Training is required so that people involved in all levels of administration of programs that receive Federal financial assistance understand civil rights related laws, regulations, procedures, and directives. USDA Final Rule: Expanding Fluid Milk Options in Child Nutrition Programs: Effective June 8, 2026

On May 8, 2026, the USDA published the final rule, [Expanding Fluid Milk Options in Child Nutrition Programs](#). Effective June 8, 2026, this final rule with comment period expands fluid milk options by allowing schools and child and adult care providers participating in the Child Nutrition Programs (CNPs) to offer whole and reduced-fat milk to participants ages 2 and older. The final rule applies to the:

- National School Lunch Program (NSLP), including the Afterschool Snack Program (ASP), the NSLP and ASP preschool meal patterns, and Smart Snacks;
- School Breakfast Program (SBP), including the SBP preschool meal pattern;
- Child and Adult Care Food Program (CACFP); and
- Special Milk Program (SMP).

The final rule does not require CNP operators to offer whole or reduced fat milk for ages 2 and older. CNP operators may choose which types of fluid milk to offer within the requirements of each CNP meal pattern.

The USDA Food and Nutrition Service will be issuing an implementation memorandum to provide information and guidance on implementing the final rule. The CSDE is updating all meal pattern and crediting resources to reflect this information.
