

Project Title: Installation & Revision of Traffic Control Signals in District 2

Permanent Project Number: 0172-0550

General Project Description: Project No. 0172-0550 will install new traffic control signal equipment, which may include span poles, mast arms, pedestals, signal heads, span wires, conduits, vehicle detectors, signing and pavement markings and will upgrade the pedestrian control features, which may include pedestrian countdown heads, sidewalk ramps and sidewalk extensions, to meet current department standards. Existing traffic signal equipment will be removed, as needed, at each intersection. Installation of traffic control signal equipment will require excavation of existing equipment as well as excavation for new foundations (span pole, mast arm, pedestal, controller cabinet, etc.) and trenching (i.e. conduit) as required. In addition to excavation for traffic signal equipment, excavation will be required for sidewalk, sidewalk ramps, and bus stop pads that will be installed or reconstructed to meet current ADA standards. In areas of an intersection where there is existing signal equipment, excavation will take place in areas that have undergone extensive ground disturbance in the past. In areas of an intersection where there is no existing signal equipment, excavation may be in areas where there may not have been extensive ground disturbance in the past. There is significantly less than one acre of disturbance for each location.

Purpose and Need Statement:

The purpose of this project is to replace the aging traffic signal infrastructure at various intersections in District 2, as needed for a state of good repair.

Traffic Control Signal – Full Replacement:
