

Impact of Possible Federal Shutdown

Grants Management

Current Status:

As of this writing, Grants Management has received no guidance from US DOJ or any other federal funding agencies regarding the availability/unavailability of funds in the event that a shutdown of federal government agencies should occur on September 30, 2025.

This is somewhat unusual, as in the past Judicial has been provided with some guidance as to how to move forward.

Grants Management has requested and received reimbursement for the majority of federally funded activity through the end of September 2025.

Therefore, expenses that occur after October 1 may be affected by a potential shutdown.

Grant Activity:

The majority of grant activity resulting in regular ongoing expenditures for the Branch occurs in four areas:

Office of Victim Services (OVS): OVS has approximately 38 subrecipients that operate and incur expenditures on a daily basis. These are primarily non-profit social service agencies that fund their daily operations with federal funds awarded by OVS. These vendors are reimbursed on a monthly basis bases upon actual expenditures that have been incurred with the last 30 days. There are also three (3) Judicial Branch full-time employees (FTEs) that are 100% federally funded.

As a result, a shutdown will have little to no effect upon subrecipients if it lasts less than 30 days (October 31, 2025). However, the Branch may need to adjust the manner (accounts) in which it charges the payroll for the 3 FTEs if there is a prolonged shutdown.

Information Technology Division (ITD): ITD currently has approximately 12 grant-funded consultants performing various duties on a daily basis. These consultants are paid on a biweekly basis, one month in arrears.

As a result, payments to the agencies that employ these consultants will be delayed for the duration of any shutdown unless these payments are temporarily assigned to another

account for immediate payment and corrected back to federal funds once any shutdown has been concluded.

Support Enforcement Services (SES): SES currently has three full-time employees that are 100% funded by federal funds. These funds are paid by the Branch, then recovered on a quarterly basis by means of a Memorandum of Agreement with CT DSS.

Therefore, payment of these funds for the period of 07/01/2025-09/30/2025 will be immediately affected for the duration of any shutdown. Payment for the quarter beginning October 1, 2025 will only be affected if the shutdown were to last beyond December 31, 2025.

Court Support Services Division (CSSD): CSSD has several federally funded allocations (via direct grant and MOAs with other state agencies) that provide limited support some daily operations (opioid intervention programs, domestic violence diversion programs) that may be affected by a federal shutdown. The effects would be similar to those experienced by OVS, in that payment to subrecipients could be delayed if a shutdown were to last more than 30 days.

A listing of current awards accompanies this summary.
