Noncreditable Foods in the Child and Adult Care Food Program

Definition of Noncreditable Foods

Noncreditable foods are foods and beverages that do not count toward the meal components for reimbursable meals and snacks in the USDA's CACAFP meal patterns. The five meal components include meats/meat alternates (MMA), grains, vegetables, fruits, and milk.

Noncreditable foods include the two categories below.

1. **Foods and beverages served in amounts too small to credit:** These are foods and beverages that are less than the minimum creditable amount for each meal component, such as 1 tablespoon of applesauce or $\frac{1}{8}$ ounce of cheese. The minimum creditable amounts are $\frac{1}{4}$ ounce equivalent (oz eq) for the grains component and MMA component, $\frac{1}{8}$ cup for the fruits component and vegetables component, and 1 cup for the milk component, except for smoothies. The minimum creditable amount of milk in smoothies is $\frac{1}{4}$ cup.
2. **Foods and beverages that do not belong to any meal component:** These are foods and beverages that do not meet the crediting requirements for any meal component. Some examples include potato chips, pudding, ice cream, gelatin, cream cheese, bacon, condiments (e.g., syrup, jam, ketchup, mustard, mayonnaise, and butter), and water.

The "[Examples of Noncreditable Foods](#)" list in this document includes many examples of noncreditable foods for the CACFP. This list is not all-inclusive.

Allowable Noncreditable Foods

CACFP facilities may serve noncreditable foods in addition to the meal components to add variety, help improve acceptability of meals and snacks, and satisfy appetites. Examples include maple syrup on pancakes, salad dressing on tossed greens, and condiments such as ketchup or mustard on sandwiches and other entrees.

To ensure that CACFP meals and snacks meet participants' nutritional needs, the CSDE encourages menu planners to use discretion when serving noncreditable foods. Noncreditable foods typically contain few nutrients and are higher in added sugars, saturated fats, and sodium. Menu planners should read labels, be aware of the ingredients in foods, and limit the frequency and amount of less nutritious choices.

Use of CACFP Funds for Noncreditable Foods

CACFP funds cannot be used to purchase noncreditable foods, except for condiments served with creditable foods, and herbs and spices used to prepare and enhance the flavor of meals. For example, CACFP funds cannot be used to purchase grain-based desserts, gelatin, pudding, or canned cream soups.
