Educator Learning Hub

#CTLEARNINGHUB

Educators model what it means to be a lifelong learner every day.

The Educator Learning Hub can provide the professional learning resources on demand to support the desire to keep learning at their own pace anytime, anywhere.

The Connecticut State Department of Education is committed to reimagining all Connecticut classrooms.

This requires a deeper understanding of evidence-based practices that ensure all learners have access to daily opportunities that accelerate their learning.

The Educator Learning Hub is the place to access relevant professional learning resources on demand.

High-quality professional learning ensures educators have equitable access throughout their career to relevant, individual, and collaborative opportunities to enhance their practice, so that all students accelerate their learning and advance towards positive academic and non-academic outcomes.

Educators can reflect and find their area of focus, and view resources anytime, anywhere to develop a personalized professional learning pathway.

These resources can be accessed by individuals or educator teams.

We aim to provide students with flexible learning experiences to develop key learning targets. Educators require the same opportunity to learn from where they are, when they are able based on interest or personal learning goals so that they can transfer insights and skills to the classroom.
