The Connecticut State Department of Education will again provide all Connecticut schools and districts access to the Defined Ecosystem for the 2024-25 school year.

Defined Careers is a college and career readiness platform that provides students opportunities to explore careers in an engaging and experiential way. This enables students to discover their interests while making connections to real-world career opportunities.

Benefits for students include:

- **Career awareness** and application;
- The development of practical **critical thinking and problem-solving skills** as they complete tasks through the lens of different careers;
- **Engaging virtually** with real-world and professional scenarios which enhances students' understanding of workplace expectations and opportunities; and
- **Informed decision-making** as students learn to make informed choices about their educational and career paths.
