ABS Software Install Instructions

1. Please navigate to the following link to download ABS software. Link: http://159.247.5.226/BudgetSystem2016/publish.htm

2. Once you are on this install web page, click on the button 'Install'.
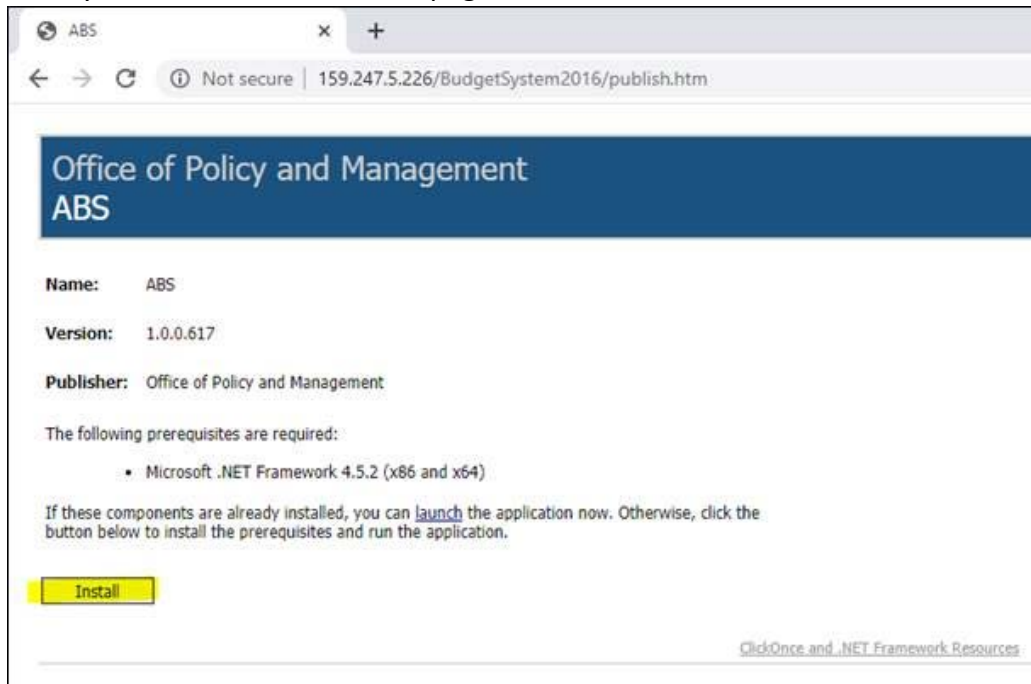

3. This will install a file called 'Setup.exe', once this file is downloaded it should show up in your downloads folder. Find the file and double click to run it, keep in mind this step might require you contact you local IT group for help with the install. If you can not run the 'Setup.exe' file.
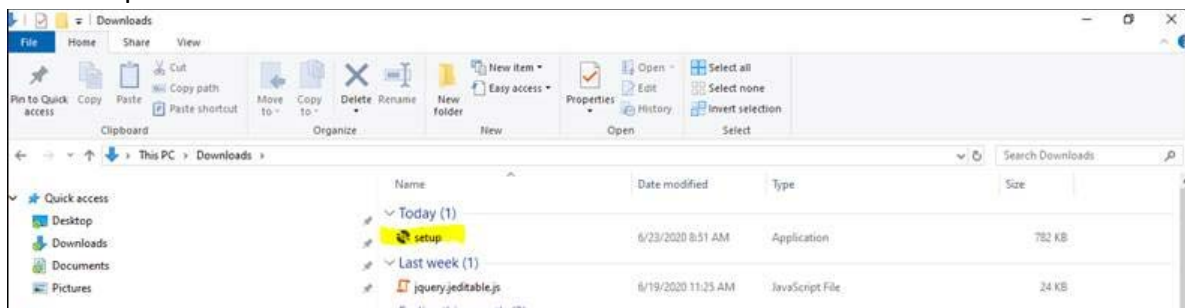

4. Once the file runs you should get a popup where you will click on 'Install' button to start the application.
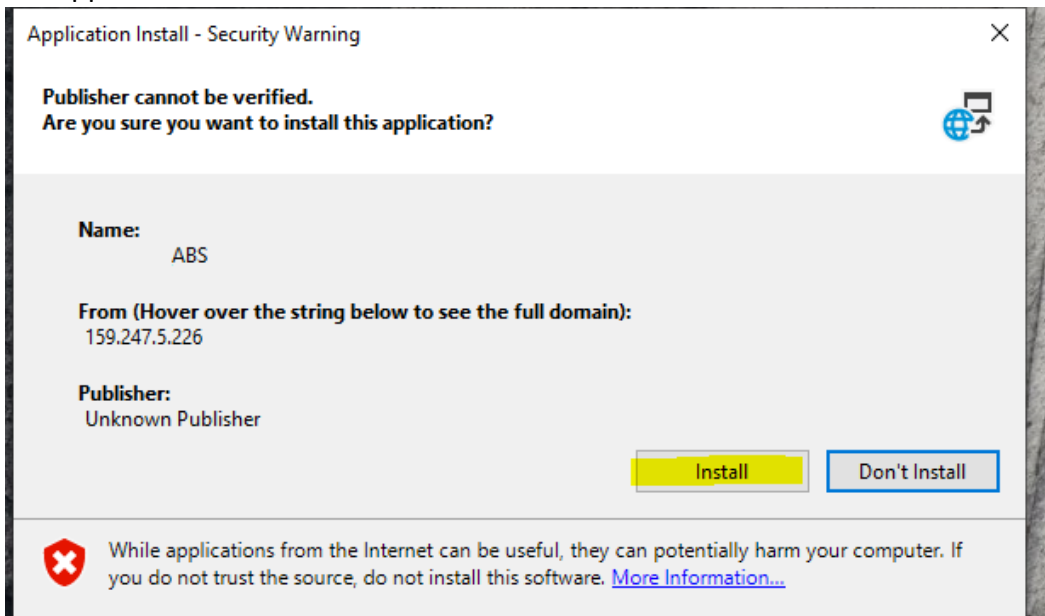

5. After the install you should get a blue popup window, here click where it says, 'More Info'. If you do not get this option, then you will need to contact you local IT group for support to complete the ABS install.

6. You should now see a button that says, 'Run Anyway', click on this to complete the ABS install.

7. The ABS software should start automatically after, if not click on the icon which should now be on your desktop called 'ABS'.
