

**Principal Stability Fund
Ratings Definitions**

AAAm A fund rated 'AAAm' demonstrates extremely strong capacity to maintain principal stability and to limit exposure to principal losses due to credit risk. 'AAAm' is the highest principal stability fund rating assigned by Standard & Poor's.

AAm A fund rated 'AAm' demonstrates very strong capacity to maintain principal stability and to limit exposure to principal losses due to credit risk. It differs from the highest-rated funds only to a small degree.

Am A fund rated 'Am' demonstrates strong capacity to maintain principal stability and to limit exposure to principal losses due to credit risk, but is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than funds in higher-rated categories

BBBm A fund rated 'BBBm' demonstrates adequate capacity to maintain principal stability and to limit exposure to principal losses due to credit risk. However, adverse economic conditions or changing circumstances are more likely to lead to a reduced capacity to maintain principal stability.

BBm A fund rated 'BBm' demonstrates speculative characteristics and uncertain capacity to maintain principal stability. It is vulnerable to principal losses due to credit risk. While such funds will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

Dm A fund rated 'Dm' has failed to maintain principal stability resulting in a realized or unrealized loss of principal.

Rationale

Standard & Poor's 'AAAm' rating on Connecticut State Treasurer's Short-Term Investment Fund demonstrates that the pool has an extremely strong capacity to maintain principal stability and to limit exposure to principal losses due to credit risk. Participants have access to their funds on a daily basis.

Overview

Connecticut State Treasurer's Short-Term Investment Fund is an investment pool managed by the Cash Management Division of the State Treasurer's Office and is comprised of very liquid, high-quality, short-term money market instruments. The fund began operations in 1972 and has over 300 participants. Connecticut State Treasurer's Short-Term Investment Fund serves as an investment tool for the operating cash of the State Treasury, state agencies, authorities, municipalities, and other political subdivisions of the state. The pool's investment objective is to seek as high a level of current income as is consistent with safety of principal and ample liquidity to meet participants' daily cash flow requirements.

Management

The pool is managed by the Cash Management Division of the State of Connecticut's Treasurer's Office, which has managed the pool since inception. The portfolio manager, Lee Ann Palladino, has overseen Connecticut State Treasurer's Short-Term Investment Fund since 2005. In 1995, the State Treasurer set up a cash management advisory board comprised of Treasury managers and investment professionals to review the pool's portfolio, performance, and investment policies and procedures. The fund meets with the advisory board on a quarterly basis, and reports to the state's investment advisory council quarterly. State Street Bank & Trust Co., Boston, MA, serves as Connecticut State Treasurer's Short-Term

Investment Fund administrator and custodian.

Portfolio Assets

The pool currently invests in money-market securities consisting of certificates of deposit (CDs), commercial paper (CP), U.S. government agencies, and repurchase agreements (REPOs). Connecticut State Treasurer's Short-Term Investment Fund typically holds a sizable position in floating rate notes that are tied to standard short-term money market indices such as overnight Fed Funds, LIBOR, and Treasury bills. The adviser maintains the pool's weighted average maturity to reset (WAM(R)) at 60 days or less, which helps to ensure liquidity and principal preservation in the event of large redemptions. In addition, the pool has a designated surplus account equal to approximately 1% of fund assets, which provides shareholders with extra protection against potential credit or market risks.

Participants should consider the investment objectives, risks and charges and expenses of the pool before investing. The investment guidelines which can be obtained from your broker-dealer, contain this and other information about the pool and should be read carefully before investing.

Principal Stability Rating Approach and Criteria

A Standard & Poor's principal stability fund rating, also known as a "money market fund rating", is a forward-looking opinion about a fixed income fund's capacity to maintain stable principal (net asset value). When assigning a principal stability rating to a fund, Standard & Poor's analysis focuses primarily on the creditworthiness of the fund's investments and counterparties, and also its investments' maturity structure and management's ability and policies to maintain the fund's stable net asset value. Principal stability fund ratings are assigned to funds that seek to maintain a stable or an accumulating net asset value.

Generally, when faced with an unanticipated level of redemption requests during periods of high market stress, the manager of any fund may suspend redemptions for up to five business days or meet redemption requests with payments in-kind in lieu of cash. A temporary suspension of redemptions or meeting redemption requests with distributions in-kind does not constitute a failure to maintain stable net asset values. However, higher rated funds are expected to have stronger capacities to pay investor redemptions in cash during times of high market stress because they generally comprise shorter maturity and higher quality investments.

Principal stability fund ratings, or money market fund ratings, are identified by the 'm' suffix (e.g., 'AAAm') to distinguish the principal stability rating from a Standard & Poor's traditional issue or issuer credit rating. A traditional issue or issuer credit rating reflects Standard & Poor's view of a borrower's ability to meet its financial obligations. Principal stability fund ratings are not commentaries on yield levels.
