The Connecticut State Department of Education will again provide all Connecticut schools and districts access to the Defined Ecosystem for the 2024-25 school year.

Defined Learning provides K-12 career-connected project-based learning opportunities that cultivate essential 21st-century skills for all students. These standards-aligned tasks allow students to demonstrate their understanding of critical content while building durable skills through:

- **Developing critical thinking** through information analysis, decision making and reflection on learning;
- **Sparking creativity** by developing solutions to complex challenges;
- **Improving collaboration** by requiring teams to work on projects that mirror real-world environments; and
- **Enhancing communication** as they present and discuss their ideas.
