Executive Summary

The Department of Public Health, Office of Health Care Access (OHCA) is responsible for the collection, analysis and dissemination of acute care hospital financial information. This report provides information related to the financial stability of Connecticut's acute care hospitals, as mandated in Section 19a-670 of the Connecticut General Statutes (C.G.S.). The report highlights Connecticut's statewide hospital trends and includes individual hospital profiles of financial performance. The report is intended to provide information that will enhance knowledge of the financial status of Connecticut's hospitals.

The report identifies a number of key findings and trends:

- In Fiscal Year (FY) 2016, Connecticut hospitals had a total gain from operations of \$348.1 million, a decrease (18%) from the previous year's gain from operations.
- In FY 2016, hospitals statewide earned \$515.7 million in income from non-operating sources of revenue, a substantial increase from the previous year when hospitals overall lost \$1 million.
- In FY 2016, 71% of hospitals (20 of 28) achieved a positive total margin.
- The average statewide total margin was 7.32% in FY 2016, an improvement over the 3.89% average statewide total margin in the previous year.
- Six hospitals had negative five-year average total margins in FY 2016.
- Total hospital net assets increased by \$24 million, totaling \$5.42 billion in FY 2016.
- Bad debts accounted for over 60% of uncompensated care charges in FY 2016 while charity care accounted for almost 40%, a slight change from last year when bad debt accounted for 62% of charges and charity care 38% of charges.
- Statewide uncompensated care charges totaled \$663 million in FY 2016, increasing \$20 million or 3% over the prior year results.
- The trend toward hospitals becoming part of larger hospital networks continued in FY 2016 with two out-of-State healthcare corporations acquiring three Connecticut health systems since the last publication of this report.

Introduction

The Department of Public Health, Office of Health Care Access (OHCA) is responsible for the collection, analysis, and dissemination of acute care hospital financial information. This report provides information related to the financial stability of Connecticut's 28 acute care hospitals, as mandated in Section 19a-670 of the C.G.S.. The following narrative provides a summary of the financial performance of Connecticut's hospitals during Fiscal Year (FY) 2016¹ and presents some key statewide hospital financial indicators.²

Connecticut state statutes and regulations³ require each short-term acute care general or children's hospital, whether structured as for-profit or not-for-profit, to annually submit financial and statistical information to OHCA. Hospital audited financial statements, which include balance sheet and statement of operations information are a primary source of information in this report. OHCA also uses data filed each year by hospitals in their Annual Report and Twelve Month Actual filing submissions. This report also uses the annual hospital filings submitted to OHCA, which include utilization statistics, uncompensated care data, free bed funds and legal charts of corporate structure.

The report highlights Connecticut's statewide hospital trends, includes individual hospital profiles of financial performance, and is intended to provide information that will enhance knowledge of the financial status of Connecticut's hospitals. While there are numerous financial and operating indicators that provide a means to measure hospital performance, this report focuses primarily on measures involving profitability, cost data, liquidity, solvency, net assets, discharges by payer and uncompensated care, which are considered strong indicators of the hospitals' financial and operating strength.

In reading this report, the reader should note that some FY 2015 financial and statistical data elements previously reported may have been updated by the hospitals during the FY 2016 filing process. This updated information has been included in this publication to improve reporting accuracy and comparability between FY 2015 and FY 2016 data reported.

¹For the purpose of filing fiscal year end results with OHCA, Connecticut's acute care hospitals' Fiscal Year 2016 began on October 1, 2015 and ended on September 30, 2016.

²OHCA used OPTUMInsight (formerly INGENIX) 2016, *Almanac of Hospital Financial & Operating Indicators, A Comprehensive Benchmark of the Nation's Hospitals*, as the source for calculating financial ratios.

³Sections 19a-644 and 19a-676, C.G.S. and Section 19a-643-206 of the Regulations of Connecticut State Agencies.

Hospital Income and Financial Performance

Hospitals must be able to generate sufficient cash flow to pay for operations and debt service, to provide a source of capital for facility needs and strategic initiatives and to increase cash reserves. In FY 2016, Net Patient Revenue (NPR) increased by 3.5% over FY 2015 while operating expenses rose 5.2%. Statewide NPR was approximately \$10.7 billion and accounted for 95% of operating revenues. In FY 2016, nearly half (47%) of hospital net revenue continued to be generated from governmental payers such as Medicare, Medicaid, CHAMPUS/TRICARE and Medical Assistance. These same payers also accounted for the majority of statewide discharges (68%).

In FY 2016, Connecticut hospitals had a total gain from operations of \$348.1 million, an 18% decrease from the previous year when operating profits were \$422.1 million. This decrease is attributable to the slight increase in total operating expenses. Nineteen hospitals reported positive operating margins in FY 2016; comparable to the results of the prior year when 18 hospitals posted positive operating margins. Some hospitals did particularly well on a margin basis, such as Backus and Griffin, but some hospitals did poorly, such as Rockville and Windham, both of which have had negative operating margins on a regular basis in recent years.

In FY 2016, non-operating revenue, which is derived primarily from investments in stocks and bonds, the value of held securities, endowments and charitable contributions, was \$515.7 million; a sharp reversal from the \$1 million loss experienced by hospitals in the previous year. *It should be noted that \$281 million of this amount was related to transfers from the University of Connecticut Health Center (UCONN) to Dempsey Hospital in FY 2016.* Just six hospitals (Griffin, Johnson, Manchester, Rockville, Sharon and Windham) reported negative non-operating revenue in FY 2016.

Combined, these factors resulted in excess revenue over expenses of approximately \$864 million (see **Table 1**), an increase of over 100% from the \$421.1 million earned last year. However, a robust financial picture should rely more on patient and other operating revenues and not on less than reliable income sources, such as investment performance. While income from operations decreased in FY 2016, total revenues in excess of expenses more than doubled in FY 2016 indicating an improved financial picture, as a whole.

Table 1

STATEWIDE HOSPITALS				
STATEMENT OF OPERATIONS DATA	2013	2014	2015	2016
Net Patient Revenue	\$9,766,243,841	\$10,012,328,984	\$10,304,993,152	\$10,666,761,080
Other Operating Revenue	\$477,106,882	\$476,677,182	\$510,874,357	\$617,316,728
Total Operating Revenue	\$10,243,350,723	\$10,489,006,166	\$10,815,867,509	\$11,284,077,808
Total Operating Expenses	\$9,909,485,912	\$10,019,930,389	\$10,393,703,516	\$10,935,989,500
Income/(Loss) from Operations	\$333,864,811	\$469,075,777	\$422,163,993	\$348,088,308
Non-Operating Revenue	\$263,214,548	\$195,875,728	(\$1,006,236)	\$515,712,373
Excess/(Deficiency) of Revenue over Expenses	\$597,079,359	\$664,951,505	\$421,157,757	\$863,800,681

Source: Hospital Audited Financial Statements

Figure 1 below shows the trends for statewide hospital average operating, non-operating and total margins for the last four years, which illustrate changes in statewide hospital financial performance, on average, over this time period.

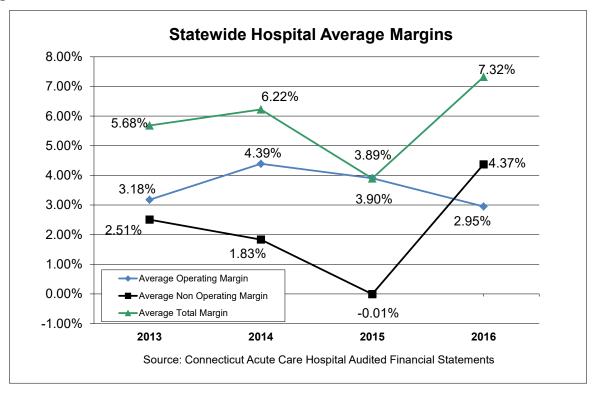

Figure 1

As indicated previously, in FY 2016, hospitals had total revenue in excess of expenses of \$864 million, an increase of over 100% or almost \$443 million from the previous fiscal year. This upward trend is also reflected in the statewide average total margin which rose to 7.32% from 3.89% the previous year. During FY 2016, all but 11 hospitals reported an improved total margin. The hospitals that had a lower total margin in FY 2016 were Bridgeport, Bristol, Hungerford, Johnson, L+M, Manchester, Norwalk, Rockville, Stamford, Waterbury and Windham. It should be noted that some of these hospitals (Bridgeport, Norwalk and Stamford) still had a total margin that was higher than the statewide average total margin of 7.32%.

Individual results ranged from a high of +43.3% (Dempsey) to a low of -38.3% (Sharon⁴). There were 20 hospitals that posted positive total margins in FY 2016, which was an increase from the previous year when just 17 hospitals had positive total margins. There were 8 hospitals that reported negative total margins; Bristol, Hungerford, Johnson, Manchester, Rockville, Sharon, Waterbury and Windham. Some of these hospitals have consistently reported a negative total margin for many years, such as Windham. More detailed hospital statement of operations and margin data are provided in Appendices I and J, which provide results by individual hospital.

⁴Sharon Hospital had an impairment loss on long lived assets which affected their total margin in FY 2016.

Five Year Financial Performance

Table 2 on the following page provides five-year weighted average total margins for Connecticut's acute care hospitals. Hospitals need to generate revenue in excess of expenses to remain profitable. Expenses exceeding revenues over a period of several years may be indicative of financial distress. Those hospitals with a negative total margin are not achieving sufficient revenue to pay all of their expenses and must use other sources of funds, such as cash reserves or the liquidation of assets, to pay their expenses. To make improvements to facilities and equipment, hospitals must have operating gains or access to sources of capital.

Listed below are key findings from **Table 2** on the following page:

- Six hospitals (Johnson, Milford, Rockville, Sharon, Waterbury and Windham) had negative five-year average total margins over the period FY 2012 FY 2016.
- Windham had negative total margins for all five fiscal years and has reported a negative total margin for the past eight years.
- Rockville and Windham both had negative total margins in the past year that were nearly three times greater than the previous year's amount.
- Six hospitals, (Danbury, Day Kimball, HOCC, Milford, St. Francis, St. Vincent's) that experienced negative total margins last year improved to positive total margins in FY 2016.
- Milford reported its first positive total margin after reporting a negative total margin for eight straight fiscal years.
- Four of the six hospitals with a negative five-year margin were acquired by larger hospital systems during the last 20 months.
- There were 22 hospitals with positive five-year average total margins.
- Eleven hospitals consistently sustained positive total margins in each of the five years and nine additional hospitals had a positive total margin in four of the five years.
- Overall, the statewide five-year weighted average total margin for FY 2012 FY 2016 was 5.97%; a slight increase from 5.23% last year.
- Eleven hospitals reported a five-year total margin greater than the statewide average of 5.97%.

Table 2

Hospital Total Margin Trends FY 2012 - FY 2016								
	FY 2012-2016							
	5 YEAR	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016

SAINT RAPHAEL	n/a	4.90%	n/a	n/a	n/a	n/a		
STATEWIDE (Note A)	5.97%	6.63%	5.68%	6.22%	3.89%	7.32%		
Median (Note B)	5.0%	5.5%	4.1%	4.9%	3.4%	5.3%		

Note A: Weighted average by dollar amounts. Revenue in excess of expenses/(revenue from

operations+(revenue in excess of expenses - gain/loss from operations))

Note B: Middle margin in numerical order

Note C: The former Hospital of St. Raphael and New Milford Hospital are presented for historical information only.

Note D: Sharon's FY 2015 & FY 2016 total margins are due to accounting adjustments to their audited financial statements. Note E: Dempsey FY 2016 non operating revenue was the result of State appropriations and transfers from UCONN Health.

Balance Sheet Strength and Liquidity

The strength and liquidity of a hospital or any organization may be measured by using various financial ratios. Liquidity ratios measure the amount of or how well a hospital utilizes its current or short-term assets to pay off its short-term obligations. Liquidity is an indication of how easily an asset can be converted into other types of assets or used to buy services or satisfy obligations. In FY 2016, some of the hospitals that reported strong operating profits also tended to have liquidity ratios that were better than the statewide median. Three hospitals had liquidity ratios that were better than the statewide median. Three hospitals had liquidity ratios that were better than the statewide median for all of the liquidity ratios calculated by OHCA (Dempsey, L + M and St. Francis). Milford, while profitable overall, still experienced liquidity ratios that did not compare favorably to the statewide median for all indicators. Among the hospitals that were not profitable, Johnson and Manchester both experienced liquidity ratios which compared unfavorably with the statewide median for all of the liquidity measures calculated by OHCA.

On a statewide basis, the hospitals' liquidity indicators showed mixed results for the four measures calculated in this report. The Days Revenue in Patient Accounts Receivable, which measures how quickly a hospital collects account balances, declined slightly from a statewide median of 37 days last year to 35 days in FY 2016 and the median Days Cash on Hand, which measures how much cash a hospital has to pay for expenses, rose slightly from 24 days last year to 26 days in FY 2016; positive movements for both indicators. Average Payment Period, which measures the average time taken to pay creditors, rose from a statewide median of 67 days last year to 71 days in FY 2016; a negative trend; and the median Current Ratio, a liquidity indicator that measures a hospital's ability to pay its short-term debts with its short-term assets, remained unchanged at 1.5 in FY 2016.

Solvency ratios measure the ability of a hospital to pay off its long term debt. Solvency measures can indicate whether or not a hospital can continue to pay all of its short-term and long-term liabilities as they become due from creditors. Similar to liquidity ratios, hospitals which have strong solvency measures also tended to report strong operating profits. In FY 2016, 5 hospitals had solvency ratios which compared favorably to the statewide median for all solvency ratios calculated by OHCA (Backus, Dempsey, Greenwich, Middlesex and St. Mary's). Similar to liquidity measures, some hospitals while profitable, still experienced solvency ratios that compared unfavorably to the statewide median for all indicators. These included L + M and St. Francis. Among the hospitals that were not profitable, Bristol and Manchester experienced unfavorable solvency ratios compared to statewide median for all of the solvency measures calculated by OHCA.

On a statewide basis, hospitals' median solvency ratios were favorable compared with the previous year for all three measures calculated in this report. The median Equity Financing Ratio, a solvency measure related to capital structure that indicates the percentage of a hospital's total assets financed with its own funds as compared to debt, had a positive change, rising slightly from 33.5% in the prior year to 33.8% in FY 2016. The median Cash Flow to Total Debt Ratio, which provides an indication of potential future debt repayment difficulty or insolvency, rose from 17.5 in the prior year to 21.5 in FY 2016 and the median Long-Term Debt to Capitalization Ratio, which measures the proportion of long-term debt in a hospital's capital structure, dropped from 35.8 the prior year to 21.4 in FY 2016; all favorable trends. More detailed hospital liquidity and

solvency measures are provided in Appendices P and Q, which provide results by individual hospital.

Another balance sheet item that indicates financial strength of an organization is the amount of net assets the organization maintains. Total statewide hospital net assets were \$5.4 billion in FY 2016, a \$24 million increase from the prior year. Net assets are also referred to as a hospital's ownership equity. Primary factors affecting total net assets include changes in unrealized gains and losses, a hospital's excess or deficiency of revenue over expenses, monetary transfers to or from a hospital affiliate, pension and post retirement-related changes, and net assets released from restrictions and used for operating purposes. In FY 2016, ten hospitals (Backus, Bridgeport, CT Children's, Dempsey, Middlesex, Norwalk, St. Francis, St. Mary's, Stamford and Yale) experienced net asset increases compared to eight hospitals last year. It should be noted that six hospitals, (Day Kimball, Griffin, Johnson, Manchester, Milford and Windham) all had negative net assets for FY 2016, indicating that hospital assets less their liabilities was a negative amount. Four of these hospitals (Day Kimball, Griffin, Milford and Windham) also had negative net assets in the prior year. More detailed data on specific hospital net asset totals is provided in Appendix N.

Uncompensated Care

Emergent, non-elective patients at Connecticut's hospitals must be treated, regardless of their ability to pay. Uncompensated care (UC) represents health care provided to patients by hospitals that will not be reimbursed. There are two components of uncompensated care: charity care and bad debt. Charity care occurs when a hospital knows in advance that the care provided will not be reimbursed. Bad debt is incurred after a service has been provided, with no forewarning of non-payment. Appendix R of this report provides an overview of the hospitals' uncompensated care data for FY 2016.

In FY 2016, statewide uncompensated care charges (UC charges) totaled \$663.3 million, an increase of \$19.7 million or 3.1% from the previous year. Total statewide bad debt of \$401.6 million, rose by \$1.7 million; an increase of just 0.4% and total statewide charity care of \$261.7 million rose by \$18 million, an increase of 7.4%.

Overall, bad debt as a percentage of total hospital UC charges decreased slightly to 60.5% in FY 2016, down from 62.1% last year. The hospitals with the highest percentage of bad debt to total hospital UC charges were Dempsey (94.1%), Milford (93.0%), Johnson (92.5%), Day Kimball (90.7%) and Sharon (82.8%). Conversely, charity care as a percentage of total UC charges increased from 37.9% in the prior year to 39.5% in FY 2016. The hospitals with the highest percentage of charity care to total hospital UC charges were Hartford (83.7%), Midstate (67.2%), Griffin (66.0%), HOCC (61.3%) and Bristol (65.1%).

Uncompensated care costs (UC costs) are the costs hospitals incur providing care for which no payment was received from the patient or insurer. Hospital charges include the actual cost of care plus a mark-up to generate additional income. This additional income is used by hospitals to recoup fixed costs, generate funds for future investment and to maintain profitability. UC costs are calculated from hospital charges using a ratio of cost-to-charges and attempt to remove the additional mark-up to determine the "true cost" of care (see Appendix R).

In FY 2016, statewide UC costs totaled \$205.3 million, an increase of \$5.4 million or 2.7%, from the previous year. The statewide UC costs accounted for 1.9% of total expenses, which was consistent with the previous year. Fourteen hospitals experienced a decrease in UC costs in FY 2016 and 3 of the 14 (Dempsey, Hartford and Johnson) decreased by more than 25%. The remaining 14 hospitals experienced an increase in UC costs in FY 2016 with 4 of the 14 (CT Children's, Greenwich, Manchester and Waterbury) increasing by more than 25%.

OHCA has stated for the past several years that, as the Patient Protection and Affordable Care Act (PPACA) expands health care coverage in Connecticut, UC Costs should decrease. However, a significant reduction in the overall costs may take some time and may not decrease uniformly at individual hospitals. FY 2016 was the second full year under the PPACA and hospitals had continued to experience an overall reduction in UC Costs. A direct correlation however, cannot be made using the data as filed. Even though these reductions did not occur uniformly at individual hospitals, half of hospitals had decreases in their total UC Costs in FY 2016 compared to the previous year, which may be in part a result of the implementation of the PPACA.

Financial Status of Hospital Health Systems

In FY 2016, the hospital corporate systems, which include hospital parent corporations and all subsidiaries, had somewhat mixed results. Hospital health systems⁵ in Connecticut had an overall loss from operations of \$115.3 million, an improvement over the \$137.2 million loss the previous year. There were 9 health systems⁶ that reported positive operating margins in FY 2016, and 11 systems reporting operating losses. In all but 4 cases (L+M, Milford, Sharon, and UCONN), if the hospital had an operating gain (or loss) then the hospital's parent also had an operating gain (or loss). Some health systems posted large operating gains, such as Yale with a gain of \$139 million. UCONN, however, had a large impact on statewide amounts with its \$310 million operating loss, similar to the previous year.

Health systems reported total non-operating revenues of \$998 million. As indicated in the health systems' audited financial statements, a large portion of these non-operating gains (\$705 million) were the result of \$464 million in State and Capital appropriations for UCONN and a \$241 million contribution to non-operating revenue received by Yale when it affiliated with L+M Corporation. *Excluding these amounts significantly decreases the total statewide health system non-operating revenue results to just \$293 million*. Non-operating revenue is generally a means for health systems to boost their financial year-end performance. On a positive note, in FY 2016, 17 of the 20 health systems reported gains in non-operating revenues, an improvement over last year when just 12 of the 20 systems reported positive non-operating revenues.

Health systems had total revenue in excess of expenses of \$882.8 million in FY 2016, an increase of \$605.1 million or 218% from the previous fiscal year. This resulted in a statewide average total margin of 6.2% for the hospital corporate systems, an increase from the 2.1% earned in the prior year. Total margins in FY 2016 ranged from a high of 12.5% (UCONN) to a low of -30.7% (Sharon). There were 12 health systems that reported an improvement in total margin over the previous year and 9 health systems reported a negative total margin (Bristol, ECHN, Greater

⁶These amounts are from the individual health system's Statement of Operations for FY 2016. In FY 2016, activity from certain out of state affiliates, such as Westerly Hospital (RI) and Mercy Medical Center (MA) have been excluded from the health system amounts so that this presentation more accurately reflects statewide (Connecticut) results. OHCA notes that in FY 2015 L+M contained data from Westerly Hospital in Rhode Island. The FY 2016 liquidity and solvency measures exclude activity from the former Johnson Memorial Medical Center and St. Mary's Health System due to the timing of those acquisitions.

⁵See Appendices A-H for listings of the 20 hospital parent corporations reporting to OHCA in FY 2016.

Waterbury, Hungerford, Johnson, L+M, Milford, Saint Vincent's and Sharon). More detailed health system statement of operations and margin data are provided in Appendix A and B.

In FY 2016, most of the hospital corporate systems' various liquidity measures were slightly better on a statewide median basis compared with the previous year. The statewide median Current Ratio rose from 1.59 in the previous year to 1.75 in FY 2016. Statewide median Days Cash on Hand presented better results for the hospital corporate systems, increasing from 35 days last year to 37 days in FY 2016. Days Revenue in Accounts Receivable dropped from 39 days previously to 35 days, another positive result. On the negative side, the Average Payment Period for health systems dropped from 62 days last year to 65 days in FY 2016.

Similar to statewide median liquidity ratios, hospital corporate systems' median solvency measures had slightly mixed results as well in FY 2016. The median statewide Equity Financing Ratio decreased to 40% from 42% last year, an unfavorable trend. The median Cash Flow to Total Debt Ratio rose from 9.3 last year to 14.0 this year and the Long-Term Debt to Capitalization Ratio dropped from 32.8 last year to 31.7 in the current year; both positive trends.

The total net assets of hospital corporate systems⁷ increased to \$6.67 billion in FY 2016, an increase of \$190 million, or 3%, from the previous year. However, in FY 2016, most health systems continued to report a decrease in net assets with the exception of CCMC, Hartford, Middlesex, St. Francis, Stamford, UCONN and Yale. The two health systems with the largest changes were St. Vincent's (-\$342 million) due to a sizable portion of the systems' long term investments going back to Ascension Health to be managed; and Yale (+\$429 million) which rose due to investments, donations and its affiliation with L+M Corporation as noted previously. Detailed data on specific health system liquidity and solvency measures, in addition to net asset data is provided in Appendices F, G and H.

A new analysis table provided this year as Appendix Y is a comparison of health system financial results based on the system Audited Financial Statements. It shows that the operating revenue of hospitals made up 85% of total health system operating revenues. Other entities associated with the health systems, such as medical groups and physician practices, insurance companies, imaging and rehabilitation centers, visiting nurse associations and real estate companies, accounted for the remaining 15% of total operating revenues on a median basis. It also shows that the operating expenses of hospitals made up 84% of total health system expenses while other related entities made up the remaining 16% of total statewide health system expenses on a median basis.

All health systems, with the exception of Bristol, Hartford and WCHN, experienced an operating loss from their other non-hospital system entities. The largest by far, a \$315 million loss experienced by UCONN's other related entities, helped contribute to an overall statewide loss of \$463 million from other system entities. Physician practices and medical groups that are under the corporate umbrella of the health systems, collectively accounted for approximately \$350 million in operating losses; the largest area of losses for health systems. As the size and complexity of the hospital systems continue to expand, it will be interesting to see if these percentages and results will remain steady and consistent in the future. More specific data comparing the results of hospitals with health systems is provided in Appendix Y.

⁷The financial results of a hospital system include each hospital's parent corporation, the hospital itself and any other subsidiaries under the hospital parent organization. Therefore, the statewide hospital systems' net assets of \$6.67 billion in FY 2016 includes the statewide hospitals' nets assets for FY 2016.

Utilization Indicators

Utilization measures provide additional information essential to understanding hospital performance. Significant fluctuations of patient volume or length of stay, for example, can enhance or detract from a hospital's financial performance. Appendix S of this report provides hospital utilization statistics for FY 2016.

For more detailed utilization data, refer to OHCA's publication entitled "Statewide Health Care Facilities and Service Plan" released in August 2017, which contains a comprehensive look at the utilization of services in Connecticut's acute care hospitals. The report may be accessed at OHCA's website Office of Health Care Access website.

A Discussion of Hospitals within Affiliated Systems

Connecticut continues to have an increasing number of hospitals that operate within corporate systems directly related to other Connecticut hospitals or, in several cases, to out-of-State hospitals. Significant activity has occurred since the last publication of the Financial Stability Report in September, 2016. The details of these affiliations are provided below and a complete list of the Connecticut acute care hospitals that operate within larger systems is provided in Appendix Z.

On June 10, 2016, OHCA issued a Certificate of Need Final Decision allowing Prospect Medical Holdings ("PMH") of Los Angeles California to purchase all of the assets of Eastern Connecticut Health Network ("ECHN"). The transfer includes both Manchester Memorial Hospital and Rockville General Hospital. On July 15, 2016, OHCA issued another Certificate of Need Final Decision to PMH, allowing the company to purchase all of the assets of Greater Waterbury Health Network ("GWHN"), which includes Waterbury Hospital. On October 1, 2016, ECHN's subsidiaries Manchester Memorial Hospital and Rockville General Hospital became wholly owned subsidiaries of Prospect ECHN, Inc. and were renamed Prospect Manchester Hospital, Inc. d/b/a Manchester Memorial Hospital and Prospect Rockville Hospital, Inc. d/b/a Rockville General Hospital; ECHN, Inc. Also, on October 1, 2016, Waterbury Hospital became a wholly owned subsidiary of Prospect CT, Inc., a subsidiary of Prospect Medical Holdings, Inc. and was renamed Prospect Waterbury, Inc. d/b/a Waterbury Hospital. These transactions will mark the first purchases of any Connecticut hospitals by a for-profit chain since the 2001 transaction involving Sharon Hospital.

Most recently, on August 1, 2017, Essent Healthcare of Connecticut, Inc. d/b/a Sharon Hospital, a for-profit entity, became a non-profit wholly owned subsidiary of Health Quest Systems, Inc. and was renamed Vassar Health Connecticut, Inc. d/b/a Sharon Hospital. This is the first hospital transaction in the State in which a for-profit reverted back to non-profit status. Health Quest Systems, Inc. owns and operates a number of hospitals in the Eastern New York region.

The planned affiliation of hospital health systems with both local and national hospital chains remains an active trend within Connecticut's hospital industry. This may be the result of many factors including, but not limited to, the costs associated with aging infrastructure, challenges in

recruiting and retaining physicians, establishing physician partnerships and sharing clinical expertise, the need to provide health services that a community requires, the necessity for economies of scale for hospital services, such as information technology, supplies and equipment and access to capital and resources necessary to reduce operational costs and grow medical services. These various influences seem to be playing an increasingly significant role in the ongoing reshaping of Connecticut's hospital systems and the formation of more affiliations, both non-profit and for-profit.

As part of the transfer of ownership approval process, OHCA places certain conditions on hospitals that are being acquired to ensure patients maintain access to needed services and as a safeguard against increasing costs. For example, hospitals agree to submit capital investment plans, report on financial measures and results, incorporate a generous charity care policy and maintain community benefit programs and community building activities. In some cases, hospitals are also required to contract with an independent monitor to ensure compliance with OHCA's conditions and initiate a Cost and Market Impact Review to determine the impact on healthcare costs and market performance.

Concluding Statement

Statewide hospital income from operations decreased in FY 2016 for the second year in a row, however, statewide hospital investment performance along with other non-operating sources of income, rose dramatically, making up for the decline in operating performance. While non-operating income is helpful to hospitals during times of decreased operating revenue, it may be considered risky to expect these gains to continue indefinitely.

Connecticut continues to have an increasing number of hospitals that operate within a hospital corporate system. Hospital financial performance may continue to change as a result of recent consolidations in this rapidly changing healthcare environment.

Statewide Health System Data Statewide Hospital Data & Individual Hospital Data

The following sections provide an aggregate statewide profile of hospital parent corporations and aggregate statewide profile of hospital summary totals for both financial and statistical indicators. In addition, individual hospital profiles are presented for each of Connecticut's acute care hospitals. The final section of this report contains detailed appendices by hospital, parent corporation and by hospital as identified in the table of contents. Unless otherwise indicated, the sources of data used in these sections are the OHCA Hospital Reporting System (HRS) and the hospitals' annual filings to OHCA.

STATEWIDE HOSPITAL HEALTH SYSTEM PROFILE

Reported below is the total Statewide Health System statement of operations summary for Fiscal Year 2013 - Fiscal Year 2016, a summary of profitability margins, net assets and selected liquidity and solvency measures.

STATEWIDE HEALTH SYSTEM STATEMENT OF OPERATIONS SUMMARY	2013	2014	2015	2016

WILLIAM W. BACKUS HOSPITAL

The William W. Backus Hospital is located in Norwich. In FY 2016, the Hospital generated \$36.5 million in income from operations and had \$31.8 non-operating revenue, resulting in an excess of revenues over expenses of \$68.3 million. Reported below is a list of various financial indicators and selected utilization measures for the Hospital. A chart indicating all of the affiliates of the Hospital's parent, Hartford Healthcare Corporation, based on OHCA filings, can be found in Appendix AA.

HARTFORD HEALTHCARE CORPORATION

HOSPITAL OF CENTRAL CONNECTICUT

The Hospital of Central Connecticut is located in New Britain. In FY 2016, the Hospital generated \$6.3 million in income from operations and had \$13.5 million in non-operating revenue, resulting in an excess of revenues over expenses of \$19.8 million. Reported below is a list of various financial indicators and selected utilization measures for the Hospital. A chart indicating all of the affiliates of the Hospital's parent, Hartford Healthcare Corporation, based on OHCA filings, can be found in Appendix AA.

Beginning with FY 2014, for financial reporting purposes, OHCA is using Yale New Haven Health Services corporation as the parent corporation for the hospital. OHCA formerly used Yale New Haven Network which was merged into the hospital in 2014.

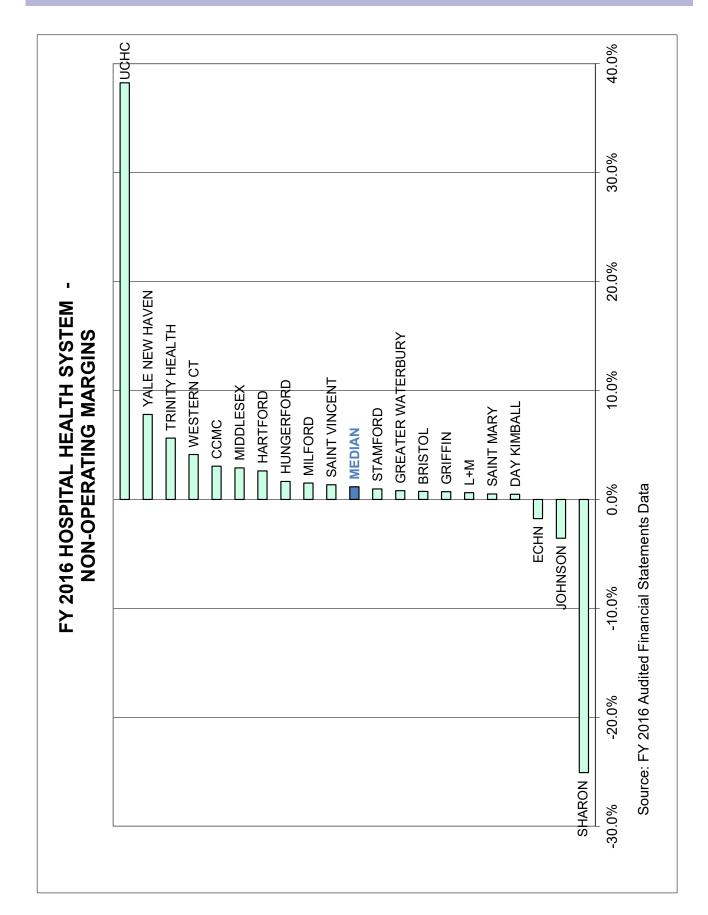

Note: Financial measures noted in green are favorable compared to the statewide average while financial measures noted in red are unfavorable compared to the statewide average. In some cases, the 2016 amount and the statewide average show the same amount. The red and green formatting is based on additional decimal spaces that are not shown.

Prospect Medical Holdings acquired Manchester Memorial Hospital, Rockville General Hospital and Waterbury Hospital in October 2016, which is FY 2017.

These hospitals are grouped for FY 2016 only to reflect current organizational structure.

Trinity Health of New England acquired St. Francis Hospital & Medical Center, Johnson Memorial Medical Center and St. Mary's Hospital during FY 2016.

Sharon Hospital Holding Company ("Sharon") had an impairment loss on long-lived assets affecting non-operating revenue.

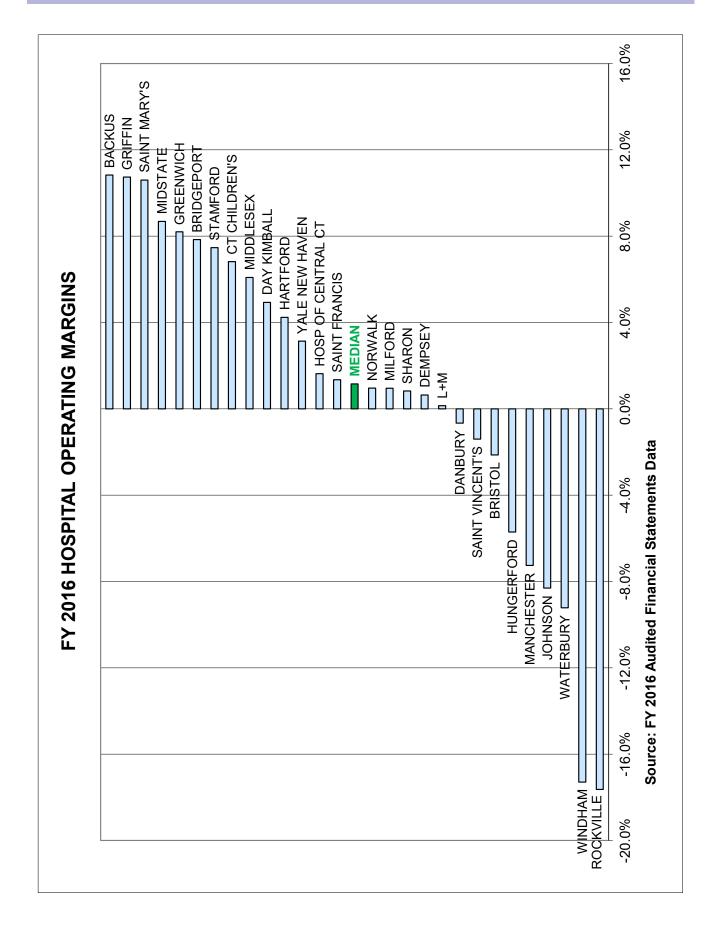

The new Connecticut system parent is Prospect CT, Inc.

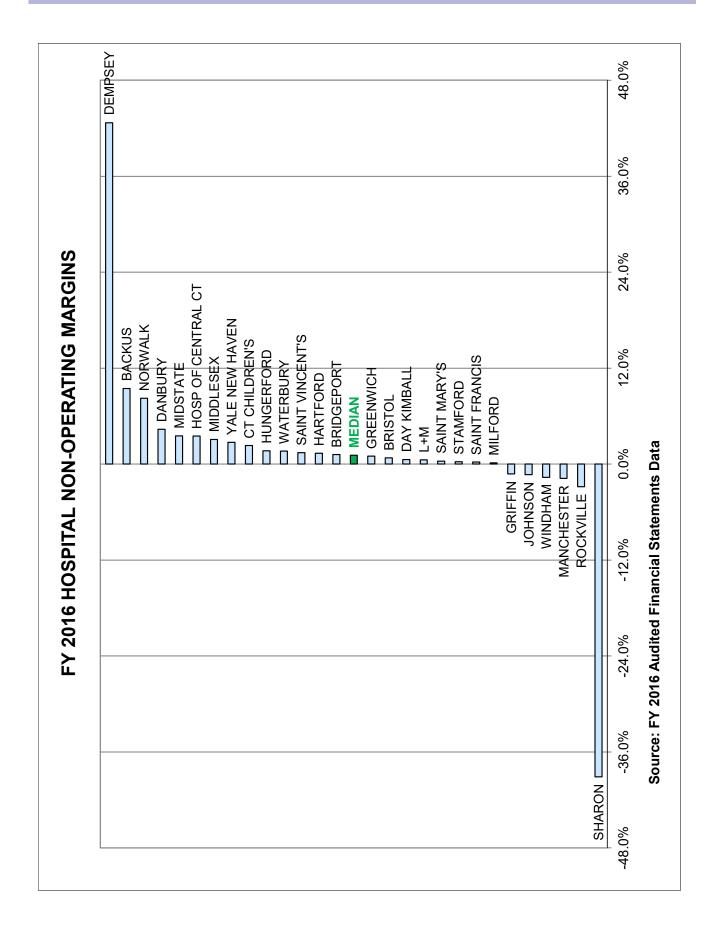

Votes:

Yale New Haven Health Services acquired Lawrence & Memorial Hospital in September 2016, the end of FY 2016. John Dempsey Hospital non-operating revenue was the result of State appropriations and tranfers from UCHC.

APPENDIX AA: CORPORATE AFFILIATIONS BETWEEN HOSPITALS

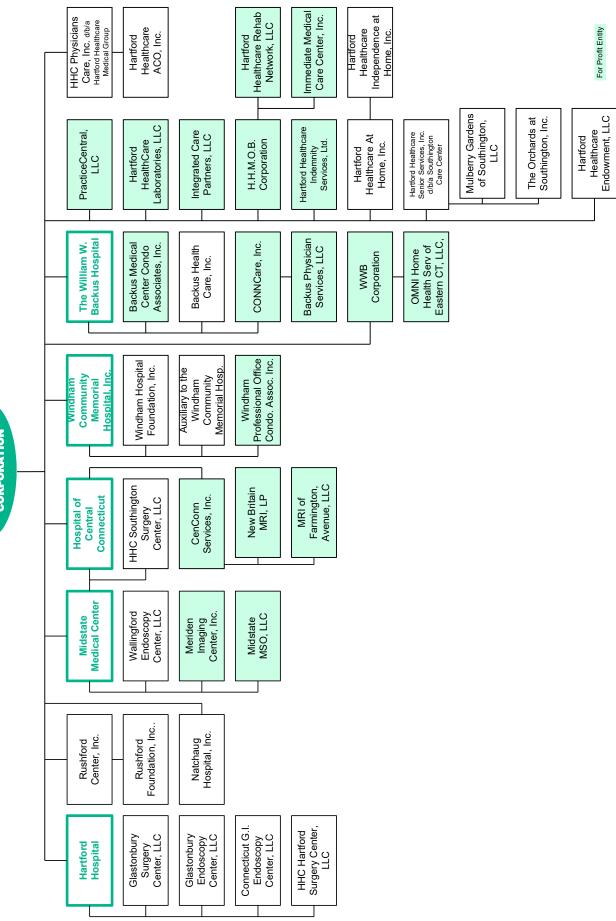

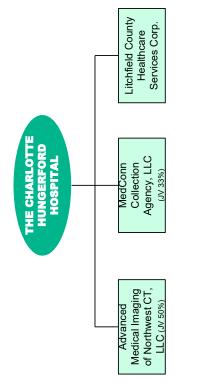

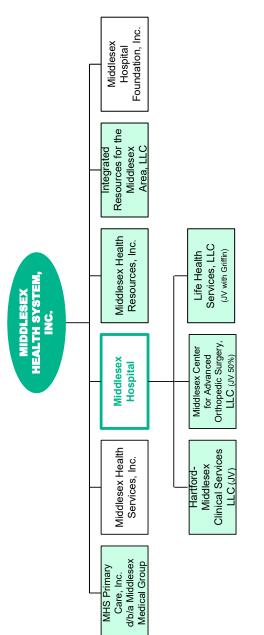

APPENDIX AB: HEALTH SYSTEM CHARTS OF ORGANIZATION

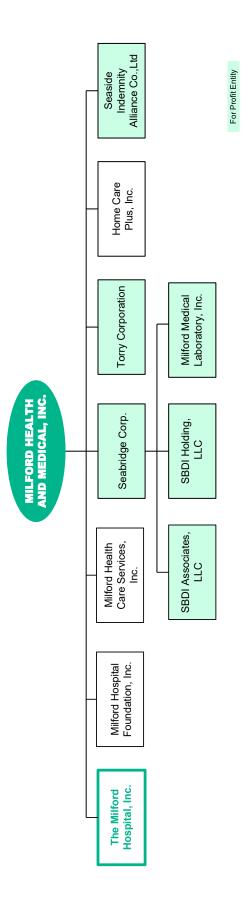

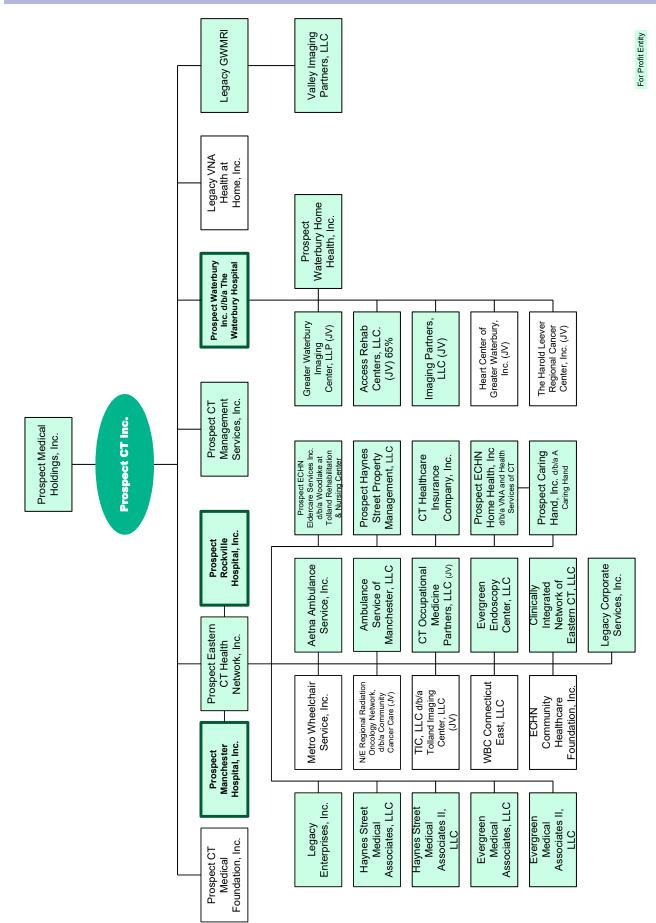

HARTFORD HEALTHCARE CORPORATION

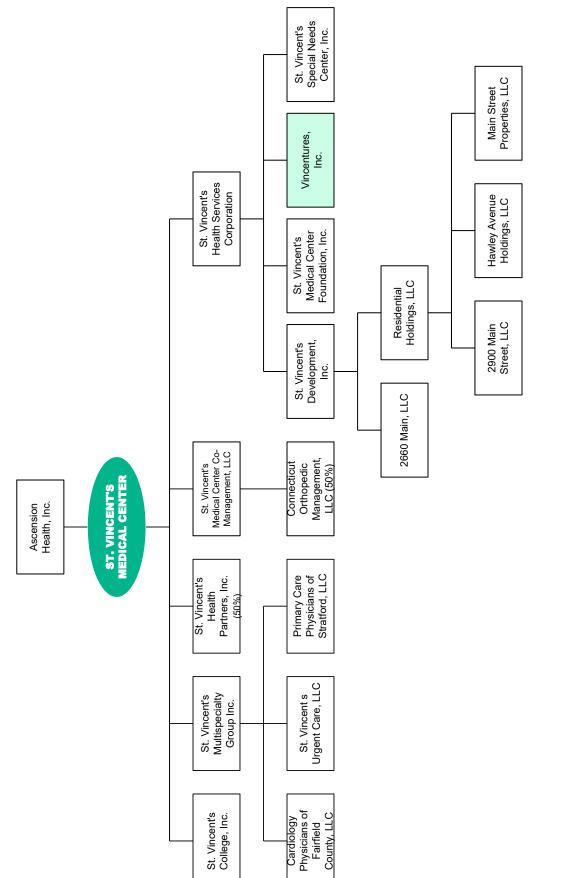

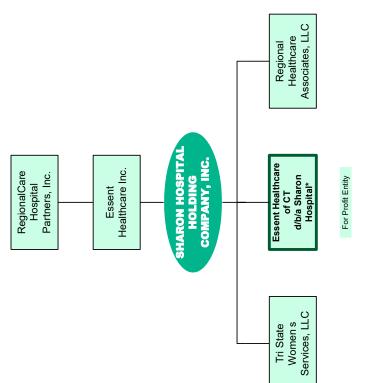

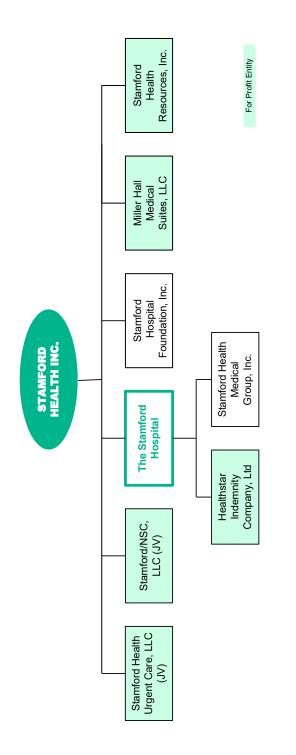

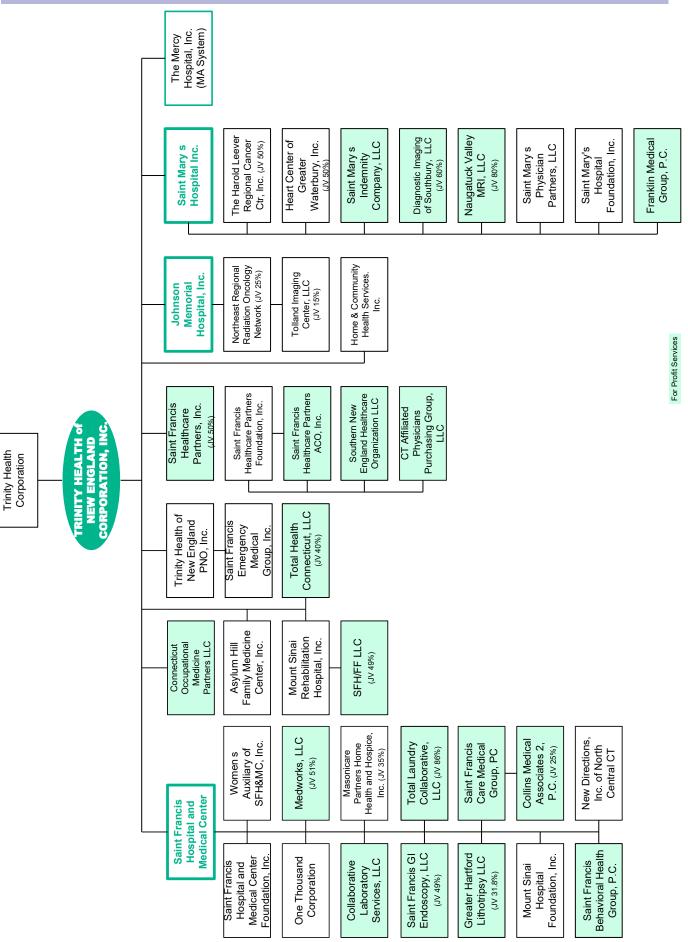

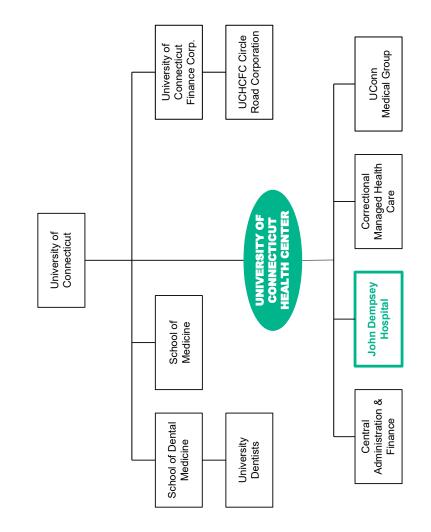

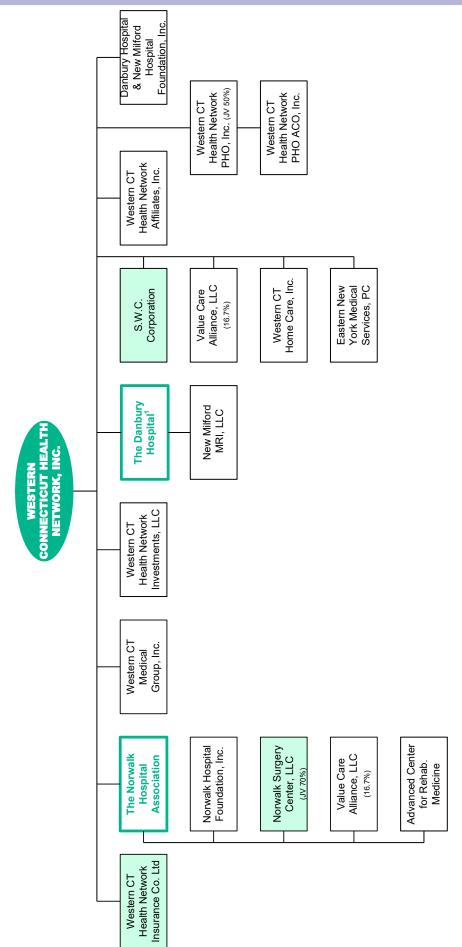

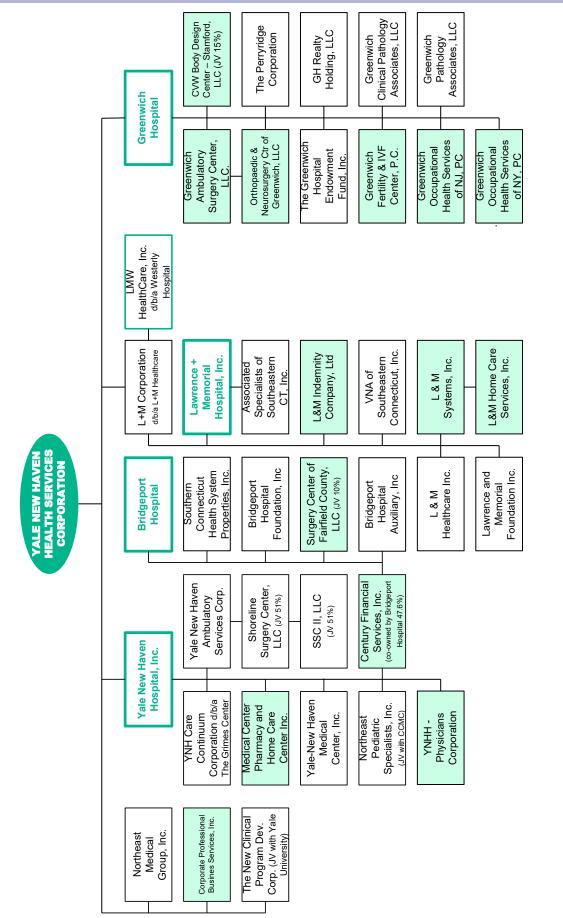

¹Includes Danbury and New Milford campuses.

Average Payment Period: the average number of days that are required to meet current liabilities. A lower number of days is favorable, since it indicates a more favorable liquidity position.

Bad Debts: the income lost to the hospital because patients who were billed and from whom payment was expected did not pay amounts owed to the hospital for services provided. Bad debts net of recoveries will result in bad debt expense, if after reasonable collection efforts are made, the hospital determines that the accounts are uncollectible.

Case Mix Index: the arithmetic mean of the Medicare diagnosis related group case weights assigned to each inpatient discharge for a hospital during the fiscal year. The case mix index is calculated by dividing the hospital's total case mix adjusted discharges by the hospital's actual number of discharges for the fiscal year.

Cash Flow to Total Debt Ratio: an indicator of potential future debt repayment difficulty or insolvency. It is calculated by dividing excess of revenues over expenses plus depreciation by current liabilities plus long term debt. A decrease in the value of the ratio may indicate a future debt repayment problem.

Charity Care: the difference between the hospital's published charges and the amount of reimbursement received for services provided to patients from whom reimbursement was not expected. Charity care does not include bad debts, courtesy discounts, contractual allowances, self pay discounts, and charges for health care services provided to employees.

Current Ratio: the measure of the number of dollars held in current assets per dollar of current liabilities. High values imply a good ability to pay short term obligations and low values imply a lesser ability.

Days Cash on Hand: the average number of days of cash available to pay for expenses that is maintained in cash accounts. A higher number is favorable, since it indicates a greater ability to meet outstanding obligations.

Days in Patients Accounts Receivable: the average number of days in collection that patient accounts receivables remain outstanding. A lower number is favorable, since it indicates good

collection practices that result in sufficient cash flow and infrequent short-term financing.

Disproportionate Share Hospital (DSH) Program Payments: payments that provide financial assistance to hospitals that serve a large number of low-income patients, such as the uninsured or people on Medicaid.

Equity Financing Ratio: the ratio related to capital structure that indicates the percentage of net assets to total assets. A higher ratio is more favorable, since it indicates utilization of a higher level of equity and a lower level of debt financing in acquiring plant and equipment assets.

Excess / (Deficiency) of Revenue over Expenses: the difference between the sum of total operating revenue and non-operating revenue less total operating expenses that results in an excess or deficiency of total revenue.

Gross Patient Revenue – total gross patient charges for all patient services before deductions for allowances, charity care and other deductions.

Hospital Parent Corporation: the hospital's corporate holding company that controls through its governing body a hospital and the hospital's affiliates, as presented on the legal chart of corporate structure.

Income / (Loss) from Operations: the difference between total operating revenue and total operating expenses that results in a financial gain or loss from operating activities.

Long-Term Debt to Capitalization Ratio: the measure of the proportion of Long-Term Debt in a capital structure. A lower proportion or percentage is desirable because it allows for obtaining of more favorable terms (i.e., lower interest rates) when borrowing.

Medicaid: the federal and state health insurance program established under Title 19 of the Social Security Act to provide medical assistance on behalf of families with dependent children and for aged, blind or disabled whose income and resources are insufficient to meet the costs of necessary medical services and which is administered by the Department of Social Services.

Medical Assistance: the programs for medical assistance provided under the Medicaid program, including the HUSKY Plan, Part A, or (B) any

APPENDIX AC: GLOSSARY OF TERMS

other state-funded medical assistance program, including the HUSKY Plan, Part B.

Medicare: the federal health insurance program for the aged and disabled.

Net Assets: the residual amount of total assets after all current and long-term liabilities (including long-term debt) are deducted. Also referred to as ownership equity.

Net Patient Revenue: the total gross revenue from patient charges less contractual allowances, less the difference between government charges and government payments, less charity care and less any other allowances.

Non Governmental: any commercial or private payer and includes but isn't limited to managed care organizations, health maintenance organizations, and preferred provider organizations.

Non-Operating Margin: the ratio related to profitability indicating the percentage of nonoperating revenue to total revenue. A higher positive ratio indicates more favorable results.

Non-Operating Revenue: the unrestricted revenue not directly derived from providing patient services but obtained from either investment income or philanthropic and non-philanthropic sources.

Operating Expenses: the expenses necessary to maintain regular operating functions and to carry out ongoing activities.

Operating Margin: the ratio related to profitability indicating the percentage of income or loss from operations to total revenue. A higher positive ratio indicates more favorable operating results.

Operating Revenue: the total of net patient revenue from reimbursement of patient services by government and non-government payers plus other operating revenue.

Other Medical Assistance: the difference between Medical Assistance and Medicaid.

Other Operating Revenue: the non-patient service operating revenue that is obtained from operating activities but is accounted for separately from patient service revenues. Other operating revenue includes revenues restricted by a donor or grantor for operating purposes, and also net assets released from restrictions.

Payer Mix: the proportion of each government or non-government payer's reimbursement to the hospital's total reimbursement for patient services. Payer mix is derived by determining the amount of total gross patient revenue or total net patient revenue that the hospital receives from each government and non-government payer.

Payment to Cost Ratio: the ratio that indicates the percentage above or below cost that a hospital is reimbursed by a government or non-government payer. A ratio that is higher than 1.00 is favorable, since it indicates reimbursement by a payer that is greater than the cost of providing patient services. A ratio that is less than 1.00 is unfavorable, since it indicates reimbursement by a payer that is less than the cost of providing patient services.

Ratio of Cost to Charges: the ratio that indicates the percentage of total operating expense to the total of gross patient charges plus other operating revenue. A lower ratio is more favorable, since it indicates a greater difference between the cost and charges billed for providing patient services.

Total Margin: the ratio related to profitability indicating the percentage of income or loss from operations and non-operating revenue to total revenue. A higher positive ratio indicates more favorable results.

Uncompensated Care: the total amount of the hospital's charity care and bad debts resulting from unreimbursed patient services that are determined by using the hospital's published charges and consistent with the hospital's policies regarding charity care and bad debts.

Uncompensated Care Cost: the total amount of the hospital's charity care and bad debts at charges multiplied by the hospital's ratio of cost to charges.

Uninsured: individuals with no health insurance for the hospital services provided.

Unrestricted Net Assets: the amount of net assets that is not restricted by donors or by a board of directors as to their use.
