---

# Welcome and Call to Order

# Public Comment

(2 minutes per commenter)

# Review and Approval of:

December 19, 2019 Meeting Minutes

# Update on the Consent Design Group

## Guiding Principles

*Michael Matthews, CedarBridge Group*

# Follow Up from December Meeting

- Consistent with Guiding Principle 8, a consent management solution will be developed and implemented, enabling patients to express their consent preferences consistent with each use case policy.
- Given that a final, comprehensive consent management solution has not been developed or selected at this time, capabilities will be commenced at this time to permit sharing of information among and between patients and providers, for which patients will have the opportunity to opt-out of having their data shared across the HIA platform. This option will be binary (i.e., all data in or all out).
- As functionality for sharing among a wider group of participating entities and use cases expands (e.g., research, health policy, etc.), patients will be afforded an opportunity to modify their degree of participation.
- Consistent with Guiding Principles 2, 3, and 6, information shall be made widely available to patients, providers and other stakeholders about the opportunity for patients to opt-out of data being exchanged across the HIE during this interim time period until the consent management solution is in place.

# Review of the Health Information Alliance, Inc. Milestones
