

Crediting Breakfast Cereals in the School Nutrition Programs

School Year 2025-26 (July 1, 2025, through June 30, 2026)

This guidance applies to the U.S. Department of Agriculture’s (USDA) meal patterns for grades K-12 and preschool (ages 1-5) in the [National School Lunch Program \(NSLP\)](#), [School Breakfast Program \(SBP\)](#), and [Afterschool Snack Program \(ASP\)](#) of the NSLP. The [Seamless Summer Option \(SSO\)](#) of the NSLP follows the NSLP, SBP, and ASP meal patterns.

For information on the meal patterns for the school nutrition programs, visit the Connecticut State Department of Education’s (CSDE) [Meal Patterns for Grades K-12 in School Nutrition Programs](#) webpage, [Meal Patterns for Preschoolers in School Nutrition Programs](#) webpage, and the “[Meal Patterns and Crediting](#)” section of the ASP webpage. For information on the crediting requirements, visit the CSDE’s [Crediting Foods in School Nutrition Programs](#) webpage and [Crediting Documentation for the Child Nutrition Programs](#) webpage.

Crediting Breakfast Cereals in the School Nutrition Programs

Definition of Breakfast Cereals

The Food and Drug Administration (FDA) regulations ([21 CFR 170.3\(n\)\(4\)](#)) define breakfast cereals as ready-to-eat (RTE) cereals (such as puffed cereals, round or flaked cereals, and granola) and instant and regular hot cereals (such as oatmeal, cream of wheat, and farina). RTE breakfast cereals can be eaten as sold and are typically fortified with vitamins and minerals.

Overview of Crediting Requirements

School food authorities (SFAs) may serve creditable breakfast cereals as the grains component at any meal or afterschool snack. The crediting requirements for breakfast cereals in the meal patterns for grades K-12 are different from the preschool meal patterns and are summarized below. In addition to meeting the crediting requirements, the serving must provide the minimum required volume or weight (refer to "[Serving Size for Breakfast Cereals](#)" in this document).

Meal patterns for grades K-12

Breakfast cereals must meet the three criteria below to credit as the grains component in the meal patterns for grades K-12.

1. The cereal must be whole grain-rich (WGR), enriched, or fortified.
2. Noncreditable grains cannot exceed 6.99 grams per portion. Examples of noncreditable grains include oat fiber, corn fiber, wheat starch, corn starch, and modified food starch (including potato, legume, and other vegetable flours). A detailed list of noncreditable grains is available in section 3 of the CSDE's [Guide to Meeting the Whole Grain-rich Requirement for the Meal Patterns for Grades K-12 in the School Nutrition Programs](#).
3. Added sugars cannot exceed 6 grams per dry ounce.

These criteria apply to RTE and cooked breakfast cereals.

Preschool meal patterns

Breakfast cereals must meet the two criteria below to credit as the grains component in the preschool meal patterns.

1. A creditable grain (whole, enriched, bran, or germ) must be the first ingredient or the cereal must be fortified.
2. Added sugars cannot exceed 6 grams per dry ounce.

The limit for noncreditable grains does not apply to the preschool meal patterns.

Crediting Breakfast Cereals in the School Nutrition Programs

Steps to identify creditable breakfast cereals for the preschool meal patterns

Menu planners may use the steps below to identify creditable breakfast cereals for the preschool meal patterns.

1. Does the breakfast cereal meet the limit for added sugars? Refer to "[Limit for Added Sugars](#)" in this document.
 - Yes: Go to step 2.
 - No: The cereal is not creditable.
2. Is the first ingredient a whole grain?
 - Yes: The cereal is creditable.
 - No: Go to step 3.
3. Is the first ingredient an enriched grain, bran, or germ?
 - Yes: The cereal is creditable.
 - No: Go to step 4.
4. Does the breakfast cereal's product formulation statement (PFS) indicate that creditable grains are the primary ingredient by weight? Refer to "[Crediting Documentation for Breakfast Cereals](#)" in this document.
 - Yes: The cereal is creditable.
 - No: Go to step 5.
5. Is the breakfast cereal fortified with vitamins and minerals? Refer to "[Fortified breakfast cereals](#)" in this document.
 - Yes: The cereal is creditable.
 - No: The cereal is not creditable.

To credit as a WGR food in the preschool meal patterns, RTE and cooked breakfast cereals must meet additional requirements (refer to "[WGR criteria for breakfast cereals in preschool menus](#)" in this document).

Crediting Breakfast Cereals in the School Nutrition Programs

Steps to identify creditable breakfast cereals for the K-12 meal patterns

Menu planners may use the steps below to identify creditable breakfast cereals for the K-12 meal patterns.

1. Does the breakfast cereal meet the limit for added sugars? Refer to "[Limit for Added Sugars](#)" in this document.
 - Yes: Go to step 2.
 - No: The cereal is not creditable.
2. Is the first ingredient a whole grain?
 - Yes: Go to step 6.
 - No: Go to step 3.
3. Is the first ingredient an enriched grain, bran, or germ?
 - Yes: Go to step 6.
 - No: Go to step 4.
4. Does the breakfast cereal's product formulation statement (PFS) indicate that creditable grains are the primary ingredient by weight? Refer to "[Crediting Documentation for Breakfast Cereals](#)" in this document.
 - Yes: Go to step 6.
 - No: Go to step 5.
5. Is the breakfast cereal fortified with vitamins and minerals? Refer to "[Fortified breakfast cereals](#)" in this document.
 - Yes: Go to step 6.
 - No: The cereal is not creditable.
6. Does the breakfast cereal contain any noncreditable grains? Refer to section 3 of the CSDE's [Guide to Meeting the Whole Grain-rich Requirement for the Meal Patterns for Grades K-12 in the School Nutrition Programs](#).
 - Yes: Go to step 7.
 - No: The cereal is creditable.
7. Does the breakfast cereal's product formulation statement (PFS) indicate that the total weight of all noncreditable grains does not exceed 6.99 grams?
 - Yes: The cereal is creditable.
 - No: The cereal is not creditable.

Crediting Breakfast Cereals in the School Nutrition Programs

To credit as a WGR food in the meal patterns for grades K-12, RTE and cooked breakfast cereals must meet additional requirements (refer to “[WGR criteria for breakfast cereals in K-12 menus](#)” in this document).

Overview of Whole grain-rich (WGR) Requirements

The NSLP, SBP, and ASP meal patterns require minimum servings of WGR menu items. This requirement and the WGR criteria are different for the meal patterns for grades K-12 and the preschool meal patterns.

Weekly WGR requirement and limit for enriched grains for K-12 menus

WGR foods are required in the meal patterns for grades K-12. At least 80 percent of the weekly grains offered at breakfast, lunch, and afterschool snack must be WGR. This percentage is based on the total ounce equivalents (oz eq) of grains offered during the week and is calculated separately for each weekly breakfast, lunch, and snack menu.

Grains that are not WGR must be enriched and cannot exceed 20 percent of the grains offered each week. Enriched breakfast cereals (including fortified breakfast cereals that are not WGR) count with all other enriched grains toward this weekly limit.

Foods are WGR foods if they contain at least 50 percent whole grains and meet the limit for noncreditable grains. Noncreditable grains for breakfast cereals cannot exceed 6.99 grams per portion. For more information, refer to the CSDE’s [Guide to Meeting the Whole Grain-rich Requirement for the National School Lunch Program and School Breakfast Program Meal Patterns for Grades K-12](#).

WGR requirement for preschool menus

The preschool meal patterns require at least one serving of WGR grains per day, between all meals and snacks served to children. The USDA’s [CACFP best practices](#) recommend at least two servings of WGR grains per day. For guidance on menu planning considerations for the preschool WGR requirement, refer to the CSDE’s [Guide to Meeting the Whole Grain-rich Requirement for the CACFP](#).

The WGR criteria for the preschool meal patterns are different from the WGR criteria for the meal patterns for grades K-12 because they do not require a limit for noncreditable grains. Breakfast cereals that meet the WGR criteria for grades K-12 will meet the preschool WGR criteria. However, breakfast cereals that meet the preschool WGR criteria may or may not meet

Crediting Breakfast Cereals in the School Nutrition Programs

the WGR criteria for grades K-12. For more information, refer to the CSDE's resource, [Comparison of Meal Pattern Requirements for the Grains Component in the School Nutrition Programs](#).

Limit for Added Sugars

Effective July 1, 2025, the USDA final rule, [Child Nutrition Programs: Meal Patterns Consistent with the 2020-2025 Dietary Guidelines for Americans](#), requires a limit for added sugars in breakfast cereals. RTE and cooked breakfast cereals cannot exceed 6 grams of added sugars per dry ounce. This limit applies to all school nutrition programs and grade groups (preschool and grade K-12).

Methods to Determine Added Sugars

SFAs may use any of the methods below to determine if breakfast cereals meet the limit for added sugars.

Method 1: USDA's added sugars limit chart

Common serving sizes of breakfast cereals and the corresponding limit for grams of added sugars per serving are provided in the Institute of Child Nutrition's resource for the meal patterns for grades K-12, [Nutrition Standards for Added Sugars: Breakfast Cereals Fact Sheet](#), and the USDA's resource for the preschool meal patterns, [Choose Breakfast Cereals That Are Lower in Added Sugars in the Child and Adult Care Food Program](#). SFAs may use these charts to compare the added sugars per serving in the Nutrition Facts label with the added sugars limit for the specific serving weight of cereal.

Crediting Breakfast Cereals in the School Nutrition Programs

Method 2: Calculation of grams of sugars per serving

The steps below show how to calculate the grams of added sugars per serving based on the ounces or grams of the breakfast cereal's serving size. SFAs may use either calculation method to document that a breakfast cereal meets the added sugars limit.

Steps for serving size in ounces

A breakfast cereal meets the limit for added sugars if it does not exceed 6 grams of added sugars per dry ounce.

1. List the grams (g) of added sugars per serving from the Nutrition Facts label.
 - 12 grams
2. List the serving size in ounces (oz) from the Nutrition Facts label.
 - 2 ounces
3. Divide the grams of added sugars per serving (from step 1) by the ounces of the serving size (from step 2).
 - 12 grams divided by 2 ounces =
6 grams of added sugars per ounce
4. Does serving meet the limit of no more than 6 grams of added sugars per ounce?
 - ☒ Yes
 - ☐ No

Nutrition Facts	
Serving Size:	1½ cups (2 ounces)
Servig per Container:	1
Amount Per Serving	
Calories	220
% Daily Value*	
Total Fat 3 g	4%
Saturated Fat 0g	0%
Cholesterol 0mg	0%
Sodium 320mg	14%
Total Carbohydrates 47g	17%
Dietary Fiber 3g	10%
Total Sugars 12g	
Includes 12g Added Sugars	23%
Protein 3 g	

This cereal meets the limit for added sugars. To credit in the meal patterns for the school nutrition programs, this cereal must also meet the applicable meal pattern requirements for creditable grains and provide the required weight or volume (refer to "[Overview of Crediting Requirements](#)" and "[Serving Size for Breakfast Cereals](#)" in this document).

Crediting Breakfast Cereals in the School Nutrition Programs

Steps for serving size in grams

A breakfast cereal meets the limit for added sugars if it does not exceed 0.212 gram of added sugars per gram of cereal. This is the gram equivalent of no more than 6 grams of added sugars per ounce (28.35 grams).

1. List the grams (g) of added sugars per serving from the Nutrition Facts label.
 - 4 grams
2. List the serving size in grams from the Nutrition Facts label.
 - 28 grams
3. Divide the grams of added sugars per serving (from step 1) by the grams of the serving size (from step 2).
 - 4 grams divided by 28 grams = **0.143 gram** of added sugars per gram of cereal
4. Does serving meet the limit of no more than 0.212 gram of added sugars per gram of cereal?
 - ☒ Yes
 - ☐ No

Total Carbohydrates 22g	7%
Dietary Fiber 3g	11%
Total Sugars 5g	
Includes 4g Added Sugars	8%
Protein 3 g	

This cereal meets the limit for added sugars. To credit in the meal patterns for the school nutrition programs, this cereal must also meet the requirements for creditable grains and provide the required weight or volume (refer to "[Creditable grains](#)" and "[Serving Size for Breakfast Cereals](#)" in this document).

Crediting Breakfast Cereals in the School Nutrition Programs

Creditable Breakfast Cereals

The three types of creditable RTE and cooked breakfast cereals for the school nutrition programs include whole grain-rich (WGR) breakfast cereals, enriched breakfast cereals, and fortified breakfast cereals. Crediting guidance and examples for each type of breakfast cereal are indicated below.

Menu planners must check the ingredients statement and Nutrition Facts label to determine if breakfast cereals meet these crediting criteria. The CSDE recommends checking the cereal's added sugars content first, before determining if the cereal contains creditable grains. Breakfast cereals that exceed the limit for added sugars do not credit in the school nutrition programs.

WGR Breakfast Cereals

WGR breakfast cereals include cereals that are 100 percent whole grain and cereals that contain a blend of whole grains (at least 50 percent) and enriched grains. Whole grains consist of the entire cereal grain seed or kernel (starchy endosperm, fiber-rich bran, and nutrient-rich germ) after removing the inedible outer husk or hull. For information on identifying whole grains, refer to the CSDE's resource, [Crediting Whole Grains in the School Nutrition Programs](#).

The WGR criteria for breakfast cereals are different for the meal patterns for grades K-12 and the preschool meal patterns. RTE and cooked breakfast cereals also have different WGR criteria. These requirements are summarized below.

WGR criteria for breakfast cereals in K-12 menus

The WGR criteria below apply to breakfast cereals in the meal patterns for grades K-12.

- **WGR criteria for cooked breakfast cereals, e.g., oatmeal (including regular and instant):** 1) The cereal is 100 percent whole grain or contains a blend of whole and enriched grains that is at least 50 percent whole grain; 2) noncreditable grains cannot exceed 6.99 grams per portion ($\frac{1}{2}$ cup cooked or 28 grams dry); and 3) added sugars cannot exceed 6 grams per dry ounce.
- **WGR criteria for RTE breakfast cereals:** 1) The first ingredient is a whole grain and the cereal is fortified, or the cereal is 100 percent whole grain; 2) noncreditable grains cannot exceed 6.99 grams per portion; and 3) added sugars cannot exceed 6 grams per

Crediting Breakfast Cereals in the School Nutrition Programs

dry ounce. Fortification is not required for RTE breakfast cereals that are 100 percent whole grain.

These criteria are stricter than the preschool meal patterns. Breakfast cereals that meet the WGR criteria for the meal patterns for grades K-12 will meet the preschool WGR criteria.

WGR criteria for breakfast cereals in preschool menus

The WGR criteria below apply to breakfast cereals in the preschool meal patterns.

- **WGR criteria for cooked breakfast cereals:** 1) The first ingredient is a whole grain; 2) the next two grain ingredients (if any) are creditable; and 3) added sugars cannot exceed 6 grams per dry ounce.
- **WGR criteria for RTE breakfast cereals:** 1) The first ingredient is a whole grain and the cereal is fortified or the cereal is 100 percent whole grain; and 2) added sugars cannot exceed 6 grams per dry ounce. Fortification is not required for 100 whole grain cereals.

Breakfast cereals that meet the preschool WGR criteria may or may not meet the WGR criteria for grades K-12. Menu planners must determine if these cereals meet the WGR criteria for grades K-12 before serving them to both grade groups.

Crediting example for WGR breakfast cereals

Breakfast cereals that are 100 percent whole grain credit as WGR foods. A breakfast cereal that is 100 percent whole grain contains only whole grains and will list a whole grain as the first ingredient. The ingredients statement below shows an example of a whole-grain breakfast cereal.

- Ingredients: Whole grain rolled oats, sugar, natural flavors, salt.

This cooked cereal is 100 percent whole grain because the first and only grain ingredient (whole grain rolled oats) is a whole grain. This breakfast cereal credits as a WGR food in all school nutrition programs.

Crediting Breakfast Cereals in the School Nutrition Programs

Enriched Breakfast Cereals

Enriched breakfast cereals contain five vitamins and minerals added in amounts required by the FDA to replace some of the nutrients lost during processing. The enrichment nutrients include thiamin (vitamin B₁, thiamin mononitrate, or thiamin hydrochloride), riboflavin (vitamin B₂); niacin (vitamin B₃ or niacinamide), folic acid (folate), and iron (reduced iron, ferrous sulfate, or ferric orthophosphate). A breakfast cereal is enriched if the food is labeled as “enriched” or an enriched grain is the first ingredient.

Crediting enriched breakfast cereals in K-12 menus

To credit in the meal patterns for grades K-12, enriched breakfast cereals cannot exceed 6.99 grams of noncreditable grains per portion. Enriched breakfast cereals count with all other enriched grains toward the 20 percent weekly limit for enriched grains at breakfast, lunch, and afterschool snack (refer to “[Weekly WGR requirement and limit for enriched grains for K-12 menus](#)” in this document).

Crediting enriched breakfast cereals in preschool menus

Enriched breakfast cereals credit in the preschool meal patterns for breakfast, lunch, and afterschool snack. The limit for noncreditable grains does not apply to the preschool meal patterns.

Crediting examples for enriched breakfast cereal

The ingredients statement below shows an example of an enriched breakfast cereal.

- Ingredients: Puffed rice, ferrous sulfate (a source of iron), niacinamide, citric acid, thiamin mononitrate, riboflavin, folic acid.

This cereal is enriched because the ingredients statement lists the five enrichment nutrients (ferrous sulfate, niacinamide, thiamin mononitrate, riboflavin, and folic acid). It does not contain any noncreditable grains. This breakfast cereal credits in all school nutrition programs as an enriched grain and counts toward the weekly limit for enriched grains in the breakfast, lunch, and afterschool snack meal patterns for grades K-12.

For information on identifying enriched grains, refer to the CSDE’s resource, [Crediting Enriched Grains in the School Nutrition Programs](#).

Crediting Breakfast Cereals in the School Nutrition Programs

Fortified Breakfast Cereals

Fortified breakfast cereals contain nutrients added by the manufacturer that were not originally present, or that are at higher levels than originally present. Manufacturers may choose which additional nutrients to use for fortification. Fortified breakfast cereals typically contain the five enrichment nutrients plus other vitamins and minerals that do not exist naturally in grains.

Different cereal brands may list different fortification nutrients. The USDA does not specify a minimum number of nutrients or a minimum percentage for the level of fortification for breakfast cereals in the Child Nutrition Programs. A fortified breakfast cereal is not required to be enriched.

A breakfast cereal is fortified if the food is labeled as “fortified” or the ingredients statement lists the vitamins and minerals added to the product. These nutrients are typically listed after “Vitamins and Minerals.”

If the ingredients statement does not list any vitamins and minerals, the breakfast cereal is not fortified. Breakfast cereals that are not fortified must contain a creditable grain as the first ingredient (or the greatest ingredient by weight).

If a creditable grain is not the first ingredient, but the cereal contains more than one creditable grain, the SFA must obtain a product formulation statement (PFS) from the manufacturer. The PFS must indicate that the combined weight of all creditable grains is the greatest ingredient by weight. For more information, refer to [“Crediting Documentation for Breakfast Cereals”](#) in this document.

Crediting fortified breakfast cereals in K-12 menus

To credit in the meal patterns for grades K-12, fortified breakfast cereals cannot exceed 6.99 grams of noncreditable grains per portion. Fortified breakfast cereals that are not WGR count with all other enriched grains toward the weekly limit for enriched grains in the breakfast, lunch, and afterschool snack meal patterns for grades K-12 (refer to [“Weekly WGR requirement and limit for enriched grains for K-12 menus”](#) in this document).

Crediting fortified breakfast cereals in preschool menus

Fortified breakfast cereals credit in the preschool meal patterns for breakfast, lunch, and afterschool snack. The limit for noncreditable grains does not apply to the preschool meal patterns.

Crediting Breakfast Cereals in the School Nutrition Programs

Crediting examples for fortified breakfast cereals

The ingredients statements below show some examples of fortified breakfast cereals.

- Ingredients: Milled corn, sugar, malt flavor, contains 2% or less of salt. **Vitamins and Minerals:** Iron, vitamin C (sodium ascorbate, ascorbic acid), niacinamide, vitamin B6 (pyridoxine hydrochloride), vitamin B2 (riboflavin), vitamin B1 (thiamin hydrochloride), vitamin A palmitate, folic acid, vitamin D, vitamin B12.

This cereal is fortified because it contains added nutrients (listed after “Vitamins and Minerals”) but it is not WGR because milled corn is not a whole grain. It does not contain any noncreditable grains. This cereal credits as an enriched grain in all school nutrition programs and counts toward the weekly limit for enriched grains in the breakfast, lunch, and afterschool snack meal patterns for grades K-12.

- Ingredients: Whole-grain wheat, raisins, wheat bran, sugar, brown sugar syrup, contains 2% or less of salt, malt flavor. **Vitamins and Minerals:** Potassium chloride, niacinamide, reduced iron, vitamin B₆ (pyridoxine hydrochloride), zinc oxide, vitamin B₂ (riboflavin), vitamin B₁ (thiamin hydrochloride), vitamin A palmitate, folic acid, vitamin D, vitamin B₁₂.

This cereal is fortified because it contains added nutrients (listed after “Vitamins and Minerals”). It is WGR because whole-grain wheat is the first ingredient, and it does not contain any noncreditable grains. This cereal credits as a WGR food in all school nutrition programs.

Bran and Germ

Bran and germ credit the same as enriched grains. Bran is the seed husk or outer coating of cereal grains such as wheat, rye, and oats. Some examples include oat bran, wheat bran, corn bran, rice bran, and rye bran. Germ (such as wheat germ) is the vitamin-rich embryo of the grain kernel. The ingredients statement below shows an example of a bran breakfast cereal.

- Ingredients: Wheat bran, sugar, malt flavor, contains 2% or less of salt. **Vitamins and Minerals:** Calcium carbonate, vitamin C (sodium ascorbate and ascorbic acid), reduced iron, niacinamide, vitamin B₆ (pyridoxine hydrochloride), vitamin B₂ (riboflavin), folic acid, vitamin B₁ (thiamin hydrochloride), vitamin A palmitate, vitamin B₁₂, vitamin D.

This cereal is fortified because it contains added nutrients (listed after “Vitamins and Minerals”) but it is not WGR because wheat bran credits the same as enriched grains. It does not contain any noncreditable grains. This

Crediting Breakfast Cereals in the School Nutrition Programs

cereal credits as an enriched grain in all school nutrition programs and counts toward the weekly limit for enriched grains in the breakfast, lunch, and afterschool snack meal patterns for grades K-12.

Bran cereals that are not WGR count with all other enriched grains toward the weekly limit for enriched grains in the breakfast, lunch, and afterschool snack meal patterns for grades K-12 (refer to "[Weekly WGR requirement and limit for enriched grains for K-12 menus](#)" in this document).

Crediting Documentation for Breakfast Cereals

SFAs must be able to document that all breakfast cereals served in reimbursable meals and afterschool snacks meet the crediting requirements for the grains component. A PFS from the manufacturer is required if the product's ingredients statement and packaging do not provide sufficient information to determine if the product meets the applicable crediting or WGR criteria for each meal pattern.

The USDA requires that SFAs must verify the PFS for accuracy prior to purchasing, serving, and claiming the breakfast cereal in reimbursable meals and afterschool snacks. For guidance on when a PFS is required and the information it must include, refer to the CSDE's resource, [When Commercial Grain Products Require a Product Formulation Statement to Credit in the School Nutrition Programs](#).

For more information on PFS forms, refer to the CSDE's resources, [Using Product Formulation Statements in the School Nutrition Programs](#) and [Accepting Processed Product Documentation in the School Nutrition Programs](#), and the USDA's resources, [USDA Memo SP 05-2025](#), [CACFP 04-2025](#), [SFSP 02-2025: Guidance for Accepting Processed Product Documentation for Meal Pattern Requirements](#) and [Tips for Evaluating a Manufacturer's Product Formulation Statement](#).

Additional guidance is available on the CSDE's [Crediting Documentation for the Child Nutrition Programs](#) webpage. Training on the requirements for PFS forms is available in [Module 8: Meal Pattern Documentation for Crediting Commercial Processed Products](#) of the CSDE's training program, *What's in a Meal: Meal Patterns for Grades K-12 in the School Nutrition Programs*.

Crediting Breakfast Cereals in the School Nutrition Programs

Storing crediting documentation

SFAs must maintain all crediting documentation on file in accordance with the records retention requirements for the school nutrition programs (refer to the CSDE's resource, [Records Retention Requirements for the School Nutrition Programs](#)). This documentation must be current and will be reviewed by the CSDE during the [Administrative Review of the school nutrition programs](#).

Serving Size for Breakfast Cereals

Cooked breakfast cereals (regular and instant) are in group H and cold RTE breakfast cereals are in group I of the USDA's chart, [Exhibit A: Grain Requirements for Child Nutrition Programs](#). Effective July 1, 2025, the Exhibit A oz eq quantities for RTE and cooked breakfast cereals are the same for all school nutrition programs. The minimum amount that credits toward the grains component is $\frac{1}{4}$ oz eq.

The table below summarizes the required quantities for 1 oz eq and $\frac{1}{2}$ oz eq. The required preschool meal pattern serving for the grains component is $\frac{1}{2}$ oz eq.

**Table 2. Required quantities of breakfast cereals
for the school nutrition programs**

Exhibit A group	Type of breakfast cereal	1 oz eq =	$\frac{1}{2}$ oz eq =
H	Cooked hot	$\frac{1}{2}$ cup cooked or 1 ounce (28 grams) dry ¹	$\frac{1}{4}$ cup cooked or $\frac{1}{2}$ ounce (14 grams) dry ¹
I	RTE flakes or rounds	1 cup or 1 ounce ²	$\frac{1}{2}$ cup or $\frac{1}{2}$ ounce ²
I	RTE puffed	1 $\frac{1}{4}$ cups or 1 ounce ²	$\frac{3}{4}$ cup or $\frac{1}{2}$ ounce ²
I	RTE granola	$\frac{1}{4}$ cup or 1 ounce ²	$\frac{1}{8}$ cup or $\frac{1}{2}$ ounce ²

¹ Cereal grains typically credit based on the cooked serving but menu planners may choose to use the dry uncooked weight.

² The serving is based on weight or volume, whichever is less. If the appropriate volume of cereal weighs less than 1 ounce (28 grams), it still credits as 1 oz eq. For example, 1 cup of flaked cereal that weighs 26 grams credits as 1 oz eq.

Crediting Breakfast Cereals in the School Nutrition Programs

In accordance with federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, this institution is prohibited from discriminating on the basis of race, color, national origin, sex (including gender identity and sexual orientation), disability, age, or reprisal or retaliation for prior civil rights activity.

Program information may be made available in languages other than English. Persons with disabilities who require alternative means of communication to obtain program information (e.g., Braille, large print, audiotope, American Sign Language), should contact the responsible state or local agency that administers the program or USDA's TARGET Center at (202) 720-2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877-8339.

To file a program discrimination complaint, a Complainant should complete a Form AD-3027, USDA Program Discrimination Complaint Form which can be obtained online at: <https://www.usda.gov/sites/default/files/documents/ad-3027.pdf>, from any USDA office, by calling (866) 632-9992, or by writing a letter addressed to USDA. The letter must contain the complainant's name, address, telephone number, and a written description of the alleged discriminatory action in sufficient detail to inform the Assistant Secretary for Civil Rights (ASCR) about the nature and date of an alleged civil rights violation. The completed AD-3027 form or letter must be submitted to USDA by:

1. mail: U.S. Department of Agriculture
Office of the Assistant Secretary for Civil Rights
1400 Independence Avenue, SW
Washington, D.C. 20250-9410; or
2. fax: (833) 256-1665 or (202) 690-7442; or
3. email: program.intake@usda.gov

This institution is an equal opportunity provider.

The Connecticut State Department of Education is committed to a policy of equal opportunity/affirmative action for all qualified persons. The Connecticut Department of Education does not discriminate in any employment practice, education program, or educational activity on the basis of race; color; religious creed; age; sex; pregnancy; sexual orientation; workplace hazards to reproductive systems, gender identity or expression; marital status; national origin; ancestry; retaliation for previously opposed discrimination or coercion, intellectual disability; genetic information; learning disability; physical disability (including, but not limited to, blindness); mental disability (past/present history thereof); military or veteran status; status as a victim of domestic violence; or criminal record in state employment, unless there is a bona fide occupational qualification excluding persons in any of the aforementioned protected classes. Inquiries regarding the Connecticut State Department of Education's nondiscrimination policies should be directed to: Attorney Louis Todisco, Connecticut State Department of Education, by mail 450 Columbus Boulevard, Hartford, CT 06103-1841; or by telephone 860-713-6594; or by email louis.todisco@ct.gov.
