PURA Investigation into the Establishment of Integrated Distribution System Planning within a Performance-Based Regulation Framework

REQUEST FOR PROPOSALS TO RETAIN A CONSULTANT TO ASSIST WITH INTEGRATED DISTRIBUTION SYSTEM PLANNING RFP #2024-01

In accordance with Conn. Gen. Stat. § 16-18a, the Public Utilities Regulatory Authority (Authority or PURA) intends to retain a consultant(s) to assist Authority staff in Docket No. 21-05-15RE03, PURA Investigation into the Establishment of Integrated Distribution System Planning within a Performance-Based Regulation Framework (RE03). RE03 is the third reopener in Phase 2 of the Authority's investigation into establishing a Performance Based Regulation (PBR) Framework for Connecticut's investor-owned electric utilities, as described in the April 26, 2023 Decision in Docket No. 21-05-15, PURA Investigation into a Performance-Based Regulation Framework for the Electric Distribution Companies (Phase 1 Decision). The Phase 1 Decision adopts four regulatory goals, five foundational considerations, and nine priority outcomes that will guide the Authority's development and adoption of a PBR Framework pursuant to Section 1 of Public Act 20-5, An Act Concerning Emergency Response by Electric Distribution Companies, the Regulations of other Public Utilities and Nexus Provisions for Certain Disaster-Related or Emergency Related Work Performed in the State (Take Back Our Grid Act).

The Authority's PBR proceeding is bifurcated into two Phases. Phase 1 employed an iterative stakeholder process to investigate Connecticut's existing regulatory framework and to establish the regulatory goals, foundational considerations, and priority public outcomes noted above. These goals, considerations, and outcomes are rooted in and have broad applicability to all utility regulatory matters and, as such, will guide current and future utility regulation in the state. Phase 2 is further investigating potential modifications and additions to the specific regulatory mechanisms identified in the Phase 1 Decision through three reopener dockets. See Section III.B of the Phase 1 Decision for

a detailed description of the investigation topic areas identified for Phase 2. The three PBR Phase 2 reopener dockets are open and underway.¹

The Authority seeks competitive proposals from qualified Consultants or Consultant teams to provide subject matter expertise and analysis to support the Authority’s investigation of Integrated Distribution System Planning (IDSP) in Docket No. 21-05-15RE03. Specifically, this proceeding encompasses three key topic areas: (1) electric distribution company (EDC) systems and processes that support an IDSP, including but not limited to internal planning, operations, and Information Technology systems; (2) operations and optimization of the grid; and (3) IDSP structure and process. The selected Consultant will support the establishment of an IDSP process and framework document. Furthermore, the selected Consultant will support the Authority by reviewing EDC-supplied data, comparing current practices against industry standards, and performing gap analyses on existing Connecticut distribution system planning processes and practices.

The Authority hereby issues this RFP and seeks proposals for subject matter expertise and analysis from qualified person(s) or organization(s) (Applicants) according to the following schedule:

SECTION II - SERVICES AND DELIVERABLES

a. GENERAL

The Authority seeks professional consulting services to support Docket No. 21-05-15RE03 (RE03) only. As such the Authority seeks to supplement staff capacity with a Consultant or Consultant team with subject matter expertise in the areas of load and DER modeling and forecasting, distribution engineering, distribution system operations and needs identification, DER interconnection and utilization, utility capital planning, and relevant information systems management. Given the varied nature of sought expertise, the Authority may select multiple consultants, in which case, they will be expected to coordinate with the other selected consultants as needed and as directed by the Authority.

Relevant docket content is summarized below along with descriptions of consultant responsibilities. The evidentiary record for RE03, found [here](#), includes the current proceeding schedule and evidentiary materials submitted to date. In addition, the [Phase 1 Decision](#) provides additional details regarding Phase 2 reopener docket areas of investigation and is a companion to this RFP.

b. 21-05-15RE03: INTEGRATED DISTRIBUTION SYSTEM PLANNING

On May 3, 2023, in accordance with the Phase 1 Decision and the Take Back Our Grid Act, the Authority initiated Docket No. 21-05-15RE03 on its own motion to investigate the establishment of IDSP in Connecticut. Ultimately this proceeding is intended to support effective grid operations in a changing energy landscape, including the proliferation of distributed energy resources and grid-edge technologies on the distribution system. More specifically, this proceeding will: (1) document the existing components of IDSP in Connecticut; (2) review and evaluate the systems and processes that support IDSP; (3) make components of IDSP more transparent and better connected where necessary; and (4) establish a public and transparent IDSP plan document, development process, and reporting standard(s).

Docket No. 21-05-15RE03 will result in a Final Decision to adopt an IDSP framework and will supplant the IDSP requirements preliminarily described in the Interim Decision dated October 2, 2019 in Docket No. 17-12-03, [PURA Investigation into Distribution System Planning of the Electric Distribution Companies](#). Additionally, the IDSP framework will necessarily integrate with the Non-Wires Solutions (NWS) Process established in Docket No. 17-12-03RE07, [PURA Investigation into Distribution System Planning of the Electric Distribution Companies – Non-Wires Alternatives](#), as the identification, evaluation and selection of solutions, including NWS, is a key activity of IDSP. Moving forward, such an IDSP framework will guide the public reporting of the EDCs' distribution system planning efforts both in terms of content and format and in terms of process.

c. CONSULTANT TASKS

The selected Consultant will support the Authority's investigation of an IDSP framework, including, without limitation, the following services:

i. Review Background Documentation

To develop a working knowledge of current and related distribution system planning efforts, as well as active Performance-Based Regulation proceedings, the selected Consultant is expected to review and assimilate key regulatory documents. Such documentation contains essential information for developing Connecticut's IDSP. Key background documentation includes, but is not limited to:

- Docket No. 22-08-07 (Innovative Energy Solutions Program); [Order No. 4 Submission](#)
- Docket No. 17-12-03RE07 (Non-Wires Solutions Process); [Decision and Appendix A, Process Design Document](#).
- Docket No. 21-05-15 (Performance-Based Regulation, Phase 1); [Phase 1 Decision](#)
- Docket No. 21-05-15RE03 (Performance-Based Regulation, Phase 2, Integrated Distribution Planning); [Notice of Docket Timeline and Process](#)
- Docket No. 17-12-03RE08 (Resilience and Reliability Standards Framework); [Final Decision](#)

ii. Attend Technical Meetings

The Consultant is expected to attend all scheduled Technical Meetings for this proceeding, to synthesize and contextualize the docket's key topics and Participant and stakeholder positions on proceeding topics. The selected Consultant is expected to review Technical Meeting agendas and other meeting materials in advance and advise the Authority on Technical Meeting strategy as may be requested. A list of Technical Meetings currently scheduled can be found in Section II.e., Docket Schedule, of this RFP.

iii. Contribute to Discovery Process

The selected Consultant will support the development of Interrogatories and/or Written Comment prompts to help build the evidentiary record in this proceeding. The Consultant will supplement Authority staff's efforts and may advise the Authority on discovery strategy, review draft Interrogatories and/or Written Comment prompts, and/or compose Interrogatories and/or Written Comment prompts for the Authority's consideration.

iv. Review EDC Technical Submissions

The selected Consultant will review all technical submissions from the EDCs in response to Interrogatories and Requests for Written Comments, and any other data or technical submissions deemed necessary and relevant to the IDSP proceeding. Specifically, such technical submissions are expected to include data, reports, and information pertaining to:

- Load forecast and DER forecast development;
- Distribution engineering and grid needs assessment;
- Hosting capacity analysis and interconnection of DERs;
- Information technology systems supporting all aspects of IDSP;
- Identification and evaluation of solutions for grid needs, including the NWS Process and its relationship with IDSP;
- Evaluation, Measurement, and Verification of IDSP efficacy, and continuous improvement of the IDSP process.

v. Produce Internal Memo Series

The selected Consultant is expected to comment on the EDCs' technical submissions, described above, in a series of memos internal to the Authority. The purpose of the memos is to analyze the technical accuracy, clarity, reasonableness, and alignment with industry best practices of the EDCs' current distribution system planning processes. The Consultant will identify areas of strength and opportunities for improvement to ensure that the IDSP process under investigation in this proceeding builds on the EDCs' existing planning strengths, while filling gaps, improving the process as may be necessary, and making relevant parts of the IDSP process more transparent and better connected. See Section II.d, Deliverables, below for the anticipated memo topics. In its proposal submission, the Applicant or Applicant team may endorse the memo topics described in this RFP or recommend an alternative portfolio of topics and rationale for the Authority's consideration.

vi. Develop Knowledge Transfer Tools

The selected Consultant will create tools to help build and institutionalize future Authority capacity to review IDSP technical submissions. Such tools may include review checklists, evaluation rubrics, or other resources to be proposed by the Consultant or Consultant team to aid the future evaluation of IDSP documents and processes.

d. DELIVERABLES

The selected Consultant will produce, at minimum, the following deliverables to advance technical review and analysis of EDC materials in the Authority's IDSP proceeding:

1. **Discovery Generation:** Produce copy for Interrogatories and/or Written Comment prompts as requested by the Authority. Anticipated discovery topics include but are not limited to: distribution system planning inputs and assumptions; existing EDC distribution system planning practices; load and DER forecast methodologies; distribution engineering assessment / grid needs assessment; hosting capacity analysis; supporting information technology systems; identification and evaluation of solutions; and EM&V requirements.
2. **Internal Memo Series:** Produce at least four (4) briefing memos to evaluate the technical strengths and opportunities for improvement of the EDCs' data submissions and planning practices in the following IDSP topic areas:
 - a. Load and DER forecasting data and processes.
 - b. Grid needs assessment and hosting capacity analysis.
 - c. Identification, evaluation, and selection of solutions, and the integration of the NWS Process into an IDSP.
 - d. EM&V requirements, opportunities for continuous improvement of IDSP, and relationships to the other PBR reopener proceedings and future EDC rate cases.
3. **IDSP Document and Process Feedback:** Provide written comments on Authority staff-proposed IDSP documentation content, format, and process.
4. **Knowledge Transfer Tools:** Propose and create resources such as checklists, evaluation rubrics, or other tools to help institutionalize the future ongoing Authority review of EDC IDSP materials.

e. DOCKET SCHEDULE

Each proposal shall reflect the Applicant's ability to conform to the general milestones and timeline described herein. The selected Consultant will be expected to coordinate closely with Authority staff for the duration of the proceeding, with Authority staff determining the timing of workstreams and deliverables.

The expected timeline for the proceeding is provided below to assist with preparation of responses to this RFP. Applicants should note that the dates below are tentative and subject to change.

In accordance with this statute, if an officer, employee or appointing authority of the Consultant takes or threatens to take any personnel action against any employee of the Consultant in retaliation for such employee's disclosure of information to any employee of the contracting state or quasi-public agency or the Auditors of Public Accounts or the Attorney General under subsection (a) of such statute, the Consultant shall be liable for a civil penalty of not more than five thousand dollars (\$5,000) for each offense, up to a maximum of twenty per cent (20%) of the value of this Contract.  - (f) For breach or violation of any of the provisions in the section concerning Representations and Warranties, the Agency may Terminate the Contract in accordance with its terms and revoke any consents to assignments given as if the assignments had never been requested or consented to, without liability to the Consultant or Consultant Parties or any third party.
 - (g) Upon Termination of the Contract, all rights and obligations shall be null and void, so that no party shall have any further rights or obligations to any other party, except with respect to the sections which survive Termination. All representations, warranties, agreements and rights of the parties under the Contract shall survive such Termination to the extent not otherwise limited in the Contract and without each one of them having to be specifically mentioned in the Contract.
