Subject: Action required: Please review your clinic information in CT WiZ

DEPARTMENT OF PUBLIC HEALTH

April 19, 2023

The Department of Public Health Immunization Program has recently added a listing of all enrolled Connecticut Vaccine Providers (CVP) to [our website](#). This listing might be beneficial to the public when seeking a pediatric medical provider. The file contains information such as the clinic name, address, contact information, and onboarding status. All information used for this listing was downloaded directly from CT WiZ. Please review your clinic's listing to confirm all information is correct.

To make updates and corrections to the clinic name, address, and/or telephone number, you must [login to CT WiZ](#) and enter the information in the module. **Please take note of the telephone number listed, and update if needed to avoid any calls to personal or back lines.** If any other information is incorrect such as your organization name, reporting status, or enrollment status, submit a [help desk ticket](#) and someone will assist you.

Please review and make any necessary updates no later than May 5, 2023. We will download the data from CT WiZ once again on this date to update the current listing. Once this has been done, DPH will continue to update this list quarterly to reflect any changes or new clinics that have enrolled.
