# Advancing Primary Care Transformation in Connecticut

## *Planning for roadmap development*

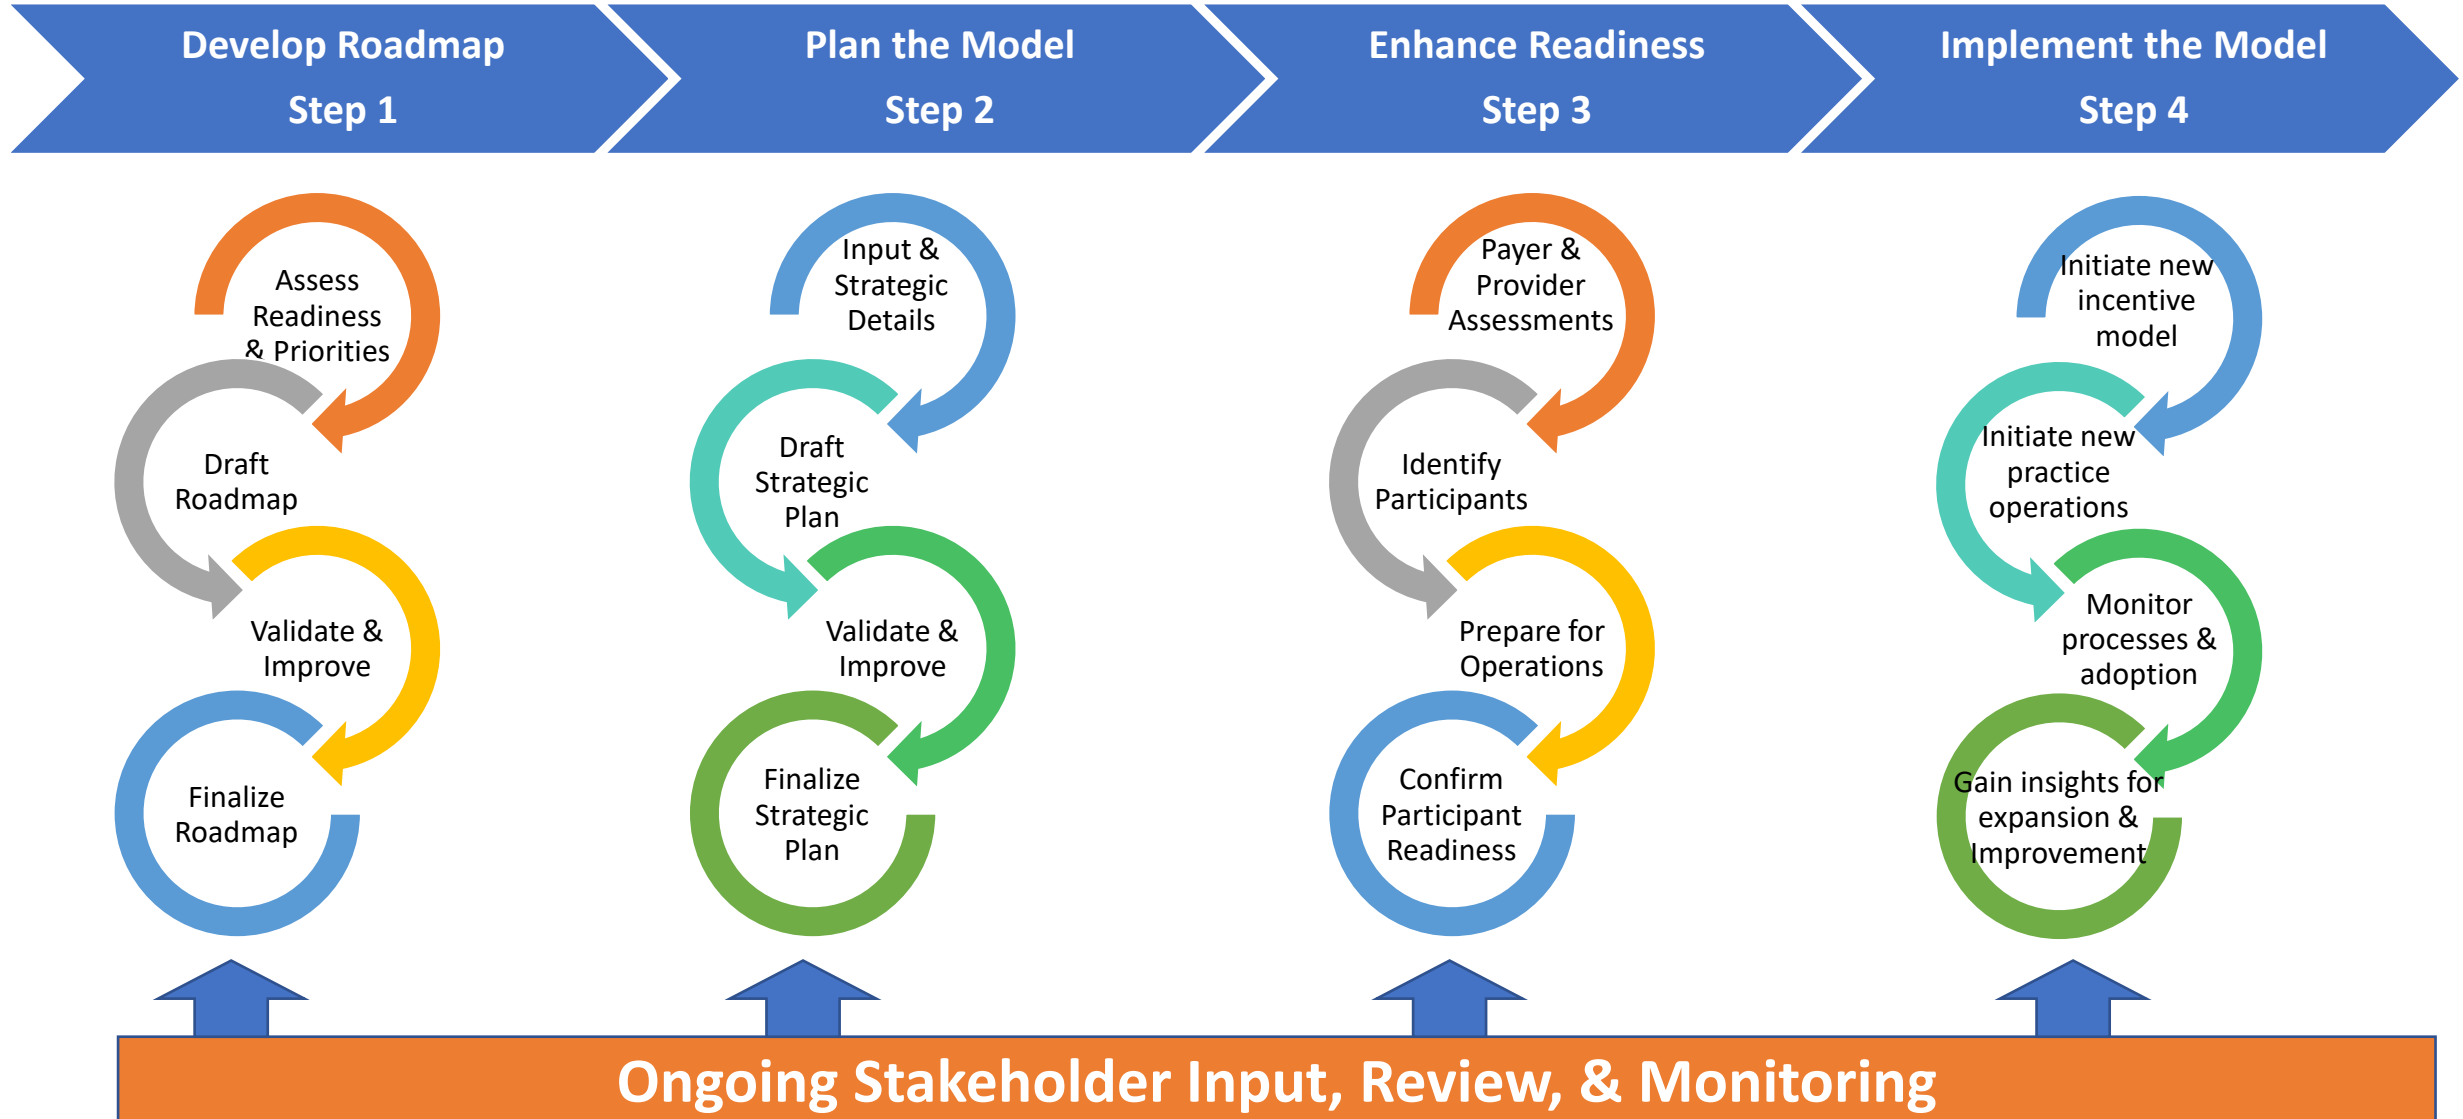

### Objectives

To outline and seek your input on a process to develop a **consensus-based roadmap** for primary care transformation in Connecticut and to assure that:

- **Previous planning and stakeholder input is incorporated**, and that the roadmap builds on the existing foundation to increase the likelihood of successful implementation of a new primary care incentive and transformation model
- **The roadmap lays out a clear path** including
  - ✓ **Detailed strategic planning** for the new primary care investment and transformation model
  - ✓ **Assessment and improvement of readiness** for providers, payers, and other stakeholders to participate
  - ✓ **Implementation of the new primary care model** as pilots or on a scaled basis that meets stakeholders needs and readiness
- **The process for roadmap development meets the states needs** within an acceptable time frame including generating material that may be needed for the next legislative session

*Pathway from roadmap to implementation*

# Advancing Primary Care Transformation in Connecticut

## *Step 1 – Developing a roadmap*

- **Research and review existing materials** on CTs path to primary care transformation including the State Innovation Model and subsequent work. Identify foundational elements to build on and challenges to address.
- **Conduct tailored interviews and surveys** of key stakeholders and committee members. Assess priorities and readiness across stakeholder groups. Identify key elements needed to advance the ecosystem to the next level including pilots for augmented investment and primary care transformation
- **Develop draft roadmap** which accounts for detailed strategic planning of the new primary model, assessment and enhancement of readiness, and implementation at either a pilot or scaled level based on readiness. Incorporate logic model demonstrating how new investments will translate into enhanced primary care operations.
- **Critical review with stakeholders to refine, augment, and improve** roadmap. Build stakeholder engagement and consensus on roadmap, including readiness for engagement with detailed planning process.
