## INTRODUCTION

“Municipal Fiscal Indicators” (MFI) is an annual publication of the Office of Policy and Management (OPM). The publication consists of the most current financial information available for each of Connecticut's 169 municipalities. The majority of the data has been compiled from the audited financial reports of municipalities submitted annually to OPM and available at <https://ears.opm.ct.gov/>. The data extracted from these reports pertains primarily to each municipality's General Fund.

Connecticut Municipalities are required to have their financial statements audited at least once annually under Chapter 111 of the Connecticut General Statutes. These financial statements must be presented in accordance with accounting principles generally accepted in the United States of America (GAAP). GAAP are uniform standards for financial accounting and reporting as promulgated by the Governmental Accounting Standards Board; however, these standards may be interpreted differently.

This publication also includes selected demographic information relevant to, or having an impact upon, a municipality's financial condition. Some of the financial and demographic data has been calibrated on a statewide basis to allow for comparisons between individual towns. Unique factors in a municipality may affect that municipality's statistics; such factors should be kept in mind when making comparisons among municipalities.

MFI is a collaborative effort on the part of all members of the Municipal Finance Services Unit within OPM. We would like to thank the various parties that have provided us information used in this publication. Special recognition is given to the STARS development team for their outstanding information technology work throughout the process of this year's publication.

## NOTES TO USERS

Great care and diligence have been exercised to ensure the accuracy and timeliness of the data presented in this publication. Some of this information was compiled from outside sources; therefore, its quality and accuracy is dependent upon the source of origin.

This edition of MFI is based upon the annual financial data reports submitted by municipalities through OPM's recently developed Fiscal Health Monitoring System (FHMS). We extend our appreciation to all municipalities for having submitted their financial data using the FHMS platform.

Adjustments are not made in this publication for an auditor's restatement of a prior year's financial statements.

Data for the **City of Groton**, which is a political subdivision of the Town of Groton, is included in this publication as it has been in previous editions. Certain financial and demographic information regarding the City of Groton is not available because separate statistics are not kept in all categories.

The **school enrollment data, net current expenditures (NCE) and NCE per pupil for fiscal year 2021-22** presented in this publication, is the latest data available from the State Dept. of Education (SDE) at the time of publication. The SDE has indicated that the figures have not been completely audited and are not considered final.

**SECTION A**

**GENERAL INFORMATION**

## GLOSSARY OF TERMS

### ADJUSTED TAX LEVY (CURRENT YEAR)

This data represents the property tax levy for the current fiscal year less any lawful adjustments as determined by the municipality. It does not include prior years' tax levies. This data is derived from a municipality's Tax Collector's Report.

### AREA IN SQUARE MILES

The United States Census Bureau implemented a computerized mapping system to determine the area in square miles of municipalities. This information was derived from the 2020 Census.

### DEBT SERVICE

Debt service is the total of principal and interest paid annually on all the municipality's long-term bonds and notes. It does not include debt payments made by Proprietary Fund types.

### EQUALIZED MILL RATE

The Equalized Mill Rate, or the Effective Tax Rate, is calculated by dividing the adjusted tax levy, as presented in the municipality's Tax Collector's Report, by the Equalized Net Grand List.

### EQUALIZED NET GRAND LIST (ENGL)

The Equalized Net Grand List is the estimate of the market value of all taxable property in a municipality. Municipalities revalue their Grand Lists based on schedules established by the Connecticut General Assembly (CGS 12-62). Thus, there can be a marked difference between the market value of all property and the assessed value. OPM calculates the ENGL from sales and assessment ratio information and grand list reports filed by the municipality.

### FUND BALANCE

The definition for this item is located on page A-5.

### FYE (FISCAL YEAR ENDED)

Connecticut municipalities operate on the uniform fiscal year July 1 to June 30. A listing of "FYE 2022" means the fiscal year that began on July 1, 2021 and ended on June 30, 2022.

### FORM OF GOVERNMENT

The Form of Government chart used in this report is compiled from annual reports submitted to the Secretary of the State by the municipality. The chart also identifies the election cycle for the Chief Executive Officer of each municipality.

### HOUSING INFORMATION

The median values of owner occupied housing units are presented in Section B. The information is derived from the 2018-22 American Community Survey of the U.S. Census Bureau. The U.S. Census Bureau provides a detailed explanation on how the data is computed and the elements that make up the data. The web address for the Census Bureau is: <http://www.census.gov/>.

### INCOME

The median household income and per capita income presented in this publication are derived from the 2018-22 American Community Survey of the U.S. Census Bureau. The U.S. Census Bureau provides a detailed explanation on how the data is computed and the elements that make up the data. The web address for the Census Bureau is: <http://www.census.gov/>.

## LONG-TERM DEBT – BONDS / PENSIONS / OPEB

The primary components of long-term debt for municipalities typically consists of debt associated with the issuance of bonds and debt from liabilities resulting from unfunded pension and other post-employment benefits. Long-Term Debt, as reported in this publication for these debt components, includes long-term liabilities associated with governmental activities. Items contained within the bonded long-term debt category include bonds and notes for which the municipality has pledged its full faith and credit, long-term lease obligations, and the portion of Regional School District debt, if any, for which the municipality is responsible. The pension related long-term debt presented in this publication is the net pension liability (NPL). The OPEB related long-term debt presented is the net other post-employment benefits liability (NOPEBL). The NOPEBL is often associated with retiree health care unfunded liabilities. The bonded long-term debt, the NPL, and the NOPEBL are presented for each individual municipality in Section D of this publication and in various exhibits within this publication.

## MILL RATE

The mill rate is the rate of taxation levied on property subject to taxation under Connecticut General Statutes. One mill is equal to 1/1000 of a dollar. For example, a tax rate of 20 mills is equivalent to \$20.00 per \$1,000 of assessed value. Generally, the mill rates of special taxing districts located within the municipalities are not included in this publication.

## MUNICIPAL BOND RATING

A bond rating is an evaluation by credit-rating agencies of a municipality's credit risk. Bonds covered by municipal bond insurance are frequently assigned a rating higher than what the rating would have been had bond insurance not been provided. A rating for municipalities with insured bonds only is not shown in this publication.

A municipality's bonds may be rated by more than one rating agency. The three major rating agencies are Moody's Investor Services, Standard and Poor's Corporation, and Fitch Incorporated. The ratings from each of these respective rating agencies as of September 2024, can be found in Section A. The majority of CT municipalities have their bond issues rated by Moody's Investors Service. This rating is presented on the individual town page (Section D) and in Section B of this publication.

## NET CURRENT EXPENDITURES (EDUCATION)

Net Current Expenditures (NCE) represent the combination of local, state and federal dollars spent on public elementary and secondary education. NCE excludes expenditures for: regular education pupil transportation, debt service, land and capital costs, nonpublic expenditures, and expenditures supported by tuition revenue. This data is published annually by the CT Department of Education.

## NET GRAND LIST

The Net Grand List is the assessed value of all taxable property in a municipality net of exemptions allowed under state statutes as of October 1.

## POPULATION

The FYE 2018 through 2022 population figures used in this publication are as of July 1 following the end of each fiscal year. For instance, for the fiscal year ended June 30, 2022, the population figures are as of July 1, 2022. The July 1 figures are published annually by the Department of Public Health, as "Estimated Population in Connecticut as of July 1".

Population density is computed by dividing a municipality's population by its area in square miles.

### RATIO OF BONDED DEBT TO ENGL

This ratio is calculated by dividing long-term bonded debt as of FYE 2022 by the October 1, 2020, equalized net grand list.

### RATIO OF BONDED DEBT TO NET GRAND LIST

This ratio is calculated by dividing long-term bonded debt as of FYE 2022 by the October 1, 2020, net grand list.

### REVALUATIONS

The Year of Last Revaluation reflects the year that a municipality last implemented, or began the phased-in implementation of, a revaluation of real property as required by the Connecticut General Statutes (CGS). This data is taken from reports filed by the municipality with OPM. The Year of Scheduled Revaluation is determined by CGS, section 12-62, as amended by Public Act 22-74.

### SCHOOL ENROLLMENT

School enrollment is the average daily membership, which represents pre-K through grade 12 resident students who are the educational and fiscal responsibility of the school district on October 1. This data is published annually by the CT Department of Education.

### UNEMPLOYMENT

The unemployment figure listed with the individual town data is the calendar year average. The CT Department of Labor publishes the unemployment percentages monthly. For comparative purposes, the information presented for calendar years 2019 to 2022 in this publication, have been benchmarked to calendar year 2023 and therefore may not agree with unemployment figures provided in earlier editions of MFI.

### TAX COLLECTION RATES

The data from the three calculations listed below is derived from a municipality's Tax Collector's Report. These calculations do not include revenues derived from interest and lien fees.

#### CURRENT YEAR COLLECTED AS A % OF CURRENT LEVY

This is a measure of the collection rate of taxes levied for the fiscal year. This percentage is calculated by dividing current tax collections by the adjusted tax levy for the fiscal year.

#### TOTAL COLLECTED AS A % OF CURRENT LEVY

This is a measure of the rate of taxes collected on all outstanding grand lists compared to the amount levied for the current fiscal year. This percentage is calculated by dividing current and prior years tax collections by the adjusted tax levy for the current fiscal year.

#### TOTAL COLLECTED AS A % OF TOTAL OUTSTANDING

This is a measure of the rate of taxes collected on all outstanding grand lists compared to the amount of all taxes still outstanding. This percentage is calculated by dividing current and prior years tax collections by the tax outstanding on all grand lists.

#### TAX EXEMPT PROPERTY

Section B of this publication provide information on the amount of tax-exempt property in each municipality. The information is based upon information filed by municipalities with OPM on forms M-13 and M-13a.

## **OPERATING STATEMENT RESULTS**

**Financial information derived from the General Fund of each municipality's Statement of Revenues, Expenditures and Changes in Fund Balance as reflected on this page.**

### **REVENUES**

#### **INTERGOVERNMENTAL REVENUES**

Intergovernmental revenues include all revenue received by a municipality from federal and state sources.

#### **PROPERTY TAX REVENUES**

Property tax revenues are the total revenues, including interest and lien fees, generated from real and personal property taxes.

#### **TOTAL REVENUES**

Total revenues are the revenues a municipality receives from all sources, as reported in the General Fund.

### **EXPENDITURES**

#### **EDUCATION EXPENDITURES**

Education expenditures represent amounts expended from the General Fund for education, including payments made to regional school districts.

#### **OPERATING EXPENDITURES**

Operating expenditures consist of total expenditures less education expenditures.

#### **TOTAL EXPENDITURES**

Total expenditures are all expenditures as reported in the General Fund.

## **SOURCES AND USES (OTHER FINANCING)**

### **OTHER FINANCING SOURCES (OFS)**

An increase in the General Fund's resources not classified as revenues. GAAP limits the use of this category to certain specified situations. A component of OFS is "transfers in". **Transfers In** are interfund transactions received by the General Fund from other funds of the municipality.

### **OTHER FINANCING USES (OFU)**

A decrease in the General Fund's resources not classified as expenditures. GAAP limits the use of this category to certain specified situations. A component of OFU is "transfers out". **Transfers Out** are interfund transactions received by other funds of the municipality from the General Fund.

Further details on other financing sources and uses can be found in a municipality's financial statements.

### **SPECIAL/EXTRAORDINARY ITEMS**

Special items are transactions or other events within the control of management that are either unusual in nature or infrequent in occurrence. Extraordinary items are transactions or other events that are both unusual in nature and infrequent in occurrence.

Special and extraordinary items are required under GAAP to be reported separately from other financing sources and uses and are reflected in this publication as a component of "net change in fund balance".

### **NET CHANGE IN FUND BALANCE**

This is the difference between revenues (including other financing sources) and expenditures (including other financing uses), net of any special and extraordinary items reported by a municipality for the fiscal year.

## **FUND BALANCE**

### FUND BALANCE - TOTAL

The total fund balance of the General Fund and its separate components are presented on each individual town page (Section D) of this publication. Fund balance is the excess of fund assets and deferred outflow of resources over fund liabilities and deferred inflow of resources. The data presented is derived from the General Fund of each municipality's Balance Sheet as reported in its audited financial statements.

In accordance with GASB Statement No. 54, municipalities report their General Fund, fund balance in one or more of the following five fund balance components:

### NONSPENDABLE FUND BALANCE

The portion of fund balance that cannot be spent either because the underlying resources are not in spendable form or because the municipality is legally or contractually required to maintain such resources intact.

### RESTRICTED FUND BALANCE

The portion of fund balance that represents resources subject to externally enforceable constraints. These constraints would include restrictions imposed by parties outside of the municipal government such as creditors, grantors, contributors, and laws or regulations of other governments. The constraint may also result from constitutional provisions or enabling legislation.

### COMMITTED FUND BALANCE

The portion of fund balance that represents resources whose use is subject to a legally binding constraint that is imposed by the municipality itself at its highest level of decision-making authority and that remains legally binding unless removed in the same manner.

## ASSIGNED FUND BALANCE

The portion of fund balance that represents resources set aside ("earmarked") by the municipality for a particular purpose.

## UNASSIGNED FUND BALANCE

The difference between total fund balance and its nonspendable, restricted, committed, and assigned components.

## **POST-EMPLOYMENT BENEFITS**

Post-employment benefits are typically provided by municipalities to former employees or their beneficiaries as compensation for services rendered while these employees were still active. **These benefits are generally divided into two broad categories – pension benefits (retirement income) and Other Post-employment Benefits (post-employment benefits other than pensions, referenced as OPEB).** Forms of OPEB typically include healthcare benefits and benefits such as disability and life insurance provided outside of the pension plan.

## PENSION AND OPEB PLANS

Defined benefit and defined contribution plans are the most common plan funding methods of providing for the income needs of former employees in retirement. Of these two types of retirement plans, defined benefit plans are the most common for municipalities in Connecticut as reflected in the chart in Section A. A closed defined benefit plan indicates that the plan is not available to new employees as of the date the plan was closed. In recent years there has been a shift away from defined benefit plans and towards defined contribution plans as reflected in the presentation on page A-16.

Municipalities that offer post-employment benefits other than pensions typically offer such benefits through a defined benefit plan arrangement.

In a defined contribution pension plan, a municipality and/or its employees contribute a fixed or defined amount of money to an individual employee's retirement account each year while employed. Upon retirement, the amount of contributions accumulated, along with the investment earnings on such contributions, determine the benefit amount available to the retiree. In a defined benefit plan, employees are promised specific benefits upon their separation or retirement. The retirement plan may state this promised benefit as an exact dollar amount, or more commonly, it may calculate a benefit through a plan formula that considers such factors as salary and length of service. A key difference between the two types of plans is that a defined benefit plan offers a fixed income during retirement for which the municipality is normally responsible, whereas a defined contribution plan provides a fixed contribution toward the employee's retirement account.

#### SINGLE AND MULTIPLE EMPLOYER PLANS

Single-employer pension plans provide pension benefits to the employees of one employer, whereas multiple-employer plans provide benefits to the employees of more than one employer. Municipalities participating in single employer defined benefit pension plans are referred to as single employers. The State of Connecticut administers a cost-sharing, multiple-employer defined benefit plan, the Connecticut Municipal Employees Retirement System (CMERS). A number of municipalities participate in CMERS and are required to contribute towards the retirement benefits of their employees. In addition, the State of Connecticut administers the Connecticut Teachers' Retirement System (CTRS), which is a multiple-employer plan that provides retirement benefits to teachers and other certified education staff employed by municipalities and school districts. However, municipalities and school districts are not required to contribute towards the CTRS, as the State of Connecticut makes contributions on behalf of each municipality and school district.

#### FUNDING STATUS DATA FOR DEFINED BENEFIT PLANS

The benefits promised by a municipality in a defined benefit plan are typically based on a predetermined benefit formula that considers factors such as an individual employee's years of service, salary level, and age. To the extent that the defined benefit plan's long-term obligation to provide pension benefits (*its total pension liability or TPL*) is larger than the value of the assets available in the pension plan's trust to pay pension benefits (the plan fiduciary net position), the plan has a *net pension liability (NPL)*.

The *actuarially determined employer contribution (ADEC)* is the amount actuarially calculated each year that the municipal employer is required to contribute to the defined benefit plan to ensure that there will be sufficient funds available to pay promised pension benefits. An ADEC may not be reported by the municipal employer for each defined benefit plan.

Municipalities report in a similar manner in regard to providing for postemployment benefits other than pensions (OPEB) to its former employees. To the extent that the defined benefit plan's long-term obligation to provide OPEB (*its total OPEB liability or TOPEBL*) is larger than the value of the assets available in the OPEB plan's trust to pay its OPEB (the plan's fiduciary net position), the plan has a *net OPEB liability (NOPEBL)*.

The funded ratio of a pension or OPEB defined benefit plan is often used as a metric in evaluating the financial health of the plan. The ratio compares the amounts accumulated in the pension or OPEB trust (fiduciary net position) to the total pension liability or total OPEB liability of the plan. Comparing the ADEC vs. the level of contribution made by the municipal employer to a defined benefit plan over a number of years can also be useful in the overall evaluation of the plan.

**The *funding status charts* included in Section A provides funding information for defined benefit plans related to pensions and OPEB, respectively.** The information was derived from the notes to the financial statements or required supplementary information included in each municipality's financial audit report.

Unique factors, such as the issuance of pension obligation bonds, actuarial assumptions, contribution methods and requirements provided under State Law that are unique to certain municipalities, or other funding practices regarding a municipality's defined benefit plan, may affect the funding information reported for a particular plan; such factors may only be apparent through a detailed review of the pension or OPEB plan.

#### CT MUNICIPAL EMPLOYEES RETIREMENT SYSTEM

Please note that for municipal employers that participate in the CMERS, funding information for CMERS specific to each participating municipality is not provided in this publication. However, information regarding CMERS as a whole and its participating municipal employers can be found at the web address below.

<https://osc.ct.gov/public/retirement/retirement-systems-actuarial-reports/>

#### CT TEACHERS RETIREMENT SYSTEM

The CT State Teachers Retirement Board administers the CT Teachers Retirement System (CTRS). CTRS is a public plan that offers retirement and other post-employment benefits to CT public school teachers and their beneficiaries. More information can be found at the web address below.

<https://portal.ct.gov/TRB/Content/Other-Resources/Statistics-and-Research>

➤ The following municipalities are implementing a phase-in of their revaluations:

- Canton - 4 year phase in of 2023 revaluation: 25% each year
- Naugatuck - 3 year phase in of 2022 revaluation: 40%/35%/25%
- Stamford - 2 year phase in of 2022 revaluation: 50% each year
- Waterbury - 4 year phase in of 2022 revaluation: 25% each year

\*\* Norfolk, Willington, and Windsor Locks are allowed to delay their scheduled 2023 revaluations to 2024 under Special Act 22-6.

Note: The Year of Last Revaluation column is not based on the Revaluation Schedule and does not reset the Schedule. (Data presented as of May, 2024)
