

**CT Department of Transportation**  
**Installation of Centerline Rumble Strips on Route 10 (Main Street) in Farmington**  
**Virtual Public Information Meeting for the Town of Farmington**  
**July 29, 2025 – 7:00 p.m.**  
**Zoom Live Event**

**Report of Meeting**

**In Attendance:** There was 1 attendee in the Zoom webinar.

**Presentation:** The meeting went live at 6:55 p.m. with an informative introduction slide for attendees to view before the event began. The official start of the meeting was at 7:00 p.m. with an introduction from Connecticut Department of Transportation (CTDOT) Engineer Yi Lou, who also covered the process for how attendees could interact with the project team. Ms. Lou gave a 20-minute PowerPoint presentation, followed by a Question-and-Answer session. Natasha Fatu, Colin Baummer, Steve Bruno, Vincent Mullin and Shane McLean were also present and involved with the event on behalf of the Department.

The presentation covered the following items:

- The extents of proposed centerline rumble strips (CLRS) installation on Route 10
- The safety benefits of centerline rumble strips
- The crash history on this segment of Route 10
- The schedule and estimated Construction cost, which is \$4,500 and using 100% State funds
- Question-and-Answer session

**Comments and Questions:** The questions and responses from the Q & A session are listed below.

**1. Question:** How long will the project take?

**Response:** Once the construction crews mobilize, they can complete a 1.3-mile long segment like this in a day. Once the new pavement is installed, this will be a short process which is not anticipated to impact regular commutes or lead to any sort of major delays.

**2. Question:** Will lanes be closed during the installation of these rumble strips?

**Response:** This is a moving operation so there is very little interference with traffic. At most there should be no more than one lane closed while the other is open to maintain traffic flow.

The meeting ended at 7:30 pm when new Zoom Q&A questions stopped coming in. No email or voicemail questions were submitted during the meeting or the comment period. Attendees were reminded to fill out the survey and that the comment period would be open until August 12<sup>th</sup>, 2025, should anyone wish to submit further comments or questions to the project email or phone number.
