Executive Summary

The Department of Public Health, Office of Health Care Access (OHCA) is responsible for the collection, analysis and dissemination of acute care hospital financial information. This report provides information related to the financial stability of Connecticut's acute care hospitals, as mandated in Section 19a-670 of the Connecticut General Statutes (C.G.S.). The report highlights Connecticut's statewide hospital trends and includes individual hospital profiles of financial performance. The report is intended to provide information that will enhance knowledge of the financial status of Connecticut's hospitals.

The report identifies a number of key findings and trends:

- In Fiscal Year (FY) 2015, Connecticut hospitals had a total gain from operations of \$422.2 million, a decrease (10%) from the previous year's gain from operations.
- In FY 2015, hospitals statewide lost \$1 million in income from non-operating sources of revenue, a substantial decrease (101%) from the previous year's results.
- In FY 2015, 61% of hospitals (17 of 28) achieved a positive total margin.
- The average statewide total margin was 3.89% in FY 2015, a decrease from the 6.22% average statewide total margin in the previous year.
- Four hospitals had negative five-year average total margins in FY 2015.
- Total hospital net assets decreased by \$204 million, totaling \$5.40 billion in FY 2015.
- Bad debts accounted for 62% of uncompensated care charges in FY 2015 while charity care accounted for nearly 38%, a change from last year when bad debt accounted for 66% of charges and charity care 34% of charges.
- Statewide uncompensated care charges totaled \$644 million in FY 2015, decreasing \$121 million or 16% over the prior year results.
- Medicaid discharges accounted for greater than two out of every ten discharges.
- Connecticut continues to have an increasing number of hospitals that operate within corporate systems directly related to other Connecticut hospitals or, in several cases, to out-of-state hospitals a trend that has been continuing with two out-of-State healthcare corporations acquiring Connecticut health systems since the last publication of this report.

Introduction

The Department of Public Health, Office of Health Care Access (OHCA) is responsible for the collection, analysis, and dissemination of acute care hospital financial information. This report provides information related to the financial stability of Connecticut's 28 acute care hospitals, as mandated in Section 19a-670 of the C.G.S.. The following narrative provides a summary of the financial performance of Connecticut's hospitals during Fiscal Year (FY) 2015¹ and presents some key statewide hospital financial indicators.²

Connecticut state statutes and regulations³ require each short-term acute care general or children's hospital, whether structured as for-profit or not-for-profit, to annually submit financial and statistical information to OHCA. Hospital audited financial statements, which include balance sheet and statement of operations information are the primary source of information in this report. This report also uses the annual hospital filings submitted to OHCA, which include utilization statistics, uncompensated care data, free bed funds and legal charts of corporate structure.

The report highlights Connecticut's statewide hospital trends, includes individual hospital profiles of financial performance, and is intended to provide information that will enhance knowledge of the financial status of Connecticut's hospitals. While there are numerous financial and operating indicators that provide a means to measure hospital performance, this report focuses primarily on measures involving profitability, cost data, liquidity, solvency, net assets, discharges by payer and uncompensated care, which are considered strong indicators of the hospitals' financial and operating strength.

In reading this report, the reader should note that some FY 2014 financial and statistical data elements previously reported may have been updated by the hospitals during the FY 2015 filing process. This updated information has been included in this publication to improve reporting accuracy and comparability between FY 2014 and FY 2015 data reported.

¹For the purpose of filing fiscal year end results with OHCA, Connecticut's acute care hospitals' Fiscal Year 2015 began on October 1, 2014 and ended on September 30, 2015.

²OHCA used OPTUMInsight (formerly INGENIX) 2015, *Almanac of Hospital Financial & Operating Indicators, A Comprehensive Benchmark of the Nation's Hospitals*, as the source for calculating financial ratios.

³Sections 19a-644 and 19a-676, C.G.S. and Section 19a-643-206 of the Regulations of Connecticut State Agencies.

Hospital Income and Financial Performance

Hospitals must be able to generate sufficient cash flow to pay for operations and debt service, to provide a source of capital for facility needs and strategic initiatives and to increase cash reserves. In FY 2015, Net Patient Revenue (NPR) increased by 2.9% over FY 2014. Statewide NPR was approximately \$10.3 billion and accounted for 95% of operating revenues. In FY 2015, nearly half (48%) of hospital net revenue continued to be generated from governmental payers such as Medicare, Medicaid, CHAMPUS/TRICARE and Medical Assistance. These same payers also accounted for the majority of statewide discharges (68%).

In FY 2015, Connecticut hospitals had a total gain from operations of \$422.2 million, a decrease (10%) from the previous year when operating profits were \$469.1 million. Eighteen hospitals posted positive operating margins in FY 2015, a notable decrease from 24 hospitals in the prior year. Some hospitals did particularly well on a margin basis, such as Backus and Bridgeport, but some hospitals did poorly, such as Milford and Johnson, both of which have had negative operating margins on a regular basis in recent years.

In FY 2015, non-operating revenue, which is derived primarily from investments in stocks and bonds, the value of held securities, endowments and charitable contributions, decreased \$197 million from the previous year to a negative amount; a 101% decrease. All but six hospitals (Day Kimball, Hungerford, Lawrence + Memorial ("L+M"), Manchester, Milford and Norwalk) reported lower non-operating revenue in FY 2015.

Combined, these factors resulted in excess revenue over expenses of approximately \$422 million (see **Table 1**), a 37% decrease from \$665 million last year. A robust financial picture should rely more on patient and other operating revenues and not on less than reliable income sources, such as investment performance. On the whole, hospitals' operational financial performance weakened in FY 2015 due to the factors noted above.

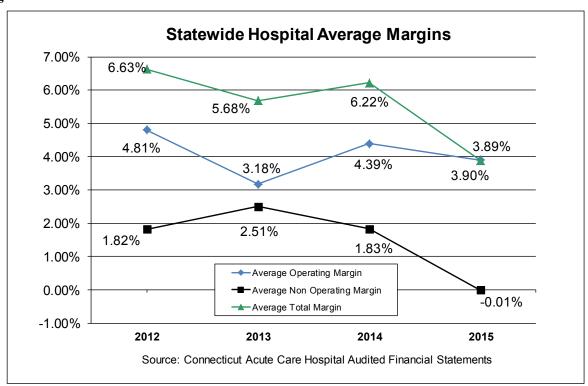

Table 1

STATEWIDE HOSPITALS STATEMENT OF OPERATIONS DATA	2012	2013	2014	2015
Net Patient Revenue	\$9,902,029,414	\$9,766,243,841	\$10,012,328,984	\$10,304,993,152
Other Operating Revenue	\$587,041,326	\$477,106,882	\$476,677,182	\$510,874,357
Total Operating Revenue	\$10,489,070,740	\$10,243,350,723	\$10,489,006,166	\$10,815,867,509
Total Operating Expenses	\$9,975,496,976	\$9,909,485,912	\$10,019,930,389	\$10,393,703,516
Income/(Loss) from Operations	\$513,573,764	\$333,864,811	\$469,075,777	\$422,163,993
Non-Operating Revenue	\$194,372,819	\$263,214,548	\$195,875,728	(\$1,006,236)
Excess/(Deficiency) of Revenue over Expenses	\$707,946,583	\$597,079,359	\$664,951,505	\$421,157,757

Source: Hospital Audited Financial Statements

Figure 1 below shows the trends for statewide hospital average operating, non-operating and total margins for the last four years, which illustrate changes in statewide hospital financial performance, on average, over this time period.

Figure 1

As indicated previously, in FY 2015, hospitals had total revenue in excess of expenses of \$422 million, a decrease of almost \$244 million or 37% from the previous fiscal year. This downward trend is also reflected in the statewide average total margin which decreased to 3.89% from 6.22%. During FY 2015, just 8 hospitals reported an improved total margin; Bridgeport, Connecticut ("CT") Children's, Dempsey, Hartford, L+M, Manchester, Milford and Stamford.

Individual results ranged from a high of +13.8% (Backus) to a low of -57.1% (Sharon⁴). While 17 hospitals posted positive total margins in FY 2015, this was a decrease from the previous year when 24 hospitals had positive total margins. There were 11 hospitals that reported negative total margins; Danbury, Day Kimball, Hospital of Central Connecticut ("HOCC"), Johnson, Milford, Rockville, Saint Francis, Saint Vincent's, Sharon, Waterbury and Windham. Some of these hospitals have consistently reported a negative total margin for many years such as Milford and Windham. More detailed hospital statement of operations and margin data are provided in Appendices I and J, which provide results by individual hospital.

_

⁴Sharon Hospital had a one time accounting change which affected their total margin in FY 2015.

Five Year Financial Performance

Table 2 on the following page provides five-year weighted average total margins for Connecticut's acute care hospitals. Hospitals need to generate revenue in excess of expenses to remain profitable. Expenses exceeding revenues over a period of several years may be indicative of financial distress. Those hospitals with a negative total margin are not achieving sufficient revenue to pay all of their expenses and must use other sources of funds, such as cash reserves or the liquidation of assets, to pay their expenses. To make improvements to facilities and equipment, hospitals must have operating gains or access to sources of capital.

Listed below are key findings from **Table 2** on the following page:

- Four hospitals (Johnson, Milford, Sharon and Windham) had negative five-year average total margins over the period FY 2011 FY 2015.
- Milford and Windham had negative total margins for all five fiscal years. Milford reported
 a negative total margin for the past eight fiscal years while Windham reported a negative
 margin for the last seven years.
- There were 24 hospitals with positive five-year average total margins.
- Thirteen hospitals consistently sustained positive total margins in each of the five years and eight additional hospitals had a positive total margin in four of the five years.
- Overall, the statewide five-year weighted average total margin for FY 2011 FY 2015 was 5.23%.
- Twelve hospitals reported a five-year total margin greater than the statewide average of 5.23%.

Median (Note B)	4.6%	2.8%	5.5%	4.1%	4.9%	3.4%	

Note A: Weighted average by dollar amounts. Revenue in excess of expenses/(revenue from operations+(revenue in excess of expenses - gain/loss from operations))

Note B: Middle margin in numerical order

Note C: The former Hospital of St. Raphael and New Milford Hospital are presented for historical information only.

Note D: Sharon's FY 2015 total margin is due to a one time accounting adjustment to their audited financial statements.

Balance Sheet Strength and Liquidity

The strength and liquidity of a hospital or any organization may be measured by using various financial ratios. Liquidity ratios measure the amount of or how well a hospital utilizes its current or short-term assets to pay off its short-term obligations. Liquidity is an indication of how easily an asset can be converted into other types of assets or used to buy services or satisfy obligations. In FY 2015, some of the hospitals that reported strong operating profits also tended to have liquidity ratios that were better than the statewide median. Three hospitals had liquidity ratios that were better than the statewide median for all of the liquidity ratios calculated by OHCA (Backus, Dempsey, and Saint Francis). Some hospitals, while profitable, still experienced liquidity ratios that compared unfavorably to the statewide median for all indicators. These included Saint Mary's and Manchester. Among the non-profitable hospitals, Johnson experienced liquidity ratios which compared unfavorably with the statewide median for all of the liquidity measures followed by OHCA.

On a statewide basis, the hospitals' liquidity indicators showed mixed results for the four measures calculated in this report. The Days Revenue in Patient Accounts Receivable, which measures how quickly a hospital collects account balances, declined from a statewide median of 39 days last year to 37 days in FY 2015, while the Average Payment Period, which measures the average time taken to pay creditors, decreased from a statewide median of 68 days last year to 67 days in FY 2015; positive movements for both indicators. The median Current Ratio, a liquidity indicator that measures a hospital's ability to pay its short-term debts with its short-term assets, decreased slightly from 1.6 in the prior year to 1.5 in FY 2015 and the median Days Cash on Hand, which measures how much cash a hospital has to pay for expenses, decreased dramatically, falling from 39 days last year to 24 days in FY 2015; both negative trends.

Solvency ratios measure the ability of a hospital to pay off its long term debt. Solvency measures can indicate whether or not a hospital can continue to pay all of its short-term and long-term liabilities as they become due from creditors. Similar to liquidity ratios, hospitals which have strong solvency measures also tended to report strong operating profits. In FY 2015, six hospitals had solvency ratios which compared favorably to the statewide median for all solvency ratios calculated by OHCA (Backus, CT Children's, Greenwich, Hungerford, Middlesex and Norwalk). Similar to liquidity measures, some hospitals while profitable, still experienced solvency ratios that compared unfavorably to the statewide median for all indicators. These included Griffin and Manchester. Among the non-profitable hospitals, Day Kimball, Johnson, Rockville, St. Francis and Waterbury experienced unfavorable solvency ratios compared to statewide median for all of the solvency measures followed by OHCA.

On a statewide basis, hospitals' median solvency ratios were unfavorable compared with the previous year for all three measures calculated in this report. The median Equity Financing Ratio, a solvency measure related to capital structure that indicates the percentage of a hospital's total assets financed with its own funds as compared to debt, had a negative change, declining from 38.5% in the prior year to 33.5% in FY 2015. The median Cash Flow to Total Debt Ratio, which

provides an indication of potential future debt repayment difficulty or insolvency, decreased from 21.3 in the prior year to 17.5 in FY 2015 and the median Long-Term Debt to Capitalization Ratio, which measures the proportion of long-term debt in a hospital's capital structure, increased from 30.4 to 35.8; all unfavorable trends. More detailed hospital liquidity and solvency measures are provided in Appendices P and Q, which provide results by individual hospital.

Another balance sheet item that indicates financial strength of an organization is the amount of net assets the organization maintains. Total statewide hospital net assets were \$5.4 billion in FY 2015, a \$204 million decrease from the prior year. Net assets are also referred to as a hospital's ownership equity. Primary factors affecting total net assets include changes in unrealized gains and losses, a hospital's excess or deficiency of revenue over expenses, monetary transfers to or from a hospital affiliate, pension and post retirement-related changes, and net assets released from restrictions and used for operating purposes. In FY 2015, only eight hospitals (Backus, Bridgeport, Greenwich, Hartford, HOCC, Norwalk, Stamford and Yale) experienced net asset increases compared to twelve last year. It should be noted that five hospitals, (Day Kimball, Dempsey, Griffin, Milford and Windham) all had negative net assets for FY 2015, indicating that hospital assets less their liabilities was a negative amount. Three of these hospitals (Griffin, Milford and Windham) also had negative net assets in the prior year. More detailed data on specific hospital net asset totals is provided in Appendix N.

Financial Status of Hospital Health Systems

In FY 2015, the hospital corporate systems, which include hospital parent corporations and all subsidiaries, had somewhat mixed results. Hospital health systems⁵ in Connecticut had an overall loss from operations of \$137.2 million, a significantly greater decrease than the \$44.8 million loss the previous year. There were 10 health systems that reported positive operating margins in FY 2015, and 10 systems reporting operating losses.⁶ In most cases, if the hospital had an operating gain (or loss) then the hospital's parent also had an operating gain (or loss). Some health systems posted large operating gains, such as Yale with a gain of \$160 million. UCONN however, had a large impact on statewide amounts with its \$286 million operating loss, similar to the previous year.

Health systems reported total non-operating revenues of \$414.9 million. UCONN's non-operating gains of \$440 million, which were the result of State and capital appropriations, accounted for the vast majority of the statewide results. Excluding the UCONN amount would have significantly lowered total statewide health system non-operating revenues. Non-operating revenue is generally a means for health systems to boost their financial strength; however, just 12 of the 20 health systems reported non-operating gains in FY 2015.

Health systems had total revenue in excess of expenses of \$277.7 million in FY 2015, a decrease of \$638.7 million or 70% from the previous fiscal year. This resulted in a statewide average total margin of 2.1% for the hospital corporate systems, a decrease from the 7.0% earned in the prior year. Total margins in FY 2015 ranged from a high of 13.3% (UCONN) to a low of -44.9%

⁵See Appendices A-H for listings of the 20 hospital parent corporations reporting to OHCA in FY 2015.

⁶These amounts are from the individual health system's Statement of Operations for FY 2015. Some parent corporations include data from out-of-state affiliates such as L+M which includes data from Westerly Hospital in Rhode Island.

(Sharon). There were just 3 health systems that reported an improvement in total margin over the year (CCMC, L+M and Milford) and eight health systems reported a negative total margin (Day Kimball, ECHN, Greater Waterbury, Johnson, Milford, Saint Francis/Trinity, Saint Vincent's and Sharon). More detailed health system statement of operations and margin data are provided in Appendix A and B.

In FY 2015, there were mixed results in the hospital corporate systems' various liquidity measures on a statewide median basis. Statewide median Days Cash on Hand displayed weaker results for the hospital corporate systems, declining from 39 days last year to 35 days in FY 2015. The statewide median Current Ratio also decreased from 1.72 in the previous year to 1.59 in FY 2015. On a positive note, Days Revenue in Accounts Receivable dipped slightly; falling from 40 days previously to 39 days, and the Average Payment Period of health systems dropped from 69 days last year to 62 days in FY 2015

Similar to statewide median liquidity ratios, hospital corporate systems' median solvency measures had mixed results as well in FY 2015. The median statewide Equity Financing Ratio remained at 42% in FY 2015 the same as in the previous year. In FY 2015, the median Cash Flow to Total Debt Ratio fell from 13.4 last year to 9.3 this year and the Long-Term Debt to Capitalization Ratio climbed from 30.3 last year to 32.8 in the current year.

The total net assets of hospital corporate systems⁷ decreased to \$6.48 billion in FY 2015 a decrease of over \$753.9 million, or 10%, from the previous year. In FY 2015, most health systems continued to report a decrease in net assets with the exception of CCMC, Sharon and Stamford. The two health systems with the largest changes were UCONN (-\$541 million) which was due to a change in accounting methods and Yale (+\$125 million). Detailed data on specific health system liquidity and solvency measures, in addition to net asset data is provided in Appendices F, G and H

Utilization Indicators

Utilization measures provide additional information essential to understanding hospital performance. Significant fluctuations of patient volume or length of stay, for example, can enhance or detract from a hospital's financial performance. Appendix S of this report provides hospital utilization statistics for FY 2015.

For more detailed utilization data, refer to OHCA's publication entitled "Statewide Health Care Facilities and Service Plan" released in February 2015, which contains a comprehensive look at the utilization of services in Connecticut's acute care hospitals. The report may be accessed in the Publications section of the OHCA website at the following address: http://www.ct.gov/dph/lib/dph/ohca/hc_facilities_advisory_body/facilities/2014/ ohca_2014_supplemental_statewide_facilities_chapter_2-acute_care_facilities_utilization_and_trends.pdf

⁷The financial results of a hospital system include each hospital's parent corporation, the hospital itself and any other subsidiaries under the hospital parent organization. Therefore, the statewide hospital systems' net assets of \$6.48 billion in FY 2015 includes the statewide hospitals' nets assets for FY 2015.

Later in calendar year 2016, OHCA is scheduled to release its update of the Statewide Health Care Facilities and Service Utilization Plan which will include updated utilization figures.

Uncompensated Care

By law, all emergent, non-elective patients at Connecticut's hospitals must be treated, regardless of their ability to pay. Uncompensated care (UC) represents health care provided to patients by hospitals that will not be reimbursed. There are two components of uncompensated care: charity care and bad debt. Charity care occurs when a hospital knows in advance that the care provided will not be reimbursed. Bad debt is incurred after a service has been provided, with no forewarning of non-payment. Appendix R of this report provides an overview of the hospitals' uncompensated care data for FY 2015.

In FY 2015, statewide uncompensated care charges (UC charges) totaled \$643.7 million, a decrease of \$121.3 million or 15.9% from the previous year. Total statewide bad debt of \$400.0 million, fell by \$106.2 million, a decrease of 21.0% and total statewide charity care of \$243.7 million fell by \$15.1 million, a decrease of 5.9%. A summary of FY 2015 changes to hospital bad debt and charity care is also provided in the **Table 3** below.

Table 3

	# of Hospitals with decreases	# of Hospitals with decreases ≥ 25%	# of Hospitals with increases	# of Hospitals with increases ≥ 25%
Bad Debt	19	11	9	5
Charity Care	21	7	7	4

Overall, bad debt as a percentage of total hospital UC charges decreased slightly to 62.1% in FY 2015, down from 66.2% last year. The hospitals with the highest percentage of bad debt to total hospital UC charges were Dempsey (96.6%), Milford (93.6%), Johnson (93.4%), Day Kimball (89.6%) and L+M (85.1%). Conversely, charity care as a percentage of total UC charges increased from 33.8% in the prior year to 37.9% in FY 2015. The hospitals with the highest percentage of charity care to total hospital UC charges were CT Children's (69.0%), HOCC (65.6%), Bristol (64.9%), Griffin (63.6%) and Hartford (63.2%).

Uncompensated care costs (UC costs) are the costs hospitals incur providing care for which no payment was received from the patient or insurer. Hospital charges include the actual cost of care plus a mark-up to generate additional income. This additional income is used by hospitals to recoup fixed costs, generate funds for future investment and to maintain profitability. UC costs are calculated from hospital charges using a cost-to-charge ratio and attempt to remove the additional mark-up to determine the "true cost" of care (see Appendix R).

In FY 2015, statewide UC costs totaled \$199.9 million, a decrease of \$37.0 million or 15.6%, from the previous year. The statewide UC costs accounted for 1.9% of total expenses, down from a figure of 2.4% last year. Twenty-three hospitals experienced a decrease in UC costs in FY 2015 and 9 of the 23 (Bridgeport, Bristol, CT Children's, Greenwich, Hartford, HOCC, Hungerford, MidState and Milford) decreased by more than 25%. The remaining 5 hospitals experienced an increase in UC costs in FY 2015 with just 2 of the 5 (Danbury and Dempsey) increasing by more than 25%.

OHCA has stated for the past several years that, as the Affordable Care Act (ACA) expands health care coverage, UC Costs should decrease. However, a significant reduction in the overall costs may take some time and may not decrease uniformly at individual hospitals. FY 2015 was the first full year under the ACA and hospitals had experienced an overall reduction in UC Costs. A direct correlation however cannot be proven by OHCA using the data as filed. Even though these reductions did not occur uniformly at individual hospitals, most hospitals had decreases in their total UC Costs in FY 2015 compared to the previous year which may be in part a result of the implementation of the ACA.

A Discussion of Hospitals within Affiliated Systems

Connecticut continues to have an increasing number of hospitals that operate within corporate systems directly related to other Connecticut hospitals or, in several cases, to out-of-state hospitals. A great deal of activity has occurred since the last publication of the Financial Stability report in September, 2014. The details of these affiliations are provided below and a complete list of the Connecticut acute care hospitals that operate within larger systems is provided in Appendix AA.

On October 1, 2015, Saint Francis Care, Inc., the parent corporation of Saint Francis Hospital and Medical Center ("SFHMC"), was acquired by Trinity Health Corporation of Livonia, Michigan ("THC"). Saint Francis Care, Inc. then subsequently changed its name to Trinity Health – New England, Inc. ("TH-NE"). SFHMC is now a direct subsidiary of TH-NE. This was the first affiliation for THC with a Connecticut health system. On January 1, 2016, Johnson Memorial Hospital ("JMH") became a wholly owned subsidiary of TH-NE due to TH-NE's acquisition of JMH's parent, Johnson Memorial Medical Center. On August 1, 2016, Saint Mary's Hospital ("SMH") also became a wholly owned subsidiary of TH-NE due to TH-NE's acquisition of SMH's parent, St. Mary's Health System. Trinity Health – New England, Inc. also owns a Massachusetts hospital system, Sisters of Providence Health System, which includes Mercy Medical Center. TH-NE is now the direct parent of these hospitals and has become a large regional provider with multiple hospitals in the region within a one year period.

On June 10, 2016, OHCA issued a Final Decision allowing Prospect Medical Holdings ("PMH") of Los Angeles California to purchase all of the assets of Eastern Connecticut Health Network ("ECHN"). The transfer includes both Manchester Memorial Hospital and Rockville General

Hospital. On July 15, 2016, OHCA issued another Final Decision to PMH allowing the company to purchase all of the assets of Greater Waterbury Health Network ("GWHN"), which includes Waterbury Hospital. As of the date of this publication, these transactions have not yet been executed. However, when these transactions do occur, they will mark the first purchases of any Connecticut hospitals by a for-profit chain since the 2001 transaction involving Sharon Hospital (now Essent Healthcare of Connecticut, Inc. d/b/a Sharon Hospital), which is owned by RegionalCare Hospital Partners of Brentwood, Tennessee.

On September 8, 2016, Yale-New Haven Health Services Corporation ("YNHHSC") received approval to affiliate with Lawrence + Memorial Corporation ("L+M"), the parent corporation of Lawrence + Memorial Hospital. YNHHSC received prior approval to affiliate with Westerly Hospital, a subsidiary of L+M, from the State of Rhode Island. Lawrence + Memorial Hospital now joins Bridgeport Hospital, Greenwich Hospital and Yale-New Haven Hospital as part of the YNHHSC network of hospitals.

The planned affiliation of hospital health systems with both local and national hospital chains remains an active trend within Connecticut's hospital industry. This may be the result of many factors including, but not limited to, the status of national and state economies, reimbursement issues, strengthening of position in payer contract negotiations and access to capital as well as the implementation of provisions of the Affordable Care Act. These various influences seem to be playing an increasingly significant role in the ongoing reshaping of Connecticut's hospital systems and the formation of more affiliations, both non-profit and for-profit.

Statewide Health System Data Statewide Hospital Data & Individual Hospital Data

The following sections provide an aggregate statewide profile of hospital parent corporations and aggregate statewide profile of hospital summary totals for both financial and statistical indicators. In addition, individual hospital profiles are presented for each of Connecticut's acute care hospitals. The final section of this report contains detailed appendices by hospital parent corporation and by hospital as identified in the table of contents. Unless otherwise indicated, the sources of data used in these sections are the OHCA Hospital Reporting System (HRS) and the hospitals' annual filings to OHCA.

STATEWIDE HOSPITAL HEALTH SYSTEM PROFILE

Reported below is the total Statewide Health System statement of operations summary for Fiscal Year 2012 - Fiscal Year 2015, a summary of profitability margins, net assets and selected liquidity and solvency measures.

STATEWIDE HEALTH SYSTEM STATEMENT OF OPERATIONS SUMMARY	2012	2013	2014	2015
Net Patient Revenue	\$10,964,152,921	\$10,920,191,160	\$11,347,784,022	\$11,846,155,228

WILLIAM W. BACKUS HOSPITAL

The William W. Backus Hospital is located in Norwich. In FY 2015, the Hospital generated \$40.9 million in income from operations and experienced an \$800,000 non-operating loss, resulting in an excess of revenues over expenses of \$40.1 million. Reported below is a list of various financial indicators and selected utilization measures for the Hospital. A chart indicating all of the affiliates of the Hospital's parent, Hartford Healthcare Corporation, based on OHCA filings, can be found in Appendix AA.

BRIDGEPORT HOSPITAL

Bridgeport Hospital is located in Bridgeport. In FY 2015, the Hospital generated \$54.7 million in income from operations and had \$900,000 in non-operating revenue, resulting in an excess of revenues over expenses of \$55.6 million. Reported below is a list of various financial indicators and selected utilization measures for the Hospital. A chart indicating all of the affiliates of the Hospital's parent, Yale-New Health Services Corporation, based on OHCA filings, can be found in Appendix AA.

Effective January 1, 2016, Ascension Health became the direct sole member of St. Vincent's Medical Center.

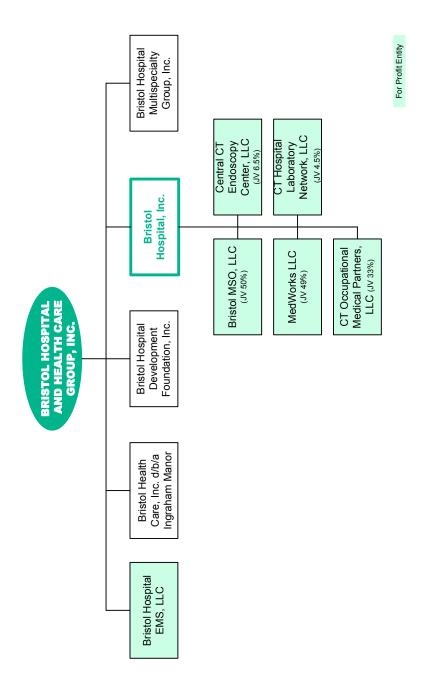

On June 10, 2016, a Certificate of Need ("CON") was issued under Docket Number 15-32016 486 for the transfer of the assets of Eastem Connecticut Health Network, Inc. to Prospect Medical Holdings, Inc. On July 15, 2016, a CON was issued under Docket Number 15-32017 486 for the transfer of assets of Greater Waterbury Health Network, the parent company of Waterbury Hospital, also to Prospect Medical Holdings, Inc. As of the date of this publication, these two transactions have not been secution, Manchester Memorial Hospital, Rockville General Hospital and Waterbury Hospital will be affiliated within the Prospect Medical Holdings, Inc. system.

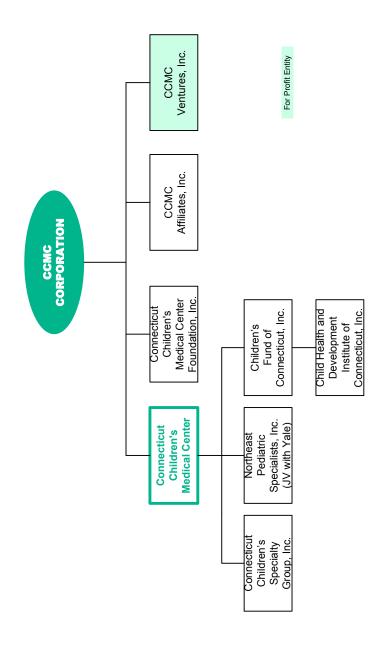

On October 1, 2015, Saint Francis Care, Inc., the parent of Saint Francis Hospital and Medical Center ("SFHMC"), was acquired by Trinity Health Corporation. Subsequently, SFHMC's previous parent, Saint Francis Care, Inc. was renamed Trinity Health On January 1, 2016, Johnson Memorial Hospital, Inc. became a wholly owned subsidiary of Trinity Health - New England, Inc.

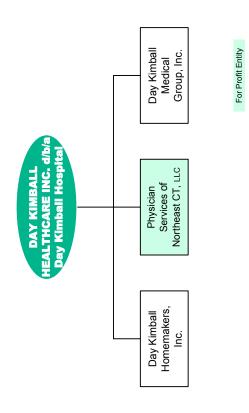

On September 8, 2016, a Certificate of Need application was approved under Docket Number 15-32033-CON for the affiliation of L+M Corporation with Yale-New Haven Health Services Corporation. It is anticipated that the transaction will occur before the On August 1, 2016, Saint Mary's Hospital became a wholly owned subsidiary of Trinity Health - New England, Inc. New England, Inc.

Information current though publication of FY 2015 Financial Stability Report

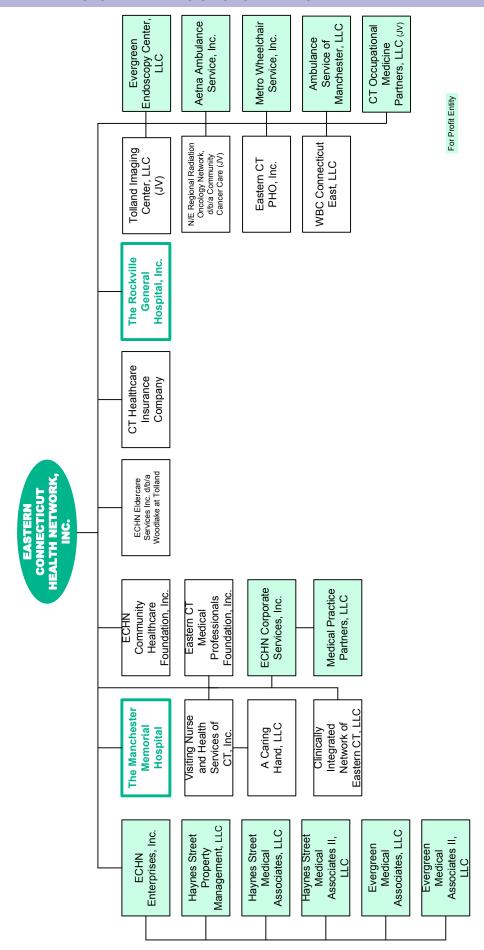

nd of Fiscal Year 2016.

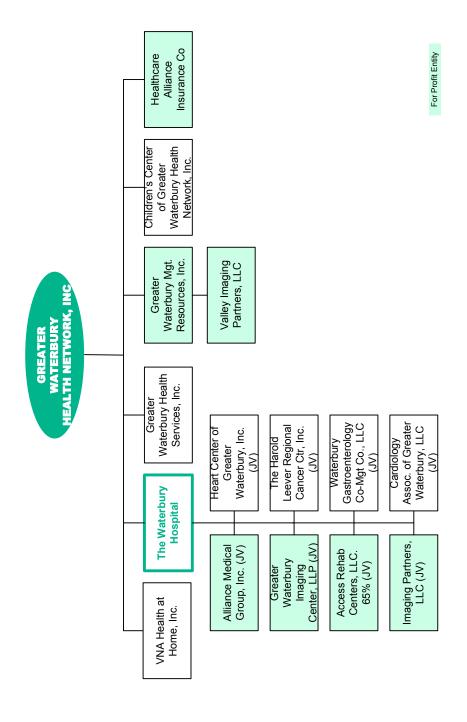

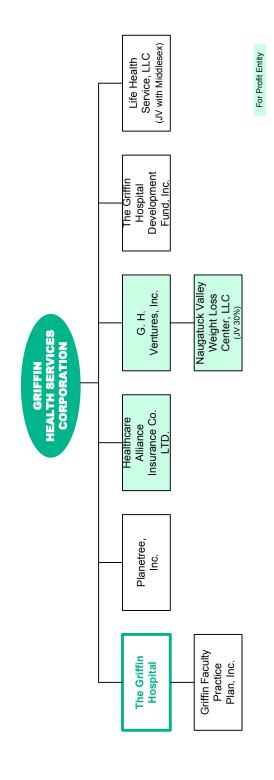

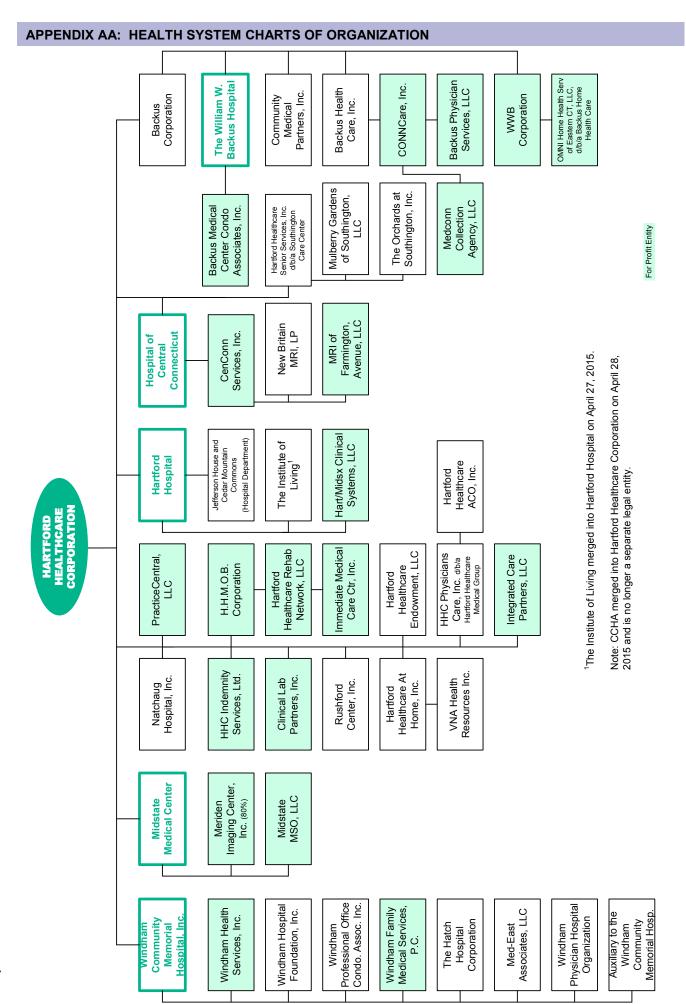

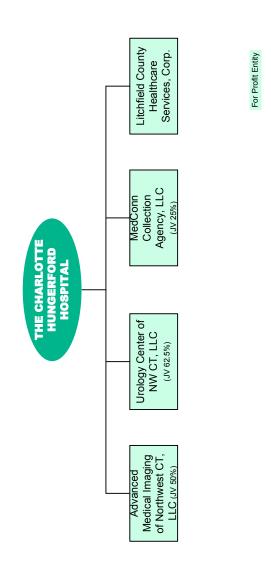

APPENDIX AA: HEALTH SYSTEM CHARTS OF ORGANIZATION

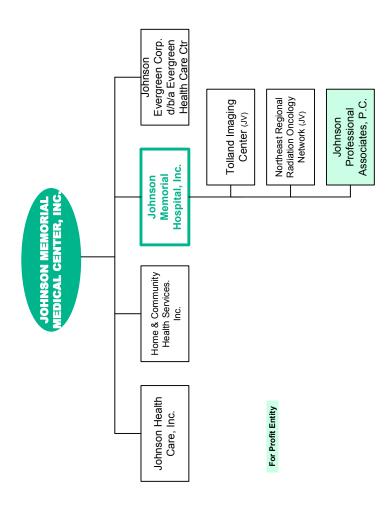

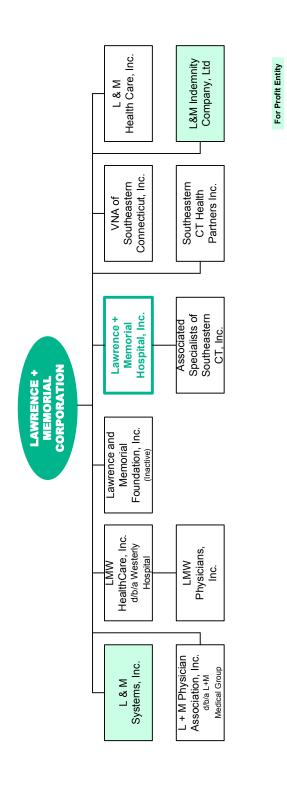

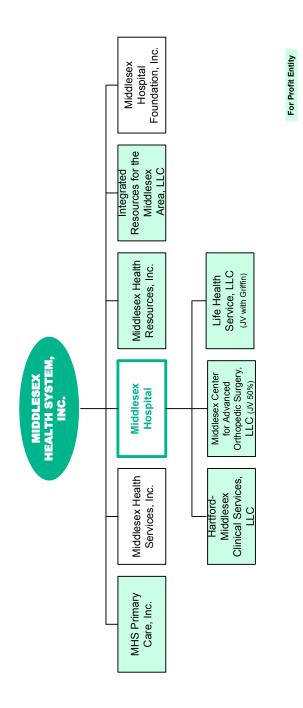

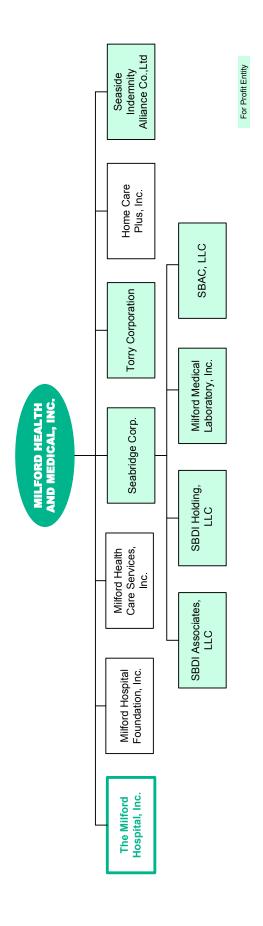

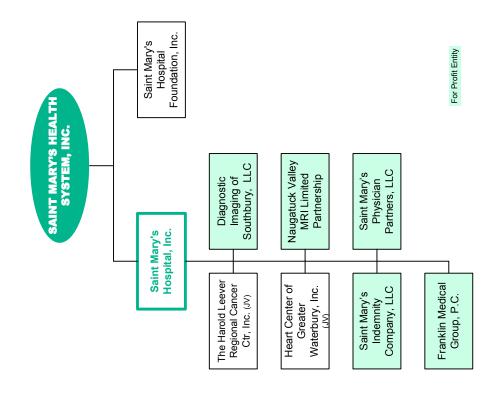

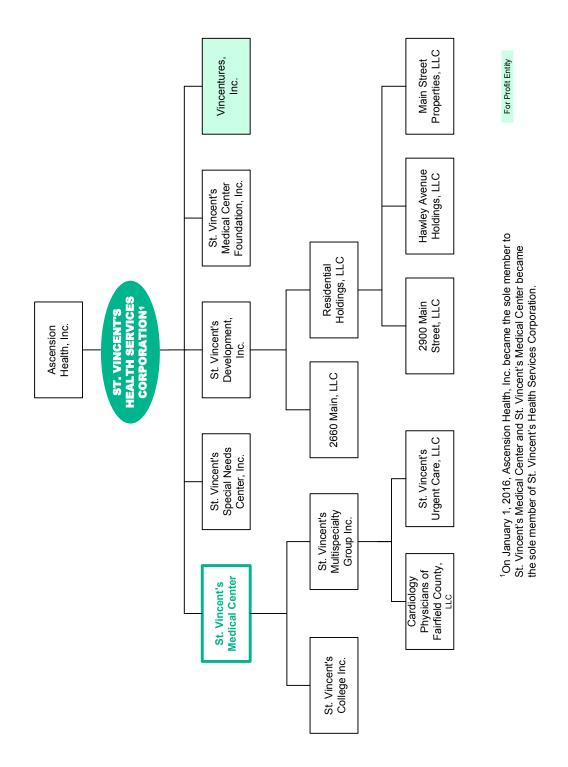

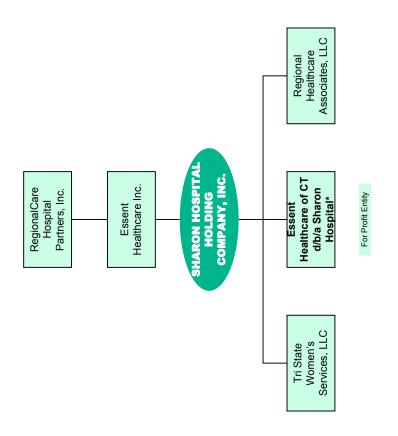

Note - At the time of this publication, L+M Corporation was approved by OHCA to affiliate with Yale-New Haven Health Services Corporation.

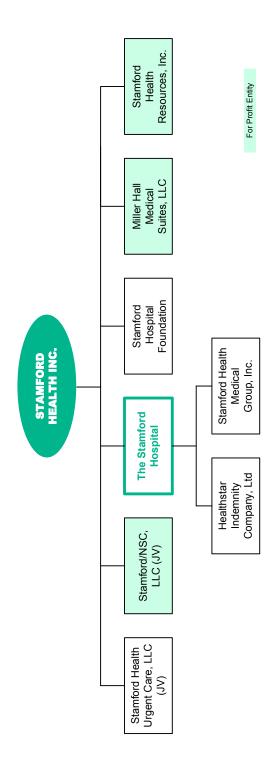

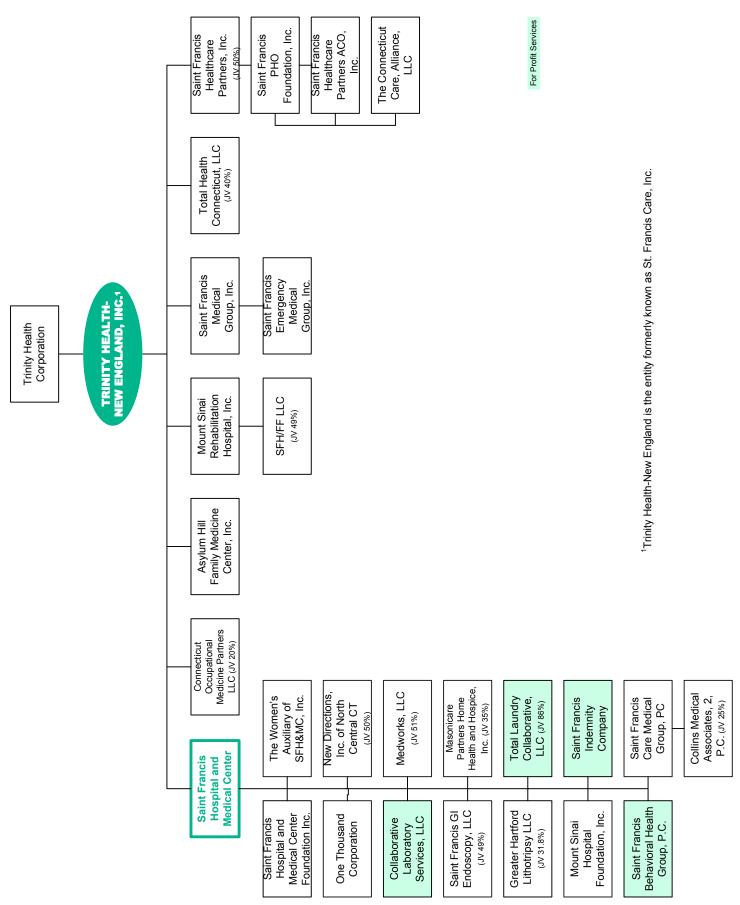

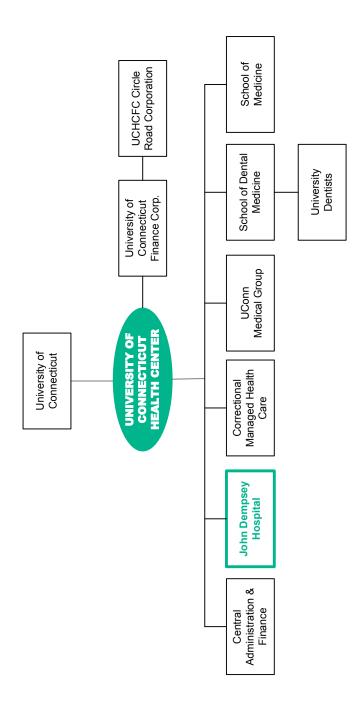

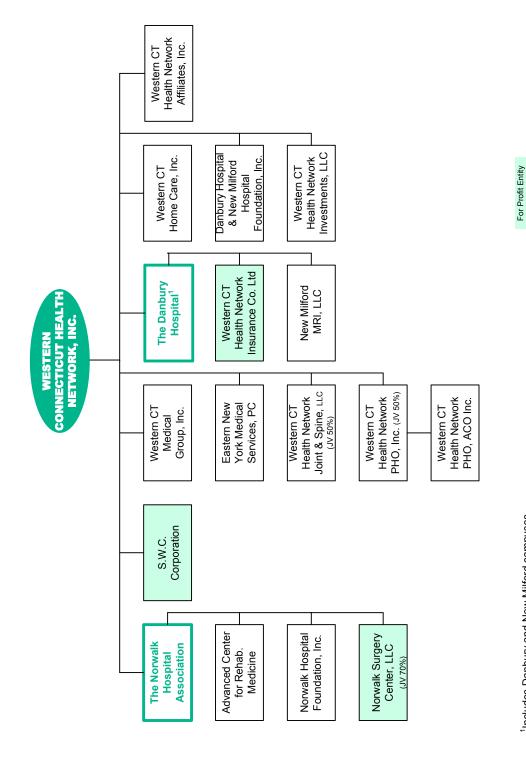

*The Foundation for Community Health, Inc. owns 5% of Sharon Hospital.

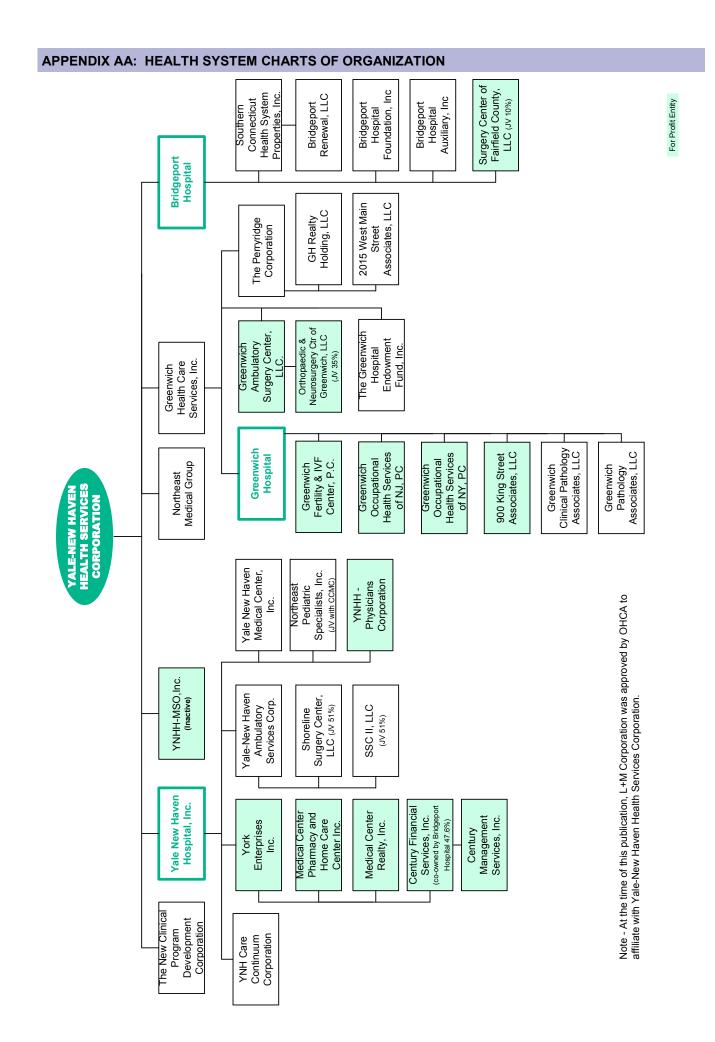

¹Includes Danbury and New Milford campuses.

APPENDIX AB: GLOSSARY OF TERMS

Average Payment Period: the average number of days that are required to meet current liabilities. A lower number of days is favorable, since it indicates a more favorable liquidity position.

Bad Debts: the income lost to the hospital because patients who were billed and from whom payment was expected did not pay amounts owed to the hospital for services provided. Bad debts net of recoveries will result in bad debt expense, if after reasonable collection efforts are made, the hospital determines that the accounts are uncollectible.

Case Mix Index: the arithmetic mean of the Medicare diagnosis related group case weights assigned to each inpatient discharge for a hospital during the fiscal year. The case mix index is calculated by dividing the hospital's total case mix adjusted discharges by the hospital's actual number of discharges for the fiscal year.

Cash Flow to Total Debt Ratio: an indicator of potential future debt repayment difficulty or insolvency. It is calculated by dividing excess of revenues over expenses plus depreciation by current liabilities plus long term debt. A decrease in the value of the ratio may indicate a future debt repayment problem.

Charity Care: the difference between the hospital's published charges and the amount of reimbursement received for services provided to patients from whom reimbursement was not expected. Charity care does not include bad debts, courtesy discounts, contractual allowances, self pay discounts, and charges for health care services provided to employees.

Current Ratio: the measure of the number of dollars held in current assets per dollar of current liabilities. High values imply a good ability to pay short term obligations and low values imply a lesser ability.

Days Cash on Hand: the average number of days of cash available to pay for expenses that is maintained in cash accounts. A higher number is favorable, since it indicates a greater ability to meet outstanding obligations.

Days in Patients Accounts Receivable: the average number of days in collection that patient accounts receivables remain outstanding. A lower number is favorable, since it indicates good

collection practices that result in sufficient cash flow and infrequent short-term financing.

Disproportionate Share Hospital (DSH) Program Payments: payments that provide financial assistance to hospitals that serve a large number of low-income patients, such as the uninsured or people on Medicaid.

Equity Financing Ratio: the ratio related to capital structure that indicates the percentage of net assets to total assets. A higher ratio is more favorable, since it indicates utilization of a higher level of equity and a lower level of debt financing in acquiring plant and equipment assets.

Excess / (Deficiency) of Revenue over Expenses: the difference between the sum of total operating revenue and non-operating revenue less total operating expenses that results in an excess or deficiency of total revenue.

Gross Patient Revenue – total gross patient charges for all patient services before deductions for allowances, charity care and other deductions.

Hospital Parent Corporation: the hospital's corporate holding company that controls through its governing body a hospital and the hospital's affiliates, as presented on the legal chart of corporate structure.

Income / (Loss) from Operations: the difference between total operating revenue and total operating expenses that results in a financial gain or loss from operating activities.

Long-Term Debt to Capitalization Ratio: the measure of the proportion of Long-Term Debt in a capital structure. A lower proportion or percentage is desirable because it allows for obtaining of more favorable terms (i.e., lower interest rates) when borrowing.

Medicaid: the federal and state health insurance program established under Title 19 of the Social Security Act to provide medical assistance on behalf of families with dependent children and for aged, blind or disabled whose income and resources are insufficient to meet the costs of necessary medical services and which is administered by the Department of Social Services.

Medical Assistance: the programs for medical assistance provided under the Medicaid program, including the HUSKY Plan, Part A, or (B) any

APPENDIX AB: GLOSSARY OF TERMS

other state-funded medical assistance program, including the HUSKY Plan, Part B.

Medicare: the federal health insurance program for the aged and disabled.

Net Assets: the residual amount of total assets after all current and long-term liabilities (including long-term debt) are deducted. Also referred to as ownership equity.

Net Patient Revenue: the total gross revenue from patient charges less contractual allowances, less the difference between government charges and government payments, less charity care and less any other allowances.

Non Governmental: any commercial or private payer and includes but isn't limited to managed care organizations, health maintenance organizations, and preferred provider organizations.

Non-Operating Margin: the ratio related to profitability indicating the percentage of non-operating revenue to total revenue. A higher positive ratio indicates more favorable results.

Non-Operating Revenue: the unrestricted revenue not directly derived from providing patient services but obtained from either investment income or philanthropic and non-philanthropic sources.

Operating Expenses: the expenses necessary to maintain regular operating functions and to carry out ongoing activities.

Operating Margin: the ratio related to profitability indicating the percentage of income or loss from operations to total revenue. A higher positive ratio indicates more favorable operating results.

Operating Revenue: the total of net patient revenue from reimbursement of patient services by government and non-government payers plus other operating revenue.

Other Medical Assistance: the difference between Medical Assistance and Medicaid.

Other Operating Revenue: the non-patient service operating revenue that is obtained from operating activities but is accounted for separately from patient service revenues. Other operating revenue includes revenues restricted by a donor or

grantor for operating purposes, and also net assets released from restrictions.

Payer Mix: the proportion of each government or non-government payer's reimbursement to the hospital's total reimbursement for patient services. Payer mix is derived by determining the amount of total gross patient revenue or total net patient revenue that the hospital receives from each government and non-government payer.

Payment to Cost Ratio: the ratio that indicates the percentage above or below cost that a hospital is reimbursed by a government or non-government payer. A ratio that is higher than 1.00 is favorable, since it indicates reimbursement by a payer that is greater than the cost of providing patient services. A ratio that is less than 1.00 is unfavorable, since it indicates reimbursement by a payer that is less than the cost of providing patient services.

Ratio of Cost to Charges: the ratio that indicates the percentage of total operating expense to the total of gross patient charges plus other operating revenue. A lower ratio is more favorable, since it indicates a greater difference between the cost and charges billed for providing patient services.

Total Margin: the ratio related to profitability indicating the percentage of income or loss from operations and non-operating revenue to total revenue. A higher positive ratio indicates more favorable results.

Uncompensated Care: the total amount of the hospital's charity care and bad debts resulting from unreimbursed patient services that are determined by using the hospital's published charges and consistent with the hospital's policies regarding charity care and bad debts.

Uncompensated Care Cost: the total amount of the hospital's charity care and bad debts at charges multiplied by the hospital's ratio of cost to charges.

Uninsured: individuals with no health insurance for the hospital services provided.

Unrestricted Net Assets: the amount of net assets that is not restricted by donors or by a board of directors as to their use.
