

2018-2019, ISAAC - School Based Health Center, Medical Services (grades 6-8)

ISAAC Middle School

Quality of Life Result: All Connecticut children will grow up in a stable environment, safe, healthy and ready to succeed.

Contribution to the Result: School Based Health Centers provide healthcare for school age students, so that they are healthy and ready to learn.

Program Expenditures	DPH SBHC Funding	Other State Funding	Federal Funding (MCHBG, ACA)	Total Other Funding (Other federal, Local, Private)	Reimbursement Generated	Total Site Funding
Actual SFY 19	\$87,333*	\$0	\$0	\$0	\$265,557	\$352,890
Estimated SFY 20	\$87,333*	\$0	\$0	\$0	\$265,557	\$352,890

Partners: Parents, Students, CASBHC, DPH, DSS, School Based Health Alliance, Board of Education, School Nurses, School Administrators and Faculty

How Much Did We Do?

Access and Utilization

(29%) had private insurance, and 22 (13%) had no insurance.

The number of publicly insured students dropped from the 2016-2017 school year to the 2018-2019 school year; however, the number of students with private insurance and without any insurance has also increased.

The decrease in visits overall is likely related to the SBHC clinic moving from the nurse's suite to the fourth floor, away from the normal school traffic. Efforts have been focused on increasing enrollments and helping uninsured students find insurance through CHC's Access to Care program.

Student Population, Enrollment, Number of Medical Visits and Number Served in ISAAC School 2018-2019				
Schools	Population	Enrolled	Medical Visits	Medical Served
ISAAC	278	252	982	163
Total	278	252	982	163

Trend: [▼]

Story behind the baseline:

In 2018-2019 the total student population for ISAAC was 278, and the total enrolled in the School Based Health Center (SBHC) was 252 (91% of population). The number of students served was 163 or 59% of the total population and 65% of enrollment. The average number of visits was 6.0 (982 visits for 163 served).

Of the 163 students utilizing the SBHC for medical visits in 2018-2019, 93 (57%) had public insurance, 48

How Well Did We Do?

Identifying Obesity in SBHC Users.

Story behind the baseline:

During the school year 2018-2019, 163 students had at least one medical visit and 163 (100%) had a BMI completed during one of these medical visits. Of those, 97 (60%) had a BMI greater than the 85 percentile. There has been a continued trend of completing a BMI for 100% of the students with at least one medical visit.

ISAAC Middle School

Is Anyone Better Off?

BMI > 85th percentile and Counseling on Nutrition and Physical Activity

Story behind the baseline:

All students with a BMI >85% are offered counseling in both nutrition and physical activity. The number of students with a BMI >85% increased to 97 students in the 2018-2019 school year, but 100% of these students received nutrition and physical activity counseling.

Trend: [◀▶]

Notes:

* Reflects funding provided to all of the SBHC for Medical and Mental Health Services.

Proposed Actions to Turn the Curve:

How Much Did We Do:

- Attend school events to increase awareness of medical and mental health services offered.
- Confirm insurance status for uninsured patients and refer to Access to Care for assistance with coverage as needed.

How Well Did We Do:

- Continue taking BMI measurements at medical visits.

Is Anyone Better Off:

- Continue providing nutrition counseling to 100% of students with BMI >85%.
- In the upcoming year, develop a pre- and post-survey for students to gain more knowledge on what clinical staff can and should be focusing their efforts on.

Data Development Agenda:

1. Continue to document on EHR actual weight loss and/or successes.
2. Work to ensure EHR data can be extracted and sent to DPH such as successes and changes to BMI.
