Sponsors of the CACFP At-Risk Afterschool Meals (Supper) Program must complete the annual CACFP application process for the new federal fiscal year (2026-27) by **September 26, 2026**.

1 — Introduction

This document provides instructions for sponsors of the Child and Adult Care Food Program (CACFP) At-Risk Afterschool Meals (Supper) Program on completing and submitting the annual CACFP sponsor application in the Connecticut Online Application and Claiming System for Child Nutrition Programs (CNP System). The CNP System is a web-based software solution that provides state users and all sponsors of the Child Nutrition Programs with efficient and immediate access to applications, claims, and related nutrition program functions. Key system features include:

- a software system that manages information regarding sponsors, applications, claims, and reports;
- a single integrated database that serves all Child Nutrition Programs;
- the ability to save partially completed forms online, allowing the user to complete the process later; and
- individual User IDs and passwords for secure login to specific program functions.

CACFP sponsors will use the CNP System to complete and submit their annual CACFP sponsor application.

Application Renewal Packet

All institutions participating in the CACFP must have an approved application renewal packet on file to submit reimbursement claims for the new federal fiscal year, which begins on October 1, 2026. The online application packet includes the sponsor application, budget, and one or more site applications, as well as various checklist items and a board of directors listing (for non-profit organizations). The Sponsor Application is the starting point for all CACFP application renewals. Sponsors must begin with the Sponsor Application to access the other areas of the application packet.

Note: The budget and board of directors listing are not required for At-Risk Afterschool sponsors that also participate in the National School Lunch Program (NSLP).

Note: All sites that were approved and active during the prior (2025-2026) year will transfer over to the new (2026-2027) year in **Pending** status. The sponsor must click **Modify** or **Revise** for each site, update the information for the upcoming year, and then **Save** the Site Application, even if there are no changes for the new year.

After completing and saving the update for each site application, the site application status will change from **Pending** to **Not Submitted**. Once the entire application packet is submitted for approval, the site application status will change from **Not Submitted** to **Submitted**. All sites that will not be active in the new year should remain in **Pending** status.

- If at least one site application is not updated and put into **Not Submitted** status, the CNP System will not allow the application packet to be submitted for approval.
- The **Submit for Approval** button will not illuminate in red at the bottom of the main page unless at least one site application has been changed from **Pending** to **Not Submitted** status.

It is imperative that sponsors review all Site Applications for accuracy. Site Applications must reflect current license, participant eligibility, and meal service operations. Pay close attention to the License Expiration Date in section A of each Site Application. CACFP regulations do not allow reimbursement to be claimed for sites that are unlicensed, uncertified, or that have expired licenses or permits.

New sites that do not appear on the **Site Application** list require a Site Application (Form ED-099 Schedule A Attachment) and other documentation (e.g., license, menu, sponsor Pre-approval Site form) to be submitted to the CSDE before they can be approved for claiming. Contact the [CACFP staff](#) for guidance on adding one or more new sites.

Click **View** once the application packet has been approved to review site information without making changes or unapproving the application packet.

6 — Checklist

The “Checklist” section automatically generates a checklist based on the answers to specific questions from the sponsor and site applications. This section identifies supplemental documents that the sponsor must submit to the CSDE. It helps sponsors track required documents and record their submission dates, ensuring all application requirements are completed.

- The CNP System will send an automated notification to the designated CACFP Contact person in the Sponsor Application and the CSDE CACFP team member assigned to the institution. This notification will state that the Application Packet has been submitted for approval.
- A similar notification will be generated once the Application Packet is approved. Sponsors should retain this notification for their records. This is the only notification that the Application Packet has been approved for program year 2026-2027.

7 — Tips for Application Renewal

1. Access the correct program year.
 - Use program year 2026-2027 for application renewals.
 - Use program year 2025-2026 for claims through September 2026 (filed in October 2026).
2. Complete the application packet items in the following order:
 - **Sponsor Application:** Update as necessary.
 - **Site Applications:** Click **Modify** or **Revise** to review and update, then **Save** changes. Make sure the Site Application changes from **Pending** to **Not Submitted** status.
 - **Checklist:** Upload necessary forms and attachments after all other items have been completed, so the Checklist populates accurately.
3. Upload all required documents in the online **Checklist** section. Examples include training dates, monitoring schedule (if applicable), and school food agreement/food service management company contract or addendum (if applicable). Make sure to label each uploaded document correctly.
4. Sponsors must review all site applications for accuracy for the upcoming year. Since each Site Application appears in **Pending** status, the CSDE's CACFP staff will not know that the information is updated for the new (2026-2027) year unless the sponsor revises and saves it and puts it into **Not Submitted** status. Review and update the license, enrollment/eligibility, and meal service information for accuracy, then **Save** the form. Complete this process for all sites that will be claimed in the upcoming year.
5. Submit a copy of all new licenses to the CSDE Bureau of Child Nutrition Programs with the application packet.

7 | Tips for Application Renewal

6. **Incomplete Items:** The Application Packet home screen will indicate a red arrow next to any incomplete items. Sponsors must address all incomplete items, so they change to a green check mark. Once all red arrows become green check marks, the CNP System will allow the Application Packet to be submitted for approval.

Error Processing

All information entered and saved in the CNP System is verified to ensure it conforms to data entry guidelines and system rules. The CNP System performs two types of checks on information entered: input edits and business rule edits.

Input Edits

Whenever the sponsor saves information or proceeds to a new screen, the CNP System checks for input errors. These errors may include entry errors such as an invalid data entry (e.g., entering a four-digit zip code) or a non-logical entry (e.g., entering a greater number of eligible participants than enrolled participants).

If a form contains an input error and the user selects **Save**, the screen either displays the error code and description in red at the top of the page (and the error code is a letter) or displays a message next to the field in error. Input errors must be corrected before users can proceed. The CNP System will not save data entered on a screen that contains an input error. The user must correct the input errors and select **Save** again.

Business Rule Edits

Business rule edits are used to ensure that entered data on a form conforms to state-defined guidelines/requirements and federal regulation. Once the user initiates a save, the CNP System will:

- perform business rule edit checks after all input errors have been corrected, and
- display a confirmation screen stating that data entered has been saved and identifies whether errors exist.

The user may correct business rule errors immediately or at another time. The entered data will not be lost. The errors will display at the top of the screen with an error code (usually 4-5 digits) and error description. Business rule edits do not prohibit the CNP System from saving the data entered on the screen.

In addition, business rule edits have an error severity that indicates whether an error is considered an error or warning.

- Errors appear in red and must be corrected before the form can be submitted.
- Warnings appear in blue and indicate an “out of the ordinary” data value. Warning errors do not need to be corrected prior to form submission.
