The purpose of this meeting is to provide the community with an opportunity to learn about the proposed project and allow an open discussion of any views and comments concerning the proposed improvements. A Q&A session will immediately follow the presentation.

This project will address the poor condition of the current structure by designing a new bridge that meets all current design and load standards, improving safety for all roadway users.

Right-of-way impacts associated with the proposed improvements include partial permanent takes, drainage ROW, and permanent slope easements on a total of three properties.

Construction is expected to start in spring 2027, depending on funding, right-of-way acquisition, and permits. The estimated cost is \$4 million, with 80% federal funds and 20% state funds.

The public can submit comments and questions during two-week public comment period following meeting. Direct comments and questions by Tuesday, July 22, 2025, to DOT-FLBP@ct.gov, (860) 594-2020, or Michelle Rame at Michelle.Rame@ct.gov or (860) 594-3319.
