

## Common Core Look4s (CCL4s)

A 'Look-for' is a classroom resource that can be used as a non-evaluative assessment tool. The Look-fors in this peer-observation tool are designed to assess the extent to which students are engaged in particular elements of the mathematical practices of the Common Core State Standards for mathematics (CCSSO, 2010) and technology.

The tool provides suggested student actions for each of the practices as observational look-fors. These should be helpful in providing suggestions related to both planning and assessment for teachers, leaders, and school-based administrators.

# Digital Resources to Support the Mathematical Practices
