#### **Section 1 - Executive Summary**

The Office of Health Strategy ("OHS") was created in 2017 as a bipartisan effort of the Connecticut General Assembly to advance high-quality, affordable, and accessible healthcare for all residents. Connecticut General Statutes Section (CGS §) 19a-754a. The legislation re-organized existing state resources into one body, uniting health policymaking and advancing healthcare reform initiatives that will drive down healthcare costs, close Connecticut's deeply entrenched racial, economic, and gender health disparities, and undertake technology-driven modernization efforts throughout the system.

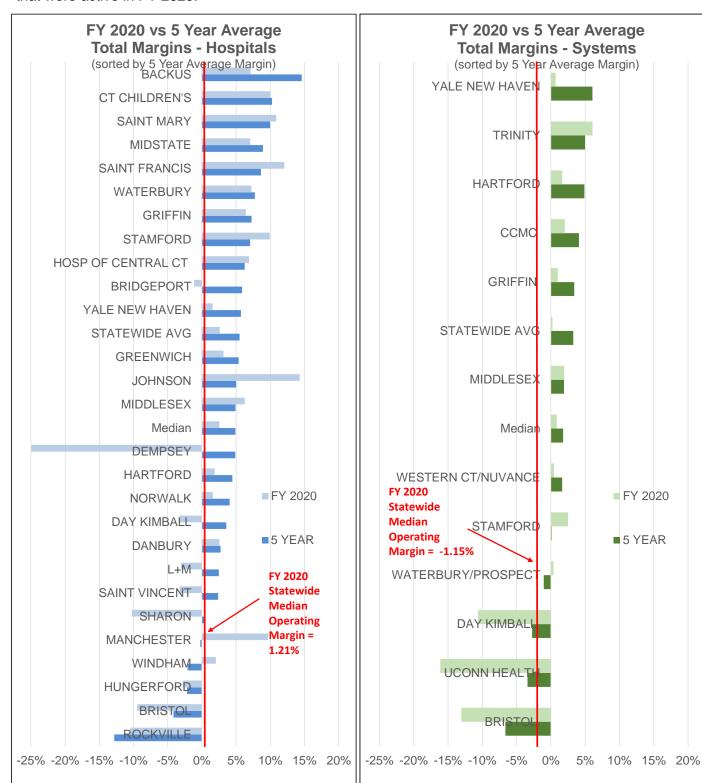

The mission of the Office of Health Strategy is to implement comprehensive, data driven strategies that promote equal access to high-quality health care, control costs, and ensure better health outcomes for all Connecticut residents. OHS is responsible for the collection, analysis, and dissemination of acute care hospital financial information. This report provides information related to the financial stability of Connecticut's acute care hospitals, as mandated by CGS § 19a-670. The report highlights Connecticut's statewide hospital trends and includes individual hospital profiles of financial performance. It is intended to provide information that will enhance knowledge of the financial status of Connecticut's hospitals.

The report identifies the following key findings and trends:

- In Federal Fiscal Year ("FY") 2020, the statewide total gain from patient care and related sources (or operating revenue) for Connecticut ("CT") hospitals was \$40.9 million, a decrease of 93% from the previous year.
- Hospitals statewide earned \$324.6 million from sources unrelated to patient care, (or non-operating revenue) such as revenue from investments, unrealized gains on investment holdings, and gains from affiliates or joint ventures. This was a 393% increase from the \$65.8 million earned in FY 2019, due in part to increases in the financial markets.
- Sixty-seven percent of hospitals (18 of 27) achieved a positive total margin which includes gains from patient care and non-operating revenues.
- The statewide total margin was 2.61% in FY 2020, a drop from the statewide total margin of 5.17% in the previous year. The five-year average total margin was 5.51%.
- Five hospitals had negative five-year average total margins in the FY 2016 to FY 2020 period;
   two fewer hospitals than in the FY 2015 to FY 2019 period.
- Total hospital net assets increased by \$428 million to \$7.67 billion in FY 2020, while stockholder equity increased by \$32 million to \$123 million.
- Statewide hospital uncompensated care charges totaled \$774 million in FY 2020, a \$32 million or 3.9% decrease from the prior year.
- Bad debts accounted for 52% of uncompensated care charges in FY 2020 while charity care accounted for 48%; virtually the same as FY 2019.

#### **Executive Summary**

Noted below is a chart depicting both the FY 2020 total margin and five-year total margin for all the hospitals. The chart is also provided in the Financial Analysis section of this report on page 11. The second chart demonstrates the FY 2020 total margin and five-year total margins for the health systems that were active in FY 2020.

#### Section 2 - Financial Analysis

#### Introduction

Connecticut state statutes and regulations¹ require each short-term acute care general or children's hospital, whether structured as for-profit, not-for-profit, or state-owned, to submit financial and statistical information to OHS annually based on the previous federal fiscal year (October 1st through September 30th). Hospital audited financial statements, which include balance sheet and statement of operations information, are a primary verifying source of information in this report. OHS also uses data and information filed each year by hospitals in their Annual Report and Twelve-Month Actual submissions, such as utilization statistics, uncompensated care data, and legal charts of corporate structure. Many of the filings noted here are available in the <a href="Hospital-Reporting-System Portal">Hospital-Reporting-System Portal</a> which can be accessed from the OHS website.

The report highlights Connecticut's statewide hospital trends, includes individual hospital profiles and hospital system profiles of financial performance, and is intended to provide information that will enhance knowledge of the financial status of Connecticut's hospitals. While there are numerous financial and operating indicators that provide a means to measure hospital performance, this report focuses primarily on measures involving profitability, cost data, liquidity, solvency, net assets, discharges by payer, and uncompensated care, which are considered strong indicators of the hospitals' financial and operating strength.<sup>2</sup>

Readers should note that when filing the FY 2020 data,<sup>3</sup> some FY 2019 financial and statistical data elements reported in a previous filing year may have been revised or restated by the hospitals during the FY 2020 filing process. This updated information is included in this publication to improve reporting accuracy and comparability between FY 2019 and FY 2020 data.

OHS presents key findings related to the hospital and hospital system financial performance for FY 2020 by the following categories:

- Individual Hospital Financial Performance
- Five-Year Financial Performance
- Uncompensated Care
- Health System Financial Performance

<sup>1</sup> C.G.S, Sections 19a-644 and 19a-676, and Section 19a-643-206 of the Regulations of Connecticut state agencies.

<sup>&</sup>lt;sup>2</sup> OHS used OPTUM's *Almanac of Hospital Financial & Operating Indicators, A Comprehensive Benchmark of the Nation's Hospitals*, as a source for calculating most financial ratios.

<sup>&</sup>lt;sup>3</sup> For the purpose of filing fiscal year end results with OHS, Connecticut's acute care hospitals operate on the federal fiscal year. FY 2020 began on October 1, 2019 and ended on September 30, 2020.

#### **Individual Hospital Financial Performance**

**Table 1** shows a summary of statewide hospital revenues and expenses over the last four fiscal years. Details by hospital can be found in Appendix H. Key findings are listed below.

#### Revenues & Expenses

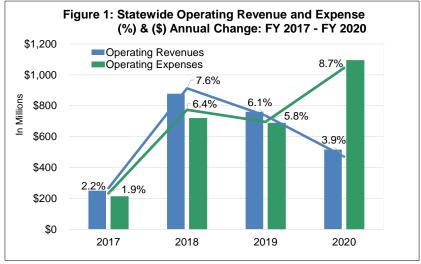

- Statewide Net Patient Revenue ("NPR") was approximately \$11.9 billion and accounted for 87% of operating revenues.
- NPR decreased by 3.8% (\$474 million) over the previous year due to lower patient activity due to COVID-19 (**Figure 4**).
- Operating expenses rose 8.7% to \$13.6 billion from the previous year due to increases in salaries and wages (6%), fringe benefits (22%), and other operating expenses (12%).
- Half (50%) of statewide hospital net revenue continued to be generated from the governmental payers: Medicare, Medicaid, CHAMPUS/TRICARE, and other Medical Assistance though the percentage of governmental payments vary by institution.
- Other operating revenue (grants, parking fees, cafeteria) increased by 133% (\$991 million) due mostly to provider relief funds.
- Non-operating revenue increased 393% due in part to increases in the financial markets.

Table 1

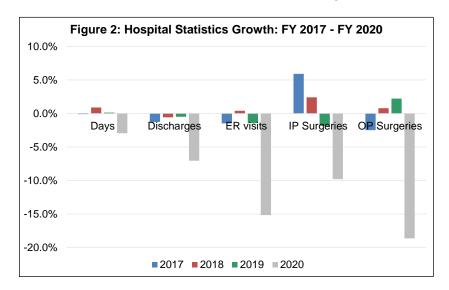

STATEWIDE HOSPITALS STATEMENT OF OPERATIONS DATA	2017	2018	2019	2020
Net Patient Revenue	\$10,881,006,478	\$11,691,395,084	\$12,427,166,410	\$11,952,887,384
Other Operating Revenue	\$653,745,437	\$721,173,652	\$746,676,374	\$1,737,522,612
Total Operating Revenue	\$11,534,751,915	\$12,412,568,736	\$13,173,842,784	\$13,690,409,996
Total Operating Expenses	\$11,148,783,536	\$11,867,696,569	\$12,555,673,515	\$13,649,521,583
Income/(Loss) from Operations	\$385,968,379	\$544,872,167	\$618,169,269	\$40,888,414
Non-Operating Revenue	\$459,624,212	\$202,563,812	\$65,780,309	\$324,609,990
Excess/(Deficiency) of Revenue over Expenses	\$845,592,591	\$747,435,979	\$683,949,578	\$365,498,404

Source: Hospital Audited Financial Statements

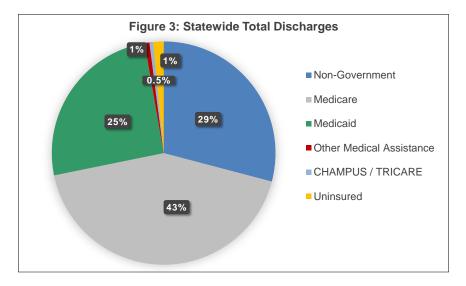

**Figure 1** shows the growth in statewide hospital total operating revenues and expenses from FY 2017 to FY 2020. FY 2020 was the only year in the period where growth in operating expenses exceeded the growth in operating revenues.

**Figure 2** shows the growth trends for hospital patient days, discharges, emergency room (ER) visits, and surgeries in the hospital setting, (excluding hospital-owned outpatient surgical facilities) for FY 2017 to FY 2020. Statewide amounts for all categories declined in FY 2020.

A summary of statewide discharges by payer type is presented in **Figure 3**. The majority of discharges (69%) were covered by government sponsored health plans (Medicare, Medicaid, Other Medical Assistance, and CHAMPUS/TRICARE). Non-government payers include commercial payers and self-funded employer health plans.

Appendix Q of this report provides further hospital utilization statistics for FY 2020. For more detailed utilization data, refer to the publication entitled <u>Facilities and Services Plan 2020 Supplement</u> released by OHS in September 2020, which contains a comprehensive look at the utilization of services in Connecticut's acute care hospitals.

Figure 4 shows the sources of statewide hospital revenues in FY 2020 by major payer categories.

- Non-government and Medicare payments each decreased by over \$100 million or more statewide with the larger decrease in non-government (\$340 million) followed by Medicare (\$155 million).
- Medicaid payments decreased less than 1%, proportionally less than any of the other major payers. The increase was due to improved payments to most hospitals (see Appendix M for more details).<sup>4</sup>

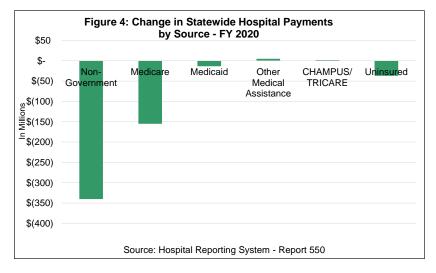

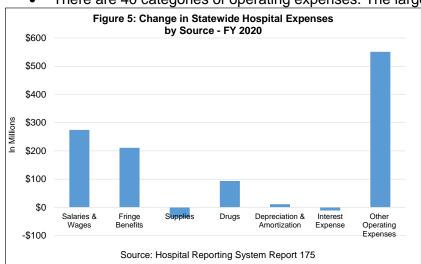

Figure 5 shows the sources of changes in hospital operating expenses in FY 2020.

- Total expenses increased by \$1.1 billion.
- The majority of the \$1.1 billion increase came from the categories other operating expenses (50%), salaries and wages (25%), fringe benefits (19%), and drugs (9%).
- Other Operating Expenses totaled \$5.0 billion. The largest expense increases were for corporate parent / system fees (\$297 million), professional / physician fees (\$56 million), medical purchased services (\$48 million) and non-medical purchased services (\$36 million).

There are 40 categories of operating expenses. The largest categories are contract labor

(\$1 billion), corporate parent/system fees (\$1.5 billion), purchased services (\$686 million), and general miscellaneous expense (\$471 million) which together account for 73% of the \$5 billion "Other Operating Expense" amount.

<sup>&</sup>lt;sup>4</sup> As part of Governor Lamont's 2019 settlement agreement with hospitals, beginning in fiscal year 2020, Medicaid rates for most hospital services will rise by approximately 2% annually for seven years, supplemental payments will increase, hospital user fees will decrease and certain one-time Medicaid payments will be issued this fiscal year.

Detailed hospital statements of operations, margin data, and various liquidity and solvency ratios are provided in Appendices H, I, N, and O.

#### Operating Gain/Loss

- Statewide operating margin or gains from patient care and related sources dropped to .30% from 4.7% in FY 2019.
- Statewide gains from operations decreased by 93.4% to \$40.9 million from \$618.2 million in FY 2019 due to decreased utilization because of the COVID-19 pandemic. (Figure 2 and Figure 4), and despite an almost \$1 billion increase in other operating revenues.
- Despite the statewide drop in gains from operations, sixteen hospitals reported positive operating margins; there were 22 in the previous year.
- Total operating margins ranged from a high of 13.3% at Johnson to a low of -36.1% at Dempsey.
- St. Francis earned the most (\$92.4 million) followed by Stamford (\$62.7 million), while the biggest losses were experienced by Dempsey (-\$167.7 million) and Yale-New Haven (-\$59.1 million).
- Hospitals that improved the most financially from FY 2019 were Manchester (1.7% to 10.1%) and Griffin (4.0% to 7.3%), while margins dropped the most at Dempsey (-17.2% to -36.1%) and St. Vincent's (7.2% to -3.2%).

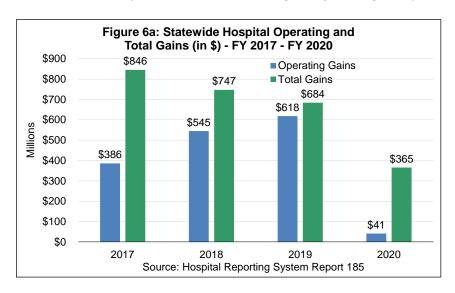

#### Non-Operating Revenue

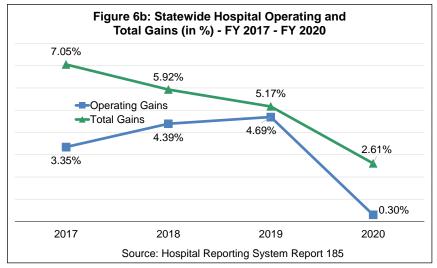

- Non-operating revenue, or revenue from sources unrelated to patient care such as investment revenues and gains from affiliates or joint ventures, increased by 393% to \$324.6 million from \$65.8 million in FY 2019 due in part to gains in the financial markets.
- Yale-New Haven reported the largest amount (\$113 million) of non-operating revenue followed by Dempsey (\$41.5 million).
- Eight hospitals (Bristol, Day Kimball, Griffin, Manchester, Rockville, St. Vincent's, Sharon, and Waterbury) had negative non-operating revenue ranging from -\$8,000 (Sharon) to -\$19.7 million (Bristol). Nine hospitals had negative non-operating revenue in FY 2019.
- Non-operating revenue for Dempsey primarily represents transfers from the University of Connecticut Health Center for personnel costs and operational support, while Bristol's was the result of a \$20.7 million adjustment to settle pension obligations.

#### Total Gain/Loss

- Statewide total margin, that is operating gains/losses and non-operating revenue, dropped to 2.6% from 5.2% in the previous year, due primarily to a statewide (**Table 1**) rising operating expenses.
- Total revenue in excess of expenses statewide decreased 46.6% to \$365.5 million from \$684 million in FY 2019.
- Eighteen hospitals reported positive total margins; there were 20 in the previous year.
- Total margins ranged from a high of 14.3% at Johnson to a low of -25% at Dempsey.
- St. Francis had the highest gain (\$114.1 million) followed by Stamford (\$65.2 million), while Dempsey (-\$126.2 million) and St. Vincent's (-\$12.7 million) had the most significant losses.
- Hospitals that were most financially improved in total margin were Manchester (-5.1% to 9.7%) and Rockville (-17.7% to -10.5%), while margins dropped the most at Dempsey (-11.7% to -25%) and St. Vincent's (7.2% to -3.3%).

**Figures 6a** and **6b** show trends in dollars (\$) and percentages (%) for statewide hospital operating and total gains for FY 2017 to FY 2020. Operating gains had been steadily increasing since FY 2017 due to increases in utilization, higher case mix indices, and improved payments to hospitals from private and Medicaid providers but decreased substantially in FY 2020 due to the COVID-19 epidemic which caused a higher proportion of operating expenses versus operating gains than in previous years. Total statewide gains (which includes non-operating revenue) have been steadily declining over the same time frame, though this trend does not hold for all hospitals. (For information on hospital/health system performance, please see "Hospital System Performance" beginning on page 14.)

#### **Five Year Financial Performance**

**Table 2** and **Figure 7** provide FY 2020 and five-year average total margins for Connecticut's acute care hospitals. Key findings are listed below.

#### **Positive Margins**

- Most (22) hospitals achieved positive five-year average total margins.
- Twelve hospitals sustained positive total margins in each of the five years, while eight additional hospitals had positive total margins in four of the five years. For the twelve:
  - The majority (9) had a five-year average margin that exceeded the statewide average of 5.51%.
  - All were medium to large hospitals with each having over 156 licensed beds and over 5,500 discharges in FY 2020. Eight of the hospitals had over 10,000 discharges.

#### **Negative Margins**

- Five hospitals (Bristol, Hungerford, Manchester, Rockville, and Windham) had negative fiveyear average total margins over the period FY 2016 to FY 2020. All had a negative five-year total margin last year.
- Rockville had negative total margins in all five years while Bristol, Hungerford, and Sharon had a negative margin in four of the five years.
- Nine hospitals had a negative total margin in FY 2020, the highest number in any of the 5 years.
- With the exception of Manchester, the other eight hospitals were small, based on bed size (below 154), and inherently had the fewest amounts of patient days (<28k), discharges (<6k), and ED visits (<29k) of all hospitals in FY 2020.

#### Margin Changes

- Eleven hospitals reported improved total margins in FY 2020.
- Four hospitals (Bristol, Manchester, Rockville, and Stamford) improved their total margins by three percentage points or more in FY 2020.
- All 27 hospitals reported increases in other operating revenue, and 23 also reported increases in non-operating revenue that helped to offset operating revenue losses from the pandemic; there were 16 hospitals with lower total margins in FY 2020 than in FY 2019.

Median (Note B)	4.9%	5.3%	6.0%	4.7%	5.6%	2.6%		

Note A: Weighted average by dollar amounts. Revenue in excess of expenses/(revenue from operations+(revenue in excess of expenses - gain/loss from operations))

Note B: Middle margin in numerical order.

Note C: Sharon's FY 2016 total margin is due to a one time accounting adjustment to their audited financial statements.

Note D: Dempsey FY 2016 total margin was due to state appropriations and transfers from UCONN Health.

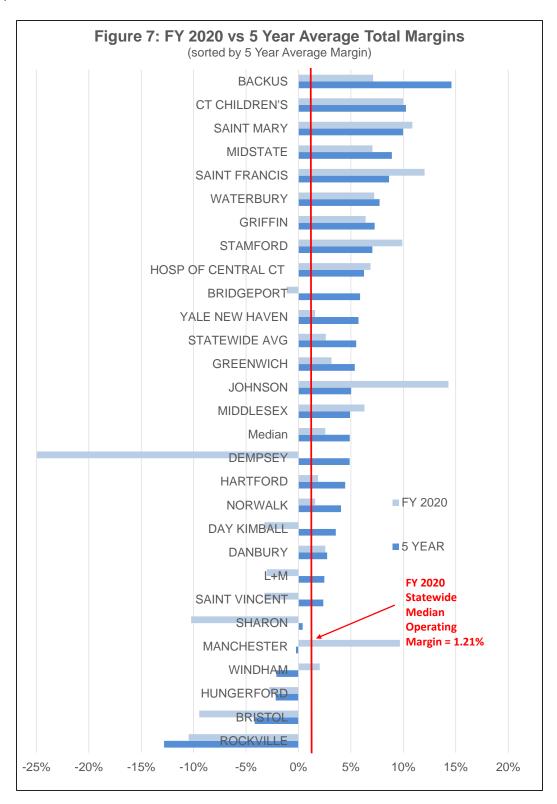

Note E: Sharon's FY 2017 total margin was the result of a one time accounting adjustment for the affilation with HealthQuest.

Note F: Middlesex Hospital's FY 2018 total margin was the result of a one time adjustment for the settlement of pensions.

Note F: Bristol Hospital's FY 2019 and FY 2020 total margin was the result of adjustments for the settlement of pensions.

Note G: The former Milford Hospital is presented for historical information only.

**Figure 7** shows the five-year average total margins for hospitals along with the FY 2020 total margin for each hospital.

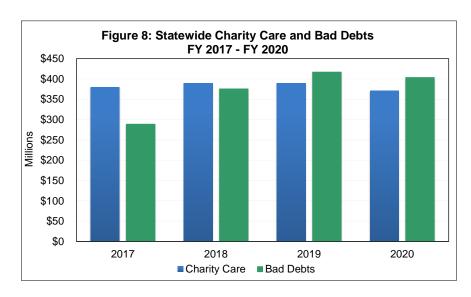

#### **Uncompensated Care**

Uncompensated Care (UC) is the sum of charity care (free care) and bad debt (unpaid charges). **Figure 8** shows the statewide trend for total charity care and bad debt charges over the last four years. Key findings are listed below.

- The majority of hospitals (15) experienced increases in UC, while 12 hospitals experienced decreases.
- Statewide hospital UC decreased by \$31.7 million (or 3.9%) to \$774.3 million in FY 2020. More than half (59%) of hospitals experienced decreases in FY 2020.
- Total statewide bad debt decreased by \$13.4 million (or 3.2%) to \$403.8 million.
- Total statewide charity care decreased by \$18.3 million (or 4.6%) to \$370.6 million<sup>5</sup>.
- Bad debt as a percentage of total hospital UC charges increased slightly from 51.8% last year to 52.1% in FY 2020.
- Conversely, charity care as a percentage of total UC charges decreased slightly from 48.2% in the prior year to 47.9% in FY 2020.
- More than half of the hospitals (18) experienced a decrease in the amount of charity care provided to patients.
- Bad debts decreased at 15 hospitals (56%) in FY 2020<sup>6</sup>. Midstate (170%) and Hartford (357%) experienced the largest increases, while Dempsey (-139%) and Rockville (-64%) experienced the biggest decreases.
- Statewide UC totaled \$255.3 million, an increase of \$11.6 million (or 4.8%), from FY 2019.
- Statewide UC continued to account for about 2.0% of total statewide hospital expenses in FY 2020.

Appendix P of this report provides the trends for hospitals' uncompensated care data for FY 2017 to FY 2020.

<sup>6</sup> Some hospitals had adjustments or changes in methodology for estimating charity care and bad debts between FY 2017 and FY 2018.

<sup>&</sup>lt;sup>5</sup> Based on documents filed by hospitals as part of their Twelve-Month Filings.

#### **Health System Financial Performance**

Hospital corporate systems include hospital parent corporations and all subsidiaries. Appendix Z provides information on the composition of all health systems<sup>7</sup> in Connecticut. **Table 3** shows a summary of statewide health system revenues and expenses over the last four years. Detail by health system can be found in Appendix A. Key findings are listed below.

#### Revenues & Expenses

- Statewide net patient revenue (NPR) was approximately \$13.6 billion and accounted for 85% of operating revenues.
- NPR decreased by 3.80% (\$540 million) over the previous year.
- Other operating revenues rose 92% (\$1.1 billion) due provider relief funds (Table 4).8
- Operating expenses rose 8.2% to \$16.5 billion from the previous year.
- Non-operating revenue rose by 90% due in part to strong financial markets.

Table 3

STATEWIDE HEALTH SYSTEM STATEMENT OF OPERATIONS DATA	2017	2018	2019	2020
Net Patient Revenue	\$12,399,668,156	\$13,357,943,369	\$14,162,269,812	\$13,622,763,109
Other Operating Revenue	\$1,023,766,449	\$1,089,573,682	\$1,205,964,177	\$2,312,391,425
Total Operating Revenue	\$13,423,434,605	\$14,447,517,051	\$15,368,233,989	\$15,935,154,534
Total Operating Expenses	\$13,652,591,596	\$14,497,435,185	\$15,241,840,749	\$16,487,515,506
Income/(Loss) from Operations	(\$229,156,991)	(\$49,918,134)	\$126,393,240	(\$552,360,972)

#### Operating Gain/Loss

Statewide operating margins were negative in FY 2020, dropping to -3.47% from .82% in FY 2019

- Operating losses totaled \$552.4 million, a significant change from the \$126.4 million gain in the previous year due mostly to large changes at UCONN Health Center (-\$332.8 million to -\$505.4 million) and Yale-New Haven Health Services (\$226.5 million to -\$98.3 million).
- Five of 12 systems (42%) reported positive operating margins; there were six in the previous year.
- Systems reported receiving over \$1 billion in pandemic relief funds with the largest amounts going to Hartford Healthcare (\$211 million) and Yale New Haven Health Services (\$325 million).
- Total operating margins ranged from a high of 4.2% at Trinity Health of New England to a low of -64.5% at UCONN Health Center.
- Trinity Health of New England had the largest operating gain (\$66 million), followed by Hartford HealthCare (\$12.1 million); while the biggest losses were at UCONN Health Center (-\$505.4 million) and Yale-New Haven Health Services (-\$98.3 million).
- Systems that improved the most financially were Bristol Hospital and Healthcare Group (-5.5% to -1.71%) and Prospect (-1.5% to 2.1%), while margins dropped the most at UCONN Health Center (-41.4% to -64.5%) and Day Kimball Healthcare (.41% to -8.9%).

<sup>&</sup>lt;sup>7</sup> There were 12 active health systems reporting data in FY 2020, compared with 15 at the end of FY 2019. St. Vincent's Medical Center became part of Hartford Healthcare, Milford Health and Medical was consolidated into Bridgeport Hospital, and Western CT Health Network and Vassar Health Connecticut reported consolidated amounts as part of Nuvance Health.

<sup>&</sup>lt;sup>8</sup> Based on amounts provided in health system audited financial statements provided by hospitals.

<sup>&</sup>lt;sup>9</sup> Loss is due to the reported high costs associated with teaching and patient services.

#### Non-Operating Revenue

- Non-operating revenue increased by 90% to \$590 million from \$310 million in FY 2019.
- Eight systems had positive non-operating revenue amounts in FY 2020; compared to ten in the previous year.
- UCONN Health Center (\$326.3 million) and Yale New Haven Health Services (\$134.8 million), had the largest non-operating revenue amounts.
- Some notable amounts that affected statewide totals were as follows: UCONN Health Center received \$319 million in state appropriations and COVID relief revenue. Bristol Hospital and Health Care Group included a \$21.7 million charge for the settlement of pensions.

#### Total Gain/Loss

- Total margin statewide dropped to .23% from 2.78% in the previous year.
- Total revenues in excess of expenses decreased by 91% to \$37.6 million, from the previous year's \$436.2 million.
- Nine systems reported positive total margins; one more than in the previous year.
- Total margins ranged from a high of 6.0% at Trinity Health of New England to a low of -16.1% at UCONN Health Center.
- Trinity Health of New England had the highest gains (\$96.7 million) followed by Hartford HealthCare (\$72.2 million). The biggest system losses were at UCONN Health Center (-\$179.1 million) and Bristol Hospital and Health Care Group (-\$23.6 million).
- Systems that improved the most financially were Bristol Hospital and Health Care Group (-18% to -13%) and Prospect (-3.3% to .4%), while margins dropped the most at Day Kimball Healthcare (.02% to -10.6%) and UCONN Health Center (-6.1% to -16.1%).

**Table 4** below, shows amounts reported for pandemic relief grants that were reported as part of other operating revenue. Health systems and their related entities also received advanced payments from the

federal government for Medicare patients and were allowed payroll tax deferrals to help them through the COVID pandemic.

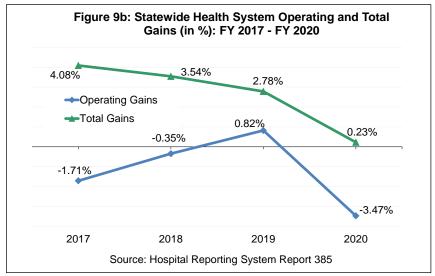

Detailed health system statement of operations, margin data, and various liquidity and solvency ratios are provided in Appendices A, B, F, and G.

<sup>&</sup>lt;sup>1</sup> Amount includes New York Hospitals.

<sup>&</sup>lt;sup>2</sup> UCONN recorded the amount in non-operating revenue. Source: Health Sysetm Audited Financial Statements

**Figures 9a and 9b** show the trends for statewide health system operating and total gains and margins for FY 2017 to FY 2020. Health Systems operating gains and total gains, which includes gains from hospitals, declined significantly in FY 2020 because of the COVID-19 pandemic. See **Figure 10** for the sources of gains and losses.

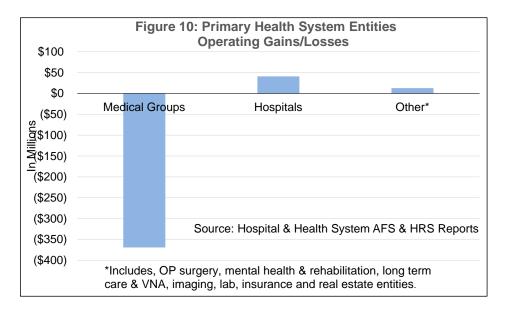

#### **Health System Affiliates and Subsidiaries**

Hospital systems include hospitals, hospital subsidiaries, and other related affiliates. **Figure 10** summarizes operating gains and losses for different types of health system entities. Additional revenue and expense data related to health systems, hospitals, and other related affiliates can be found in Appendix W. Key findings are listed below.

- Hospital operating revenues accounted for the majority (86%) of total health system operating revenues.
- System subsidiaries such as medical groups and physician practices, insurance companies, imaging and rehabilitation centers, visiting nurse associations, and real estate companies account for the remaining 14% of operating revenues.
- Medical groups and physician practice affiliates account for significant health system losses but may also serve as a referral source for hospital-based services.
- Affiliates that had a minimal direct impact on operating gains include those that specialize in providing insurance, imaging, outpatient surgeries, mental health and rehabilitation, long term care and visiting nurse associations, real estate, and lab services.

#### **New Hospital Affiliation Activity**

Since the last publication of this report in September 2020, no additional affiliation activity has occurred in Connecticut.

A complete list of the Connecticut acute care hospitals that operate within larger systems and unaffiliated hospitals is provided in Appendix Y.

#### Section 3 - Hospital and Health System Data

The following sections provide an aggregate statewide profile of hospital parent corporations and hospital summary totals for financial and statistical indicators. In addition, profiles are presented for individual Connecticut acute care hospitals. The final section of this report contains detailed appendices by hospital and parent corporation as identified in the table of contents. Unless otherwise indicated, the sources of data used in these sections are the OHS Hospital Reporting System ("HRS") and the hospitals' annual filings to OHS.

In the following pages, financial measures noted in green are favorable compared to the statewide average while financial measures noted in red are unfavorable compared to the statewide average. In some cases, the 2020 amount and the statewide average show the same amount. The red and green formatting is based on additional decimal spaces that are not shown.

### **Statewide Health System Summary**

Reported below is the total Statewide Health System statement of operations summary for FY 2017 - FY 2020, a summary of profitability margins, net assets, and selected liquidity and solvency measures.

#### William W. Backus Hospital

HARTFORD HEALTHCARE CORPORATION

The William W. Backus Hospital is located in Norwich. In FY 2020, the Hospital experienced a \$4.7 million loss from operations and had \$33.1 million in non-operating revenue, resulting in an excess of revenues over expenses of \$28.4 million. Reported below is a list of various financial indicators and selected utilization measures for the Hospital. A chart indicating all of the affiliates of the Hospital's parent, Hartford HealthCare Corporation, based on OHS filings, can be found in Appendix Z.

<sup>\*</sup>Western CT Health Network (Danbury and Norwalk Hospitals) and Vassar Health CT (Sharon Hospital) became part of Nuvance Health in April 2019. FY 2020 is the first year that has a consolidating audited financial statement with all three CT hospitals. Prior year amounts are just those of Western CT Health Network.

## **Windham Community Memorial Hospital**

Windham Community Memorial Hospital is located in Willimantic. In FY 2020, the Hospital generated \$2.4 million in income from operations and had a \$25,000 non-operating gain, resulting in an excess of revenues over expenses of \$2.4 million. Reported below is a list of various financial indicators and selected utilization measures for the Hospital. A chart indicating all of the affiliates of the Hospital's parent, Hartford HealthCare Corporation, based on OHS filings, can be found in Appendix Z.

\* RCC is rounded to two digits for presentation purposes.

Note: There are different ways hospitals report provider taxes and payments in their audited financial statements. As a result, the total expense amount above, which agrees to the audited financial statements, will have different components depending on the hospital.

Some hospitals may have adjusted Total Gross revenues due to accounting rule changes for bad debts.

		FY 2020	HOSPITAL RAT	FY 2020 HOSPITAL RATIO OF COST TO CHARGE DATA	CHARGE DATA			
Ratio:	MEDICAID	MEDICAID PAYMENTS	MEDICAID PAYMENT TO COST DATA	TOTAL NON GOVT CHARGES	TOTAL NON GOVT PAYMENTS	TOTAL UNINSURED CHARGES	TOTAL UNINSURED PAYMENTS	PRIVATE PAYMENT TO COST DATA

Appendix Z – Health System Charts of Organization

**End of Section** 

## Appendix AA - Glossary of Terms

**Average Payment Period:** the average number of days that are required to meet current liabilities. A lower number of days is favorable, since it indicates a more favorable liquidity position.

**Bad Debts:** the income lost to the hospital because patients who were billed and from whom payment was expected did not pay amounts owed to the hospital for services provided. Bad debts net of recoveries will result in bad debt expense, if after reasonable collection efforts are made, the hospital determines that the accounts are uncollectible.

**Case Mix Index:** the arithmetic mean of the Medicare diagnosis related group case weights assigned to each inpatient discharge for a hospital during the fiscal year. The case mix index is calculated by dividing the hospital's total case mix adjusted discharges by the hospital's actual number of discharges for the fiscal year.

**Cash Flow to Total Debt Ratio:** an indicator of potential future debt repayment difficulty or insolvency. It is calculated by dividing excess of revenues over expenses plus depreciation by current liabilities plus long term debt. A decrease in the value of the ratio may indicate a future debt repayment problem.

**Charity Care:** the difference between the hospital's published charges and the amount of reimbursement received for services provided to patients from whom reimbursement was not expected. Charity care does not include bad debts, courtesy discounts, contractual allowances, self-pay discounts, and charges for health care services provided to employees.

**Current Ratio:** the measure of the number of dollars held in current assets per dollar of current liabilities. High values imply a good ability to pay short term obligations and low values imply a lesser ability.

**Days Cash on Hand:** the average number of days of cash available to pay for expenses that is maintained in cash accounts. A higher number is favorable, since it indicates a greater ability to meet outstanding obligations.

**Days in Patients Accounts Receivable:** the average number of days in collection that patient accounts receivables remain outstanding. A lower number is favorable, since it indicates good collection practices that result in sufficient cash flow and infrequent short-term financing.

**Equity Financing Ratio:** the ratio related to capital structure that indicates the percentage of net assets to total assets. A higher ratio is more favorable, since it indicates utilization of a higher level of equity and a lower level of debt financing in acquiring plant and equipment assets.

**Excess / (Deficiency) of Revenue over Expenses:** the difference between the sum of total operating revenue and non-operating revenue less total operating expenses that results in an excess or deficiency of total revenue.

**Gross Patient Revenue** – total gross patient charges for all patient services before deductions for allowances, charity care and other deductions.

**Hospital Parent Corporation:** the hospital's corporate holding company that controls through its governing body a hospital and the hospital's affiliates, as presented on the legal chart of corporate structure.

**Income / (Loss) from Operations:** the difference between total operating revenue and total operating expenses that results in a financial gain or loss from operating activities.

**Long-Term Debt to Capitalization Ratio:** the measure of the proportion of Long-Term Debt in a capital structure. A lower proportion or percentage is desirable because it allows for obtaining of more favorable terms (i.e., lower interest rates) when borrowing.

**Medicaid:** the federal and state health insurance program established under Title 19 of the Social Security Act to provide medical assistance on behalf of families with dependent children and for aged, blind or disabled whose income and resources are insufficient to meet the costs of necessary medical services and which is administered by the Department of Social Services.

**Medical Assistance:** the programs for medical assistance provided under the Medicaid program, including the HUSKY Plan A, or (B) any other state funded medical assistance program, including the Husky Plan, Part B.

**Medicare:** the federal health insurance program for the aged and disabled.

## Appendix AA - Glossary of Terms

**Net Assets:** the residual amount of total assets after all current and long-term liabilities (including long-term debt) are deducted. Also referred to as ownership equity.

**Net Patient Revenue:** the total gross revenue from patient charges less contractual allowances, less the difference between government charges and government payments, less charity care and less any other allowances.

**Non-Governmental:** any commercial or private payer and includes but isn't limited to managed care organizations, health maintenance organizations, and preferred provider organizations.

**Non-Operating Revenue:** the unrestricted revenue not directly derived from providing patient services but obtained from either investment revenues or philanthropic and non-philanthropic sources.

**Operating Expenses:** the expenses necessary to maintain regular operating functions and to carry out ongoing activities.

**Operating Margin:** the ratio related to profitability indicating the percentage of gain or loss from operations to total revenue. A higher positive ratio indicates more favorable operating results.

**Operating Revenue:** the total of net patient revenue from reimbursement of patient services by government and non-government payers plus other operating revenue.

Other Medical Assistance: the difference between Medical Assistance and Medicaid.

**Other Operating Revenue:** the non-patient service operating revenue that is obtained from operating activities but is accounted for separately from patient service revenues. Other operating revenue includes revenues restricted by a donor or grantor for operating purposes, and also net assets released from restrictions.

**Payer Mix:** the proportion of each government or non-government payer's reimbursement to the hospital's total reimbursement for patient services. Payer mix is derived by determining the amount of total gross patient revenue or total net patient revenue that the hospital receives from each government and non-government payer.

**Payment to Cost Ratio:** the ratio that indicates the percentage above or below cost that a hospital is reimbursed by a government or non-government payer. A ratio that is higher than 1.00 is favorable, since it indicates reimbursement by a payer that is greater than the cost of providing patient services. A ratio that is less than 1.00 is unfavorable, since it indicates reimbursement by a payer that is less than the cost of providing patient services.

**Ratio of Cost to Charges:** the ratio that indicates the percentage of total operating expense to the total of gross patient charges plus other operating revenue. A lower ratio is more favorable, since it indicates a greater difference between the cost and charges billed for providing patient services.

**Total Margin:** the ratio related to profitability indicating the percentage of gain or loss from operations and non-operating revenue to total revenue. A higher positive ratio indicates more favorable results.

**Uncompensated Care:** the total amount of the hospital's charity care and bad debts resulting from unreimbursed patient services that are determined by using the hospital's published charges and consistent with the hospital's policies regarding charity care and bad debts.

**Uncompensated Care Cost:** the total amount of the hospital's charity care and bad debts at charges multiplied by the hospital's ratio of cost to charges.

Uninsured: individuals with no health insurance for the hospital services provided.

**Unrestricted Net Assets:** the amount of net assets that is not restricted by donors or by a board of directors as to their use.
