# CONNECTICUT STATE BOARD OF EDUCATION 

## Hartford

TO: State Board of Education<br>FROM: Dr. Dianna R. Wentzell, Commissioner of Education<br>DATE: $\quad$ November 7, 2018<br>SUBJECT: College Enrollment, Credit Attainment and Remediation of High School Graduates in Connecticut Public Universities and Community Colleges

## Executive Summary

Please find attached the report entitled Trends in Enrollment, Credit Attainment, and Remediation at Connecticut Public Universities and Community Colleges: Results from P20WIN for the Graduating Classes of 2010, 2011, and 2012. The report answers three questions:

1. Enrollment: What percentage of the graduating class enrolled in a Connecticut public university or community college (UCONN, the four Connecticut State Universities, and 12 Connecticut community colleges) within 16 months of graduation?
2. Credit Attainment: What percentage of those who enrolled in a Connecticut public university or community college within 16 months of graduation earned at least one year's worth of credits ( 24 or more) within two years of enrollment?
3. Remediation: What percentage of those who enrolled in one of the four Connecticut State Universities or one of the 12 community colleges within 16 months of graduation took a remedial course within two years of enrollment?

The overall results indicate the following:

- Of the nearly 39,000 students in each of the graduating classes of 2010, 2011, and 2012, around 40 percent of them enrolled in a Connecticut public university or community college within 16 months of graduation. There is a slight increase across the graduating classes, from 39.3 percent in 2010 to 40.8 percent in 2011 and finally 41.2 percent in 2012.
- Of those who enroll, nearly two-thirds earn 24 credits within two years of enrollment. There is a slight increase across the graduating classes, from 64.4 percent in 2010 to 65.4 percent in 2011 and finally 66.8 percent in 2012.
- Of the approximately 13,000 students per graduating class who enrolled in one of the four Connecticut public universities or a Connecticut community college within 16 months of graduation, nearly half of them took a remedial course within the first two years of enrollment.

When disaggregating the data by student groups, some of the following were observed:

- Across all three graduating classes, female students were both more likely to enroll in a Connecticut public university or a Connecticut community college within 16 months of graduation than their male student peers and more likely to earn 24 or more credits within two years of enrollment.
- Students reported as African American or Hispanic were less likely to have earned 24 or more credits in two years than their white student peers, with Asian students having the highest credit attainment rates.
- Across all three graduating classes, English Learners were less likely than their peers to have earned a full year's worth of credit within two years of enrollment. Students with disabilities were also less likely than their peers to have earned a full year's worth of credit within two years of enrollment.

The report is being shared with CSDE staff, district and school leaders, and higher education staff to inform strategies that prepare all students for education after high school. Results for subsequent graduating classes will be added to this report so as to serve as one additional data point that informs our efforts around the implementation of Connecticut's Core Standards.

# Trends in Enrollment, Credit Attainment, and Remediation at Connecticut Public Universities and Community Colleges: Results from P20WIN for the High School Graduating Classes of 2010, 2011, and 2012 

During the summer of 2014, three Connecticut state agencies - the Connecticut State Department of Education, the Board of Regents for Higher Education, and the Department of Labor - successfully completed a pilot project and established the Preschool through 20 and Workforce Information Network (P20WIN). In 2015, the University of Connecticut (UCONN) joined the effort, adding significantly to the scope of the data and analysis. P20WIN is an unprecedented interagency network that securely links data to gain new insights that can help improve the policies and procedures that affect individuals and students these agencies serve.

These analyses examine:

- Enrollment: What percentage of the graduating class (or subgroup of the graduating class) enrolled in a Connecticut public university or community college (UCONN, the four Connecticut State Universities, and all Connecticut community colleges) within 16 months of graduation?
- Credit Attainment: What percentage of those who enrolled in a Connecticut public university or community college within 16 months of graduation (or subgroup thereof) earned at least one year's worth of credits ( 24 or more) within two years of enrollment?
- Remediation: What percentage of those who enrolled in either a Connecticut State University or community college within 16 months of graduation (or subgroup thereof) took a remedial course within two years of enrollment?
- UCONN does not collect data on remediation, and is thus not included in the remediation analysis. The enrollment percentage of the graduating class without UCONN is provided for comparison.

The results contained herein are both a fresh examination of previous P2OWIN evaluations of the high school graduating class of 2010 and 2011 as well as a new evaluation of the graduating class of 2012 and the trends in enrollment, credit attainment, and remediation in Connecticut's public universities and community colleges. For more information about the differences between this report and previous reports, please see Appendix C.

The complete results are provided in six graphs (see Appendix A) and seven tables (see Appendix B):

## Statewide Trends in Enrollment and Credit Attainment

(See Graphs 1-4 and Table 2 for more information)
Of the nearly 39,000 students in each of the graduating classes (GC) of 2010, 2011, and 2012, around $40 \%$ of them enrolled in a Connecticut public university or community college (CPUCC) within 16 months of graduation. There is a slight increase across the graduating classes, from $39.3 \%$ in 2010 to $40.8 \%$ in 2011 and finally $41.2 \%$ in 2012. Across all three graduating classes, female students were not only more likely to enroll in a CPUCC within 16 months of graduation than their male student peers (e.g., GC11, Female: $42.2 \%$, Male: $39.4 \%)$, female students were also more likely to earn 24 or more credits within two years of enrollment (e.g., GC11, Female: 68.5\%, Male: 62.1\%). Both male and female students experienced increases in enrollment (GC10-GC12, Female: 39.6\%-42.1\%, Male: 39.0\%-40.2\%) and credit attainment (GC10-GC12, Female: 66.7-69.6\%, Male: 62.0\%-63.8\%) across the three graduating classes.

While African American, Asian, and Hispanic students were more likely to enroll in CPUCCs than their white student peers (e.g., GC11, African American: 43.0\%, Asian: 50.7\%, Hispanic: 43.9\%, White: 39.2\%), students reported as African American or Hispanic were less likely to have earned 24 or more credits in two years than their white students peers, with Asian students having the highest credit attainment rates (e.g., GC11, African American: 51.1\%, Asian: 79.7\%, Hispanic: 53.9\%, White: 70.0\%). All subgroups experienced increases across the graduating classes in both CPUCC enrollment (GC10-GC12, African American: 38.4\%-43.3\%, Asian: 49.9\%-50.5\%, Hispanic: 41.6\%-44.4\%, White: 38.5\%-39.6\%) and credit attainment (GC10-GC12, African American: 49.8\%-52.3\%, Asian: 79.8\%-80.2\%, Hispanic: 52.8\%-55.8\%, White: 68.3\%-71.4\%).

English Learners were slightly less likely to have enrolled in a CPUCC within 16 months of graduation than their peers across all three cohorts (e.g., GC11, EL: $38.2 \%$, Not EL: $40.8 \%$ ). Across all three cohorts, English Learners were less likely than their peers to have earned a full year's worth of credit within two years of enrollment (e.g., GC11, EL: 48.0\%, Not EL: 65.8\%). While the percentage of English Learners enrolling in a CPUCC increased slightly across the cohorts (GC10-GC12: 36.3\%-38.2\%), the percentage of students earning a year's credit decreased (GC10-GC12: 52.0\%-50.7\%).

Students with disabilities (SWD) were less likely to have enrolled in a CPUCC within 16 months of graduation than their peers across all three cohorts (e.g., GC11, SWD: 30.2\%, Not SWD: 41.7\%). Across all three cohorts, students with disabilities were less likely than their peers to have earned a full year's worth of credit within two years of enrollment (e.g., GC11, SWD: 38.9\%, Not SWD: 67.1\%). While the percentage of students with disabilities enrolling in a CPUCC held nearly constant across the cohorts (GC10-GC12: 30.3\%-29.5\%), the percentage of students earning a year's credit increased slightly (GC10GC12: 37.0\%-39.0\%).

Students who were eligible for free or reduced price lunch (FRL) were either equally or more likely to have enrolled in a CPUCC within 16 months of graduation than their peers across all three cohorts (e.g., GC11, FRL: 42.5\%, Not FRL: 40.2\%). Across all three cohorts, students eligible for FRL were less likely than their peers to have earned a full year's worth of credit within two years of enrollment (e.g., GC11, FRL: 52.9\%, Not FRL: 70.1\%). The percentage of students eligible for FRL enrolling in a CPUCC increased across the cohorts (GC10-GC12: 39.0\%-42.6\%), as did the percentage of students earning a year's credit (GC10-GC12: 52.1\%-54.6\%).

## Statewide Trends in Remediation

(See Graphs 5-6 and Table 3 for more information)
Of the approximately 13,000 students per graduating class who enrolled in one of the four Connecticut State Universities or a Connecticut community college within 16 months of graduation, nearly half of them took a remedial course within the first two years of enrollment, with declines in every demographic subgroup across the three graduating classes (State Average, GC10: 49.8\%, GC11: 46.9\%, GC12: $46.0 \%$ ). Female students took slightly more remedial courses than their male student peers (e.g., GC11, Female: $48.7 \%$, Male: $44.9 \%$ ), although the gap narrowed by more than half across the graduating classes (GC10-GC12, Female: 51.1\%-46.7\%, Male: 48.5\%-45.3\%).

Both English Learners and students with disabilities had significantly higher percentages of students taking remedial classes (e.g., GC11, EL: 73.2\%, SWD: 78.4\%) than their peers (e.g., GC11, Not ELL: 46.2\%, Not SWD: 44.4\%). Students eligible for free or reduced price lunch also had significantly higher percentages of remedial courses than their peers (e.g., GC11, FRL: 64.6\%, Not FRL: 39.3\%). All three subgroups-English Learners, students with disabilities, and students eligible for FRL-had fewer students taking remedial courses across the graduating classes (GC10-12, EL: 75.8\%-73.4\%, SWD: 77.7\%-71.9\%, FRL: 68.2\%-64.1\%).

Students who were reported as African American or Hispanic enrolled in a CSCU were also more likely to take a remedial course than their white or Asian student peers (e.g., GC11, African American: 66.7\%, Asian: $44.3 \%$, Hispanic: $65.2 \%$, White: $38.0 \%$ ). All four subgroups experienced an overall decline in the percentage of students taking remedial courses (GC10-12: African American: 70.1\%-66.4\%, Asian: 42.7\%-36.6\%, Hispanic: 67.5\%-64.3\%, White: 42.0\%-37.1\%) While Asian students in the 2011 graduating classes took more remedial courses than their white student peers, the proportion of students in the 2010 and 2012 graduating classes who took remedial courses is comparable.

Trends in Enrollment, Credit Attainment, and Remediation at Connecticut Public Universities and Community Colleges: Results from P20WIN for the Graduating Classes of 2010, 2011, and 2012

## Appendix C: Methods

Trends in Enrollment, Credit Attainment, and Remediation at Connecticut Public Universities and Community Colleges: Results from P20WIN for the Graduating Classes of 2010, 2011, and 2012

## Explanation of Differences between 2018 and Prior P20WIN Analyses

Two important changes were made to the methodology in these analyses from the previous reports. First, no records from a term in which the start-of-term date preceded the graduation date were included. Primarily, this removed records from students who had engaged in a dual-enrollment program during high school. This had a negative effect on the percentage of students who had enrolled within 16 months of graduation, but a positive effect on the percentage of students who had completed a year's worth of credits within two years.

The second methodology change was with respect to students who had transferred between colleges/universities during the two years after first enrollment. For the prior reports, a student's first enrollment was considered, and any credits earned at a later institution were removed. For this report, the student records were combined, allowing students who earned 24 or more credits between several institutions to count toward the credit attainment statistic.

Additionally, this year, CSCU was able to share more accurate and complete data about remedial education that includes remedial courses taken at the transitional, intensive, and embedded levels as required by PA 12-40. Prior data matches were done with data collected before or during the time when the new policy on remedial education was being implemented.

Explanation of Programming Logic for Term/Student-level Records: (see Figure 1 on next page):

1. Var1: All students enrolled in a CPUCC within 16 months of graduation.

- If earliest start-of-term date before graduation (i.e., a dual-enrollment student), term record discarded before repeating this step.
- If earliest start-of-term date more than 16 months after graduation:
- Student-level enrollment at CPUCC = "No" (Var1=0)
- Student-level enrollment at CSCU = "No" (Var3=0)
- Student-level credit and remediation data removed (Var2, Var4 = missing)
- If the earliest start-of-term date within 16 months after graduation:
- Student-level enrollment at CPUCC = "Yes" (Var1=1)

2. Var2: Out of those students where enrollment at CPUCC = "Yes" (Var1=1), all students with 24 or more credits within two years of enrollment.

- For each term record, time between credit attainment date and enrollment date calculated. If more than two years, term record discarded.
- Calculated the maximum number of cumulative credits for each student:
- If 24 or more credits, student-level credit attainment = "Yes" (Var2=1)
- Otherwise, student-level credit attainment = "No" (Var2=0)

3. Var3: Out of those students where enrollment at CPUCC = "Yes" (Var1=1), regardless of credit attainment, all students enrolled in a CSCU within 16 months of graduation.

- If UCONN only:
- Student-level enrollment at CSCU = "No" (Var3=0)
- Student-level remediation data removed (Var4 = missing)
- If a student attended a CSCU, enrollment at CSCU was set to "Yes" (Var3=1)

4. Var4: Out of those students where enrollment at CSCU = "Yes" (Var1=1), regardless of credit attainment, all students with at least one remedial class within two years

- If remediation occurred, student-level remediation = "Yes" (Var4=1).
- Otherwise, student-level remediation = "No" (Var4=0).

Trends in Enrollment, Credit Attainment, and Remediation at Connecticut Public Universities and Community Colleges:
Results from P20WIN for the Graduating Classes of 2010, 2011, and 2012

## Visual Representation of Programming Logic

Trends in Enrollment, Credit Attainment, and Remediation at Connecticut Public Universities and Community Colleges: Results from P20WIN for the Graduating Classes of 2010, 2011, and 2012

## Calculation of School/District-level records:

1. The school/district percentage of students enrolled at a CPUCC within 16 months of graduation is the number of students within each school/district with a "Yes" for enrollment at a CPUCC divided by the total number of students within the school/district then multiplied by $100 \%$.
$\frac{\text { sum of Var1 }}{\text { count of graduates in each school/district }} * 100 \%$
2. The school/district percentage of students who completed one year's worth of credit within two years of enrollment is the number of students within each school/district with a "Yes" for credit attainment divided by the number of students within each school/district with a "Yes" for enrollment at a CPUCC then multiplied by $100 \%$.

$$
\frac{\text { sum of } \operatorname{Var} 2}{\text { sum of } \operatorname{Var} 1} * 100 \%
$$

3. The school/district percentage of students enrolled at a CSCU within 16 months of graduation is the number of students within each school/district with a "Yes" for enrollment at a CSCU divided by the total number of students within the school/district then multiplied by $100 \%$.

$$
\frac{\text { sum of Var } 3}{\text { count of graduates in each school/district }} * 100 \%
$$

4. The school/district percentage of students enrolled in a remedial course is the number of students within each school/district with a "Yes" for remediation divided by the number of students within each school/district with a "Yes" for enrollment at a CSCU then multiplied by $100 \%$.

$$
\frac{\text { sum of Var } 4}{\text { sum of } \operatorname{Var} 3} * 100 \%
$$
