HIT Activity 2012-to  
present

### **SIM Relationship**

HIT Advisory Council  
Specific Responses

# State Innovation Model (SIM) Relationship

- Developed and drafted HIT plan for the SIM Grant.
- Leverage existing DSS assets and existing State Medicaid HIT Plan (SMHP).
- Co-Chaired the SIM HIT Committee.
- Consensus of the HIT Committee was to not leverage key DSS asset to assess quality outcomes.

Agency Background  
HIT Activity 2012-to  
present

### SIM Relationship

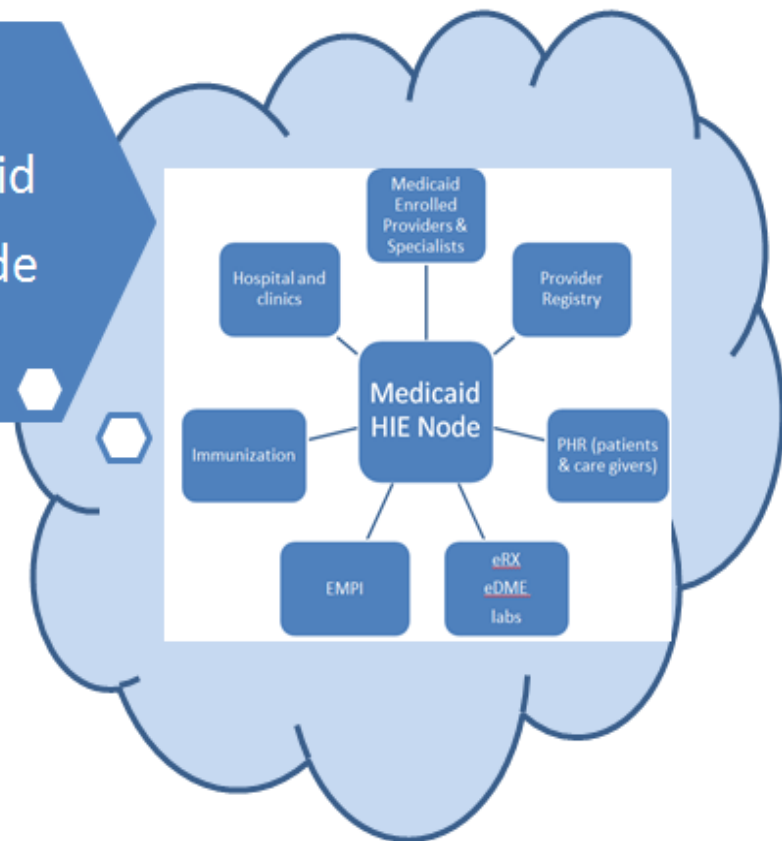

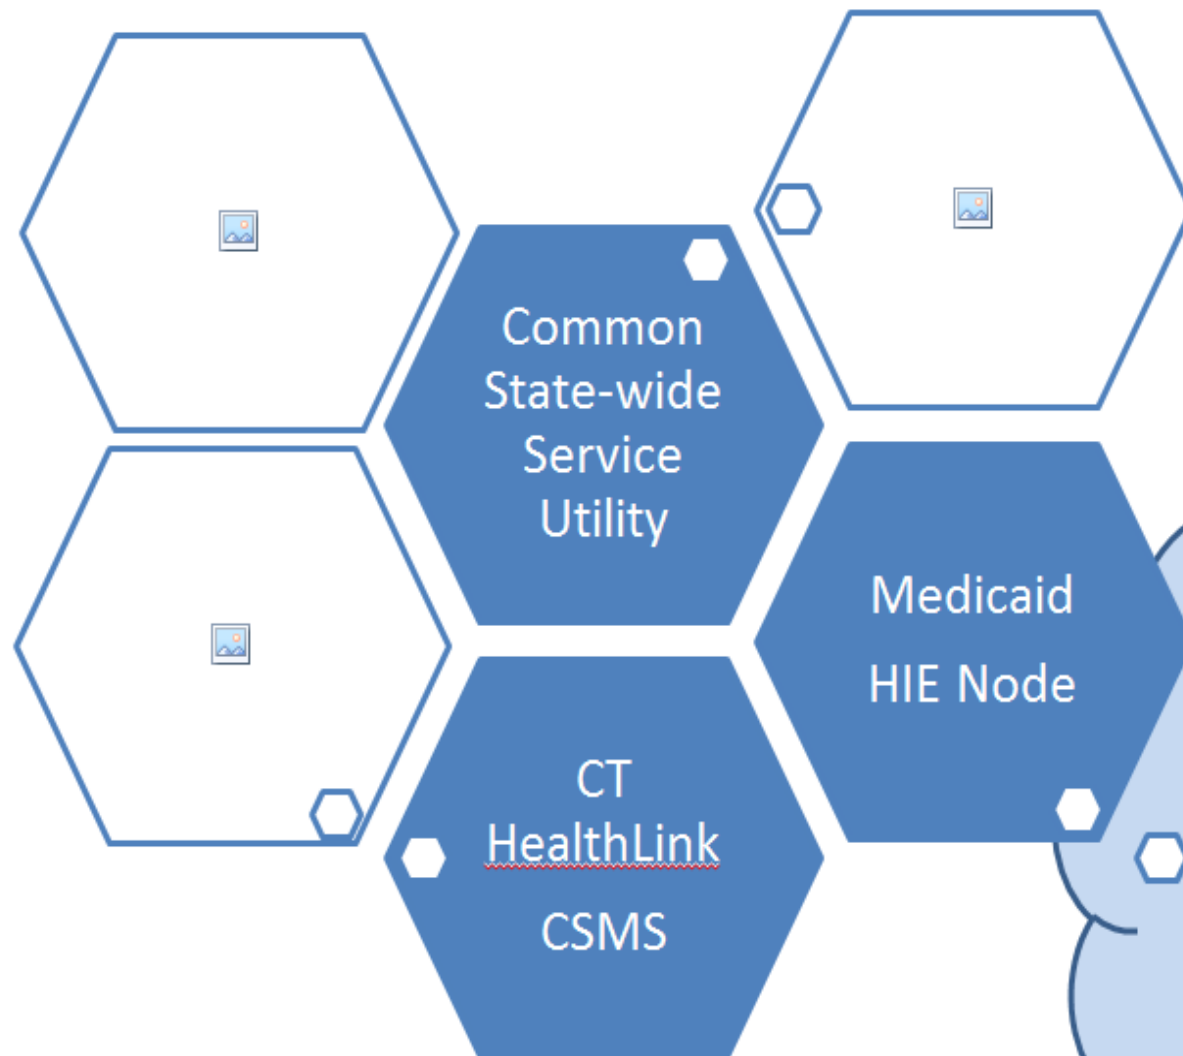

**HIT Advisory Council**  
Specific Responses

See. P.5 Executive  
Summary of HIT IAPDu

## HIT Advisory Council

- Developed out of P.A. 16-77, and later P.A. 17-2
- Delivered required HIE plan
- DSS began implementing plan as approved by OPM Secretary
- Since 2013, DSS has been enhancing its Health IT capacity (first asset the HISP was operational April 2014) many months before the Statute was changed to create HITO.
- Council expanded to incorporate SIM HIT Council / Healthcare Cabinet interests
- HITO created to coordinate efforts

# Network of Networks Framework

## DSS Response to HIT Advisory Council Questions

DSS in Context

Agency Background

HIT Activity 2012-to  
present

SIM Relationship

HIT Advisory Council  
Origin

**Specific Responses**

**Q-4**

- DSS is committed to the development, implementation and sustainability of a statewide Health Information Exchange (HIE) for Connecticut.
- DSS will have a more active and engaged role in the HIT Council in support of our commitment to shared vision.

present

SIM Relationship

HIT Advisory Council  
Origin

### Specific Responses

#### Q-3

See. P.5 Executive  
Summary of HIT IAPDu

The DSS node constitutes all of the components of a health information exchange. A node developed in support of enhanced service outcomes for Medicaid members. No intent to market or deploy the node in competition to a statewide HIE.

The DSS node was developed with CMS funding. All components reside in the State Data Center, and can be leveraged by statewide HIE as appropriate.

## DSS Response to HIT Advisory Council Questions

### DSS in Context

Agency Background  
HIT Activity 2012-to  
present

### SIM Relationship

HIT Advisory Council  
Origin

### Specific Responses

**Q-5**

**Q-6**

- DSS intends to utilize the statewide HIE when it becomes available and is financially sustainable. For example, it is through the HIE utility that we intend to obtain Immunization Registry for Medicaid members rather than building a parallel registry.
- Most of the technology build was accomplished with 90% CMS/Medicaid funding. As the single state Medicaid agency, all requests for such funding must be requested by DSS on behalf of our partners.

## DSS Response to HIT Advisory Council Questions

DSS in Context

Agency Background

HIT Activity 2012-to  
present

SIM Relationship

HIT Advisory Council  
Origin

### Specific Responses

**Q- 2.1**

**Q- 2.2**

It is DSS's goal to minimize provider burden. All components are standards based. DSS will be able to communicate bi-directionally with the Statewide HIE or any other source of data

All of the assets discussed last month are hosted in the State Datacenter and are secure.

## DSS Response to HIT Advisory Council Questions

### DSS in Context

Agency Background  
HIT Activity 2012-to  
present

### SIM Relationship

HIT Advisory Council  
Origin

### Specific Responses

**Q- 2.3**

**Q- 2.4**

**Q- 2.5**

DSS welcomes the participation of the statewide HIE in the prioritization of future requirements. These efforts will have to cost allocated per federal rules.

We suggest the creation of a work group to address this concern, once a decision has been made about the detailed design of the statewide HIE as to which components of the DSS node will be leveraged for statewide HIE use cases.

## DSS Response to HIT Advisory Council Questions

### DSS in Context

Agency Background  
HIT Activity 2012-to  
present

### SIM Relationship

HIT Advisory Council  
Origin

### Specific Responses

### Q-7

- DSS does not have a communication plan to engage the provider community. However, the Medicaid program maintains ongoing relationships with Medicaid consumers and the provider community through our Medical ASO – CHNCT, BH ASO – Beacon, Dental ASO – Benecare, and LTSS work - Allied.
- Further, MAPOC provides multi-stakeholder engagement and legislative oversight for the Medicaid program.

## DSS Response to HIT Advisory Council Questions

present

SIM Relationship

HIT Advisory Council  
Origin

**Specific Responses**

**Q-8**

Depending upon the use case, and the HIE component, some Community providers have begun using the technology.

The largest uptake of Project Notify is within the behavioral health sector.

## DSS Response to HIT Advisory Council Questions

DSS in Context

Agency Background

HIT Activity 2012-to  
present

SIM Relationship

HIT Advisory Council  
Origin

**Specific Responses**

**Q-9.1**

The HITECH Act required states to develop a State Medicaid HIT Plan (SMHP) as a pre-requisite to making EHR incentive programs. DSS created the original plan in 2011. As required by CMS we have been updating this plan annually. This planning effort is CMS funded and will end in 2021.

## DSS Response to HIT Advisory Council Questions

DSS in Context

Agency Background

present

SIM Relationship

HIT Advisory Council  
Origin

### **Specific Responses**

**Q-9.2**

**Q-9.3**

**Q-9.4**

The annual update of the SMHP is scheduled to be submitted before the end of the month for Council review and comment.

The SMHP addendum submitted to CMS jointly by DSS and the HITO on 5/10/18 addresses the intersection.

The DSS node is standards based and can consume data from other sources in many formats.
