

2015-2016, New Haven - School Based Health Centers, Mental Health Services (Grades K-12)

Barnard, Hillhouse High and Mauro-Sheridan Schools

Quality of Life Result: All Connecticut children will grow up in a stable environment, safe, healthy and ready to succeed.

Contribution to the Result: School Based Health Centers provide healthcare access for school aged students, so that they are healthy and ready to learn.

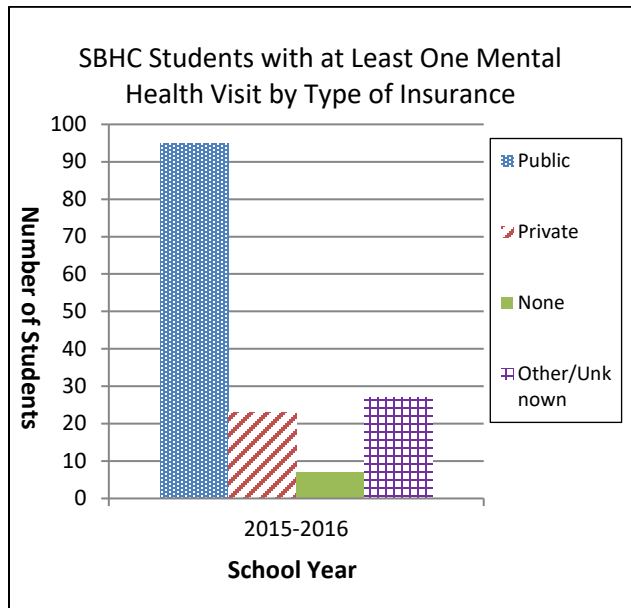

Program Expenditures	DPH SBHC Funding	Other State Funding	Federal Funding (MCHBG, ACA)	Total Other Funding (Other federal, Local, Private)	Reimbursement Generated	Total Site Funding
Actual SFY 16	\$200,000*	\$0	\$1,000**	\$0	\$165,000	\$366,000
Estimated SFY 17	\$185,000*	\$0	\$1,000**	\$0	\$195,000	\$381,000

Sponsoring Agency: Yale-New Haven Hospital

Partners: CASBHC, DPH, DSS, DMHAS, DCF, School Based Health Alliance, School Administrators and Faculty.

How Much Did We Do?

Access and Utilization

Story behind the baseline:

In 2015-2016, the total student population for all 3 schools was 2,043. The total number enrolled in the SBHC was 1,177 (57.6%). The number of students served was 153 (7.5% of the total population and 13% of those enrolled).

Of the 153 students served, 95 (62%) were publically insured, 23 (15%) were privately insured, 7 (5%) had no insurance, and 27 (18%) had other or unknown.

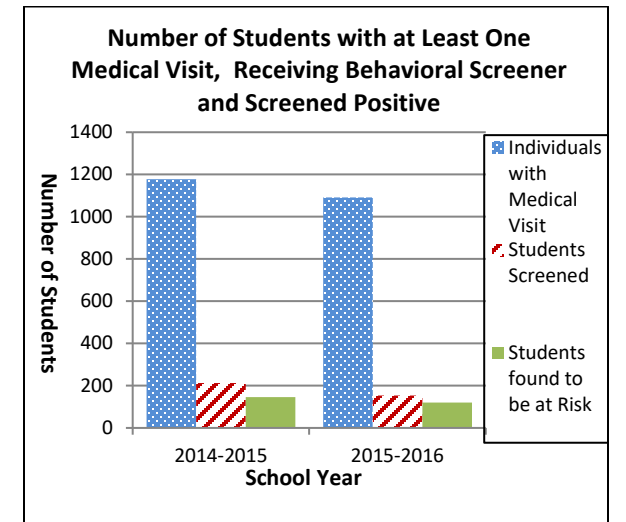

In 2015-2016, a process to request reimbursement services provided was implemented. This involved much more training and communication to secure insurance authorizations, and improved documentation of treatment plans. For students who don't have insurance we provide them with information for Husky and other financial resources as appropriate.

Students' Population, Enrollment, Mental Health Visits and Students Served at New Haven's 3 High Schools 2015-2016				
Schools	Pop	Enrolled	MH Visits	MH Served
Barnard	552	334	441	32
Hillhouse	949	475	772	65
Mauro-Sheridan	542	368	992	56
	2,043	1,177	2,205	153

How Well Did We Do?

Screen All Students for Mental/Behavioral Health Issues that received a Medical Visit.

Story behind the baseline:

Students deemed to be "at risk" are those identified by the social worker as necessitating continued intervention. Of the 1,091 students with a medical visit in the 2015-2016 school year, 153 (14%) students were screened with the behavioral health screener. Of those 120 (11%) were considered positive for risk and in need of continued care.

Is Anyone Better Off?

Students Receiving Counseling Meeting their Goals

Story behind the baseline:

Among the goals SBHC staff have for students is to maintain their healthy functioning in the community and avoid crises that escalate to ED/inpatient intervention. Of the 153 students that received counseling for 3 or more months, 141 (92%) achieved at least one goal and were successfully maintained in the community. The other 12 (8%) students required ED or inpatient evaluation and/or treatment (any cause).

Notes:

* Reflects funding provided to all of the SBHC for Medical, and Mental Health Services.

** Maternal and Child Block Grant Funds

Proposed Actions to Turn the Curve:

How Much Did We Do:

Survey the staff to assess their knowledge of the medical and mental health services available at the SBHC.

How Well Did We Do:

Provide professional development on how to complete a risk assessment.

Is Anyone Better Off:

In the upcoming year a survey and interview will be done on those students who did not attain their goal, and those that went elsewhere for counseling.

Data Development Agenda:

1. Document in EHR goals that students are trying to reach and progress.
2. Do pre and post-test screeners on all students that receive counseling.
3. Work with EHR to ensure all data can be easily exported to DPH. (Any updates made to the EHR should be written out here.)
