K-12 Model Curricula Hub

#CTLEARNINGHUB

Welcome to the K-12 Model Curricula Hub.

Access to model curricula is our promise to accelerating learning and advancing equity. If we give students access to high quality, standards-based units of study for teacher use, then we can ensure positive student outcomes.

All model curricula are guided by six design principles ensuring it is focused on the standards; relevant to the student; flexible enough to meet the students where they are; coherent with connections to other subjects; communicating rigorous expectations; and is diverse, equitable, and inclusive.

So, how will you be able to access the K-12 Model Curricular resources? The Connecticut State Department of Education is excited to give all educators access to curricular resources to support the daily teaching and learning process through GoOpenCT: Connecticut's public library of open education resources.

It is our hope that this ease of access to a digitized curriculum will give our teacher colleagues back time to do what they love to do: TEACH!

The Connecticut State Department of Education believes the Connecticut Model Curricula can support teachers in how they plan to accelerate the learning experience. To this end, teachers will notice that the K-12 Model Curricula provides a recommended learning sequence that includes exact prerequisite content knowledge with grade level learning targets.

The common goal is to make sure all learners will have access to high quality, high impact learning with curriculum developed by teachers for teachers. The K-12 Model Curricula Hub has the potential to help all teachers implement best practices daily to accelerate learning and advance equity, anytime, anywhere.
