

**Environmental Health & Drinking Water Branch**

October 7, 2025

Greetings,

The Connecticut Department of Public Health (DPH) Radon Program is pleased to share the 2025-2026 Radon Poster Contest. Supported by the Environmental Protection Agency's (EPA) State Indoor Radon Grant, the Connecticut Radon Program organizes two annual contests:

- The State Radon Poster Contest for students ages 9–14.
- The State Radon Video Contest for students ages 14–18.

Both contests aim to raise awareness about lung cancer prevention, educate the public about the health risks associated with elevated indoor radon levels, and encourage both radon testing in homes and mitigation actions when high levels are found.

These contests are often administered by science teachers, art teachers, video production teachers, and enrichment program teachers alike. We would appreciate any effort on your part to encourage student participation. For more information please visit: <https://portal.ct.gov/dph/environmental-health/radon/radon-in-schools/annual-poster-and-video-contest>. Entries must be received by **November 6, 2025**. If you require additional information about the upcoming fall contests, please do not hesitate to contact us or use the QR code below for more information.

Please send posters with entry submission and release forms to:

**CT Department of Public Health  
Radon Program  
410 Capitol Ave, MS#12-RAD  
Hartford, CT 06134**

Please send video entries with submission and release forms to:

**DPH.RadonReports@ct.gov**

Thank you for your continued support in raising awareness of radon and its impact on public health.

Warm regards,

Alessia Frasco, Epidemiologist 2  
Occupational Health Program
