The purpose of this meeting is to provide the community with an opportunity to learn about the proposed project and allow an open discussion of any views and comments concerning the proposed improvements. A question and answer (Q&A) session will immediately follow the presentation.

This project will replace the existing bridge's superstructure and conduct a comprehensive rehabilitation of its substructure to extend the structure's service life and to provide a safe crossing for the traveling public.

Right-of-way impacts are not anticipated.

Construction is expected to start spring 2029, depending on funding, right-of-way acquisition, and permits. The estimated cost is \$11 million, with 80 percent Federal funds and 20 percent State funds.
