Don't Miss It!
NEAT Virtual Conference
October 2020

Creating Independent Learning & Living
Through Assistive Technology

What is the Closer Look Forum?

Closer Look Forum is a different kind of online learning experience. Created by New England Assistive Technology (NEAT), it is designed to give participants a deeper understanding of Assistive Technology. One day a week for one month, you will have the opportunity to engage in focused topics that will help increase independence in your students and loved ones. The first two weeks will involve topics under the theme of **Learning**, and the second two weeks will cover topics under the theme of **Living**. Each topic will be divided into two meetings. The first meeting will be presentation-based and led by an AT specialist. Attendees will have a week to digest the topic and submit questions and comments. That feedback will then be discussed during a "closer look" second meeting. Topics will include the following and so much more:

Learning

- What is Optical Character Recognition (OCR) and How Can it Help Kids in School?
- AAC Companion Programs are Here to Help! Editing, Creating Materials, and More!
- Alexa: The Virtual Teaching Assistant

Living

- Mobile Apps to Make a Day in the City Accessible
- Living in the Accessible Gaming World
- Automate Your Life: The Simple Way to Make Smart Tech Work for You
