

Crediting Tofu and Tofu Products in the School Nutrition Programs

School Year 2025-26 (July 1, 2025, through June 30, 2026)

This guidance applies to the U.S. Department of Agriculture's (USDA) meal patterns for grades K-12 and preschool (ages 1-5) in the [National School Lunch Program \(NSLP\)](#), [School Breakfast Program \(SBP\)](#), and [Afterschool Snack Program \(ASP\)](#) of the NSLP. The [Seamless Summer Option \(SSO\)](#) of the NSLP follows the NSLP, SBP, and ASP meal patterns.

For information on the meal patterns for the school nutrition programs, visit the Connecticut State Department of Education's (CSDE) [Meal Patterns for Grades K-12 in School Nutrition Programs](#) webpage, [Meal Patterns for Preschoolers in School Nutrition Programs](#) webpage, and the "[Meal Patterns and Crediting](#)" section of the ASP webpage. For information on the crediting requirements, visit the CSDE's [Crediting Foods in School Nutrition Programs](#) webpage and [Crediting Documentation for the Child Nutrition Programs](#) webpage.

Crediting Tofu and Tofu Products in the School Nutrition Programs

Tofu Definition

Tofu does not have a Food and Drug Administration (FDA) [standard of identity](#). Tofu must be commercially prepared and meet the following definition in [7 CFR 210.2](#) and [7 CFR 226.2](#): “a soybean-derived food, made by a process in which soybeans are soaked, ground, mixed with water, heated, filtered, coagulated, and formed into cakes. Basic ingredients are whole soybeans, one or more food-grade coagulants (typically a salt or an acid), and water.”

USDA Crediting Requirements for Tofu

Tofu and tofu products must meet two criteria to credit toward the meats/meat alternates (MMA) component of the school meal patterns: 1) they must be easily recognizable as a meat substitute; and 2) they must contain at least 5 grams of protein in a 2.2-ounce serving by weight (¼ cup volume equivalent).

Criterion 1: Easily recognizable

The tofu or tofu product must be easily recognizable as a meat substitute to credit as the MMA component. The USDA emphasizes the importance of the nutrition education aspect of the school nutrition programs, which includes the goal of helping children easily recognize the key food groups that contribute to a healthy meal.

Tofu is widely recognized as a meat substitute and comes in a variety of textures such as silken, soft, firm, and extra firm. Some examples of recognizable tofu and tofu products include firm or extra firm tofu in stir-fries, omelets, miso soup, and minced in lasagna as a substitute for ricotta cheese; and commercial meat substitute products like tofu burgers and tofu sausage.

Tofu products that are not easily recognizable as meat substitutes cannot credit as the MMA component. Some examples include tofu blended into other foods (like smoothies, soup, and sauces), tofu baked in desserts, and tofu that does not represent a meat substitute, such as tofu noodles. These foods do not meet the customary and usual function of the MMA component.

Criterion 2: Meets protein requirement

The tofu ingredient must contain at least 5 grams of protein in a 2.2-ounce serving by weight (¼ cup volume equivalent) to credit as 1 ounce equivalent (oz eq) of the MMA component. Menu planners must use the Nutrition Facts panel or product formulation statement (PFS) to determine if commercial tofu meets the USDA’s protein requirement.

Crediting Tofu and Tofu Products in the School Nutrition Programs

Tofu Crediting Example

The steps below show how to determine if tofu complies with the USDA's protein requirement, using the sample Nutrition Facts panel for tofu on the right.

- List the grams (g) of protein per serving from the Nutrition Facts label.
 - 9 grams
- List the serving size in ounces (oz) from the Nutrition Facts label.
 - 3 ounces
- Calculate the grams of protein per ounce: divide grams of protein (from step 1) by serving size in ounces (from step 2).
 - 9 grams divided by 3 ounces = 3 grams per ounce
- Calculate the grams of protein in 2.2 ounces: multiply the grams in step 3 by 2.2.
 - 3 grams multiplied by 2.2 = 6.6 grams

This tofu product contains 6.6 grams of protein in 2.2 ounces, which meets the USDA's minimum protein requirement (5 grams in a 2.2-ounce serving). A 2.2-ounce serving of this tofu provides 1 oz eq of the MMA component if it also meets criterion 1 (easily recognizable as a meat substitute).

School food authorities (SFAs) cannot use this method for commercial products that contain tofu as an ingredient, like tofu burgers or tofu sausages. The Nutrition Facts panel shows the amount of protein in the food, not the amount of protein in the tofu ingredient. Commercial products that contain tofu as an ingredient require a Child Nutrition (CN) label or product formulation statement (PFS) to determine crediting information (refer to "[Required Crediting Documentation for Tofu](#)" in this document).

MMA Contribution of Tofu Servings

Table 1 shows the MMA contribution for different serving sizes of tofu and the minimum grams of protein required to credit in the school meal patterns. Menu planners must review the Nutrition Facts label or PFS to determine if the tofu serving meets this requirement (refer to [“Tofu Crediting Example”](#) in this document).

Table 1. MMA contribution of tofu

Serving size	MMA contribution	Minimum protein (grams) per serving
0.55 ounce (1 tablespoon)	¼ oz eq (minimum creditable amount)	1.25 grams
1.1 ounces (⅛ cup)	½ oz eq	2.5 grams
2.2 ounces (¼ cup)	1 oz eq	5 grams
3.3 ounces (⅜ cup)	1½ oz eq	7.5 grams
4.4 ounces (½ cup)	2 oz eq	10 grams

Required Crediting Documentation for Tofu

SFAs must be able to document that all menu items served in reimbursable meals and afterschool snacks meet the crediting requirements. The guidance below summarizes the required documentation for commercial tofu products and foods made from scratch that contain tofu. Documentation must be based on the food yields and crediting information in the USDA’s [Food Buying Guide for Child Nutrition Programs](#) (FBG).

Documentation for commercial products

Commercially prepared tofu products that contain tofu as an ingredient (like tofu burgers and tofu sausages) require a CN label or PFS that indicates the amount of protein per serving. For information on CN labels and PFS forms, refer to the CSDE’s resources, [Using Product Formulation Statements in the School Nutrition Programs](#) and [Using Child Nutrition \(CN\) Labels in the School Nutrition Programs](#). For guidance on reviewing PFS forms, visit the USDA’s [Child Nutrition Programs: Tips for Evaluating a Manufacturer's Product Formulation Statement](#) webpage.

For more information on crediting documentation, refer to the CSDE's resource, [Accepting Processed Product Documentation in the School Nutrition Programs](#), and [USDA Memo SP 05-2025, CACFP 04-2025, SFSP 02-2025: Guidance for Accepting Processed Product Documentation for Meal Pattern Requirements](#). Additional guidance is available on the CSDE's [Crediting Documentation for the Child Nutrition Programs](#) webpage.

Training on the requirements for CN labels and PFS forms is available in [Module 8: Meal Pattern Documentation for Crediting Commercial Processed Products](#) of the CSDE's training program, *What's in a Meal: Meal Patterns for Grades K-12 in the School Nutrition Programs*.

Documentation for foods made from scratch that contain tofu

SFAs must have standardized recipes on file that document the oz eq of MMA per serving in all foods prepared from scratch that contain commercial tofu. For information on standardized recipes, refer to the CSDE's [Guide to Menu Documentation for the School Nutrition Programs](#) and the Institute of Child Nutrition's [USDA Recipe Standardization Guide for School Nutrition Programs](#), and visit the "[Standardized Recipes](#)" section of the CSDE's Crediting Documentation for the Child Nutrition Programs webpage.

Training on the requirements for standardized recipes is available in [Module 7: Meal Pattern Documentation for School Menus](#) of the CSDE's training program, *What's in a Meal: Meal Patterns for Grades K-12 in the School Nutrition Programs*.

Storing crediting documentation

SFAs must maintain all crediting documentation for tofu menu items on file in accordance with the records retention requirements for the school nutrition programs (refer to the CSDE's resource, [Records Retention Requirements for the School Nutrition Programs](#)). This documentation must be current and will be reviewed by the CSDE during the [Administrative Review of the school nutrition programs](#).
