Connecticut Impaired Driving Records Information System

CIDRIS: NHTSA Demonstration

October 14, 2009

PART 3

National Highway Traffic Safety Administration (NHTSA)

Welcome to CIDRIS...

Connecticut Impaired Driving Records Information System:

- Overview from CIDRIS Business Manager – *Linda DeConti*
- Message from Local LAW – *Robert Flodquist*
Nexgen Public Safety Services
- Message receipt CIDRIS – *Steven Wallick*
CSG/DOIT State of Connecticut
- Introduction of Teleconference Call Participants

CIDRIS Participants

- CJIS Governing Board (CJIS GB), *Linda DeConti*
- Connecticut Police Chiefs Association (CPCA) – Local Law Enforcement, *Chief Richard Mulhall*
- Department of Information Technology (CSG/DOIT)
Len Smith, Tina Good, Mary Anne Sirkin and Steven Wallick
- Department of Motor Vehicles (DMV) – Administrative Per Se, *Nancy Schad and Jim Rogers*
- Division of Criminal Justice (DCJ), *Evelyn Godbout*
- Judicial Branch, Judicial Information Systems (JIS), *Thomas Sutkowski*
- Office of Policy and Management (OPM), *Linda DeConti*
- Sierra Systems – CIDRIS Vendor, *Marilyn Solikoski*
- Nexgen Public Safety Services – State Vendor
Sal Annunziato (CEO), Robert Flodquist, Jon Travisano
- Town of West Hartford, *Larry Niland*

Technical DEMO...

Local Police Department (PD) Demonstration of CIDRIS:

- The State of Connecticut conducted its first Dry Run for the Local Police Department (PD) Demonstration of the CIDRIS Interface on October 9th. Two (2) Local Police Departments were selected: **West Hartford** and **Hamden**. Both sites were configured with the *Nexgen RMS interface with CIDRIS*. The initial Dry Run was a success in that the CIDRIS application worked just as it should have by rejecting improperly formatted data messages from one of the local PD sites. After an additional day of testing, the Nexgen team and the State's CJIS Support Group (CSG/DOIT) conducted its Final Demonstration as shown in this presentation.
- This technical demonstration was conducted remotely through a teleconference call. Screen captures were generated to document the success of this event and to satisfy the final technical demonstration requirements of the National Highway Traffic Safety Administration (NHTSA) Cooperative Agreement (DTNH22-04-H-05110).

Disclaimer: All records shown in this demonstration are fictional scenarios and NOT from production systems within any agency. Any events or persons depicted in this presentation are fictional. These fictional scenarios are for training and demonstration purposes only.

Technical DEMO Overview

Local Police Department (PD) Demonstration of CIDRIS:

The demonstration consisted of the following for each Local Police Department (PD):

Pre-call preparation:

1. **Three (3) Incidents** were recorded in the Local Police Department (PD) Record Management Systems (RMS). Each incident has an OUI charge and 1 or more other MV charges.
2. The A-44 Report data has been entered for each Incident.
3. A Misdemeanor Summons number was recorded for each Incident/A-44 report.

Disclaimer: All records shown in this demonstration are fictional scenarios and NOT from production systems within any agency. Any events or persons depicted in this presentation are fictional. These fictional scenarios are for training and demonstration purposes only.

West Hartford Police Department

Nexgen Submissions from West Hartford Police Department

A screenshot of the 'Arrestee Search' form. The form has tabs for 'People Search', 'Arrest Search', 'Charges Search', 'Offense Search', 'Address Search', and 'Phone Search'. The 'Arrest Search' tab is active. Below the tabs are three sub-tabs: 'Arrest Information', 'Where Arrested', and 'Clothing'. The 'Arrest Information' sub-tab is active. The form contains various input fields and checkboxes. A red box highlights the 'Arrest Date' field, which contains '10/14/2009', a 'Between' dropdown, and a date field containing '00/00/0000'. A red arrow points from the text 'Enter Date or Range' below to the 'Arrest Date' field. Other fields include 'Arresting Agency' (West Hartford PD), 'On Drugs', 'Intoxicated', 'Violent', 'Resist', 'Appear Sick', 'Family Violence', 'Arrest Off', 'Booking Off', 'Arrest Time', 'Moustache', 'Beard', 'Arrest Type', 'Height', 'Weight', 'Resident', 'OBTN', 'Offense', 'Armed(1)', 'Automatic', 'Bond Type', 'Taped', 'Tape #', 'Transaction No', 'Under 18', and 'Court Case Status'. At the bottom, there is a 'Search Results' section with a table header: 'Warrants', 'BOLO', 'Status', 'Name', 'A.K.A.', 'ID #', 'Date Of Birth', 'Sex', 'Race', 'Social'. The 'Records Retrieved' field is empty.

The screenshot shows a database management tool interface. On the left is a tree view of database objects. The main window displays a SQL query and its results. The query is: `select * from message t order by id_message desc`. The results are shown in a table with 10 columns: ID_MESSAGE, TX_XML_DOCUMENT, TX_CREATED_BY, TS_CREATED_ON, TX_UPDATED_BY, TS_UPDATED_ON, ID_EVENT, and IN_ACCE. The table contains 5 rows of data.

The screenshot shows a database management tool with a left-hand pane displaying a tree view of database objects (Recent objects, Functions, Procedures, Packages, etc.). The main pane shows a SQL query: `select * from message t order by id_message desc`. Below the query, a table of results is displayed, showing columns: ID_MESSAGE, TX_XML_DOCUMENT, TX_CREATED_BY, TS_CREATED_ON, TX_UPDATED_BY, TS_UPDATED_ON, ID_EVENT, and IN_ACCE.

ID_MESSAGE	TX_XML_DOCUMENT	TX_CREATED_BY	TS_CREATED_ON	TX_UPDATED_BY	TS_UPDATED_ON	ID_EVENT	IN_ACCE

Summary of Technical DEMO...

Connecticut Impaired Driving Records Information System:

- Three (3) OUI arrests successfully submitted to CIDRIS from the **West Hartford** Police Department by Nexgen Public Safety Software.
- Three (3) OUI arrests successfully submitted to CIDRIS from the **Hamden** Police Department by Nexgen Public Safety Software.
- Nexgen screen shots are of the incident data in the Local Police Department RMS. CGS/DOIT screen shots are of the messages in the CIDRIS message table. XML messages were also captured and are available in a separate PDF.
- The same MQ queues and the System Test environment at DoIT was used as for the September 17th demonstration. DMV and JIS received messages in their inbound queues, but no further demonstration was required from their systems.

STATE OF CONNECTICUT

Connecticut Impaired Driving Records Information System

CIDRIS: NHTSA Demonstration

October 14, 2009

Business Process Overview

National Highway Traffic Safety Administration (NHTSA)

CIDRIS Definition

Connecticut Impaired Driving Records Information System:

- CIDRIS is a messaging solution designed to provide for the reliable and timely electronic exchange of Operating Under the Influence (OUI) information between Criminal Justice Information System (CJIS) agencies allowing for the paperless delivery of arrest data and documents.
- CIDRIS is a tool that aids with the minimization and elimination of paper, improves information quality by reducing errors and downstream manual data re-entry; it aids with the capture of OUI information into a data mart for statistical and trending analysis; and, it will align with the Connecticut Information Sharing System (CISS).

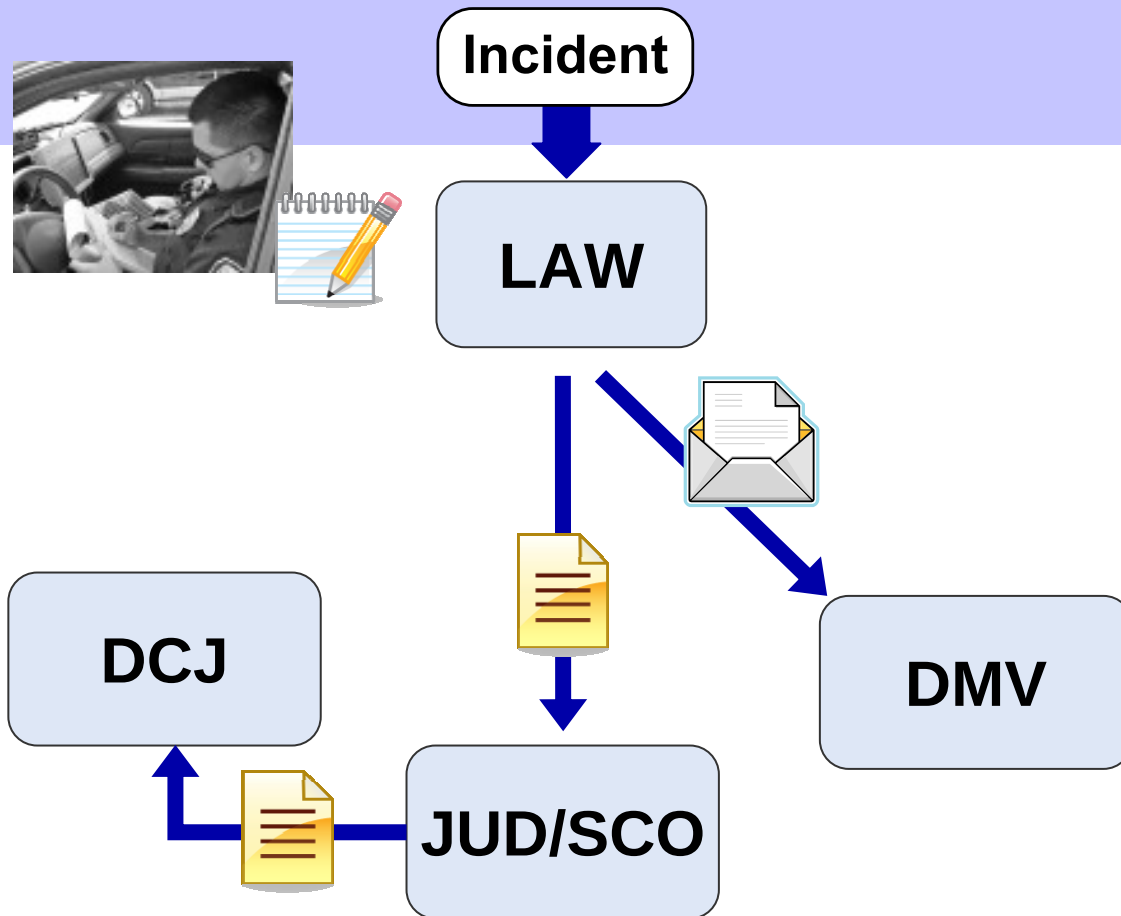

CIDRIS Strategic Objectives

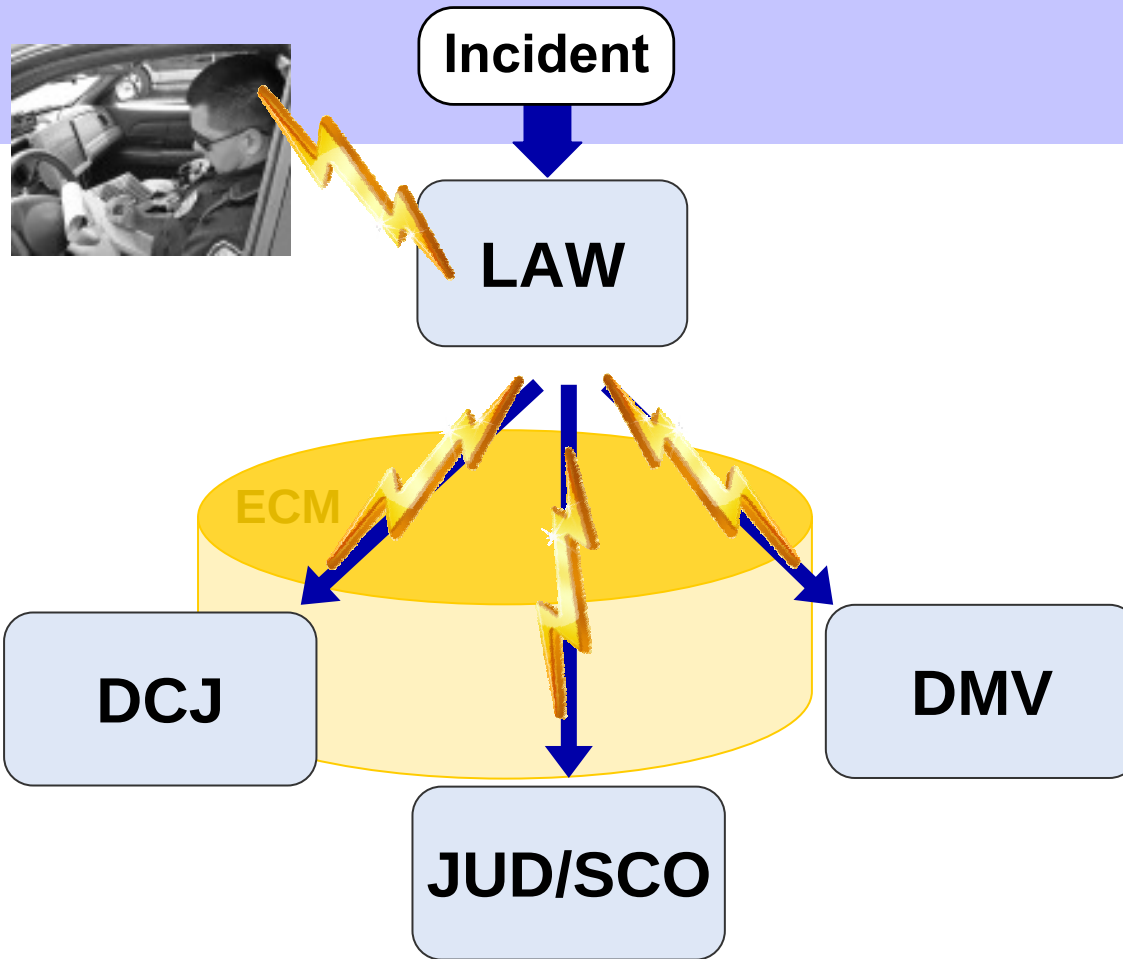

CIDRIS will:

- Provide near real-time information on motor vehicle and criminal OUI arrests.
- Integrate with CJIS Community applications via National Information Exchange Model (NIEM) version 2.0 conformant messaging.
- Leverage the national Model Impaired Driving Records Information Systems (MIDRIS) model.
- Align with Connecticut Information Sharing Solution (CISS) initiative.
- Support NHTSA Information Quality Metrics.
- Be expandable to support all arrests statewide.
- Integrate with legacy CJIS systems via IBM Websphere MQ messaging.
- Integrate with current and future Law Enforcement CAD/RMS systems via NIEM 2.0.
- Assure Legal Sufficiency of electronic information exchanged.

AS-IS Business Process Overview

TO-BE Business Process Overview

Business Process Next Steps

- Need to **validate the current workflow** for all the documents and information being managed and their pathways.
- **Identify who/what** are all the existing touch points in each agency process (people, workflows, sign offs...).
- Check/Test the TO-BE business process to **ensure that the system is fully integrated into the agency workflow.**
- **Communicate potential challenges** and suggest solutions/ideas to resolve any issues.

CT Police Chiefs Association (CPCA)

- Introduction – CPCA
- Document Exchange Workflow
- List of Documents/Forms – DPS
- Challenges – CPCA Law Enforcement
- Benefits – CPCA Law Enforcement

Introduction

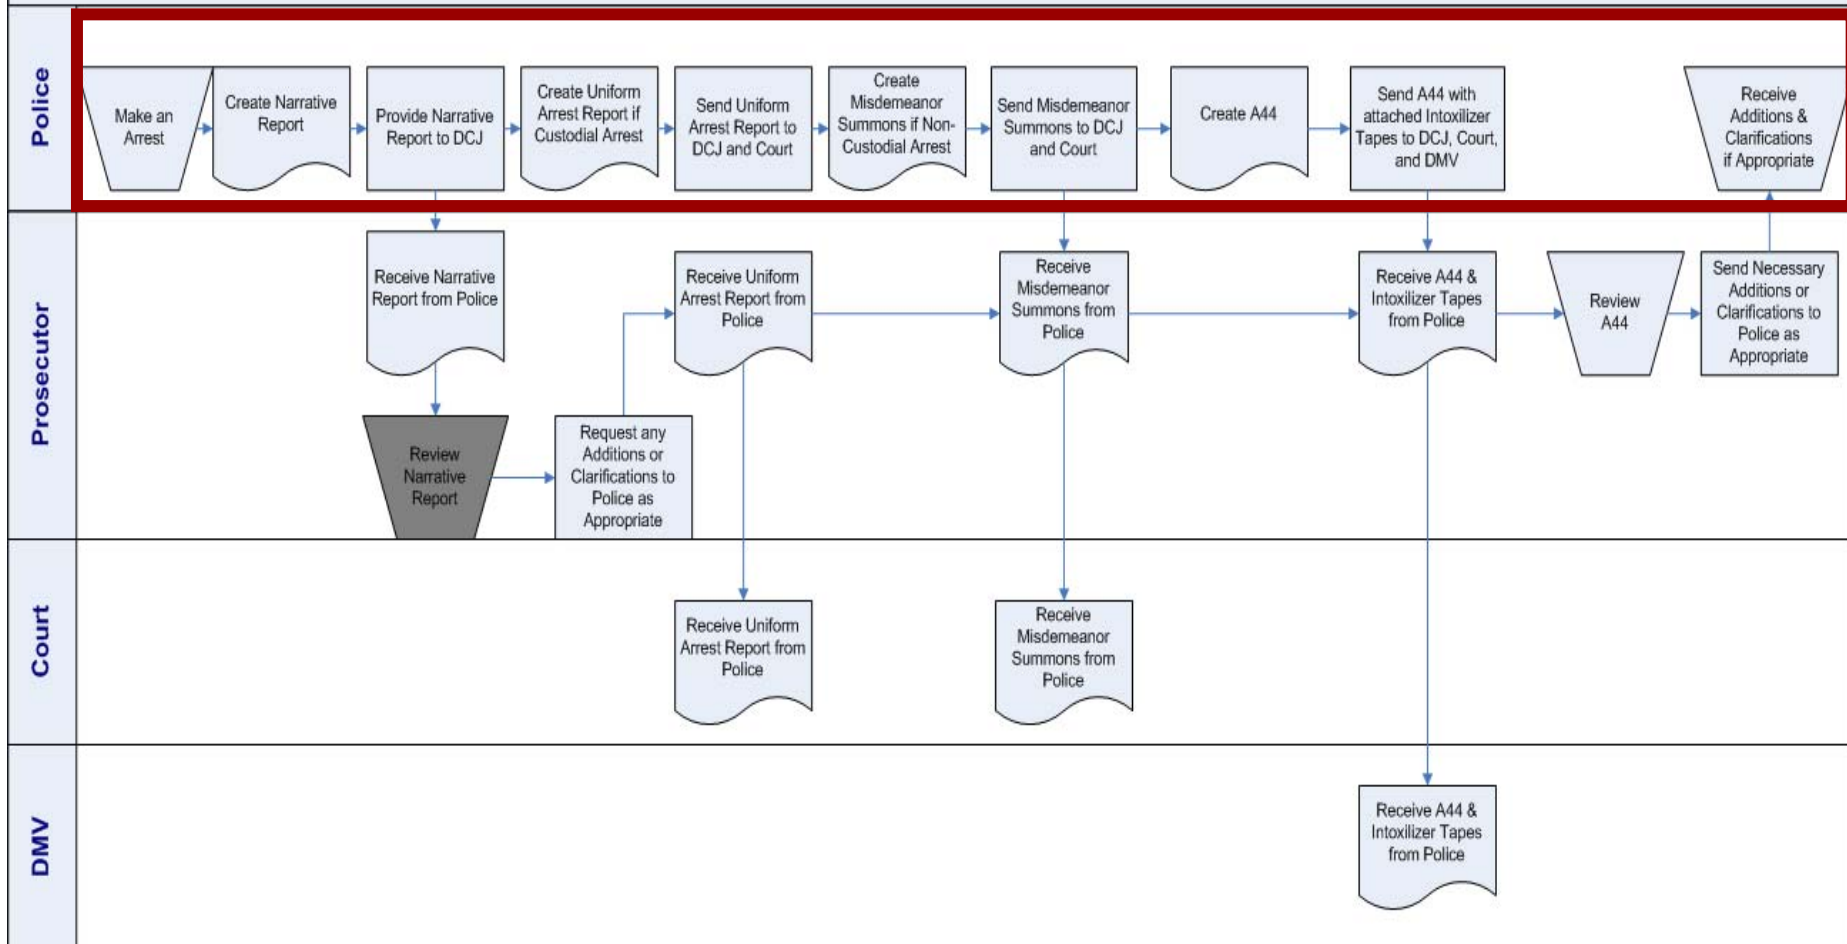

Law Enforcement – CT Police Chiefs Association (CPCA)

- The CPCA is made up of over 100 local law enforcement agencies with over 8,500 officers.
- CPCA member account for 85% of criminal and OUI arrests made in the state.
- Member agencies range in size from 14 officers to almost 500 officers.
- Since the inception of CJIS, the CPCA has been supporting its goals and objectives.
- At the current time local departments are using over 30 different vendors for their RMS and CAD systems.
- CPCA fully supports data sharing.
- The Capitol Region currently has the CAPTAINS MDT system that has over 1800 units deployed throughout CT and ROBIR arrest data sharing system.

OUI Document Exchange Workflow

DUI Warrantless Case – Exchange of Documents Model

R = Received, I = Initiated, B = Both Initiated and Received

Challenges

Law Enforcement – CT Police Chiefs Association (CPCA)

- DCJ must be included in the electronic CIDRIS workflow.
- How do we leverage the AFIS interface to allow local law enforcement agencies to send CIDRIS information. This system currently exists in 85% of local law enforcement.
- How do we avoid costly adjustments to local law enforcement interfaces?
- State of Connecticut bandwidth issues with current infrastructure.
- Establishment of a document management system for CJIS.
- Timing the project so that the first phase is a pilot with the main system coming on line when the OSET Fiber Optic PSDN comes on line in the fall of 2010.
- Requires scanners and PDF licenses.

Benefits

Law Enforcement – CT Police Chiefs Association (CPCA)

- Local law enforcement will be able to access the CIDRIS for enforcement and accident data to analyze current information to create better enforcement strategies to lower motor vehicle accidents.
- Reduce manual data entries by multiple agencies.
- The system will allow data sharing with other state agencies and law enforcement.
- Leverages existing systems such as AFIS.
- If done correctly it will lay the technical foundation for a statewide booking system for OUI and criminal offenses by using the existing AFIS (with some modifications).
- Begin to standardize data transfer and storage into a centralized system.
- Improved data accuracy downstream.
