August 26, 2020

Dear Superintendents,

I am writing to notify you of a revision to the Coronavirus Relief Fund (CRF) allocation for Transportation in both the personnel and non-personnel related categories. During a review of the CRF Transportation allocations, it was discovered that an older simulation of how the funds were to be distributed was accidentally included in the summary of CRF funding that was shared with the districts on Friday. This simulation was derived from an earlier incomplete data set from the reopening survey. In this version, some districts would have received more transportation funding than the estimated transportation need provided in their survey.

Attached is the corrected version of the allocation of CRF funds to support districts' anticipated transportation costs. This change will mean that some districts will see an increase in their allocation and others a decrease. No longer will any district be allocated more transportation funding than their estimated need. Please accept my sincerest apologies for any confusion this has caused. If you need additional information or clarification, please don't hesitate to call me at 203-206-4885.

Sincerely,

Kathy Demsey
Chief Financial Officer
