

Crediting Summary Charts for the Child and Adult Care Food Program (CACFP)

Meal Patterns for Children

CACFP facilities must be able to document the meal pattern contribution of foods and beverages served in CACFP meals and snacks. This publication summarizes the crediting requirements and methods for the five food components of the U.S. Department of Agriculture's (USDA) CACFP meal patterns for children. [Chart 1](#) provides an overview of the crediting requirements for each component. [Charts 2 through 6](#) summarize the specific crediting considerations for each of the five meal pattern components (milk, meat/meat alternates, vegetables, fruits, and grains).

Crediting Documentation

CACFP facilities must use appropriate crediting methods and maintain the applicable documentation for commercial products and foods made from scratch. Menu planners should follow the guidance below to ensure that CACFP menus comply with the crediting requirements of the [CACFP meal patterns for children](#).

- **Use the Food Buying Guide for Child Nutrition Programs (FBG):** The USDA's [FBG](#) determines food yields and crediting information, and the specific contribution of foods toward the meal pattern requirements. It indicates how many servings a specific quantity of food will provide, what quantity of raw product will provide the amount of ready-to-cook food in a recipe, and how much food to buy to provide a specific meal pattern contribution.
- **Obtain a Child Nutrition (CN) label or product formulation statement (PFS) for all commercial processed products:** CACFP facilities must have a CN label or PFS to document the meal pattern contribution of all commercial processed foods. Commercial processed foods without this documentation cannot credit. For more information, refer to the Connecticut State

Department of Education's (CSDE) resources, [Using Child Nutrition \(CN\) Labels in the Child and Adult Care Food Program](#), [Using Product Formulation Statements in the Child and Adult Care Food Program](#), and [Accepting Processed Product Documentation in the Child and Adult Care Food Program](#), and the USDA's [Tips for Evaluating a Manufacturer's Product Formulation Statement](#). Additional resources are available in the ["Crediting Commercial Processed Products"](#) section of the CSDE's [Crediting Foods in CACFP Child Care Programs](#) webpage.

- **Maintain recipes for foods made from scratch:** CACFP facilities must have recipes (preferably standardized) that document the crediting information for all foods made from scratch. Determine the recipe's meal pattern contribution per serving by: 1) using the FBG to determine the weight or volume of each creditable ingredient in the recipe; and 2) dividing the weight or volume of each creditable ingredient by the number of servings. The FBG's [Recipe Analysis Workbook \(RAW\)](#) allows menu planners to search for creditable ingredients and calculate a recipe's meal pattern contribution. For more information, visit the ["Crediting Foods Made from Scratch"](#) section of the CSDE's [Crediting Foods in CACFP Child Care Programs Programs](#) webpage.

Remember to round down all crediting amounts for products and recipes to the nearest minimum creditable amount (refer to [chart 1](#)).

Crediting Summary Charts for the CACFP Meal Patterns for Children

Chart 1 – Overview of Crediting Requirements for the Meal Pattern Components

Criteria	Milk	Meat/Meat Alternates (MMA)	Vegetables	Fruits	Grains
Meal pattern measure	Volume: cups	Weight: ounces	Volume: cups	Volume: cups	Ounce equivalents (oz eq): weight (groups A-G) or volume (groups H-I)
Minimum creditable amount	Full serving	¼ ounce	⅛ cup	⅛ cup	¼ oz eq
Crediting methods: Round down all crediting amounts for products and recipes to the nearest minimum creditable amount	Credit based on allowable types of milk for each age group (refer to chart 2).	<p>MMA without added ingredients: Credit based on cooked weight, e.g., 1 ounce of cooked lean meat credits as 1 ounce of MMA. Use the FBG to determine cooked yields or edible portions.</p> <p>Processed MMA (contain added ingredients): Credit based on the amount specified in the CN label, PFS, or FBG. Note: The manufacturer’s serving weight is not the same as the MMA contribution because processed foods contain non-MMA ingredients.</p>	<p>Credit based on volume (cups) using the yields in the FBG.</p> <p>Credit raw leafy greens as half the volume served.</p>	<p>Credit based on volume (cups) using the yields in the FBG.</p> <p>Credit dried fruit credits as twice the volume served.</p>	<p>Method 1: Use the weight (groups A-E) or volume (groups H-I) in the USDA’s Exhibit A chart (refer to Grain Ounce Equivalents for the Child and Adult Care Food Program).</p> <p>Method 2: Determine the weight (grams) of the creditable grains per servings. Refer to Calculation Methods for Grain Ounce Equivalents in the Child and Adult Care Food Program.</p> <ul style="list-style-type: none"> • Groups A-F: 1 oz eq = 16 grams of creditable grains • Groups H: 1 oz eq = 28 grams of creditable grains
Documentation for unprocessed products	Not applicable	Use FBG to determine and document food yields and crediting information.			
Documentation for processed products	Not applicable, except for milk in smoothies.	Must have CN label or PFS. CSDE webpage: Crediting Commercial Processed Products in CACFP Child Care Programs			
Documentation for foods made from scratch	Not applicable, except for milk in smoothies.	Must have recipe (preferably standardized). CSDE webpage: Crediting Foods Made from Scratch in CACFP Child Care Programs			

Crediting Summary Charts for the Child and Adult Care Food Program (CACFP) Meal Patterns for Children

How to Credit the Meal Pattern Components

Charts 2 through 6 summarize the specific crediting considerations for each of the five components and include links to resources and websites with additional information.

- [Chart 2](#). Milk Component
- [Chart 3](#). Meat/Meat Alternates Component
- [Chart 4](#). Vegetables Component
- [Chart 5](#). Fruits Component
- [Chart 6](#). Grains Component

For detailed guidance on the meal patterns and crediting requirements, refer to the Guide, *Guide to Meeting the Meal Pattern Requirements for CACFP Child Care Programs*, and visit the CSDE's [Crediting Foods in CACFP Child Care Programs](#) webpage.

Crediting Summary Charts for the CACFP Meal Patterns for Children

Chart 2 – How to Credit the Milk Component

The milk component includes only fluid milk. Milk must be pasteurized, meet all state and local requirements, and contain vitamins A and D at levels specified by the Food and Drug Administration (FDA). For information on the meal pattern requirements for the milk component, refer to section 3 of the Guide, *Guide to Meeting the Meal Pattern Requirements for CACFP Child Care Programs*.

Noncreditable foods: Examples of foods that do not credit as the milk component include milk that does not meet the fat content and flavor restrictions for each age group, such as low-fat (1%) milk and fat-free milk for age 1, and flavored milk, reduced fat (2%) milk, and whole milk for ages 2-5; nondairy milk substitutes that do not meet the USDA’s nutrition standards for fluid milk substitutes, such as rice milk, almond milk, and cashew milk; milk that is cooked or baked in prepared foods, such as cereals, puddings, and cream sauces; nutrition supplement beverages, such as Abbott’s Pediasure; powdered milk beverages, such as Nestle’s NIDO; and for child care centers in public schools only, milk and nondairy milk substitutes that do not meet the state beverage requirements of Connecticut General Statute Section 10-221q. For additional guidance, refer to the CSDE’s resource, *Noncreditable Foods for Child Care Programs in the Child and Adult Care Food Program*.

Food item	Crediting requirements	Crediting resources
Fluid milk	<ul style="list-style-type: none"> • The CACFP meal patterns require fluid milk as a beverage. Milk does not credit when cooked or baked in foods, such as cereals, puddings, cream sauces, and other foods. • Milk must be pasteurized, meet all state and local requirements, and contain vitamins A and D at levels specified by the Food and Drug Administration (FDA). • The allowable types of milk are different for each age group. <ul style="list-style-type: none"> ○ Age 1: Whole milk, unflavored ○ Ages 2 and older: Low-fat (1%) or fat-free milk, unflavored ○ Ages 6 and older: Low-fat (1%) or fat-free milk, unflavored or flavored. The USDA’s CACFP best practices recommends serving only unflavored milk (refer to USDA Memo CACFP 15-2016: Optional Best Practices to Further Improve Nutrition in the CACFP). • Allowable types of milk include any of the following that meet the fat content and flavor restrictions: lactose-reduced milk, lactose-free milk, acidified milk, cultured milk, cultured buttermilk, and Ultra High Temperature (UHT) milk. 	<ul style="list-style-type: none"> • USDA webpage: Serving Milk in the CACFP • CSDE training: Bite Size: Meeting the CACFP Meal Patterns for Children: Module 3: Milk Component • CSDE handout (applies only to child care centers in public schools): Allowable Beverages for Connecticut Public Schools

Chart 2 – How to Credit the Milk Component, *continued*

Food item	Crediting requirements	Crediting resources
Milk in fruit/vegetable smoothies	<ul style="list-style-type: none"> The minimum creditable amount of milk in a smoothie is ¼ cup. If a smoothie contains less than the full serving of milk, the meal or snack must include additional milk to provide the full serving for each age group. 	<ul style="list-style-type: none"> CSDE handout: <i>Crediting Smoothies in the Child and Adult Care Food Program</i>
Milk substitutes for children without a disability	<ul style="list-style-type: none"> The USDA allows two types of milk substitutions: 1) nondairy milk substitutes that meet the USDA’s nutrition standards for fluid milk substitutes; and 2) lactose-free or lactose-reduced milk that meets the required fat content and flavor restrictions for each age group (refer to “Fluid milk” above). Child care centers in public schools: Must also meet the state beverage requirements for nondairy milk substitutes (Section 10-221q of the Connecticut General Statutes). The state beverage statute requires that milk cannot contain artificial sweeteners and cannot exceed 4 grams of sugars per fluid ounce. Nondairy milk substitutes cannot contain artificial sweeteners and cannot exceed 4 grams of sugars per fluid ounce, 35 percent of calories from fat, and 10 percent of calories from saturated fat. Juice, water, and other beverages can never substitute for milk in meals or snacks for children without a disability. 	<ul style="list-style-type: none"> CSDE handout: <i>Allowable Milk Substitutes for Children without Disabilities in CACFP Child Care Programs</i> CSDE handout: <i>Determining if Nondairy Beverages Meet the USDA’s Nutrition Standards for Fluid Milk Substitutes in the Child and Adult Care Food Program</i> USDA Memo: CACFP 17-2016: Nutrition Requirements for Fluid Milk and Fluid Milk Substitutions in the CACFP, Q&As CSDE handout (applies only to child care centers in public schools): <i>Allowable Beverages for Connecticut Public Schools</i>

For more resources, visit the CSDE’s webpage, [Milk Component for CACFP Child Care Programs](#).

Crediting Summary Charts for the CACFP Meal Patterns for Children

Chart 3 – How to Credit the Meat/Meat Alternates Component

The MMA component includes fresh and frozen meats (e.g., lean beef, pork, poultry, fish, and shellfish), processed meats (e.g., chicken nuggets, deli meats, and fish sticks), canned meats (e.g., chicken, tuna, and salmon), and meat alternates such as eggs, cheese, yogurt, nuts and seeds and their butters, beans and peas (legumes), tofu, and tempeh. The USDA’s [CACFP best practices](#) recommend serving only lean meats, nuts, and legumes; limiting processed meats to no more than one serving per week; and serving only natural cheeses and choosing low-fat or reduced-fat cheeses. For information on the meal pattern requirements for the MMA component, refer to section 3 of the Guide, [Guide to Meeting the Meal Pattern Requirements for CACFP Child Care Programs](#).

Note: The manufacturer’s serving weight is not the same as the MMA contribution, i.e., 1 ounce does not equal 1 ounce of MMA, because processed foods (such as combination foods, deli meats, hot dogs, and sausages) contain non-MMA ingredients. CACFP facilities must obtain a CN label or PFS for all commercial processed products (refer to “[Crediting Documentation](#)” in this document).

Noncreditable foods: Examples of foods that do not credit as the MMA component include bacon; commercial canned soups, e.g., beef barley, beef noodle, turkey or chicken noodle, and turkey or chicken rice; cream cheese; drinkable yogurt; egg whites; frozen yogurt; imitation cheese; products made with tofu that are not easily recognized as meat substitutes; and sour cream. For additional guidance, refer to the CSDE’s resource, [Noncreditable Foods for Child Care Programs in the Child and Adult Care Food Program](#).

Food item	1 ounce of MMA =	Additional crediting requirements and resources
Alternate protein products (APPs) , e.g., veggie burgers, meatless chicken nuggets, and soy hotdogs	<ul style="list-style-type: none"> ● 1 ounce of APP: Must have a CN label or PFS from the manufacturer with supporting documentation on company letterhead that the APP ingredient meets the USDA’s requirements (refer to “Crediting Documentation” on page 1 and “Commercial meat, poultry, or fish products with added ingredients” in this section). 	<ul style="list-style-type: none"> ● CSDE handout: Requirements for Alternate Protein Products in the Child and Adult Care Food Program ● USDA handout: Questions and Answers on Alternate Protein Products
Cheeses , e.g., cheddar, mozzarella, provolone, American, and cottage cheese	<ul style="list-style-type: none"> ● 1 ounce of natural cheese and pasteurized process cheese, e.g., American. ● ¼ cup of cottage or ricotta cheese. ● 2 ounces of cheese substitute, cheese food substitute, and cheese spread substitute. 	<ul style="list-style-type: none"> ● Cream cheese does not credit. ● Foods that contain cheese (such as pizza and macaroni and cheese) require a CN label or PFS for commercial products and a standardized recipe for foods made from scratch (refer to “Crediting Documentation” on page 1). ● The USDA’s CACFP best practices recommend serving only natural cheeses and choosing low-fat or reduced-fat cheeses (refer to USDA Memo CACFP 15-2016: Optional Best Practices to Further Improve Nutrition in the CACFP).

Chart 3 – How to Credit the Meat/Meat Alternates Component, *continued*

Food item	1 ounce of MMA =	Additional crediting requirements and resources
Cheeses , e.g., cheddar, mozzarella, provolone, American, and cottage cheese	<ul style="list-style-type: none"> • 1 ounce of natural cheese and pasteurized process cheese, e.g., American. • ¼ cup of cottage or ricotta cheese. • 2 ounces of cheese substitute, cheese food substitute, and cheese spread substitute. 	<ul style="list-style-type: none"> • Cream cheese does not credit. • Foods that contain cheese (such as pizza and macaroni and cheese) require a CN label or PFS for commercial products and a standardized recipe for foods made from scratch (refer to “Crediting Documentation” on page 1). • The USDA’s CACFP best practices recommend serving only natural cheeses and choosing low-fat or reduced-fat cheeses (refer to USDA Memo CACFP 15-2016: Optional Best Practices to Further Improve Nutrition in the CACFP).
Commercial combination foods , e.g., pizza and chicken nuggets	<ul style="list-style-type: none"> • Varies by product: Must have a CN label or PFS to document the amount of meat or meat alternate per serving (refer to “Crediting Documentation” on page 1 and “Commercial meat, poultry, or fish products with added ingredients” in this section). 	<ul style="list-style-type: none"> • CSDE handout: Crediting Commercial Meat/Meat Alternate Products in the Child and Adult Care Food Program • CSDE webpage: Crediting Commercial Processed Products in CACFP Child Care Programs
Commercial meat, poultry, or fish products with added ingredients , e.g., hotdogs, deli meats, and sausages	<ul style="list-style-type: none"> • Varies by product: Must have a CN label or PFS to document the amount of meat or meat alternate per serving (refer to “Crediting Documentation” on page 1 and “Commercial meat, poultry, or fish products with added ingredients” in this section). 	<ul style="list-style-type: none"> • Regular bacon does not credit. Some brands of turkey bacon might credit with the appropriate documentation from a CN label or PFS. • CSDE handout: Crediting Commercial Meat/Meat Alternate Products in the Child and Adult Care Food Program • CSDE handout: Using Child Nutrition (CN) Labels in the Child and Adult Care Food Program • CSDE handout: Using Product Formulation Statements in the Child and Adult Care Food Program • CSDE webpage: Crediting Commercial Processed Products in CACFP Child Care Programs • USDA handout: Reviewer’s Checklist for Evaluating Manufacturer Product Formulation Statements for Meat/Meat Alternates • USDA handout: Tips for Evaluating a Manufacturer’s Product Formulation Statement

Crediting Summary Charts for the CACFP Meal Patterns for Children

Chart 3 – How to Credit the Meat/Meat Alternates Component, *continued*

Food item	1 ounce of MMA =	Additional crediting requirements and resources
Cooked lean meat, poultry, or fish, i.e., without bone, skin, or added ingredients	<ul style="list-style-type: none"> 1 ounce: Refer to the FBG for cooked yields of meat, poultry, and fish. 	
Deli meats, e.g., turkey, ham, roast beef, salami, and bologna	<ul style="list-style-type: none"> Varies by product: serving (refer to “Crediting Documentation” on page 1 and “Commercial meat, poultry, or fish products with added ingredients” in this section). Many deli meats contain added binders, extenders, and liquids, and do not credit based on serving weight. Some deli meats require several ounces to credit as 1 ounce of MMA. 	<ul style="list-style-type: none"> The USDA’s CACFP best practices recommend limiting processed meats to no more than one serving per week (refer to USDA Memo CACFP 15-2016: Optional Best Practices to Further Improve Nutrition in the CACFP). CSDE handout: Crediting Deli Meats in the Child and Adult Care Food Program
Dried meat, poultry, and seafood products, e.g., jerky and summer sausage	<ul style="list-style-type: none"> Varies by product: Must have a CN label or PFS to document the amount of meat per serving (refer to “Commercial meat, poultry, or fish products with added ingredients” in this section). 	<ul style="list-style-type: none"> Must evaluate the product’s PFS to ensure it meets the following USDA crediting principles: 1) the creditable meat ingredient must match, or have a similar description to, the ingredient listed on the product’s label; 2) the creditable meat ingredient must have a similar description to a food item in the FBG; and 3) the creditable amount cannot exceed the finished weight of the product. For example, a 1-ounce serving of beef jerky cannot credit for more than 1 ounce of the MMA component. Ground pork and beef ingredients must include the percent fat because the fat content has a direct correlation to the cooking yield. To credit in Child Nutrition Programs, the fat content of ground beef or ground pork in dried meat products cannot exceed 30 percent. USDA Memo SP 21-2019, CACFP 08-2019, and SFSP 07-2019: Crediting Shelf-Stable, Dried and Semi-Dried Meat, Poultry, and Seafood Products in the Child Nutrition Programs USDA’s webinar: Moving Forward: Update on Food Crediting in Child Nutrition Programs with Guidance for Dried Meat Products

Crediting Summary Charts for the CACFP Meal Patterns for Children

Chart 3 – How to Credit the Meat/Meat Alternates Component, *continued*

Food item	1 ounce of MMA =	Additional crediting requirements and resources
Eggs	<ul style="list-style-type: none"> • ½ large 	<ul style="list-style-type: none"> • Only whole eggs credit. Liquid egg substitutes are not whole eggs and do not credit. Egg whites served alone do not credit. • To credit foods that contain eggs (such as quiche or frittatas) requires a CN label or PFS for commercial products, and a recipe for foods made from scratch.
Foods made from scratch, e.g., pizza and macaroni and cheese	<ul style="list-style-type: none"> • Varies by food: Must have a recipe (preferably standardized) to document the amount of meat or meat alternate per serving (refer to “Crediting Documentation” on page 1). 	<ul style="list-style-type: none"> • CSDE webpage: Crediting Foods Made from Scratch in CACFP Child Care Programs
Hummus made with chickpeas (or other legumes) and tahini	<ul style="list-style-type: none"> • Varies by product and recipe. The serving must contain at least ¼ ounce of MMA from the chickpeas/garbanzo beans (legumes) and tahini (sesame paste) combined. • Commercial products require a CN label or PFS to document the amount of meat alternate per serving (refer to “Crediting Documentation” on page 1 and “Commercial meat, poultry, or fish products with added ingredients” in this section). • Hummus made from scratch must have a recipe to document the amount of meat alternate per serving (refer to “Crediting Documentation” on page 1). 	<ul style="list-style-type: none"> • A ¼-cup serving of legumes credits as 1 ounce of the MMA component. The minimum creditable amount is 1 tablespoon (¼ ounce). • Tahini credits the same as nut/seed butters. Two tablespoons of tahini credit as 1 ounce of the MMA component. The minimum creditable amount is ½ tablespoon (¼ ounce). • The legumes in hummus may credit as either MMA or vegetables but one serving cannot credit as both components in the same meal or snack. Refer to chart 4 for information on crediting hummus as the vegetables component. • CSDE handout: Crediting Legumes in the Child and Adult Care Food Program

Crediting Summary Charts for the CACFP Meal Patterns for Children

Chart 3 – How to Credit the Meat/Meat Alternates Component, *continued*

Food item	1 ounce of MMA =	Additional crediting requirements and resources
Legumes (cooked beans and peas), e.g., kidney beans, black beans, and chickpeas	<ul style="list-style-type: none"> ● ¼ cup of cooked legumes ● 1 ounce of roasted legumes, e.g., roasted chickpeas and roasted soybeans (soy nuts) 	<ul style="list-style-type: none"> ● The liquid served with legumes does not credit, such as the sauce in baked beans. ● Legumes may credit as either MMA or vegetables but one serving cannot credit as both components in the same meal. Refer to chart 4 for information on crediting legumes as vegetables. ● Roasted or dried legumes (such as roasted soybeans or roasted chickpeas) credit as the MMA component the same as nuts and seeds. A 1-ounce serving of roasted or dried legumes credits as 1 ounce of the MMA component. At lunch and supper, roasted or dried legumes cannot credit for more than half of the MMA component; they must be combined with another meat or meat alternate to meet the full serving for each grade group. ● CSDE handout: Crediting Legumes in the Child and Adult Care Food Program
Pasta products made of 100 percent legume flour, e.g., chickpea flour pasta and lentil flour pasta	<ul style="list-style-type: none"> ● ¼ cup of cooked legume flour pasta 	<ul style="list-style-type: none"> ● CACFP menus must offer the legume flour pasta with an additional MMA, such as tofu, cheese, or meat. ● Pasta made of 100 percent legumes may credit as either MMA or vegetables but one serving cannot credit as both components in the same meal. Refer to chart 4 for information on crediting 100 percent legume flour pasta products as vegetables.
Nut/seed butters, e.g., peanut butter, almond butter, sunflower seed butter, and soy nut butter	<ul style="list-style-type: none"> ● 2 tablespoons ● Note: Use <i>tablespoons</i>, not weight. Measuring 1 ounce by weight does <i>not</i> provide 1 ounce of MMA. The FBG indicates that 1.1 ounces of nut/seed butter credit as 1 ounce of MMA. 	<ul style="list-style-type: none"> ● Consider the appropriateness of the serving size for each age group. It may be unreasonable to provide the full serving of a nut or seed butter in one menu item, such as a peanut butter sandwich. ● CSDE handout: Crediting Nuts and Seeds in the Child and Adult Care Food Program

Crediting Summary Charts for the CACFP Meal Patterns for Children

<p>Yogurt and soy yogurt, plain or flavored; sweetened or unsweetened; and with or without added fruit, either blended or on the bottom or top</p>	<ul style="list-style-type: none"> ● ½ cup or 4 ounces weight 	<ul style="list-style-type: none"> ● Cannot exceed 3.83 grams of sugars per ounce. ● Yogurt mixed in smoothies credits as the MMA component. Crediting requires a recipe, PFS, or CN label. Refer to <i>Crediting Smoothies in the Child and Adult Care Food Program</i>. ● Fruits in commercially prepared yogurt (either blended or on the bottom or top) do not credit toward the fruits component. Menu planners may credit fruits offered as a separate component, such as yogurt topped with fresh blueberries or sliced strawberries in a yogurt-fruit parfait (refer to chart 5). ● Homemade yogurt does not credit. ● Commercial yogurt products do not credit. Examples include drinkable or squeezable yogurt, frozen yogurt, yogurt bars, yogurt-covered fruits and nuts, and yogurt-flavored products. ● CSDE handout: <i>Crediting Yogurt in the Child and Adult Care Food Program</i> ● USDA Memo SP 02-2024, CACFP 02-2024, and SFSP 02-2024: Revised: Crediting Tofu and Soy Yogurt Products in the School Meal Programs, CACFP, and SFSP

For more resources, visit the CSDE’s webpage, [Meat/Meat Alternates Component for CACFP Child Care Programs](#).

Crediting Summary Charts for the CACFP Meal Patterns for Children

Chart 4 – How to Credit the Vegetables Component

The vegetables component includes fresh vegetables, frozen vegetables, canned vegetables, rehydrated dried vegetables, and pasteurized 100 percent full-strength vegetable juice. The USDA’s [CACFP best practices](#) recommend providing at least one serving per week of dark green vegetables, red and orange vegetables, beans and peas (legumes), starchy vegetables, and other vegetables. For more information, refer to the CSDE’s resource, [Vegetable Subgroups in the Child and Adult Care Food Program](#). For information on the meal pattern requirements for the vegetables component, refer to section 3 of the Guide, [Guide to Meeting the Meal Pattern Requirements for CACFP Child Care Programs](#).

Juice limit: Pasteurized full-strength juice credits as either the vegetables component or fruits component at only one meal or snack per day.

Noncreditable foods: Examples of foods that do not credit as the vegetables component include chili sauce; dehydrated vegetables used for seasoning; cream vegetable soups, e.g., cream of broccoli and cream of mushroom; home-canned products (for food safety reasons); ketchup; pickle relish; and snack-type foods made from vegetables, such as potato chips. For additional guidance, refer to the CSDE’s resource, [Noncreditable Foods for Child Care Programs in the Child and Adult Care Food Program](#).

Food item	Credit based on	Additional crediting requirements and resources
Canned vegetables , e.g., corn, peas, and kidney beans	<ul style="list-style-type: none"> Served volume, e.g., ½ cup = ½ cup of the vegetables component. 	<ul style="list-style-type: none"> Must be drained. The packing liquid does not credit, such as the water in canned corn or the sauce in baked beans. Refer to the FBG for yields.
Commercial products containing vegetables , e.g., hummus, vegetable pizza, vegetable egg rolls, breaded onion rings, and soups	<ul style="list-style-type: none"> Varies by product: Must have a CN label or PFS to document the amount of vegetables per serving (refer to “Crediting Documentation” on page 1). Note: CN labels are available only for main dish commercial products that contribute to the MMA component but typically indicate the contribution of other meal components that are part of these products, e.g., vegetables, fruits, and grains. 	<ul style="list-style-type: none"> CSDE handout: Using Child Nutrition (CN) Labels in the Child and Adult Care Food Program CSDE handout: Using Product Formulation Statements in the Child and Adult Care Food Program CSDE webpage: Crediting Commercial Processed Products in CACFP Child Care Programs USDA handout: Tips for Evaluating a Manufacturer’s Product Formulation Statement

<p>Pureed vegetables, e.g., sweet potatoes, tomato sauce, and butternut squash</p>	<ul style="list-style-type: none"> Served volume, e.g., ½ cup = ½ cup of the vegetables component. Must be recognizable. 	<ul style="list-style-type: none"> Must be recognizable (visible), e.g., tomato sauce, split pea soup, mashed potatoes, mashed sweet potatoes, and pureed butternut squash. Pureed vegetables do not credit as the vegetables component when they are not recognizable unless the food also provides at least ⅛ cup of a visible creditable vegetable. For example, a serving of macaroni and cheese that contains ⅛ cup of diced butternut squash (visible) and ⅛ cup of pureed carrots (not visible) credits as ¼ cup of the red/orange vegetables subgroup. Pureed vegetables in smoothies credit only as juice. CSDE handout: <i>Crediting Smoothies in the Child and Adult Care Food Program</i>
<p>Vegetable juice, pasteurized full-strength, e.g., tomato juice and mixed vegetable juice</p>	<ul style="list-style-type: none"> Served volume, e.g., ½ cup = ½ cup of the vegetables component. 	<ul style="list-style-type: none"> Juice limit: Juice credits as either the vegetables component or fruits component at only one meal or snack per day. The juice limit includes all sources of juice, e.g., 100 percent juice, frozen pops made from 100 percent juice, pureed fruits and vegetables in smoothies, and juice from canned fruit in 100 percent juice. CSDE handout: <i>Crediting Juice in the Child and Adult Care Food Program</i>

For more resources, visit the CSDE’s webpage, [Vegetables Component for CACFP Child Care Programs](#).

Crediting Summary Charts for the CACFP Meal Patterns for Children

Chart 5 – How to Credit the Fruits Component

The fruits component includes fresh fruit; frozen fruit; dried fruit; canned fruit in juice, water, or light syrup; and pasteurized 100 percent full-strength fruit juice. The USDA’s [CACFP best practices](#) recommend serving whole fruits (fresh, canned, dried, and frozen) more often than juice; and making at least one of the two required snack components a vegetable or fruit. For information on the meal pattern requirements for the fruits component, refer to section 3 of the Guide, [Guide to Meeting the Meal Pattern Requirements for CACFP Child Care Programs](#).

Juice limit: Pasteurized full-strength juice credits as either the vegetables component or fruits component at only one meal or snack per day.

Noncreditable foods: Examples of foods that do not credit as the fruits component include banana chips; dried coconut; fruit snacks (e.g., fruit roll-ups, fruit leathers, fruit wrinkles, fruit twists, yogurt-covered fruit snacks); home-canned products (for food safety reasons); jams, jellies, and preserves; and juice drinks that are not 100 percent juice such as grape juice drink, orange juice drink, pineapple-grapefruit drink, cranberry juice cocktail, and lemonade. For additional guidance, refer to the CSDE’s resource, [Noncreditable Foods for Child Care Programs in the Child and Adult Care Food Program](#).

Food item	Credits based on	Additional crediting requirements and resources
Canned fruits in juice, water, or syrup , e.g., canned peaches and pineapple tidbits	<ul style="list-style-type: none"> Served volume, e.g., ½ cup = ½ cup of the fruits component 	<ul style="list-style-type: none"> If the menu planner credits the juice from canned fruit toward the fruits component, it also counts toward the juice limit. Refer to the FBG for yields. CSDE handout: Crediting Juice in the Child and Adult Care Food Program
Coconut	<ul style="list-style-type: none"> Fresh and frozen coconut: Served volume, e.g., ½ cup = ½ cup of the fruits component Dried coconut: Twice the volume served, e.g., ¼ cup = ½ cup of the fruits component Coconut water labeled as 100 percent juice (credits as juice): Served volume, e.g., ½ cup = ½ cup of the fruits component 	<ul style="list-style-type: none"> Coconut flour, coconut oil, and coconut milk do not credit. CACFP facilities must count coconut water with all other juices toward the juice limit (refer to “Juice limit” under “Fruit juice, pasteurized full-strength”).

Crediting Summary Charts for the CACFP Meal Patterns for Children

Chart 5 – How to Credit the Fruits Component, *continued*

Food item	Credits based on	Additional crediting requirements and resources
Commercial products containing fruits , e.g., trail mix with dried fruit and fruit smoothies	<ul style="list-style-type: none"> Varies by product: Must have a CN label or PFS to document the amount of vegetables per serving (refer to “Crediting Documentation” on page 1). Note: CN labels are available only for main dish commercial products that contribute to the MMA component but typically indicate the contribution of other meal components that are part of these products, e.g., vegetables, fruits, and grains. 	<ul style="list-style-type: none"> CSDE handout: Using Child Nutrition (CN) Labels in the Child and Adult Care Food Program CSDE handout: Using Product Formulation Statements in the Child and Adult Care Food Program CSDE webpage: Crediting Commercial Processed Products in CACFP Child Care Programs USDA handout: Tips for Evaluating a Manufacturer’s Product Formulation Statement
Dried fruits , e.g., raisins, apricots, and cherries	<ul style="list-style-type: none"> Twice the volume served, e.g., ¼ cup = ½ cup of the fruits component 	<ul style="list-style-type: none"> Dried coconut, banana chips, and fruit snacks (e.g., fruit roll-ups and yogurt-covered fruit snacks) do not credit.
Fresh fruits , e.g., apples, bananas, and pears	<ul style="list-style-type: none"> Served volume, e.g., ½ cup = ½ cup of the fruits component 	<ul style="list-style-type: none"> Refer to the FBG for yields. Depending on the size, one piece of fresh fruit might not provide the full serving of the fruits component. For example, one clementine credits as ⅜ cup of the fruits component, which does not provide the required ½-cup serving for ages 3 and older at breakfast, and ages 1-5 at snack.
Frozen fruits , e.g., frozen berries and melon	<ul style="list-style-type: none"> Served volume, e.g., ½ cup = ½ cup of the fruits component 	<ul style="list-style-type: none"> Refer to the FBG for yields.

Chart 5 – How to Credit the Fruits Component, *continued*

Food item	Credits based on	Additional crediting requirements and resources
Fruit juice, pasteurized full-strength , e.g., apple juice, orange juice, and grape juice	<ul style="list-style-type: none"> Served volume, e.g., ½ cup = ½ cup of the fruits component 	<ul style="list-style-type: none"> Juice limit: Juice credits as either the fruits component or vegetables component at only one meal or snack per day. The juice limit includes all sources of juice, e.g., 100 percent juice, frozen pops made from 100 percent juice, pureed fruits and vegetables in smoothies, and juice from canned fruit in 100 percent juice. Juice blends: Fruit and vegetable juice blends credit based on the first ingredient. If the first ingredient is a fruit juice or fruit puree, it credits as the fruits component. If the first ingredient is a vegetable juice or vegetable puree, it credits as the vegetables component. The USDA’s CACFP best practices recommend serving a variety of fruits and choose whole fruits (fresh, canned, frozen, or dried) more often than juice. (refer to USDA Memo CACFP 15-2016: Optional Best Practices to Further Improve Nutrition in the CACFP). CSDE handout: Crediting Juice in the Child and Adult Care Food Program
Pureed fruits , e.g., applesauce	<ul style="list-style-type: none"> Served volume, e.g., ½ cup = ½ cup of the fruits component Must be recognizable 	<ul style="list-style-type: none"> Must be recognizable (visible), e.g., applesauce. Pureed fruits do not credit as the fruits component when they are not recognizable, e.g., using applesauce or prune puree to replace the oil in muffins. Pureed vegetables and fruits in smoothies credit only as juice (refer to “Smoothies made of fruits/vegetables/juice” in this chart).
Smoothies made of fruits/vegetables/juice	<ul style="list-style-type: none"> Pureed fruits and vegetables in smoothies credit only as juice and must meet the same requirements as juice (refer to “Fruit juice, pasteurized full-strength” in this chart). Crediting is based on the volume (cups) of pureed fruits and vegetables per serving. 	<ul style="list-style-type: none"> Commercial smoothies require a PFS (or CN label, if available) to credit. Commercial smoothies cannot contain dietary or herbal supplements (refer to “Commercial products containing fruits” in this section). CSDE handout: Crediting Smoothies in the Child and Adult Care Food Program.

For more resources, visit the CSDE’s webpage, [Fruits Component for CACFP Child Care Programs](#).

Crediting Summary Charts for the CACFP Meal Patterns for Children

Chart 6 – How to Credit the Grains Component

The grains component includes breads and bread products (e.g., biscuits, bagels, rolls, tortillas, and muffins), snack products (e.g., crackers, animal crackers, graham crackers, hard pretzels, tortilla chips, and popcorn); cereal grains (e.g., buckwheat, brown rice, bulgur, and quinoa); ready-to-eat (RTE) breakfast cereals; cooked breakfast cereals (e.g., oatmeal); bread products used as an ingredient in another menu item such as combination foods (e.g., breading on fish or poultry and pizza crust in pizza); and pasta. Grain-based desserts (such as cookies, brownies, cakes, and granola bars) do not credit. For information on the meal pattern requirements for the grains component, refer to section 3 of the CSDE’s *Guide to Meeting the Meal Pattern Requirements for CACFP Child Care Programs*.

Commercial grain products and CACFP recipes must meet the crediting, whole grain-rich (WGR), and oz eq requirements.

- **Crediting requirements:** Grain products and recipes must be made with creditable grains. Creditable grains include whole grains, enriched grains, bran (such as oat bran, wheat bran, corn bran, rice bran, and rye bran), and germ (such as wheat germ). Bran and germ credit the same as enriched grains. For guidance on creditable grains, refer to the CSDE’s resources, *Crediting Whole Grains in the Child and Adult Care Food Program*, *Crediting Enriched Grains in the Child and Adult Care Food Program*, *Crediting Breakfast Cereals in the Child and Adult Care Food Program*, and *How to Identify Creditable Grains in the Child and Adult Care Food Program*.
- **Daily WGR requirement:** At least one serving per day must be WGR. The USDA’s *CACFP best practices* recommend at least two WGR serving per day. Grains that are not WGR must be enriched. For information on the WGR criteria and guidance on identifying WGR foods, refer to the CSDE’s *Guide to Meeting the Whole Grain-rich Requirement for the Child and Adult Care Food Program*.
- **Oz eq:** The oz eq contribution of creditable commercial grain products and CACFP recipes must be determined using one of the two allowable methods: 1) the required weight (groups A-E) or volume (groups H-I) in the USDA’s *Exhibit A: Grain Requirements for Child Nutrition Programs* (refer to the CSDE’s resources, *Grain Ounce Equivalents for the Child and Adult Care Food Program* and *How to Use the Ounce Equivalents Chart for the Child and Adult Care Food Program*); or 2) the creditable grains per serving (refer to the CSDE’s *Calculation Methods for Grain Ounce Equivalents in the Child and Adult Care Food Program* and *When Commercial Grain Products Require a Product Formulation Statement to Credit in the Child and Adult Care Food Program*). **Note:** The CSDE’s *Grain Ounce Equivalents for the Child and Adult Care Food Program* does not include groups F and G (grain-based desserts) of the USDA’s Exhibit A chart because these foods do not credit as the grains component in the CACFP.

Noncreditable foods: Examples of foods that do not credit as the grains component include commercial products that do not contain a creditable grain as the first ingredient (excluding water); recipes that are not made with creditable grains; breakfast cereals that contain more than 6 grams of sugars per ounce; and grain-based desserts. For additional guidance, refer to the CSDE’s resource, *Noncreditable Foods for Child Care Programs in the Child and Adult Care Food Program*.

Crediting Summary Charts for the CACFP Meal Patterns for Children

For more information, visit the CSDE's [Crediting Foods in CACFP Child Care Programs](#) webpage or contact the [CACFP staff](#) at the Connecticut State Department of Education, Bureau of Child Nutrition Programs, 450 Columbus Boulevard, Suite 504, Hartford, CT 06103-1841.

This document is available at https://portal.ct.gov/-/media/SDE/Nutrition/CACFP/Crediting/Crediting_Summary_Charts_CACFP.pdf.

In accordance with federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, this institution is prohibited from discriminating on the basis of race, color, national origin, sex (including gender identity and sexual orientation), disability, age, or reprisal or retaliation for prior civil rights activity.

Program information may be made available in languages other than English. Persons with disabilities who require alternative means of communication to obtain program information (e.g., Braille, large print, audiotape, American Sign Language), should contact the responsible state or local agency that administers the program or USDA's TARGET Center at (202) 720-2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877-8339.

To file a program discrimination complaint, a Complainant should complete a Form AD-3027, USDA Program Discrimination Complaint Form which can be obtained online at: <https://www.usda.gov/sites/default/files/documents/ad-3027.pdf>, from any USDA office, by calling (866) 632-9992, or by writing a letter addressed to USDA. The letter must contain the complainant's name, address, telephone number, and a written description of the alleged discriminatory action in sufficient detail to inform the Assistant Secretary for Civil Rights (ASCR) about the nature and date of an alleged civil rights violation. The completed AD-3027 form or letter must be submitted to USDA by:

1. mail: U.S. Department of Agriculture
Office of the Assistant Secretary for Civil Rights
1400 Independence Avenue, SW
Washington, D.C. 20250-9410; or
2. fax: (833) 256-1665 or (202) 690-7442; or
3. email: program.intake@usda.gov

This institution is an equal opportunity provider.

The Connecticut State Department of Education is committed to a policy of equal opportunity/affirmative action for all qualified persons. The Connecticut Department of Education does not discriminate in any employment practice, education program, or educational activity on the basis of race; color; religious creed; age; sex; pregnancy; sexual orientation; workplace hazards to reproductive systems, gender identity or expression; marital status; national origin; ancestry; retaliation for previously opposed discrimination or coercion, intellectual disability; genetic information; learning disability; physical disability (including, but not limited to, blindness); mental disability (past/present history thereof); military or veteran status; status as a victim of domestic violence; or criminal record in state employment, unless there is a bona fide occupational qualification excluding persons in any of the aforementioned protected classes. Inquiries regarding the Connecticut State Department of Education's nondiscrimination policies should be directed to: Attorney Louis Todisco, Connecticut State Department of Education, by mail 450 Columbus Boulevard, Hartford, CT 06103-1841; or by telephone 860-713-6594; or by email louis.todisco@ct.gov.
