

Healthcare Innovation Steering Committee
PCMH+ Shared Savings Results Presentation
January 2020

PCMH+ model design was guided by a number of important values:

1

Protecting the interests of Medicaid members

2

Improving overall health and wellness for Medicaid members

3

Creating high performance primary care practices with integrated support for both physical and behavioral health conditions

4

Building on the platform of the Department's PCMH Program, as well as the strengths and analytic capability of the Medicaid program's medical Administrative Services Organization (ASO)

5

Enhancing capacity at practices where Medicaid members are seeking care, to improve health outcomes and care experience

6

Encouraging the use of effective care coordination to address the social determinants of health

- PCMH+ requires PEs to build on the limited, PCMH care coordination with enhanced care coordination activities targeting improved outcomes in:
 - Behavioral health integration
 - Cultural competency, including use of the national Culturally and Linguistically Appropriate Services in Health and Health Care (CLAS) standards
 - Children and youth with special health care needs
 - Disability competency

Since the launch of PCMH+ on January 1, 2017, data has been posted publicly to the DSS website to provide timely, transparent evaluation of the program found here: <https://portal.ct.gov/DSS/Health-And-Home-Care/PCMH-Plus/Documents>

Person-Centered Medical Home Plus (PCMH+)

Overview

Documents/Forms

Provided by:

Department of Social Services

Overview

Person-Centered Medical Home Plus or **PCMH+** provides person-centered, comprehensive and coordinated care to HUSKY members. If you are PCMH+ HUSKY Member, **your HUSKY benefits do not change.** PCMH+ builds on the success of Connecticut Medicaid's Person-Centered Medical Home (PCMH) program which works to improve the quality of care our members receive. The PCMH+ program works to improve your overall health and help you get services like access to healthy food,

- ✓ PE Tools and Resources

PEs are required to have a PCMH+ oversight body with the following requirements:

- Include substantial representation by PCMH+ members assigned to the PE.
- Meet at least quarterly and provide meaningful feedback to the PE on a variety of topics, including quality improvement, member experience, prevention of underservice, implementation of PCMH+, and distribution of shared savings.
- Other requirements regarding governing process, bylaws, conflict of interest policies and under-service prevention requirements.

Meeting the substantial representation requirement has been challenging for some PEs. Efforts to increase member retention and participation include:

- Assistance with transportation.
- Offering onsite child care during meetings.
- Providing food during meetings.
- Assistance from PE staff to help members navigate agendas and materials.

- PCMH+ uses a five-pronged approach to identify indicators of under-service utilization practices.

- In addition to the five-pronged approach, DSS also uses a variety of initiatives to ensure that Medicaid member quality of care and access to medical care is not adversely affected as a result of the PCMH+ program.

2017 Shared Savings

- PCMH+ had two out of nine PEs save in the first year of the program.
- The PCMH+ program resulted in \$2,375,366 in savings. Half of the savings was shared with the PCMH+ PEs.

2017 Quality Improvement

- All nine PCMH+ PEs qualified for the Challenge Pool.
- Behavioral Health Screening 1-17 improved 29.5%.
- Developmental Screening in the First Three Years of Life improved 13.1%.
- Avoidance of Antibiotic Treatment in Adults with Acute Bronchitis improved 11.6%.
- PCMH+ PE final quality scores ranged from 38% to 73% and measured PEs ability to maintain, improve, and meet absolute benchmarks.

2018 Shared Savings

- PCMH+ had 4 out of 14 PEs save in the second year of the program.
- The PCMH+ program resulted in \$8,236,847 in savings. Half of the savings was shared with the PCMH+ PEs.

2018 Quality Improvement

- 11 out of 14 PCMH+ PEs qualified for the Challenge Pool.
- Behavioral Health Screening 1-17 improved 58.4%.
- Developmental Screening in the First Three Years of Life improved 28.6%.
- ED Usage and Developmental Screening in the First Three Years of Life measures both saw 11 out of 14 participating entities (PEs) improve.
- PCMH+ PE final quality scores ranged from 21% to 57% and measured PEs ability to maintain, improve, and meet absolute benchmarks.

2018 QUALITY MEASURE RESULTS

WAVE 2 YEAR 1 QUALITY RESULTS

QUALITY MEASURES

Individual Saving Pool Quality Measures	PCMH+ 2017	PCMH+ 2018	PCMH+ % Change
Adolescent Well-Care Visits	73.6%	74.2%	0.8%
Avoidance of Antibiotic Treatment in Adults with Acute Bronchitis	31.6%	33.9%	7.4%
Developmental Screening in the First Three Years of Life	49.1%	63.1%	28.6%
Diabetes HbA1c Screening	88.8%	88.1%	-0.8%
Emergency Department (ED) Usage*	82.2	80.1	-2.4%
PCMH CAHPS	82.6%	82.8%	0.2%
Prenatal Care	73.1%	75.0%	2.7%
Postpartum Care	47.1%	46.4%	-1.4%
Well-Child Visits in the First 15 Months of Life	79.6%	79.8%	0.2%
Challenge Pool Quality Measures	PCMH+ 2017	PCMH+ 2018	PCMH+ % Change
Behavioral Health Screening 1-17	24.0%	37.9%	58.4%
Metabolic Monitoring for Children and Adolescents on Antipsychotics	42.0%	43.0%	2.4%
Readmissions within 30 Days*	15.3%	15.1%	-0.9%
Post-Hospital Admission Follow-Up	42.2%	42.5%	0.6%

* A lower score indicates more appropriate care.

WAVE 2 YEAR 1 QUALITY RESULTS

QUALITY MEASURES SUMMARY

Significant improvement was observed for the following quality measures for PCMH+:

- Behavioral Health Screening 1-17 (58.4% improvement)
- Developmental Screening in the First Three Years of Life (28.6% improvement)
- Avoidance of Antibiotic Treatment in Adults with Acute Bronchitis (7.4% improvement)
- ED Usage and Developmental Screening in the First Three Years of Life measures both saw 11 out of 14 participating entities (PEs) improve.

Quality measures that did not improve:

- The PCMH+ PEs did not improve on the Diabetes HbA1c Screening measure (decreased by 0.8%)
- The PCMH+ PEs did not improve on the Postpartum Care Measure (decreased by 1.4%)
- Only four out of 14 PEs improved on the Well-Child Visits in the First 15 Months of Life

APPENDIX

2018 AND 2017 QUALITY MEASURE RESULTS

CLAIMS UTILIZATION RESULTS

PCMH+ QUALITY MEASURE RESULTS

QUALITY MEASURE NOTES

- The Medication Management for People with Asthma measure is not included in the measure results for 2018 due to data issues.
- Lower scores indicate more appropriate care for the ED usage and the Readmissions within 30 days measures.
- For the PCMH+ scoring measures, partial points are awarded between the fiftieth percentile benchmark and the eightieth percentile benchmark. Full points are awarded for scores exceeding the eightieth percentile benchmark.
 - These benchmarks were created using historic quality scores and were provided to the PEs after the beginning of Wave 2.
- For the PCMH+ challenge measures, points are awarded to PEs scoring at or above the PEs' median score.

Rate Calculation Considerations

Not Applicable

Quality Measure Description

The percentage of enrolled members 12–21 years of age who had at least one comprehensive well-care visit with a primary care practitioner (PCP) or an obstetrics and gynecology practitioner during the measurement year.

- Notes:
1. The 2017 rates are from the quality measure data sets provided on September 6, 2018.
 2. The 2018 rates are from the quality measure data sets provided on October 8, 2019.
 3. DNQ (Does Not Qualify) values occur when a denominator count is less than 30.
 4. The Absolute Quality 50th and 80th Percentile Benchmarks were derived from the comparison group 2018 rates.
 5. Values displayed are rounded to one decimal place; unrounded rates are used for scoring PE results.

PCMH+ QUALITY MEASURE RESULTS — AVOIDANCE OF ANTIBIOTIC TREATMENT IN ADULTS WITH ACUTE BRONCHITIS

Year	Northeast Medical Group AN	St. Vincent's AN	Charter Oak Family Health	Community Health Center	Cornell Scott-Hill Health	Fair Haven Community Health	Generations Family Health	Optimus Health Care	Southwest Community Health	Hartford Healthcare Medical Group, Inc. AN	Prospect CT Medical Foundation, Inc. AN	Wheeler Clinic, Inc. / Torrington AN	First Choice Health Centers Inc.	United Community and Family Services
2017	26.9%	20.0%	41.3%	39.8%	28.6%	37.1%	46.0%	29.3%	25.6%	35.7%	29.5%	35.6%	32.0%	38.2%
2018	32.8%	26.0%	34.8%	40.7%	28.8%	DNQ	59.7%	24.2%	26.4%	37.6%	34.9%	28.2%	35.6%	41.4%

Rate Calculation Considerations

The rate is calculated as 1 - (adults with bronchitis that received an antibiotic / adults with bronchitis). A higher rate indicates appropriate treatment.

Quality Measure Description

The percentage of adults 18–64 years of age with a diagnosis of acute bronchitis who were not dispensed an antibiotic prescription. A higher rate indicates appropriate care (i.e. the proportion for whom antibiotics were not prescribed).

Notes:

1. The 2017 rates are from the quality measure data sets provided on September 6, 2018.
2. The 2018 rates are from the quality measure data sets provided on October 8, 2019.
3. DNQ (Does Not Qualify) values occur when a denominator count is less than 30.
4. The Absolute Quality 50th and 80th Percentile Benchmarks were derived from the comparison group 2016 rates.
5. Values displayed are rounded to one decimal place; unrounded rates are used for scoring PE results.

Rate Calculation Considerations
Not Applicable

Quality Measure Description
The percentage of children screened for risk of developmental, behavioral, and social delays using a standardized screening tool in the first three years of life. This is a measure of screening in the first three years of life that includes three, age-specific indicators assessing whether children are screened by 12 months of age, by 24 months of age, and by 36 months of age.

- Notes:
1. The 2017 rates are from the quality measure data sets provided on September 6, 2018.
 2. The 2018 rates are from the quality measure data sets provided on October 8, 2019.
 3. DNQ (Does Not Qualify) values occur when a denominator count is less than 30.
 4. The Absolute Quality 50th and 80th Percentile Benchmarks were derived from the comparison group 2016 rates.
 5. Values displayed are rounded to one decimal place; unrounded rates are used for scoring PE results.

Rate Calculation Considerations
Not Applicable

Quality Measure Description
Adults age 18–75 with a diagnosis of Type I or Type II diabetes who received at least one HbA1c screening during the measurement year.

- Notes:
1. The 2017 rates are from the quality measure data sets provided on September 8, 2018.
 2. The 2018 rates are from the quality measure data sets provided on October 8, 2019.
 3. DNQ (Does Not Qualify) values occur when a denominator count is less than 30.
 4. The Absolute Quality 50th and 80th Percentile Benchmarks were derived from the comparison group 2018 rates.
 5. Values displayed are rounded to one decimal place; unrounded rates are used for scoring PE results.

PCMH+ QUALITY MEASURE RESULTS

EMERGENCY DEPARTMENT (ED) USAGE

Year	Northeast Medical Group AN	St. Vincent's AN	Charter Oak Family Health	Community Health Center	Cornell Scott-Hill Health	Fair Haven Community Health	Generations Family Health	Optimus Health Care	Southwest Community Health	Hartford Healthcare Medical Group, Inc. AN	Prospect CT Medical Foundation, Inc. AN	Wheeler Clinic, Inc. / Torrington AN	First Choice Health Centers Inc.	United Community and Family Services
2017	79.6	62.1	100.9	93.5	91.0	67.5	116.6	71.8	80.7	77.6	59.4	129.2	74.8	94.2
2018	77.9	59.7	101.7	89.7	86.4	63.8	111.9	70.4	85.3	70.3	62.2	118.5	74.3	85.1

Rate Calculation Considerations

The rate is calculated as (numerator / denominator) * 1,000 member months. A lower score indicates more appropriate care.

Quality Measure Description

Emergency department usage (all ages, but 0–19 can be broken out for pediatric practices). Excludes mental health and chemical dependency services.

Notes:

1. The 2017 rates are from the quality measure data sets provided on September 6, 2018.
2. The 2018 rates are from the quality measure data sets provided on October 8, 2019.
3. DNQ (Does Not Qualify) values occur when a denominator count is less than 30.
4. The Absolute Quality 50th and 80th Percentile Benchmarks were derived from the comparison group 2018 rates.
5. Values displayed are rounded to one decimal place; unrounded rates are used for scoring PE results.

Quality Measure Description

The percentage of deliveries of live births between November 6 of the year prior to the measurement year and November 5 of the measurement year. For these women, the measure assesses the following facets of prenatal and postpartum care:

- Rate 1: Timeliness of Prenatal Care. The percentage of deliveries that received a prenatal care visit as a patient of the organization in the first trimester or within 42 days of enrollment in the organization.

- Notes:
1. The 2017 rates are from the quality measure data sets provided on September 6, 2018.
 2. The 2018 rates are from the quality measure data sets provided on October 8, 2019.
 3. DNQ (Does Not Qualify) values occur when a denominator count is less than 30.
 4. The Absolute Quality 50th and 80th Percentile Benchmarks were derived from the comparison group 2016 rates.
 5. Values displayed are rounded to one decimal place; unrounded rates are used for scoring PE results.

Rate Calculation Considerations

A lower score indicates more appropriate care.

Quality Measure Description

For Medicaid members age 0 to 64, total readmissions within 30 days after discharge from hospital. This measure is based on AHRQ and CMS approved specifications developed by Medicaid Medical Directors Network (MMDN) for Medicaid patients only. The measure aggregates the results for Physical Health only, Physical Health and Behavioral Health combined, by age, gender, race/ethnicity and by Major Diagnosis Category. It assesses the overall readmission rate by 4 populations: Pediatric OB, Pediatric Non-OB, Adult OB, Adult Non-OB with the age break out of Age Under 1, Age 1-12, Age 13-20, Age 21-44 and Age 45-64. Dual Eligible members are excluded.

Notes:

Quality Measure Description
Percentage of adults age 21–75 with an inpatient "medical" or psych admission with a claim for post-admission follow-up with a physician, Physician Assistant, or advanced practice registered nurse within seven days of the inpatient discharge. Medical admissions are defined as all admissions that are not maternity or surgery related.

- Notes:
