

# SCHOOL BASED HEALTH CENTERS (SBHCs)

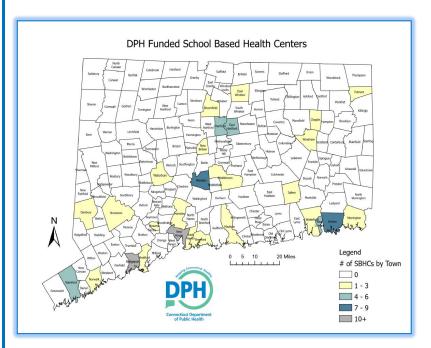

Community, Family Health, and Prevention Section - March 2023

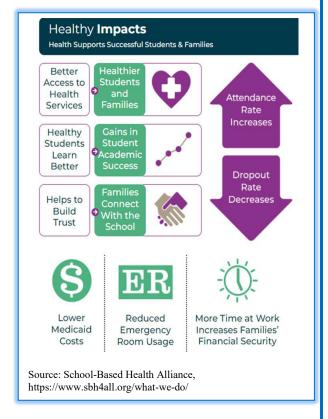

## What are School Based Health Centers (SBHCs)?

- Free standing medical clinics located within or on the grounds of schools.
- Licensed as outpatient clinics or as hospital satellites.
- Open to all enrolled in the school regardless of ability to pay/insurance status.
- Work collaboratively with schools, parents, and the community.
- Ensure that students are healthy and ready to learn.

## What are the benefits of SBHCs?

- Accessible health care where and when students need it.
- Supports students by providing a safe place to talk about sensitive issues such as depression, family problems, relationships, and substance abuse.
- Supports the *school* environment by helping children stay in school and by identifying and addressing health problems that may interfere in the learning process.
- Supports families by allowing parents to stay at work while attending to their child's routine health care needs.

## Connecticut SBHCs

- DPH currently funds 90 School Based Health programs in 27 communities statewide.
- Of those 78 (87%) are SBHCs and provide the full complement of SBHC programming (medical and mental health services). The other 12 (13%) Expanded School Health programs offer more limited services (medical or mental health services).
- SBHCs are staffed by an interdisciplinary team of professionals with expertise in child and adolescent health.
