Contents

Introduction

The Connecticut Behavioral Risk Factor Surveillance System (CT BRFSS) is an ongoing, statewide voluntary phone survey of Connecticut citizen volunteers aged 18 and over. It is funded by the Centers for Disease Control and Prevention (CDC) in all 50 states and has been implemented in Connecticut since 1989.

For the 2022 CT BRFSS, the landline sample was a disproportionate stratified random digit dial (RDD) sample, stratified by geography and listed status. Within each contacted household, one adult was randomly selected to be interviewed. The cell phone sample was also stratified RDD sample drawn from dedicated cellular telephone banks with equal probability. An adult contacted by cell phone was eligible to complete the survey if he or she lived in a private residence or college housing either without a landline present or with a landline but with at least 90 percent of all calls received by cell phone. Each month, survey data from Connecticut are sent to CDC for editing and checking. At the end of each year, data are compiled and weighted to represent the state and returned to states for analysis and use in planning and monitoring health programs. Summary data for all states are available on the CDC BRFSS website (http://www.cdc.gov/BRFSS).

In 2022, the total sample size of completed interviews for the core survey was 9,784 (land line=1,072; cell phone=8,712). Due to variability in response rates to individual questions and differences in specific sub-populations of interest for particular questions, not all estimates are based on a total sample size of 9,784. Prevalence estimates and 95% confidence intervals were computed using SAS PROC SURVEYFREQ, which can properly compute variances for complex sampling plans. Any responses of "Not Known/Not sure" or "Refused" were classified as missing.

In an effort to provide the most reliable information possible, coefficients of variation (CV), defined as the ratio of the standard deviation to the mean and serving as a measure of the dispersion of the data points around the mean, were used to assess the validity of each estimate. Prevalence estimates with a CV of between 15% and 20%, inclusive, are marked with a single asterisk (*). Prevalence estimates with a CV between 20.1% and 30%, inclusive, are marked with two asterisks (**) to indicate that caution should be exercised when interpreting these estimates. Prevalence estimates with a CV greater than 30% are suppressed due to poor validity are marked with three asterisks (***). Only comparisons between estimates with non-overlapping 95% confidence intervals should be considered significantly different.

Due to the BRFSS methodology changes that took place in 2011, the estimates provided within the following tables should only be compared to CT BRFSS estimates from 2011-2022 and not to CT BRFSS estimates from years prior to 2011.

If you have any questions regarding any of the estimates within the following tables, please contact Xi Zheng at xi.zheng@ct.gov. To access the 2022 CT BRFSS questionnaire, please visit the CT BRFSS web page at: www.ct.gov/dph/brfss.

Adult Measures

	%	95% CI	
Health Status			
Fair or poor health	14.4	13.3	15.5
Poor physical health	11.6	10.5	12.6
Poor mental health	14.5	13.3	15.6
Disability	27.0	25.6	28.5
Overweight	35.6	34.0	37.1
Obese	30.6	29.1	32.1
Insurance coverage (all ages)	93.5	92.8	94.3
Private insurance (18-64 years old)	64.6	62.8	66.3
Medicare (18-64 years old)	6.6	5.6	7.7
Medicaid or other state program (18-64 years old)	16.0	14.6	17.4
No insurance (18-64 years old)	8.4	7.4	9.4
At least one regular doctor	87.3	86.3	88.3
Skip doctor visits due to cost	9.2	8.3	10.0
Skip prescribed medicine due to the cost	6.0	5.1	6.9
Risk Behaviors			
No leisure time physical activities	23.1	21.8	24.4
Current smoker	10.0	9.0	11.0
Current E-cigarette use	5.6	4.8	6.3
Secondhand exposure to smoke	28.5	26.4	30.7
Binge drinking	15.8	14.6	17.0
Heavy drinking	6.1	5.3	6.8
Excessive drinking	17.6	16.4	18.9
Insufficient sleep (less than 7 hours)	36.5	35.0	37.9
HIV risk behaviors	5.4	4.6	6.1
Clinical Preventive Practice			
Routine Check-up in the past year	79.3	78.1	80.6
Had flu shot in the past year (all ages)	54.0	52.3	55.6
Had flu shot in the past year (65+)	76.6	74.0	79.2
Ever had a pneumonia shot (all ages)	34.9	33.3	36.6
Ever had a pneumonia shot (65+)	72.5	69.5	75.6
Ever tested for HIV	39.5	37.9	41.1
Had tetanus shot within ten years	64.6	62.9	66.2
Dental visits in the past year	73.9	72.6	75.3
Had any permanent teeth extracted	39.2	37.7	40.6
Had blood sugar test in past three years	81.6	79.7	83.5
Breast cancer screening in the past two years (women 40 and over)	76.2	73.9	78.6

Clinical Preventive Practice (Cont.)			
	%	95% CI	
Had a mammogram in the past two years (women 50-74 years old)	81.7	79.2	84.1
Had fully met the USPSTF recommendations for colorectal cancer screening (45-75 years old)	75.3	73.4	77.2
Chronic Diseases			
Current asthma	12.4	11.4	13.4
Former asthma	5.1	4.3	5.8
Chronic obstructive pulmonary disease (COPD)	5.8	5.1	6.5
Arthritis	27.0	25.7	28.3
Cardiovascular diseases or stroke	8.2	7.3	9.0
Diabetes	10.7	9.7	11.7
Pre-diabetes	11.7	10.2	13.2
Kidney disease	2.7	2.3	3.1
Depression	19.3	18.1	20.4
Other Topics			
COVID related			
Received Covid vaccination (at least one dose)	89.5	88.4	90.7
Test positive for COVID	37.7	36.1	39.3
▪ Had long COVID among those ever-tested COVID positive	17.0	15.0	18.9
Suicide Prevention			
Suicide ideation	12.6	10.9	14.3
▪ Suicide Attempt (among adults indicated ever thought of suicide)	38.2	30.7	45.7
Aware of Suicide Prevention Campaign	42.6	40.2	45.1
Special Population			
Prevalence of LGBT population	9.4	8.4	10.5
Social Determinants of Health and Health Equity			
Satisfied or very satisfied with their life	94.5	93.7	95.2
Always or usually get the social and emotional support they need	75.4	73.9	76.9
Always or usually feel socially isolated from others	9.1	8.1	10.1
Lost employment or reduced hours during the past 12 months (18-64 years old)	14.8	13.3	16.4
Received food stamps during the past 12 months	9.7	8.6	10.8
Always or usually didn't have money to get more food during the past 12 months	4.0	3.4	4.7
Had a time when they were not able to pay their mortgage, rent, or utility bills during the last 12 months	11.5	10.4	12.6
There was a time when an electric, gas, oil, or water company threatened to shut off services during the last 12 months	7.2	6.3	8.0
Other Topics			
	%	95% CI	

Lack of reliable transportation kept them from medical appointments, meetings, work, or getting things needed for daily living.	7.5	6.5	8.5
Always or usually felt stress within the last 30 days	13.1	11.8	14.3
Cognitive Decline			
Adults 45 and over experienced cognitive decline	11.4	9.6	13.1
Hepatitis Treatment			
Ever had Hepatitis C	1.6**	0.9	2.3
Ever received vaccination for Hepatitis A	29.0	26.4	31.5
Ever received vaccination for Hepatitis B	34.2	31.5	36.9

Child Measures

	%	95% CL	
Overweight (5-17 years old)	15.8	11.7	20.0
Obese (5-17 years old)	16.1	12.1	20.1
Ever breastfed	83.4	80.4	86.4
• Exclusive Breastfed for at least 3 months	70.2	66.1	74.2
• Exclusive Breastfed for at least 6 months	57.6	52.2	63.1
Excessive screen time (2-17 years old)	62.6	57.8	67.4
Drank soda or sugary drinks at least once daily (2-17 years old)	28.1	23.8	32.4
Ate fast food at least twice weekly (2-17 years old)	49.6	45.1	54.2
Visited dentist in the past year	85.0	82.5	87.6
Ever received dental sealant on permanent teeth (5-17 years old)	46.4	41.1	51.7
Had dental decay in the past 12 months	19.2	15.3	23.0
Current asthma	8.2	6.3	10.2
Former asthma	6.6	4.4	8.9

* estimates have a CV between 15% and 20%;

** estimates have a CV between 20.1% and 30%;

*** estimates were suppressed because of limited validity (CV>30%).

Fair or Poor Health

Indicator Description: Among all adults, the proportion who reported that their health, in general, was either fair or poor.

Demographics		%	95% Confidence Intervals	
	Total	14.4	13.3	15.5
Age	18-24*	13.4	9.1	17.6
