

Pistol Mounted Optics - LE | Mil | Corrections

In this two day "Instructor - Level" class each student will walk through how to navigate running a pistol mounted optic on your handgun. Students will understand the advantages and disadvantages of a red dot, how to negotiate obstacles like water/fog/mud, and build confidence in the use of your optic. If you are a Firearms Instructor looking to build an optics program for your department or new to a red dot, this course will give you the tools and resources to confidently carry or teach.

- Zeroing Procedure
- Advantages and Disadvantages of a PMO
- Gun Setup
- Use of Suppressor Sights
- Overcoming Potential Obstacles (Cracked / water / fog)
- Acceptable Sight Picture
- One Handed Operations
- Shooting on the Move
- Use of Cover
- Low Light/ No light
