Form CT-8801 Instructions

General Information

How is the credit for prior year minimum tax calculated? Your credit for 2003 is calculated by subtracting the part of your 2002 Connecticut alternative minimum tax that was attributable to adjustments and items of tax preferences (such as exclusion items) specified in I.R.C. §53(d) from your net Connecticut alternative minimum tax paid in 2002 and adding the result to the amount of credit carried forward from the prior year.

Exclusion items are your federal alternative minimum tax adjustments and preferences for: the standard deduction, itemized deductions (including any investment interest expense reported on federal Schedule E), the deduction for charitable contributions of appreciated property, certain tax-exempt interest, and depletion. For more information, see instructions for federal Form 8801, Credit for Prior Year Minimum Tax - Individuals, Estates, and Trusts.

How may the credit be used? You may be able to reduce your regular Connecticut income tax liability by the amount of your credit. Your credit for 2003 is limited to the amount that your regular Connecticut income tax for 2003, less the credit allowed for income tax paid to a qualifying jurisdiction(s), exceeds your Connecticut alternative minimum tax for 2003, less the credit allowed for alternative minimum tax paid to a qualifying jurisdiction(s).

What happens to the unused portion of the credit? Any unused portion of the credit may be carried forward to reduce your regular Connecticut income tax in future years. You may carry the credit forward until it is completely used. If you are entitled to any additional credit in a subsequent year, you may add that credit to any balance being carried forward from earlier years.
