3. Please clarify, if possible, what PURA is seeking with the following service task: "Assisting in the examination of operations and internal workings of the electric distribution companies and in accordance with Conn. Gen. Stat. § 16-19e(a)." For example, are there specific components of the utility's "operations and internal workings" that PURA would like for the consultant to review?
 - a. **PURA is seeking assistance with its prudence review of the revenues and expense items contained in each of the electric distribution company's RAM components (i.e., for Eversource: TAC, NBFMCC, SBC, RDM, GSC, ESI and CTA; for UI: TAC, NBFMCC, SBC, RDM, and GSC). The expenses contained in some of these rate components include personnel, IT, and other operations and maintenance costs that the Authority allows recovery of outside of base distribution rates. We are seeking assistance with digging into the reasonableness and prudence of these costs.**
