DRAFT – Research Project
Proposed Collaborative Multi-Agency Initiatives of the CJPAC Research Workgroup
Revised: **March 6, 2009**

Project Title:

Collaborative Data Requests for Research Purposes

Project Description:
OPM and DMHAS recently requested arrest data from DPS and were asked to seek this information through OBTS/CJIS. In an effort to evaluate OBTS/CJIS Systems as a means to acquiring accurate and timely information, the CJPAC Research Workgroup agreed to develop requests for two (2) projects:

1) Data required from all agencies for the **OPM Monthly Indicators** Report and
2) Standard data required to evaluate **Arrest Data** including the suspense file records.

Project Goal:
Often we request data from Criminal Justice partners and the next day someone may request the same but slightly different request. By collaborating and sharing data requests we can potentially reduce the amount of staff time dedicated to repeatedly performing these tasks.

The goal of this project is:
- To determine if OBTS or the CJIS Initiative can assist in the regular generation of (annual, quarterly, monthly) data extracts,
- To evaluate the accuracy and timeliness of using the OBTS/CJIS Systems as a means of acquiring research information for decision and policy makers, and
- To estimate or account for potential cost savings from this effort.

Project Plan and Responsibilities:
- Al Bidorini and Brian Hill will draft a standard universal list of data variables for the Arrest Data typically used for research purposes.
- Tyler and Ivan have documented data fields used in the OPM Monthly Indicators Report to send to DOC.
- Linda DeConti will ask individual agencies to provide the specific fields used to derive the data sent monthly for the OPM Monthly Indicators Report.
- Both lists will be reviewed by the Workgroup.
- Linda DeConti will setup a meeting with Dean Marshall at DOIT to request and coordinate these projects as data extracts from OBTS.

Progress:
1) Data required from all agencies for the **OPM Monthly Indicators** Report and

Ivan and Tyler's data fields for OPM Monthly Indicators draft info goes here….

2) Standard data required to evaluate **Arrest Data** including the suspense file records.

   Below are the list of variables that CSSD and DMHAS receive from Tom Myers at DPS extracted from the Connecticut Criminal History (CCH) system and Suspense file.
