The purpose of this meeting is to provide the community with an opportunity to learn about the proposed project and allow an open discussion of any views and comments concerning the proposed improvements. A Q&A session will immediately follow the presentation.

If initiated, this project is anticipated to reduce the number of head-on and left/right turn angle crashes at the targeted intersection while maintaining a consistent flow of traffic.

Right-of-way impacts associated with project include several minor land acquisitions in the immediate project area due to the geometry of the proposed roundabout.

If project is initiated, construction is anticipated to begin spring 2031, based on the availability of funding, acquisition of rights of way, and approval of permit(s). The estimated construction cost for this project is approximately $7 million. Funding for this project is still to be determined.

The public can submit comments and questions during two-week public comment period following meeting. Direct comments and questions by Tuesday, December 15, 2026, to Jonathan Corilla at Jonathan.Corilla@ct.gov or 860-594-2755.
