

# Crediting Smoothies in the School Nutrition Programs

**School Year 2025-26 (July 1, 2025, through June 30, 2026)**

This guidance applies to the U.S. Department of Agriculture’s (USDA) meal patterns for grades K-12 and preschool (ages 1-5) in the [National School Lunch Program \(NSLP\)](#), [School Breakfast Program \(SBP\)](#), and [Afterschool Snack Program \(ASP\)](#) of the NSLP. The [Seamless Summer Option \(SSO\)](#) of the NSLP follows the NSLP, SBP, and ASP meal patterns.

For information on the meal patterns for the school nutrition programs, visit the Connecticut State Department of Education’s (CSDE) [Meal Patterns for Grades K-12 in School Nutrition Programs](#) webpage, [Meal Patterns for Preschoolers in School Nutrition Programs](#) webpage, and the “[Meal Patterns and Crediting](#)” section of the ASP webpage. For information on the crediting requirements, visit the CSDE’s [Crediting Foods in School Nutrition Programs](#) webpage and [Crediting Documentation for the Child Nutrition Programs](#) webpage.

# Crediting Smoothies in the School Nutrition Programs

## Creditable Ingredients

Smoothie ingredients that credit toward the meal patterns for the school nutrition programs include:

- full-strength vegetable juice and pureed vegetables (vegetables component);
- full-strength fruit juice and pureed fruits (fruits component);
- milk that is consistent with the meal pattern requirements for each grade group, including flavored milk that meet the USDA's limit for added sugars (milk component) (refer to ["Allowable types of milk"](#) in this document); and
- yogurt and soy yogurt that meet the USDA's limit for added sugars (meats/meat alternates (MMA) component).

Creditable ingredients in smoothies must provide at least the minimum creditable amount to credit toward the meal patterns:  $\frac{1}{8}$  cup for the vegetables component and fruits component:  $\frac{1}{4}$  cup for the milk component (applies only to milk in smoothies): and  $\frac{1}{8}$  cup ( $\frac{1}{4}$  ounce) for yogurt.

## Required Crediting Documentation for Smoothies

School food authorities (SFAs) must maintain appropriate documentation to indicate the crediting information for each meal component in a smoothie. For example, to credit a strawberry-yogurt smoothie as  $\frac{1}{2}$  cup of the fruits component and 1 ounce equivalent (oz eq) of the MMA component, the SFA's documentation must indicate that the serving contains  $\frac{1}{2}$  cup of pureed strawberries and  $\frac{1}{2}$  cup of yogurt. Documentation must be based on the food yields and crediting information in the USDA's [Food Buying Guide for Child Nutrition Programs](#) (FBG).

### Documentation for commercial smoothies

Commercial smoothies require a product formulation statement (PFS) that indicates the amount of each meal component per serving. A Child Nutrition (CN) label might be available for some commercial smoothies that contain yogurt. For information on CN labels and PFS forms, refer to the CSDE's resources, [Using Child Nutrition \(CN\) Labels in the School Nutrition Programs](#) and [Using Product Formulation Statements in the School Nutrition Programs](#).

For more information on crediting documentation, refer to the CSDE's resource, [Accepting Processed Product Documentation in the School Nutrition Programs](#), and the USDA's resources, [USDA Memo SP 05-2025, CACFP 04-2025, SFSP 02-2025: Guidance for Accepting Processed Product Documentation for Meal Pattern Requirements](#) and [Tips for Evaluating a Manufacturer's Product Formulation Statement](#).

# Crediting Smoothies in the School Nutrition Programs

Additional guidance is available on the CSDE's [Crediting Documentation for the Child Nutrition Programs](#) webpage. Training on the requirements for CN labels and PFS forms is available in [Module 8: Meal Pattern Documentation for Crediting Commercial Processed Products](#) of the CSDE's training program, *What's in a Meal: Meal Patterns for Grades K-12 in the School Nutrition Programs*.

## Documentation for smoothies made from scratch

Smoothies made from scratch require a standardized recipe that indicates the contribution of each meal component in the serving. For information on standardized recipes, refer to the CSDE's [Guide to Menu Documentation for the School Nutrition Programs](#) and visit the "[Standardized Recipes](#)" section of the CSDE's Crediting Documentation for the Child Nutrition Programs webpage.

Training on the requirements for standardized recipes is available in [Module 7: Meal Pattern Documentation for School Menus](#) of the CSDE's training program, *What's in a Meal: Meal Patterns for Grades K-12 in the School Nutrition Programs*.

## Storing crediting documentation

SFAs must maintain all crediting documentation on file in accordance with the records retention requirements for the school nutrition programs (refer to the CSDE's resource, [Records Retention Requirements for the School Nutrition Programs](#)). This documentation must be current and will be reviewed by the CSDE during the [Administrative Review of the school nutrition programs](#).

## Recommended Daily Limit for Smoothies

The USDA recommends limiting smoothies to one meal or snack per day. For example, if a smoothie is served at breakfast, the lunch menu and afterschool snack menu should not include a smoothie.

# Crediting Smoothies in the School Nutrition Programs

## Crediting Fruits and Vegetables in Smoothies

Pureed fruits and vegetables in smoothies credit as juice. Crediting is based on the volume (cups) of pureed fruits and vegetables per serving. For example, a smoothie that contains  $\frac{1}{2}$  cup of pureed strawberries credits as  $\frac{1}{2}$  cup of fruit juice. SFAs must document the amount of pureed fruits and vegetables per serving (refer to “[Required Crediting Documentation for Smoothies](#)” in this document). Menu planners must follow the guidance below when crediting fruits and vegetables in smoothies.

### Juice limit

Pureed fruits and vegetables in smoothies count toward the juice limit with all other types of 100 percent juice. The juice limit includes all types of 100 percent juice, e.g. fruit juice, vegetable juice, and juice blends, pureed fruits and vegetables in smoothies, and frozen juice pops made from 100 percent juice.

- **Meal patterns for grades K-12:** At breakfast, fruit juices together with vegetable juices and vegetable/fruit juice blends (including pureed fruits and vegetables in smoothies) cannot exceed half of the total fruits (including vegetable substitutions) offered during the week. At lunch, fruit juice (including pureed fruit in smoothies) cannot exceed half of the total fruits offered during the week, and vegetable juice (including pureed vegetables in smoothies) cannot exceed half of the total vegetables offered during the week. At snack, fruit juices together with vegetable juices and vegetable/fruit juice blends (including pureed fruits and vegetables in smoothies) cannot exceed half of the total fruits and vegetables offered during the week.
- **Preschool meal patterns:** Juice credits as the vegetables component or fruits component at only one preschool meal or snack per day. For example, if the menu planner credits pureed blueberries in a smoothie as the fruits component at breakfast, juice cannot credit as the fruits component or the vegetables component at lunch or ASP snack.

For more information on crediting juices, refer to the CSDE’s resource, [Crediting Juices in the School Nutrition Programs](#).

# Crediting Smoothies in the School Nutrition Programs

## Mixed fruits and vegetables

Smoothies that contain a mix of pureed fruits and vegetables, or 100 percent fruit and vegetable juice blends, credit based on the greatest fruit or vegetable ingredient.

- Commercial smoothies credit as the fruits component if the first juice ingredient is fruit juice or fruit puree. They credit as the vegetables component if the first juice ingredient is vegetable juice or vegetable puree.
- Smoothies made from scratch credit as the fruits component if the greatest juice ingredient in the standardized recipe is fruit juice or fruit puree. They credit as the vegetables component if vegetable juice or vegetable puree is the greatest juice ingredient.

## Smoothies at breakfast

Smoothies credit toward the breakfast meal patterns based on the amount of juice or pureed fruits and vegetables they contain. The examples below illustrate the different crediting requirements for the breakfast meal pattern grades K-12 and the preschool breakfast meal pattern.

- **Meal patterns for grades K-12:** The breakfast meal pattern for grades K-12 requires 1 cup of the fruits component and allows SFAs to offer vegetable substitutions, including vegetable juices and pureed vegetables in smoothies. A serving of smoothie that contains  $\frac{1}{2}$  cup of pureed strawberries and  $\frac{1}{4}$  cup of pureed carrots credits as  $\frac{1}{2}$  cup of fruit juice and  $\frac{1}{4}$  cup of vegetable juice (red/orange subgroup). This breakfast menu must also offer another  $\frac{1}{2}$ -cup serving of fruit or a vegetable substitution to meet the minimum 1-cup serving.
- **Preschool meal patterns for ages 3-5:** The preschool breakfast meal pattern for ages 3-5 requires  $\frac{1}{2}$  cup of vegetables, fruits, or both. A serving of smoothie that contains  $\frac{1}{2}$  cup of pureed strawberries credits as  $\frac{1}{2}$  cup of fruit juice, which provides the full required serving of the fruits/vegetables component for breakfast.

## Smoothies at lunch

The lunch meal patterns for preschool and grades K-12 require a serving of the fruits component and a serving of the vegetables component. Lunch menus cannot offer a smoothie and juice as the only two servings of fruits and vegetables because both credit as juice. For example, the lunch menu cannot offer a strawberry smoothie as the fruits component and tomato juice as the vegetables component. At least one serving of the vegetables component or fruits component must be a whole fruit or vegetable, i.e., fresh, frozen, canned, or dried.

# Crediting Smoothies in the School Nutrition Programs

## Smoothies at snack

The ASP meal pattern requires two of the five meal components (milk, MMA, vegetables, fruits, and grains).

- Pureed fruits and vegetables in smoothies may credit as the entire fruits component or the entire vegetables component but cannot credit as both meal components in the same snack.
- Smoothies that contain juice and milk may credit as either juice or milk but cannot credit as both meal components in the same snack.
- The snack menu cannot include juice (including pureed fruits and vegetables in smoothies) when milk is the only other meal component.

The examples below show how these requirements apply to the ASP meal pattern for grades K-12. The required servings for this grade group are  $\frac{3}{4}$  cup for the fruits component and 1 cup for the milk component.

- **Example 1 for K-12 menus:** The SFA's standardized smoothie recipe documents that the serving contains  $\frac{3}{4}$  cup of pureed fruit (credits as fruit juice) and 1 cup of unflavored low-fat milk. The menu planner may choose to credit the smoothie as either the fruits component or the milk component but cannot credit the smoothie as both meal components in the same snack. To be reimbursable, the snack must include the full serving of a second meal component, which must be MMA or grains.
- **Example 2 for K-12 menus:** The SFA's standardized smoothie recipe documents that the serving contains  $\frac{3}{4}$  cup of pureed fruit (credits as fruit juice) and  $\frac{1}{2}$  cup of unflavored low-fat milk. The pureed fruit credits as the fruits component but  $\frac{1}{2}$  cup of milk cannot credit as the full milk component because the serving is less than 1 cup. To be reimbursable, the snack must include the full serving of a second meal component, which must be MMA or grains.

The examples below show how these requirements apply to the ASP preschool meal pattern for ages 3-5. The required servings for this age group are  $\frac{1}{2}$  cup for the fruits component and  $\frac{1}{2}$  cup for the milk component.

- **Example 1 for preschool menus:** The SFA's standardized smoothie recipe documents that the serving contains  $\frac{1}{2}$  cup of pureed fruit (credits as fruit juice) and  $\frac{1}{2}$  cup of unflavored low-fat milk. The menu planner may choose to credit the smoothie as either the fruits component or the milk component but cannot credit the smoothie as both meal components in the same snack. To be reimbursable, the snack must include the full serving of a second meal component, which must be MMA or grains.

# Crediting Smoothies in the School Nutrition Programs

- **Example 2 for preschool menus:** The SFA's standardized smoothie recipe documents that the serving contains  $\frac{1}{2}$  cup of pureed fruit (credits as fruit juice) and  $\frac{1}{4}$  cup of unflavored low-fat milk. The pureed fruit credits as the fruits component but  $\frac{1}{4}$  cup of milk cannot credit as the full milk component because the serving is less than  $\frac{1}{2}$  cup. To be reimbursable, the snack must include the full serving of a second meal component, which must be MMA or grains.

## Crediting Milk in Smoothies

Milk in smoothies credits as the milk component based on the cups per serving. For example, a smoothie that contains  $\frac{1}{2}$  cup of milk credits as  $\frac{1}{2}$  cup of the milk component. SFAs must document the amount of milk per serving (refer to "[Required Crediting Documentation for Smoothies](#)" in this document).

### Allowable types of milk

The type of milk used in smoothies must be the same as the allowable types of milk for each meal pattern.

- The preschool meal patterns require unflavored whole milk for age 1 and unflavored low-fat (1%) or fat-free milk for ages 2-5. Flavored milk does not credit in the preschool meal patterns.
- The meal patterns for grades K-12 require low-fat or fat-free milk, either unflavored or flavored. Flavored milk cannot exceed 10 grams of added sugars per 8 fluid ounces. Breakfast and lunch menus must offer a variety of milk choices (refer to "[Milk variety required at breakfast and lunch for grades K-12](#)" below)

For more information, visit the "[Milk](#)" section of the CSDE's Crediting Foods in School Nutrition Programs webpage.

### Minimum creditable amount

The minimum creditable amount of milk in a smoothie is  $\frac{1}{4}$  cup. SFAs must have a standardized recipe or PFS to document the type and amount of milk per serving (refer to "[Required Crediting Documentation](#)" in this document).

### Milk variety required at breakfast and lunch for grades K-12

When milk is served in smoothies at breakfast and lunch for grades K-12, SFAs must still offer a variety of milk (at least two different choices) with each meal. Choices may include low-fat milk and fat-free milk, either unflavored or flavored. At least one choice must be unflavored.

# Crediting Smoothies in the School Nutrition Programs

## Crediting Yogurt in Smoothies

Effective with school year 2025-26 (beginning July 1, 2025), the USDA final rule, [Child Nutrition Programs: Meal Patterns Consistent with the 2020-2025 Dietary Guidelines for Americans](#), requires that yogurt and soy yogurt cannot exceed 12 grams of added sugars per 6 ounces (no more than 2 grams of added sugars per ounce).

Yogurt and soy yogurt that meets this limit may credit as the MMA component when used as an ingredient in smoothies. The meal pattern contribution is based on the volume (cups) or weight of yogurt in the smoothie serving. A  $\frac{1}{2}$ -cup serving of yogurt credits as 1 oz eq of the MMA component. The minimum creditable amount is  $\frac{1}{8}$  cup.

The addition of yogurt to a smoothie is not a substitution for fluid milk in the breakfast and lunch meal patterns. Fluid milk must be offered in all meals to meet the milk component requirement.

SFAs must document the amount of yogurt or soy yogurt per serving with a recipe for smoothies made from scratch and a PFS for commercial products (refer to “[Required Crediting Documentation](#)” in this document). For information on the crediting requirements for yogurt, refer to the CSDE’s resource, [Crediting Yogurt in the School Nutrition Programs](#).

## Additional Ingredients

Smoothies may include additional noncreditable ingredients to improve flavor and consistency, such as oatmeal and peanut butter. However, these ingredients do not credit toward the meal patterns for the school nutrition programs.

# Crediting Smoothies in the School Nutrition Programs

## Smoothie Crediting Example

The example below shows how to credit a smoothie made with blueberry puree, low-fat yogurt, fat-free milk, and oatmeal.

Smoothie ingredient	Meal pattern contribution
Frozen blueberry puree, ½ cup	½ cup of fruit juice (fruits component)
Low-fat blueberry yogurt with no more than 2 grams of added sugars per ounce, ½ cup	1 oz eq of MMA
Low-fat milk, 4 fluid ounces	4 fluid ounces of milk
Oatmeal, 2 tablespoons	None (does not credit in smoothies)

## Crediting toward the meal patterns for grades K-12

This smoothie recipe credits toward the fruits, MMA, and milk components in the meal patterns for grades K-12. The blueberry puree credits as fruit juice and counts toward the weekly juice limit for breakfast, lunch, and afterschool snack (refer to CSDE's resource, [Crediting Juices in the School Nutrition Programs](#)).

## Crediting toward the preschool meal patterns

This smoothie recipe credits toward the fruits, MMA, and milk components in the preschool meal patterns for ages 2-5; and toward the fruits and MMA components in the preschool meal patterns for age 1. The smoothie cannot credit as the milk component for age 1 because the preschool meal patterns require unflavored whole milk for age 1. The blueberry puree credits as fruit juice and counts toward the preschool juice limit for all ages. For more information, refer to the CSDE's resource, [Crediting Juices in the School Nutrition Programs](#).

# Crediting Smoothies in the School Nutrition Programs

## Commercial Products

Commercial smoothies credit the same as smoothies made from scratch. Product formulation and labeling can vary greatly because commercial smoothies do not have a Food and Drug Administration (FDA) standard of identity. To credit commercial smoothies in the school nutrition programs, SFAs must obtain a PFS (or CN label, if available). This documentation must state the amount of all creditable ingredients per serving, such as pureed fruits and vegetables, juice, yogurt, and milk (refer to “[Required Crediting Documentation](#)” in this document).

The crediting documentation for commercial smoothies must follow the guidance below.

### Crediting pureed vegetables/fruits

Commercial smoothies made with juices or pureed fruits/vegetables credit only as juice toward the fruits component or vegetables component. Crediting is based on the volume of fruits/vegetables after pureeing and before freezing. The product label must include a statement regarding the “percent juice content,” which is required by the FDA for beverages made with fruit/vegetable juice or puree.

For example, an 8-fluid ounce smoothie made from fruit puree that is labeled with “contains 50% juice” credits as 4 fluid ounces ( $\frac{1}{2}$  cup) of juice. SFAs may need to obtain a PFS from the manufacturer to document the amount of pureed fruit in the product.

Concentrated fruit puree and concentrated juice are added sugars and do not credit in smoothies unless they are reconstituted to full-strength fruit puree or full-strength juice.

### Crediting milk

The type of milk used as an ingredient in commercial smoothies must be consistent with the meal pattern requirements (refer to “[Allowable types of milk](#)” in this document). The manufacturer’s product documentation must attest that commercial mixes with milk are made using ingredients that meet federal, state, and local definitions for fluid milk.

### Crediting yogurt

Yogurt and soy yogurt that meets the limit for added sugars credits as the MMA component when used as an ingredient in commercial smoothies (refer to “[Crediting Yogurt in Smoothies](#)” in this document). The product documentation must attest that commercial mixes with yogurt are made in compliance with the federal definition for yogurt.

# Crediting Smoothies in the School Nutrition Programs

## Limit for crediting amount

The total creditable amount in a smoothie cannot exceed the volume served. For example, ½ cup of a commercial smoothie cannot credit as 1 cup of juice.

## Noncreditable commercial smoothies

Probiotic dairy drinks, drinkable yogurt, and yogurt drinks are not smoothies, and do not credit in the meal patterns for the school nutrition programs. Commercial smoothies that contain dietary supplements (such as whey protein powder) or herbal supplements (such as ginkgo biloba, ginseng, and echinacea) do not credit.

## Review accuracy of PFS

The USDA requires that SFAs must verify the PFS for accuracy prior to purchasing, serving, and claiming the food product in reimbursable meals and afterschool snacks (refer to “[Documentation for commercial smoothies](#)” in this document). Check that the listed volumes of pureed fruits and vegetables are prior to freezing. Check that milk meets the meal pattern requirements, including the limit for added sugars in flavored milk. Check that meets yogurt meets the federal definition for yogurt and the limit for added sugars.

## Signage Requirement

The USDA’s regulations require SFAs to identify the meal components offered to students. Schools that serve smoothies should inform students about the included meal components by listing the type of smoothie on the menu and serving line signage, e.g., “peach and milk smoothie” or “strawberry, yogurt, and milk smoothie.” For more information, refer to the CSDE’s resource, [Signage Requirements for the National School Lunch Program and School Breakfast Program](#). For sample signage templates, visit New England Dairy’s [Smoothies](#) webpage.

For young children, the USDA encourages SFAs to provide information, as age appropriate, that helps children understand what foods are in their meals and afterschool snacks. For example, the breakfast menu could list “peach and milk smoothie” or “strawberry, yogurt, and milk smoothie” or use graphics or photos to show the meal components included in the smoothie.

Menu planners should also inform food service staff about the meal components in smoothies, so they are aware of how these foods contribute to the meal patterns for the school nutrition programs. When the SFA implements offer versus serve (OVS) for grades K-12, food service staff must be able to accurately identify reimbursable meals at the point of service.

This document is available at [https://portal.ct.gov/-/media/sde/nutrition/nslp/crediting/credit\\_smoothies\\_snp.pdf](https://portal.ct.gov/-/media/sde/nutrition/nslp/crediting/credit_smoothies_snp.pdf).

# Crediting Smoothies in the School Nutrition Programs

In accordance with federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, this institution is prohibited from discriminating on the basis of race, color, national origin, sex (including gender identity and sexual orientation), disability, age, or reprisal or retaliation for prior civil rights activity.

Program information may be made available in languages other than English. Persons with disabilities who require alternative means of communication to obtain program information (e.g., Braille, large print, audiotape, American Sign Language), should contact the responsible state or local agency that administers the program or USDA's TARGET Center at (202) 720-2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877-8339.

To file a program discrimination complaint, a Complainant should complete a Form AD-3027, USDA Program Discrimination Complaint Form which can be obtained online at: <https://www.usda.gov/sites/default/files/documents/ad-3027.pdf>, from any USDA office, by calling (866) 632-9992, or by writing a letter addressed to USDA. The letter must contain the complainant's name, address, telephone number, and a written description of the alleged discriminatory action in sufficient detail to inform the Assistant Secretary for Civil Rights (ASCR) about the nature and date of an alleged civil rights violation. The completed AD-3027 form or letter must be submitted to USDA by:

1. mail: U.S. Department of Agriculture  
Office of the Assistant Secretary for Civil Rights  
1400 Independence Avenue, SW  
Washington, D.C. 20250-9410; or
2. fax: (833) 256-1665 or (202) 690-7442; or
3. email: [program.intake@usda.gov](mailto:program.intake@usda.gov)

This institution is an equal opportunity provider.

The Connecticut State Department of Education is committed to a policy of equal opportunity/affirmative action for all qualified persons. The Connecticut Department of Education does not discriminate in any employment practice, education program, or educational activity on the basis of race; color; religious creed; age; sex; pregnancy; sexual orientation; workplace hazards to reproductive systems, gender identity or expression; marital status; national origin; ancestry; retaliation for previously opposed discrimination or coercion, intellectual disability; genetic information; learning disability; physical disability (including, but not limited to, blindness); mental disability (past/present history thereof); military or veteran status; status as a victim of domestic violence; or criminal record in state employment, unless there is a bona fide occupational qualification excluding persons in any of the aforementioned protected classes. Inquiries regarding the Connecticut State Department of Education's nondiscrimination policies should be directed to: Attorney Louis Todisco, Connecticut State Department of Education, by mail 450 Columbus Boulevard, Hartford, CT 06103-1841; or by telephone 860-713-6594; or by email [louis.todisco@ct.gov](mailto:louis.todisco@ct.gov).
