

Crediting Summary Charts for the Meal Patterns for Grades K-12 in the School Nutrition Programs

School Year 2024-25 (July 1, 2024, through June 30, 2025)

This guidance applies to the U.S. Department of Agriculture's (USDA) meal patterns for grades K-12 in the [National School Lunch Program \(NSLP\)](#), [School Breakfast Program \(SBP\)](#), and [Seamless Summer Option \(SSO\)](#) of the NSLP. The SSO follows the NSLP and SBP meal patterns. For information on the meal patterns for grades K-12, visit the Connecticut State Department of Education's (CSDE) [Meal Patterns for Grades K-12 in School Nutrition Programs](#) webpage.

Crediting Summary Charts for the Meal Patterns for Grades K-12 in the School Nutrition Programs

Meeting the Meal Component Requirements

School food authorities (SFAs) must be able to document the meal pattern contribution of foods and beverages served in the U.S. Department of Agriculture's (USDA) [National School Lunch Program \(NSLP\)](#), [School Breakfast Program \(SBP\)](#), and [Seamless Summer Option \(SSO\)](#) of the NSLP. The SSO follows the NSLP and SBP meal patterns.

This document summarizes the crediting requirements and methods for the five meal components of the NSLP and SBP meal patterns for grades K-12, including the updates required by the USDA final rule, [Child Nutrition Programs: Meal Patterns Consistent with the 2020-2025 Dietary Guidelines for Americans](#) (89 FR 31962).

Effective with school year 2024-25 (beginning July 1, 2024), July 1, 2024, the USDA final rule, [Child Nutrition Programs: Meal Patterns Consistent with the 2020-2025 Dietary Guidelines for Americans](#), changes the previous terminology for "food component" to "meal component." A meal component is one of the food groups that comprise reimbursable meals and snacks in the USDA Child Nutrition Programs.

Chart 1 provides an overview of the crediting requirements for the five meal components (milk, meats/meat alternates, vegetables, fruits, and grains). Charts 2 through 6 summarize the specific crediting considerations for each meal component.

For detailed guidance on the meal patterns for grades K-12 and the crediting requirements for the meal components, refer to the CSDE's [Menu Planning Guide for Grades K-12 in the National School Lunch Program and School Breakfast Program](#) and

visit the CSDE's [Meal Patterns for Grades K-12 in School Nutrition Programs](#) webpage and [Crediting Foods in School Nutrition Programs](#) webpage.

Required Crediting Documentation

SFAs must use appropriate crediting methods and maintain the applicable documentation for commercial products and foods made from scratch. Menu planners should follow the guidance below to ensure that school menus comply with the crediting requirements of the NSLP and SBP meal patterns.

- **Use the Food Buying Guide for Child Nutrition Programs (FBG):** The USDA's [FBG](#) determines food yields and crediting information, and indicates the specific contribution of foods toward the meal pattern requirements. The FBG indicates how many servings a specific quantity of food will provide, what quantity of raw product will provide the amount of ready-to-cook food in a recipe, and how much food to buy to provide a specific meal pattern contribution.
- **Obtain a Child Nutrition (CN) label or product formulation statement (PFS) for all commercial processed products:** SFAs must have a CN label or PFS to document the meal pattern contribution of all commercial processed foods with added ingredients, such as combination foods (e.g., pizza and chicken nuggets), deli meats, hot dogs, and breaded vegetables. Commercial processed foods without this documentation do not credit. For more information, refer to the Connecticut State Department of Education's (CSDE) resources, [Using Child Nutrition \(CN\) Labels in the School Nutrition Programs](#), [Using Product Formulation Statements in the School Nutrition Programs](#), and [Accepting Processed Product Documentation in the School Nutrition Programs](#), and the USDA's [Tips for Evaluating a Manufacturer's Product Formulation Statement](#). Additional

Crediting Summary Charts for the Meal Patterns for Grades K-12 in the School Nutrition Programs

resources are available in the “[Crediting Commercial Processed Products](#)” section of the CSDE’s [Crediting Foods in School Nutrition Programs Programs](#) webpage. Training on the requirements for CN labels and PFS forms is available in “Module 6: Meal Pattern Documentation” of the CSDE’s training program, [What’s in a Meal: National School Lunch Program and School Breakfast Program Meal Patterns for Grades K-12](#).

- **Maintain standardized recipes for foods made from scratch:** SFAs must have standardized recipes that document the crediting information for all foods made from scratch. Determine the recipe’s meal pattern contribution per serving by: 1) using the FBG to determine the weight or volume of each creditable ingredient in the recipe; and 2) dividing the weight or volume of each creditable ingredient by the number of servings. The FBG’s [Recipe Analysis Workbook](#) (RAW) allows menu planners to search for creditable ingredients and calculate the recipe’s meal pattern contribution. For more information, visit the “[Crediting Foods Made from Scratch](#)” section of the CSDE’s [Crediting Foods in School Nutrition Programs Programs](#) webpage.

Remember to round down all crediting amounts for commercial products and standardized recipes to the nearest minimum creditable amount (refer to [chart 1](#)).

Training on the school meal patterns and crediting requirements is available in the CSDE’s [What’s in a Meal: National School Lunch Program and School Breakfast Program Meal Patterns for Grades K-12](#).

Upcoming Meal Pattern Changes for School Year 2025-26

Effective July 1, 2025, the USDA final rule, [Child Nutrition Programs: Meal Patterns Consistent with the 2020-2025 Dietary Guidelines for Americans](#), establishes several product-based limits for added sugars in the NSLP and SBP meal patterns for grades K-12.

- Yogurt cannot exceed 12 grams of added sugars per 6 ounces (2 grams of added sugars per ounce).
- Flavored milk cannot exceed 10 grams of added sugars per 8 fluid ounces. Flavored milk sold as a competitive food in middle and high schools cannot exceed 15 grams of added sugars per 12 fluid ounces.
- Breakfast cereals cannot exceed 6 grams of added sugars per dry ounce.

For more information on the final rule, visit the “[Upcoming Meal Pattern Changes](#)” section of the CSDE’s [Meal Patterns for Grades K-12 in School Nutrition Programs](#) webpage.

Crediting Summary Charts for the Meal Patterns for Grades K-12 in the School Nutrition Programs

Chart 1 – Overview of Crediting Requirements for the Meal Components

Criteria	Milk	Meats/Meat Alternates (MMA)	Vegetables	Fruits	Grains
Meal pattern measure	Volume: cups	Ounce equivalents (oz eq): Weight (ounces [oz]) for most foods; volume (cups) for some foods (e.g., beans, peas, and lentils and peanut butter); and either weight or volume for some foods (e.g., yogurt and tofu)	Volume: cups	Volume: cups	Ounce equivalents (oz eq): <ul style="list-style-type: none"> weight (groups A-G) volume (groups H-I)
Minimum creditable amount	Full serving: 1 cup	¼ oz eq	⅛ cup	⅛ cup	¼ oz eq
Crediting methods: Round down all crediting amounts for products and standardized recipes to the nearest minimum creditable amount	Credit based on allowable types of milk (refer to chart 2).	MMA without added ingredients: Credit based on cooked weight, e.g., 1 ounce of cooked lean meat credits as 1 oz eq of MMA. Use the FBG to determine the cooked yields or edible portions. Processed MMA with added ingredients: Credit based on the CN label, PFS, or FBG. Note: The manufacturer’s serving weight is not the same as the MMA contribution because processed foods contain non-MMA ingredients in addition to their MMA component.	Credit based on volume (cups) using the yields in the FBG. Credit raw leafy greens as half the volume served.	Credit based on volume (cups) using the yields in the FBG. Credit dried fruit credits as twice the volume served.	Method 1: Use the weight (groups A-G) or volume (groups H-I) in the USDA’s Exhibit A chart (refer to Grain Ounce Equivalents for the National School Lunch Program and School Breakfast Program Meal Patterns for Grades K-12). Method 2: Determine the weight (grams) of the creditable grains per serving (refer to Calculation Methods for Grain Ounce Equivalents for the National School Lunch Program and School Breakfast Program Meal Patterns for Grades K-12): 1 oz eq = 16 grams of creditable grains (groups A-G) or 28 grams of creditable grains (group H).
Documentation for unprocessed commercial products	Not applicable	Use the FBG to determine and document food yields and crediting information (or USDA Foods in Schools Product Information Sheets for USDA Foods).	Same	Same	Same
Documentation for processed commercial products	Not applicable, except for milk in smoothies.	Must have CN label or PFS (or USDA Foods in Schools Product Information Sheets for USDA Foods). CSDE webpage: Crediting Commercial Processed Products for Grades K-12 in School Nutrition Programs	Same	Same	Same
Documentation for foods made from scratch	Not applicable, except for milk in smoothies.	Must have standardized recipe. CSDE webpage: Crediting Foods Made from Scratch for Grades K-12 in School Nutrition Programs	Same	Same	Same

Milk Component

The milk component includes only fluid milk. Milk must be pasteurized, meet all state and local requirements, and contain vitamins A and D at levels specified by the Food and Drug Administration (FDA). For information on the meal pattern requirements for the milk component, refer to the CSDE's chart, [Comparison of the Milk Component Requirements in the Meal Patterns for School Nutrition Programs](#), and section 3 of the CSDE's [Menu Planning Guide for Grades K-12 in the National School Lunch Program and School Breakfast Program](#) and visit the "Milk Component for Grades K-12" section of the CSDE's Crediting Foods in School Nutrition Programs webpage. Training on the milk component is available in module 7 of the CSDE's training program, [What's in a Meal: National School Lunch Program and School Breakfast Program Meal Patterns for Grades K-12](#).

Noncreditable foods: Examples of foods that do not credit as the milk component include reduced fat (2%) milk and whole milk; nondairy milk substitutes that do not meet the USDA's nutrition standards for fluid milk substitutes, e.g., rice milk, almond milk, and cashew milk; milk that is cooked or baked in prepared foods, such as cereals, puddings, and cream sauces; nutrition supplement beverages, e.g., Abbott's Pediasure; powdered milk beverages, e.g., Nestle's NIDO; and *for public schools only*, milk and nondairy milk substitutes that do not meet the state beverage requirements of Connecticut General Statute Section 10-221q. For additional guidance, refer to the CSDE's [Noncreditable Foods in the National School Lunch Program and School Breakfast Program Meal Patterns for Grades K-12](#).

Changes for school year 2024-25: Effective July 1, 2024, the USDA final rule, [Child Nutrition Programs: Meal Patterns Consistent with the 2020-2025 Dietary Guidelines for Americans](#), implements the changes below to the NSLP and SBP meal patterns for grades K-12.

- Continues to allow SFAs to offer fat-free and low-fat milk (flavored and unflavored) for grades K-12. Continues to require that unflavored milk be offered at each school breakfast and lunch meal service.
- Updates the units for vitamin A and vitamin D requirements for fluid milk substitutes to align with the Food and Drug Administration (FDA) labeling requirements. For vitamin A, instead of 500 IUs, the unit requirement is now 150 mcg retinol activity equivalents (RAE) per 8 fluid ounces. For vitamin D, instead of 100 IUs, the unit requirement is now 2.5 mcg per 8 fluid ounces. The amount of vitamin A and vitamin D required in fluid milk substitutes does not change; only the unit of measurement has changed to conform to FDA labeling requirements.

Upcoming change for school year 2025-26: Effective July 1, 2025, the USDA final rule, [Child Nutrition Programs: Meal Patterns Consistent with the 2020-2025 Dietary Guidelines for Americans](#), establishes a new sugar limit for flavored milk. Flavored milk cannot exceed 10 grams of added sugars per 8 fluid ounces. Flavored milk sold as a competitive food in middle and high schools cannot exceed 15 grams of added sugars per 12 fluid ounces.

Crediting Summary Charts for the Meal Patterns for Grades K-12 in the School Nutrition Programs

Chart 2 – Crediting Foods in the Milk Component

Milk component food item	Crediting requirements	Crediting resources
Fluid milk	<ul style="list-style-type: none"> • The NSLP and SBP meal patterns require fluid milk as a beverage. Milk does not credit when cooked or baked in foods, such as cereals, puddings, cream sauces, and other foods. • Milk must be pasteurized, meet all state and local requirements, and contain vitamins A and D at levels specified by the Food and Drug Administration (FDA). • Allowable types of milk include low-fat (1%) and fat-free milk, either unflavored or flavored. This includes any of the following types of milk that meet the fat content restrictions: lactose-reduced milk, lactose-free milk, acidified milk, cultured milk, cultured buttermilk, and Ultra High Temperature (UHT) milk. • Public schools only: Milk must also meet the state beverage requirements of Section 10-221q of the Connecticut General Statutes (C.G.S). The state beverage statute requires that milk cannot contain artificial sweeteners and cannot exceed 4 grams of sugars per fluid ounce. • Menus must include a variety (at least two different choices) and at least one milk choice must be unflavored. • Upcoming change for program year 2025-26: Effective July 1, 2025, the USDA final rule, Child Nutrition Programs: Meal Patterns Consistent with the 2020-2025 Dietary Guidelines for Americans, establishes a new sugar limit for flavored milk. Flavored milk cannot exceed 10 grams of added sugars per 8 fluid ounces. Flavored milk sold as a competitive food in middle and high schools cannot exceed 15 grams of added sugars per 12 fluid ounces. 	<ul style="list-style-type: none"> • CSDE handout: Comparison of Meal Pattern Requirements for the Milk Component in School Nutrition Programs • CSDE handout (applies only to public schools): Allowable Beverages for Connecticut Public Schools
Milk in fruit/vegetable smoothies	<ul style="list-style-type: none"> • The minimum creditable amount of milk in a smoothie is ¼ cup. If a smoothie contains less than the full serving of milk, the meal must include additional milk to provide the full serving. Note: This crediting applies only to milk in smoothies. The minimum creditable amount of the milk component is the full 1-cup serving. 	<ul style="list-style-type: none"> • CSDE handout: Crediting Smoothies in the Meal Patterns for Grades K-12 in the School Nutrition Programs

Crediting Summary Charts for the Meal Patterns for Grades K-12 in the School Nutrition Programs

Milk component food item	Crediting requirements	Crediting resources
<p>Milk substitutes for children without a disability</p>	<ul style="list-style-type: none"> • The USDA allows two types of milk substitutions: 1) nondairy milk substitutes that meet the USDA’s nutrition standards for fluid milk substitutes; and 2) lactose-free or lactose-reduced milk that meets the required fat content and flavor restrictions, i.e., low-fat (1%) milk and fat-free milk, either unflavored or flavored (refer to “Fluid milk” in this section). • Public schools only: Nondairy milk substitutes must also meet the state beverage requirements of C.G.S. Section 10-221q. The state beverage statute requires that nondairy milk substitutes cannot contain artificial sweeteners and cannot exceed 4 grams of sugars per fluid ounce, 35 percent of calories from fat, and 10 percent of calories from saturated fat. • Juice, water, and other beverages cannot substitute for milk in meals for children without a disability. • Change for school year 2024-25: Effective July 1, 2024, the USDA final rule, Child Nutrition Programs: Meal Patterns Consistent with the 2020-2025 Dietary Guidelines for Americans, updates the units for vitamin A and vitamin D requirements for fluid milk substitutes to align with the Food and Drug Administration (FDA) labeling requirements. For vitamin A, instead of 500 IUs, the unit requirement is now 150 mcg retinol activity equivalents (RAE) per 8 fluid ounces. For vitamin D, instead of 100 IUs, the unit requirement is now 2.5 mcg per 8 fluid ounces. The amount of vitamin A and vitamin D required in fluid milk substitutes does not change; only the unit of measurement has changed to conform to FDA labeling requirements. 	<ul style="list-style-type: none"> • CSDE handout: Milk Substitutes for Children with Disabilities in School Nutrition Programs • CSDE handout: Determining if Nondairy Beverages Meet the USDA’s Nutrition Standards for Fluid Milk Substitutes in School Nutrition Programs • CSDE handout (applies only to public schools): Allowable Beverages for Connecticut Public Schools

Crediting Summary Charts for the Meal Patterns for Grades K-12 in the School Nutrition Programs

Meats/Meat Alternates (MMA) Component

The MMA component includes fresh and frozen meats (e.g., lean beef, pork, poultry, fish, and shellfish), processed meats (e.g., chicken nuggets, deli meats, and fish sticks), canned meats (e.g., chicken, tuna, and salmon), and meat alternates such as eggs, cheese, yogurt, nuts and seeds and their butters, beans, peas, and lentils, tofu, and tempeh.

For information on the meal pattern requirements for the MMA component, refer to the CSDE's [Menu Planning Guide for Grades K-12 in the National School Lunch Program and School Breakfast Program](#) and visit the "Meats/Meat Alternates Component for Grades K-12" section of the CSDE's Crediting Foods in School Nutrition Programs webpage. Training on the MMA component is available in module 8 of the CSDE's training program, [What's in a Meal: National School Lunch Program and School Breakfast Program Meal Patterns for Grades K-12](#).

The manufacturer's serving weight is not the same as the MMA contribution, i.e., 1 ounce does not equal 1 ounce of MMA, because processed foods (such as combination foods, deli meats, hot dogs, and sausages) contain non-MMA ingredients in addition to their MMA component. SFAs must obtain a CN label or PFS for all commercial processed products (refer to ["Crediting Documentation"](#) in this document).

Noncreditable foods: Examples of foods that do not credit as the MMA component include bacon, commercial canned soups (e.g., beef barley, beef noodle, turkey or chicken noodle, and turkey or chicken rice), cream cheese, drinkable yogurt, egg whites, frozen yogurt, imitation cheese, products made with tofu that are not easily recognized as meat substitutes or that contain less than 5 grams of protein in 2.2 ounces, and sour cream.

For additional guidance, refer to the CSDE's [Noncreditable Foods in the National School Lunch Program and School Breakfast Program Meal Patterns for Grades K-12](#).

Changes for school year 2024-25: Effective July 1, 2024, the USDA final rule, [Child Nutrition Programs: Meal Patterns Consistent with the 2020-2025 Dietary Guidelines for Americans](#), implements the changes below to the NSLP and SBP meal patterns for grades K-12.

- Establishes a combined grains and MMA meal component in the SBP and removes the requirement for schools to offer 1 oz eq of grains each day at breakfast. Schools may offer grains, meats/meat alternates, or a combination of both, to meet the minimum oz eq in this combined meal component requirement.
- Allows nuts and seeds to credit for the full MMA component in all meals, removing the previous 50 percent crediting limit for nuts and seeds at lunch.
- Changes the name of the previous "legumes (beans and peas)" vegetable subgroup to the "beans, peas, and lentils" vegetable subgroup.
- Allows beans, peas, and lentils offered as a meat alternate at lunch to also count toward the weekly beans, peas, and lentils vegetable subgroup requirement. As with the current requirement, menu planners determine whether beans, peas, and lentils count toward the vegetables component or the MMA component.

Upcoming change for program year 2025-26: The USDA final rule, [Child Nutrition Programs: Meal Patterns Consistent with the 2020-2025 Dietary Guidelines for Americans](#), establishes a sugar limit for yogurt of no more than 12 grams of added sugars per 6 ounces (2 grams of added sugars per ounce).

Crediting Summary Charts for the Meal Patterns for Grades K-12 in the School Nutrition Programs

Chart 3 – Crediting Foods in the MMA Component

MMA component food item	1 oz eq of MMA =	Additional crediting requirements and resources
<p>Alternate protein products (APPs), e.g., veggie burgers, meatless chicken nuggets, and soy hotdogs</p>	<ul style="list-style-type: none"> ● 1 ounce of APP: Must have a CN label or PFS from the manufacturer with supporting documentation on company letterhead that the APP ingredient meets the USDA’s requirements (refer to “Crediting Documentation” on page 1 and “Commercial meat, poultry, or fish products with added ingredients” in this section). 	<ul style="list-style-type: none"> ● CSDE handout: Requirements for Alternate Protein Products in the School Nutrition Programs ● USDA handout: Questions and Answers on Alternate Protein Products ● CSDE training module: What’s in a Meal Module 6: Meal Pattern Documentation
<p>Beans, peas, and lentils, e.g., kidney beans, black beans, and chickpeas</p>	<ul style="list-style-type: none"> ● ¼ cup of cooked beans, peas, and lentils ● 1 ounce of roasted beans, peas, and lentils, e.g., roasted chickpeas and roasted soybeans (soy nuts) 	<ul style="list-style-type: none"> ● Effective July 1, 2024, the USDA final rule, <i>Child Nutrition Programs: Meal Patterns Consistent with the 2020-2025 Dietary Guidelines for Americans</i>, changes the name of the previous “legumes (beans and peas)” vegetable subgroup to the “beans, peas, and lentils” vegetable subgroup. ● The liquid served with beans, peas, and lentils does not credit, such as the sauce in baked beans. ● Beans, peas, and lentils may credit as either the MMA component or vegetables component but one serving cannot credit as both components in the same meal. Refer to chart 4 for information on crediting beans, peas, and lentils as vegetables. ● Roasted or dried beans, peas, and lentils (such as roasted soybeans or roasted chickpeas) credit the same as nuts and seeds. A 1-ounce serving of roasted or dried beans, peas, or lentils credits as 1 oz eq of the MMA component. ● CSDE handout: Crediting Beans, Peas, and Lentils in the School Nutrition Programs

Crediting Summary Charts for the Meal Patterns for Grades K-12 in the School Nutrition Programs

MMA component food item	1 oz eq of MMA =	Additional crediting requirements and resources
<p>Cheeses, e.g., cheddar, mozzarella, provolone, American, and cottage cheese</p>	<ul style="list-style-type: none"> • 1 ounce of natural cheese and pasteurized process cheese, e.g., American. • ¼ cup of cottage or ricotta cheese. • 2 ounces of cheese substitute, cheese food substitute, and cheese spread substitute. 	<ul style="list-style-type: none"> • Cream cheese does not credit. • Foods that contain cheese (such as pizza and macaroni and cheese) require a CN label or PFS for commercial products and a standardized recipe for foods made from scratch (refer to “Crediting Documentation” on page 1).
<p>Commercial combination foods, e.g., pizza and chicken nuggets</p>	<ul style="list-style-type: none"> • Varies by commercial product: Must have a CN label or PFS to document the amount of MMA per serving (refer to “Crediting Documentation” on page 1 and “Commercial meat, poultry, or fish products with added ingredients” in this section). 	<ul style="list-style-type: none"> • CSDE handout: Crediting Commercial Meat/Meat Alternate Products in the School Nutrition Programs • CSDE webpage: Crediting Commercial Processed Products for Grades K-12 in School Nutrition Programs
<p>Commercial meat, poultry, or fish products with added ingredients, e.g., hotdogs, deli meats, and sausages</p>	<ul style="list-style-type: none"> • Varies by commercial product: Must have a CN label or PFS to document the amount of MMA per serving (refer to “Crediting Documentation” on page 1 and “Commercial meat, poultry, or fish products with added ingredients” in this section). 	<ul style="list-style-type: none"> • Regular bacon does not credit. Some brands of turkey bacon might credit with the appropriate documentation from a CN label or PFS. • CSDE handout: Crediting Commercial Meat/Meat Alternate Products in the School Nutrition Programs • CSDE handout: Using Child Nutrition (CN) Labels in the School Nutrition Programs • CSDE handout: Using Product Formulation Statements in the School Nutrition Programs • CSDE webpage: Crediting Commercial Processed Products for Grades K-12 in School Nutrition Programs • USDA handout: Reviewer’s Checklist for Evaluating Manufacturer Product Formulation Statements (Product Analysis) for Meat/Meat Alternate (M/MA) Products • USDA handout: Tips for Evaluating a Manufacturer’s Product Formulation Statement

Crediting Summary Charts for the Meal Patterns for Grades K-12 in the School Nutrition Programs

MMA component food item	1 oz eq of MMA =	Additional crediting requirements and resources
Cooked lean meat, poultry, or fish , i.e., without bone, skin, or added ingredients	<ul style="list-style-type: none"> • 1 ounce: Refer to the FBG for cooked yields of meat, poultry, and fish. 	
Deli meats , e.g., turkey, ham, roast beef, salami, and bologna	<ul style="list-style-type: none"> • Varies by commercial product: Must have a CN label or PFS to document the amount of meat per serving (refer to “Crediting Documentation” on page 1 and “Commercial meat, poultry, or fish products with added ingredients” in this section). • Many deli meats contain added binders, extenders, and liquids, and do not credit based on serving weight. Some deli meats require several ounces to credit as 1 oz eq of MMA. 	<ul style="list-style-type: none"> • CSDE handout: Crediting Deli Meats in the School Nutrition Programs • CSDE training module: What’s in a Meal Module 6: Meal Pattern Documentation
Dried meat, poultry, and seafood products , e.g., jerky and summer sausage	<ul style="list-style-type: none"> • Varies by commercial product: Must have a CN label or PFS to document the amount of meat per serving (refer to “Crediting Documentation” on page 1 and “Commercial meat, poultry, or fish products with added ingredients” in this section). 	<ul style="list-style-type: none"> • Must evaluate the product’s PFS to ensure it meets the following USDA crediting principles: 1) the creditable meat ingredient must match, or have a similar description to, the ingredient listed on the product’s label; 2) the creditable meat ingredient must have a similar description to a food item in the FBG; and 3) the creditable amount cannot exceed the finished weight of the product. For example, a 1-ounce serving of beef jerky cannot credit for more than 1 oz eq of MMA. • Ground pork and beef ingredients must include the percent fat because the fat content has a direct correlation to the cooking yield. To credit in the Child Nutrition Programs, the fat content of ground beef or ground pork in dried meat products cannot exceed 30 percent. • USDA Memo SP 21-2019, CACFP 08-2019 and SFSP 07-2019: Crediting Shelf-Stable, Dried and Semi-Dried Meat, Poultry, and Seafood Products in the Child Nutrition Programs • USDA webinar: Moving Forward: Update on Food Crediting in Child Nutrition Programs with Guidance for Dried Meat Products

MMA component food item	1 oz eq of MMA =	Additional crediting requirements and resources
Eggs	<ul style="list-style-type: none"> ● ½ large 	<ul style="list-style-type: none"> ● Only whole eggs credit. Liquid egg substitutes are not whole eggs and do not credit. Egg whites served alone do not credit. ● Foods that contain eggs (such as quiche or frittata) require a CN label or PFS for commercial products and a standardized recipe for foods made from scratch (refer to “Crediting Documentation” on page 1).
Foods made from scratch , e.g., pizza and macaroni and cheese	<ul style="list-style-type: none"> ● Varies by food: Must have a standardized recipe to document the amount of MMA per serving. 	<ul style="list-style-type: none"> ● CSDE webpage: Crediting Foods Made from Scratch
Hummus or bean dip made with beans, peas, and lentils) and tahini (or other nut/seed butters)	<ul style="list-style-type: none"> ● Varies by commercial product and standardized recipe. The serving must contain at least ¼ oz eq of MMA combined from the beans, peas, and lentils and tahini (sesame paste) or other nut/seed butters. ● Commercial products require a CN label or PFS to document the amount of meat alternate per serving (refer to “Crediting Documentation” on page 1 and “Commercial meat, poultry, or fish products with added ingredients” in this section). ● Hummus and bean dips made from scratch must have a standardized recipe to document the amount of meat alternate per serving (refer to “Crediting Documentation” on page 1). 	<ul style="list-style-type: none"> ● Bean dip is a spread made from ground pulses (beans, peas, and/or lentils) with one or more of the following optional ingredients: ground nut/seed butter (such as tahini [ground sesame] or peanut butter; vegetable oil (such as olive oil, canola oil, soybean oil); seasoning (such as salt, citric acid); vegetables and juice for flavor (such as olives, roasted peppers, garlic, lemon juice); and for manufactured bean dip, ingredients necessary as preservatives and/or to maintain freshness. ● A ¼-cup serving of beans, peas, and lentils credits as 1 oz eq of the MMA component. The minimum creditable amount is 1 tablespoon (¼ oz eq). ● Two tablespoons of tahini or other nut/seed butters credit as 1 ounce of the MMA component. The minimum creditable amount is ½ tablespoon (¼ ounce). ● The beans/peas/lentils in hummus or bean dips may credit as either the MMA component or vegetables component but one serving cannot credit as both components in the same meal. Refer to chart 4 for information on crediting hummus as the vegetables component. ● CSDE handout: Crediting Beans, Peas, and Lentils in the School Nutrition Programs

Crediting Summary Charts for the Meal Patterns for Grades K-12 in the School Nutrition Programs

MMA component food item	1 oz eq of MMA =	Additional crediting requirements and resources
Nut/seed butters , e.g., peanut butter, almond butter, sunflower seed butter, and soy nut butter	<ul style="list-style-type: none"> ● 2 tablespoons 	<ul style="list-style-type: none"> ● The meal patterns require volume (tablespoons) not weight (ounces). Measuring 1 ounce by weight does not provide 1 oz eq of MMA. The FBG indicates that 1.1 ounces of nut/seed butter is required to credit as 1 oz eq of MMA. ● Consider the appropriateness of the serving size for each age group. It may be unreasonable to provide the full serving of a nut or seed butter in one menu item. For example, a peanut butter sandwich must contain 4 tablespoons of peanut butter to credit as 2 oz eq of MMA for grades K-12 at lunch. ● CSDE handout: Crediting Nuts and Seeds in the School Nutrition Programs
Nuts/seeds , e.g., almonds, Brazil nuts, cashews, filberts, macadamia nuts, peanuts, pecans, walnuts, pine nuts, pistachios, pumpkin seeds, soy nuts, and sunflower seeds	<ul style="list-style-type: none"> ● 1 ounce 	<ul style="list-style-type: none"> ● Effective July 1, 2024, the USDA final rule, <i>Child Nutrition Programs: Meal Patterns Consistent with the 2020-2025 Dietary Guidelines for Americans</i>, removes the previous 50 percent crediting limit for nuts and seeds at lunch. Nuts and seeds may credit for the full MMA component at any meal. ● CSDE handout: Crediting Nuts and Seeds in the School Nutrition Programs
Pasta products made of 100 percent bean, pea, and lentil flour , e.g., chickpea flour pasta and lentil flour pasta	<ul style="list-style-type: none"> ● ¼ cup of cooked 100 percent bean, pea, and lentil flour pasta 	<ul style="list-style-type: none"> ● School menus must offer an additional MMA (such as tofu, cheese, or meat) with bean, pea, and lentil flour pasta. ● Pasta made of 100 percent beans, peas, or lentils may credit as either the MMA component or vegetables component but one serving cannot credit as both components in the same meal. Refer to chart 4 for information on crediting beans, peas, and lentils as vegetables.
Surimi	<ul style="list-style-type: none"> ● 3 ounces 	<ul style="list-style-type: none"> ● A PFS is required to credit a surimi product differently (refer to “Commercial meat, poultry, or fish products with added ingredients” in this section).

Crediting Summary Charts for the Meal Patterns for Grades K-12 in the School Nutrition Programs

MMA component food item	1 oz eq of MMA =	Additional crediting requirements and resources
Tempeh	<ul style="list-style-type: none"> • 1 ounce 	<ul style="list-style-type: none"> • A PFS is required if the product’s ingredients contain anything other than soybeans (or other beans, peas, and lentils), water, tempeh culture, vinegar, seasonings, and herbs (refer to “Commercial meat, poultry, or fish products with added ingredients” in this section). • USDA Memo SP 25-2019, CACFP 12-2019 and SFSP 11-2019: Crediting Tempeh in the Child Nutrition Programs • USDA webinar: Additional Meat/Meat Alternate Options for CNPs: Crediting Tempeh and Surimi
Tofu (commercial)	<ul style="list-style-type: none"> • 1 ounce 	<ul style="list-style-type: none"> • Products must meet three crediting criteria: 1) must be commercially prepared; 2) must be easily recognized as meat substitutes, such as tofu burgers and tofu sausages; and 3) must contain 5 grams of protein in 2.2 ounces. • CSDE handout: Crediting Tofu and Tofu Products in the School Nutrition Programs • USDA Memo SP 02-2024, CACFP 02-2024, and SFSP 02-2024: Revised: Crediting Tofu and Soy Yogurt Products in the School Meal Programs, CACFP, and SFSP

Crediting Summary Charts for the Meal Patterns for Grades K-12 in the School Nutrition Programs

MMA component food item	1 oz eq of MMA =	Additional crediting requirements and resources
<p>Yogurt and soy yogurt, plain or flavored; sweetened or unsweetened; and with or without added fruit, either blended or on the bottom or top</p>	<ul style="list-style-type: none"> ● ½ cup or 4 ounces weight 	<ul style="list-style-type: none"> ● Yogurt mixed in smoothies credits as the MMA component. Crediting requires a standardized recipe for foods made from scratch, and a PFS or CN label for commercial products. Refer to the CSDE’s Crediting Smoothies in the Meal Patterns for Grades K-12 in the School Nutrition Programs. ● Fruits in commercially prepared yogurt (either blended or on the bottom or top) do not credit toward the fruits component. Menu planners may credit fruits offered as a separate component, such as yogurt topped with fresh blueberries or sliced strawberries in a yogurt-fruit parfait (refer to chart 5). ● Homemade yogurt does not credit. ● Commercial yogurt products do not credit. Examples include drinkable or squeezable yogurt, frozen yogurt, yogurt bars, yogurt-covered fruits and nuts, and yogurt-flavored products. ● Upcoming change for program year 2025-26: Effective July 1, 2025, the USDA final rule, Child Nutrition Programs: Meal Patterns Consistent with the 2020-2025 Dietary Guidelines for Americans, establishes a sugar limit for yogurt of no more than 12 grams of added sugars per 6 ounces (2 grams of added sugars per ounce). ● CSDE handout: Crediting Yogurt in the Meal Patterns for Grades K-12 in the School Nutrition Programs ● USDA Memo SP 02-2024, CACFP 02-2024, and SFSP 02-2024: Revised: Crediting Tofu and Soy Yogurt Products in the School Meal Programs, CACFP, and SFSP

Vegetables Component

The vegetables component includes fresh, frozen, and canned vegetables; rehydrated dried vegetables; and pasteurized 100 percent full-strength vegetable juices. Lunch menus must include specific weekly quantities of the five vegetable subgroups: dark green; red/orange; beans, peas, and lentils; starchy; and “other (refer to the CSDE’s [Vegetable Subgroups in the National School Lunch Program](#)).

For information on the meal pattern requirements for the vegetables component, refer to the CSDE’s [Menu Planning Guide for Grades K-12 in the National School Lunch Program and School Breakfast Program](#) and visit the “[Vegetables Component for Grades K-12](#)” section of the CSDE’s Crediting Foods in School Nutrition Programs webpage Training on the vegetables component is available in module 10 of the CSDE’s training program, [What’s in a Meal: National School Lunch Program and School Breakfast Program Meal Patterns for Grades K-12](#).

Juice limit: At breakfast, fruit juice together with vegetable juice cannot exceed half of the weekly offerings of fruits, including vegetable substitutions. At lunch, vegetable juice cannot exceed half of the weekly vegetable offerings.

Noncreditable foods: Examples of foods that do not credit as the vegetables component include chili sauce; dehydrated vegetables used for seasoning; cream vegetable soups, e.g., cream of broccoli and cream of mushroom; home-canned products (for food safety reasons); ketchup; pickle relish; and snack-type foods made from vegetables, such as potato chips. For additional guidance, refer to the CSDE’s [Noncreditable Foods in the National School Lunch Program and School Breakfast Program Meal Patterns for Grades K-12](#).

Changes for school year 2024-25: Effective July 1, 2024, the USDA final rule, [Child Nutrition Programs: Meal Patterns Consistent with the 2020-2025 Dietary Guidelines for Americans](#), implements the changes below to the NSLP and SBP meal patterns for grades K-12.

- Continues to allow vegetables to substitute for fruits in the SBP and simplifies the vegetable variety requirement. Vegetable substitutions may be from any of the five vegetable subgroups. SFAs that choose to offer vegetable substitutions on one day per school week have the option to offer any vegetable, including a starchy vegetable. SFAs that choose to offer vegetable substitutions on two or more days per school week must offer vegetables from at least two different subgroups.
- Changes the name of the previous “legumes (beans and peas)” vegetable subgroup to the “beans, peas, and lentils” vegetable subgroup.
- Allows beans, peas, and lentils offered as a meat alternate at lunch to also count toward the weekly beans, peas, and lentils vegetable subgroup requirement. As with the current requirement, menu planners determine whether beans, peas, and lentils count toward the vegetables component or the MMA component.

Crediting Summary Charts for the Meal Patterns for Grades K-12 in the School Nutrition Programs

Chart 4 – Crediting Foods in the Vegetables Component

Vegetables component food item	Credit based on	Additional crediting requirements and resources
<p>Beans, peas, and lentils, e.g., kidney beans, black beans, and chickpeas</p>	<ul style="list-style-type: none"> ● Served volume: Includes cooked beans, peas, and lentils and roasted beans, peas, and lentils (e.g., roasted chickpeas and soy nuts) 	<ul style="list-style-type: none"> ● Effective July 1, 2024, the USDA final rule, Child Nutrition Programs: Meal Patterns Consistent with the 2020-2025 Dietary Guidelines for Americans, changes the name of the previous “legumes (beans and peas)” vegetable subgroup to the “beans, peas, and lentils” vegetable subgroup. ● Refer to the FBG for yields. ● The liquid served with beans, peas, and lentils does not credit, such as the sauce in baked beans. ● Beans, peas, and lentils may credit as either the vegetables component or MMA component but one serving cannot credit as both components in the same meal. Refer to chart 3 for information on crediting beans, peas, and lentils as MMA. ● CSDE handout: Crediting Beans, Peas, and Lentils in the School Nutrition Programs
<p>Canned vegetables, e.g., corn, peas, and kidney beans</p>	<ul style="list-style-type: none"> ● Served volume and vegetable subgroup, e.g., ½ cup = ½ cup of the vegetables component 	<ul style="list-style-type: none"> ● Must be drained. The packing liquid does not credit, e.g., water in canned corn or sauce in baked beans. ● Refer to the FBG for yields.
<p>Commercial products containing vegetables, e.g., hummus, vegetable pizza, vegetable egg rolls, breaded onion rings, and soups</p>	<ul style="list-style-type: none"> ● Varies by commercial product: Must have a CN label or PFS to document the amount of vegetables per serving (refer to “Crediting Documentation” on page 1). Note: CN labels are available only for main dish commercial products that contribute to the MMA component, but they typically also indicate the contribution of other meal components (such as vegetables, fruits, and grains) that are part of these products. 	<ul style="list-style-type: none"> ● CSDE handout: Using Child Nutrition (CN) Labels in the School Nutrition Programs ● CSDE handout: Using Product Formulation Statements in the School Nutrition Programs ● CSDE webpage: Crediting Commercial Processed Products for Grades K-12 in School Nutrition Programs ● USDA handout: Tips for Evaluating a Manufacturer’s Product Formulation Statement

Crediting Summary Charts for the Meal Patterns for Grades K-12 in the School Nutrition Programs

Vegetables component food item	Credit based on	Additional crediting requirements and resources
<p>Commercial vegetable soups, e.g., vegetable soups (such as minestrone and tomato) and soups made with beans, peas, and lentils (such as split pea, lentil, and black bean)</p>	<ul style="list-style-type: none"> ● Yields in FBG: <ul style="list-style-type: none"> ○ Vegetable soup: 1 cup = ¼ cup of “additional” vegetables ○ Bean, pea, and lentil soup: 1 cup = ½ cup of the vegetables component (beans, peas and lentils subgroup) 	<ul style="list-style-type: none"> ● Only certain types of vegetable soups credit (refer to the FBG). ● Cream vegetable soups (such as cream of broccoli and cream of mushroom) do not credit. ● Must have a PFS to credit a commercial soup differently. Refer to “Commercial products containing vegetables” in this section. ● CSDE handout: Crediting Soups in the School Nutrition Programs
<p>Dried vegetables, e.g., potato flakes and dried soup mix</p>	<ul style="list-style-type: none"> ● Varies by commercial product: Must have a PFS to document the rehydrated volume of vegetables per serving (refer to “Crediting Documentation” on page 1). 	<ul style="list-style-type: none"> ● Credits based on the rehydrated volume (cups) of each vegetable subgroup. ● Dehydrated vegetables used for seasoning (such as dried parsley and onion flakes) do not credit.
<p>Fresh vegetables, e.g., broccoli, carrots, and spinach</p>	<ul style="list-style-type: none"> ● Served volume (except raw leafy greens such as lettuce, kale, and spinach) and vegetable subgroup. ● Raw leafy greens: Credit as half the volume served, e.g., ½ cup = ¼ cup of the vegetables component (refer to “Leafy greens” in this section). 	<ul style="list-style-type: none"> ● Refer to the FBG for yields.
<p>Frozen vegetables, e.g., corn, peas, and green beans</p>	<ul style="list-style-type: none"> ● Served volume and vegetable subgroup. 	<ul style="list-style-type: none"> ● Refer to the FBG for yields.
<p>Hominy, drained canned or cooked whole hominy from dried hominy</p>	<ul style="list-style-type: none"> ● Served volume, e.g., ½ cup = ½ cup of the vegetables component (starchy subgroup) 	<ul style="list-style-type: none"> ● Hominy grits credit as the grains component (refer to chart 6). ● USDA Memo SP 22-2019, CACFP 15-2019, and SFSP 15-2019: Crediting Coconut, Hominy, Corn Masa, and Corn Flour in the Child Nutrition Programs

Crediting Summary Charts for the Meal Patterns for Grades K-12 in the School Nutrition Programs

Vegetables component food item	Credit based on	Additional crediting requirements and resources
<p>Hummus or bean dip made with beans, peas, and lentils and tahini (or other nut/seed butters)</p>	<ul style="list-style-type: none"> • Varies by commercial product and standardized recipe. The serving must contain at least 1/8 cup of beans/peas/lentils to credit toward the vegetables component. • Commercial products require a CN label or PFS to document the amount of beans, peas, and lentils per serving (refer to “Crediting Documentation” on page 1). • Hummus and bean dips made from scratch must have a standardized recipe to document the amount of beans, peas, and lentils per serving (refer to “Crediting Documentation” on page 1). 	<ul style="list-style-type: none"> • Bean dip is a spread made from ground pulses (beans, peas, and/or lentils) with one or more of the following optional ingredients: ground nut/seed butter (such as tahini [ground sesame] or peanut butter; vegetable oil (such as olive oil, canola oil, soybean oil); seasoning (such as salt, citric acid); vegetables and juice for flavor (such as olives, roasted peppers, garlic, lemon juice); and for manufactured bean dip, ingredients necessary as preservatives and/or to maintain freshness. • Hummus and bean dips credits as the vegetables component (beans, peas, and lentils subgroup) based on the amount of beans, peas, and lentils per serving. For example, hummus that contains 1/4 cup of chickpeas per serving credits as 1/4 cup of the beans, peas, and lentils subgroup. The minimum creditable amount is 1/8 cup. • The beans/peas/lentils in hummus and bean dips may credit as either the MMA component or vegetables component but one serving cannot credit as both components in the same meal. Refer to chart 3 for information on crediting hummus and bean dips as the MMA component. • CSDE handout: Crediting Beans, Peas, and Lentils in the School Nutrition Programs
<p>Leafy greens, e.g., kale, greens (e.g., beet, collard, mustard, and turnip), spinach, arugula, and lettuce such as iceberg, romaine, Boston, Bibb, red leaf, and spring mix</p>	<ul style="list-style-type: none"> • Raw leafy greens: half the volume served, e.g., 1/2 cup = 1/4 cup of the vegetables component • Cooked, roasted, or dried leafy greens (such as cooked spinach and roasted kale): served volume, e.g., 1/2 cup = 1/2 cup of the vegetables component 	

Crediting Summary Charts for the Meal Patterns for Grades K-12 in the School Nutrition Programs

Vegetables component food item	Credit based on	Additional crediting requirements and resources
<p>Mixed vegetables, e.g., three-bean salad and peas and carrots</p>	<ul style="list-style-type: none"> ● Served volume and vegetable subgroup. <ul style="list-style-type: none"> ○ Same subgroup: Combinations from the same subgroup credit toward that vegetable subgroup. For example, a mixture of carrots and sweet potatoes credits as red/orange vegetables because both are from the red/orange subgroup. ○ Different subgroups: Combinations that contain at least ½ cup each of different subgroups credit toward the appropriate subgroups. For example, a mixture of ¼ cup of carrots (red/orange) and ¼ cup of corn and peas (starchy) credits as ¼ cup of red/orange vegetables and ¼ cup of starchy vegetables. ○ Unknown quantities: If quantities of the different vegetables are unknown, the mixture credits as “additional” vegetables. 	<ul style="list-style-type: none"> ● Refer to the FBG for yields. ● To credit as different subgroups, commercial products require a PFS that documents the amount of each type of vegetable in the mixture (refer to “Commercial products containing vegetables” in this section).
<p>Mixtures of vegetables and fruits, e.g., carrot-raisin salad</p>	<ul style="list-style-type: none"> ● May credit toward both the vegetables component and fruits component if the serving contains at least ½ cup of recognizable vegetables and at least ¼ cup of recognizable fruits. 	<ul style="list-style-type: none"> ● Refer to the FBG for yields. ● To credit as both the vegetables component and fruits component, commercial products require a PFS to document the amount of each type of vegetable and fruit in the mixture (refer to “Commercial products containing vegetables” in this section).

Crediting Summary Charts for the Meal Patterns for Grades K-12 in the School Nutrition Programs

Vegetables component food item	Credit based on	Additional crediting requirements and resources
<p>Pasta products made of 100 percent vegetable flours, e.g., chickpea flour pasta, lentil flour pasta</p>	<ul style="list-style-type: none"> ● Served volume and vegetable subgroup: ½ cup of pasta made of 100 percent vegetable flour credits as ½ cup of the vegetables component. 	<ul style="list-style-type: none"> ● Pasta products made of 100 percent vegetable flour may credit as either the vegetables component or MMA component but one serving cannot credit as both components in the same meal. Refer to chart 3 for information on crediting 100 percent bean, pea, and lentil flour pasta products as MMA. ● Pasta products made of vegetable flour with other non-vegetable ingredients require a PFS detailing the volume of vegetable flour per serving (refer to “Commercial products containing vegetables” in this section).
<p>Pureed vegetables, e.g., sweet potatoes, tomato sauce, and butternut squash</p>	<ul style="list-style-type: none"> ● Served volume and vegetable subgroup. 	<ul style="list-style-type: none"> ● Must be recognizable (visible), e.g., tomato sauce, split pea soup, mashed potatoes, mashed sweet potatoes, and pureed butternut squash. ● Pureed vegetables do not credit as the vegetables component when they are not recognizable unless the food also provides at least ⅛ cup of a visible creditable vegetable. For example, a serving of macaroni and cheese that contains ⅛ cup of diced butternut squash (visible) and ⅛ cup of pureed carrots (not visible) credits as ¼ cup of the red/orange vegetables subgroup. ● Pureed vegetables in smoothies credit only as juice (refer to “Vegetable juice, pasteurized full-strength” in this section). ● CSDE handout: Crediting Smoothies in the Meal Patterns for Grades K-12 in the School Nutrition Programs

Crediting Summary Charts for the Meal Patterns for Grades K-12 in the School Nutrition Programs

Vegetables component food item	Credit based on	Additional crediting requirements and resources
<p>Vegetable juice, pasteurized full-strength, e.g., tomato juice and mixed vegetable juice</p>	<ul style="list-style-type: none"> ● Served volume and vegetable subgroup. <ul style="list-style-type: none"> ○ Same subgroup: Blends from the same subgroup credit toward that vegetable subgroup. For example, a full-strength carrot/tomato vegetable juice blend credits toward the red/orange subgroup because both vegetables are from the red/orange vegetable subgroup. ○ Different subgroups: Blends containing vegetables from more than one subgroup contribute to the “other” vegetable subgroup. For example, a full-strength vegetable juice blend containing carrots (red/orange), spinach (dark green), tomato (red/orange), and watercress (dark green) credits toward the “other” subgroup. 	<ul style="list-style-type: none"> ● Juice limit: At breakfast, fruit juice together with vegetable juice cannot exceed half of the weekly offerings of fruits, including vegetable substitutions. At lunch, vegetable juice cannot exceed half of the weekly vegetable offerings. The juice limit includes all sources of juice, e.g., 100 percent juice, frozen pops made from 100 percent juice, pureed fruits and vegetables in smoothies, and juice from canned fruit in 100 percent juice. ● CSDE handout: Crediting Juice in the Meal Patterns for Grades K-12 in the School Nutrition Programs

Fruits Component

The fruits component includes fresh, frozen, and dried fruits; canned fruits in juice, water, or light syrup; and pasteurized 100 percent full-strength fruit juices. For information on the meal pattern requirements for the fruits component, refer to the CSDE's [Menu Planning Guide for Grades K-12 in the National School Lunch Program and School Breakfast Program](#) and visit the "Fruits Component for Grades K-12" section of the CSDE's Crediting Foods in School Nutrition Programs webpage. Training on the fruits component is available in module 9 of the CSDE's training program, [What's in a Meal: National School Lunch Program and School Breakfast Program Meal Patterns for Grades K-12](#).

Juice limit: At breakfast, fruit juice together with vegetable juice cannot exceed half of the weekly offerings of fruits, including vegetable substitutions. At lunch, fruit juice cannot exceed half of the weekly fruit offerings.

Noncreditable foods: Examples of foods that do not credit as the fruits component include banana chips; dried coconut; fruit snacks (e.g., fruit roll-ups, fruit leathers, fruit wrinkles, fruit twists, yogurt-covered fruit snacks); home-canned products (for food safety reasons); jams, jellies, and preserves; and juice drinks that are not 100 percent juice such as grape juice drink, orange juice drink, pineapple-grapefruit drink, cranberry juice cocktail, and lemonade. For additional guidance, refer to the CSDE's [Noncreditable Foods in the National School Lunch Program and School Breakfast Program Meal Patterns for Grades K-12](#).

Chart 5 – Crediting Foods in the Fruits Component

Fruits component food item	Credit based on	Additional crediting requirements and resources
<p>Canned fruits in juice, water, or syrup, e.g., canned peaches and pineapple tidbits</p>	<ul style="list-style-type: none"> ● Served volume, e.g., ½ cup = ½ cup of the fruits component 	<ul style="list-style-type: none"> ● The serving may include the 100 percent juice in which the fruit is packed but cannot include water or syrup. If the menu planner credits the juice from canned fruit toward the fruits component, it also counts toward the weekly juice limit (refer to “Juice limit” under “Fruit juice, pasteurized full-strength” in this section). Drained canned fruit and canned fruit in water or light syrup do not count toward the juice limit. ● Refer to the FBG for yields. ● CSDE handout: Crediting Juice in the Meal Patterns for Grades K-12 in the School Nutrition Programs
<p>Coconut</p>	<ul style="list-style-type: none"> ● Fresh and frozen coconut: Served volume, e.g., ½ cup = ½ cup of the fruits component ● Dried coconut: Twice the volume served, e.g., ¼ cup = ½ cup of the fruits component ● Coconut water labeled as 100 percent juice (credits as juice): Served volume, e.g., ½ cup = ½ cup of the fruits component 	<ul style="list-style-type: none"> ● Coconut flour, coconut oil, and coconut milk do not credit. ● SFAs must count coconut water with all other juices toward the weekly juice limit (refer to “Juice limit” under “Fruit juice, pasteurized full-strength” in this section).
<p>Commercial products containing fruits, e.g., fruit turnover, trail mix with dried fruit, and fruit smoothies</p>	<ul style="list-style-type: none"> ● Varies by commercial product: Must have a CN label or PFS to document the amount of vegetables per serving (refer to “Crediting Documentation” on page 1). Note: CN labels are available only for main dish commercial products that contribute to the MMA component, but they typically also indicate the contribution of other meal components (such as vegetables, fruits, and grains) that are part of these products. 	<ul style="list-style-type: none"> ● CSDE handout: Using Child Nutrition (CN) Labels in the School Nutrition Programs ● CSDE handout: Using Product Formulation Statements in the School Nutrition Programs ● CSDE webpage: Crediting Commercial Processed Products for Grades K-12 in School Nutrition Programs ● USDA handout: Tips for Evaluating a Manufacturer’s Product Formulation Statement

Crediting Summary Charts for the Meal Patterns for Grades K-12 in the School Nutrition Programs

Fruits component food item	Credit based on	Additional crediting requirements and resources
Dried fruits , e.g., raisins, apricots, and cherries	<ul style="list-style-type: none"> ● Twice the volume served, e.g., $\frac{1}{4}$ cup = $\frac{1}{2}$ cup of the fruits component 	<ul style="list-style-type: none"> ● Dried banana chips, and fruit snacks (e.g., fruit roll-ups and yogurt-covered fruit snacks) do not credit.
Fresh fruits , e.g., apples, bananas, and pears	<ul style="list-style-type: none"> ● Served volume 	<ul style="list-style-type: none"> ● Refer to the FBG for yields. ● Depending on the size, one piece of fresh fruit might not provide the full serving of the fruits component. For example, one clementine credits as $\frac{3}{8}$ cup of the fruits component. Check the FBG to ensure proper crediting.
Frozen fruits , e.g., frozen berries and melon	<ul style="list-style-type: none"> ● Served volume 	<ul style="list-style-type: none"> ● Refer to the FBG for yields.
Fruit juice, pasteurized full-strength , e.g., apple juice, orange juice, and grape juice	<ul style="list-style-type: none"> ● Served volume 	<ul style="list-style-type: none"> ● Juice limit: At breakfast, fruit juice together with vegetable juice cannot exceed half of the weekly offerings of fruits, including vegetable substitutions. At lunch, fruit juice cannot exceed half of the weekly fruit offerings. The juice limit includes all sources of juice, e.g., 100 percent juice, frozen pops made from 100 percent juice, pureed fruits and vegetables in smoothies, and juice from canned fruit in 100 percent juice. ● Juice blends: Fruit and vegetable juice blends credit based on the first ingredient. If the first ingredient is a fruit juice or fruit puree, it credits as the fruits component. If the first ingredient is a vegetable juice or vegetable puree, it credits as the vegetables component. ● CSDE handout: Crediting Juice in the Meal Patterns for Grades K-12 in the School Nutrition Programs

Crediting Summary Charts for the Meal Patterns for Grades K-12 in the School Nutrition Programs

Fruits component food item	Credit based on	Additional crediting requirements and resources
Pureed fruits , e.g., applesauce	<ul style="list-style-type: none"> ● Served volume 	<ul style="list-style-type: none"> ● Must be recognizable (visible), e.g., applesauce. ● Pureed fruits do not credit as the fruits component when they are not recognizable, e.g., using applesauce or prune puree to replace the oil in muffins. ● Pureed vegetables and fruits in smoothies credit only as juice (refer to “Smoothies made of fruits/vegetables/juice” in this chart).
Smoothies made of fruits/vegetables/juice	<ul style="list-style-type: none"> ● Pureed fruits and vegetables in smoothies credit only as juice and must meet the same requirements as juice (refer to “Fruit juice, pasteurized full-strength” in this chart). ● Crediting is based on the volume (cups) of pureed fruits and vegetables per serving. 	<ul style="list-style-type: none"> ● Commercial smoothies require a PFS to credit. Commercial smoothies cannot contain dietary or herbal supplements. Refer to “Commercial products containing fruits” in this section. ● CSDE handout: Crediting Smoothies in the Meal Patterns for Grades K-12 in the School Nutrition Programs

How to Credit the Grains Component

The grains component includes breads and bread products (e.g., biscuits, bagels, rolls, tortillas, and muffins), snack products (e.g., crackers, animal crackers, graham crackers, hard pretzels, tortilla chips, and popcorn); cereal grains (e.g., buckwheat, brown rice, bulgur, and quinoa); ready-to-eat (RTE) breakfast cereals; cooked breakfast cereals (e.g., oatmeal); bread products used as an ingredient in another menu item such as combination foods (e.g., breading on fish or poultry and pizza crust in pizza); pasta; and grain-based desserts (e.g., cookies, graham crackers, plain brownies, cakes, and granola bars). At lunch, grain-based desserts cannot exceed 2 oz eq per week.

For information on the meal pattern requirements for the grains component, refer to the CSDE's [Comparison of the Grains Component Requirements in the Meal Patterns for School Nutrition Programs](#) and [Menu Planning Guide for Grades K-12 in the National School Lunch Program and School Breakfast Program](#) and visit the "Grains Component for Grades K-12" section of the CSDE's Crediting Foods in School Nutrition Programs webpage. Training on the grains component is available in modules 11-13 of the CSDE's training program, [What's in a Meal: National School Lunch Program and School Breakfast Program Meal Patterns for Grades K-12](#).

Commercial grain products and standardized recipes must meet the crediting, whole grain-rich (WGR), and oz eq requirements indicated below.

- **Crediting requirements:** Grain products and recipes must be made with creditable grains. Creditable grains include whole grains, enriched grains, bran (such as oat bran, wheat bran, corn bran, rice bran, and rye bran), and germ (such as wheat germ). Bran and germ credit the same as enriched grains. For guidance on creditable grains, refer to the CSDE's resources, [Crediting](#)

[Whole Grains in the School Nutrition Programs](#), [Crediting Enriched Grains in the School Nutrition Programs](#), and [Crediting Breakfast Cereals in the Meal Patterns for Grades K-12 in the School Nutrition Programs](#).

- **Weekly WGR requirement:** At least 80 percent of the grains offered at lunch and breakfast must be WGR. Grains that are not WGR must be enriched and cannot exceed 20 percent of the grains offered each week. For guidance on the WGR criteria and how to identify WGR foods, refer to the CSDE's [Guide to Meeting the Whole Grain-rich Requirement for the National School Lunch Program and School Breakfast Program Meal Patterns for Grades K-12](#). For information on meeting the weekly WGR requirement, refer to the CSDE's [Calculating the Weekly Percentage of Whole Grain-rich Menu Items in the National School Lunch Program and School Breakfast Program](#).
- **Oz eq:** The oz eq contribution of creditable commercial grain products and standardized recipes must be determined using one of the two allowable methods: 1) the required weight (groups A-E) or volume (groups H-I) in the USDA's [Exhibit A: Grain Requirements for Child Nutrition Programs](#) (refer to the CSDE's resources, [Grain Ounce Equivalents for the National School Lunch Program and School Breakfast Program Meal Patterns for Grades K-12](#) and [How to Use the Ounce Equivalents Chart for the National School Lunch Program and School Breakfast Program](#)); or 2) the creditable grains per serving (refer to the CSDE's [Calculation Methods for Crediting Grains for Grades K-12 in the National School Lunch Program and School Breakfast Program](#) and [When Commercial Grain Products Require a Product Formulation Statement to Credit in the School Nutrition Programs](#)).

Crediting Summary Charts for the Meal Patterns for Grades K-12 in the School Nutrition Programs

Limit for noncreditable grains: WGR and enriched grain products and standardized recipes cannot exceed $\frac{1}{4}$ oz eq of noncreditable grains per portion, i.e., ≤ 3.99 grams per portion for groups A-G or ≤ 6.99 grams per portion for group H-I. Examples of noncreditable grains include oat fiber, corn fiber, wheat starch, corn starch, and modified food starch (including potato, legume, and other vegetable flours). For additional guidance and more examples of noncreditable grains, refer to section 3 of the CSDE's [Guide to Meeting the Whole Grain-rich Requirement for the National School Lunch Program and School Breakfast Program Meal Patterns for Grades K-12](#).

Noncreditable foods: Examples of foods that do not credit as the grains component include commercial grain products that are not WGR or enriched; commercial products and standardized recipes that exceed the limit for noncreditable grains; and standardized recipes that are not WGR or enriched. For additional guidance, refer to the CSDE's [Noncreditable Foods in the National School Lunch Program and School Breakfast Program Meal Patterns for Grades K-12](#).

Changes for school year 2024-25: Effective July 1, 2024, the USDA final rule, [Child Nutrition Programs: Meal Patterns Consistent with the 2020-2025 Dietary Guidelines for Americans](#), implements the changes below to the NSLP and SBP meal patterns for grades K-12.

- Maintains the current requirement that at least 80 percent of the weekly grains offered in the school lunch and breakfast programs must be whole grain-rich, based on ounce equivalents.
- Adds the following definition for “whole grain-rich” in NSLP and SBP regulations: Whole grain-rich is the term designated by FNS to indicate that the grain content of a product is between 50 and

100 percent whole grain with any remaining grains being enriched. This definition does not change the meaning of WGR. SFAs can continue to identify WGR as described in current guidance.

Upcoming change for program year 2025-26: Effective July 1, 2025, the USDA final rule, [Child Nutrition Programs: Meal Patterns Consistent with the 2020-2025 Dietary Guidelines for Americans](#), establishes a sugar limit for breakfast cereals of no more than 6 grams of added sugars per dry ounce.

Crediting Summary Charts for the Meal Patterns for Grades K-12 in the School Nutrition Programs

Chart 6 –Grains Component

Grains food item	Crediting requirements	WGR requirements	1 oz eq of grains =
<p>Breakfast cereals: cold RTE in group I, e.g., flaked cereals, round cereals, puffed cereals, and granola</p>	<ul style="list-style-type: none"> ● Must be WGR, enriched, or fortified. For more information, visit the CSDE's [Crediting Foods in School Nutrition Programs](#) webpage or contact the [school nutrition programs staff](#) at the Connecticut State Department of Education, Bureau of Child Nutrition Programs, 450 Columbus Boulevard, Suite 504, Hartford, CT 06103-1841. This document is available at https://portal.ct.gov/-/media/sde/nutrition/nslp/crediting/crediting_summary_charts_snp_grades_k-12.pdf.

In accordance with federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, this institution is prohibited from discriminating on the basis of race, color, national origin, sex (including gender identity and sexual orientation), disability, age, or reprisal or retaliation for prior civil rights activity.

Program information may be made available in languages other than English. Persons with disabilities who require alternative means of communication to obtain program information (e.g., Braille, large print, audiotape, American Sign Language), should contact the responsible state or local agency that administers the program or USDA's TARGET Center at (202) 720-2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877-8339.

To file a program discrimination complaint, a Complainant should complete a Form AD-3027, USDA Program Discrimination Complaint Form which can be obtained online at: <https://www.usda.gov/sites/default/files/documents/ad-3027.pdf>, from any USDA office, by calling (866) 632-9992, or by writing a letter addressed to USDA. The letter must contain the complainant's name, address, telephone number, and a written description of the alleged discriminatory action in sufficient detail to inform the Assistant Secretary for Civil Rights (ASCR) about the nature and date of an alleged civil rights violation. The completed AD-3027 form or letter must be submitted to USDA by:

1. mail: U.S. Department of Agriculture
Office of the Assistant Secretary for Civil Rights
1400 Independence Avenue, SW
Washington, D.C. 20250-9410; or
2. fax: (833) 256-1665 or (202) 690-7442; or
3. email: program.intake@usda.gov

This institution is an equal opportunity provider.

The Connecticut State Department of Education is committed to a policy of equal opportunity/affirmative action for all qualified persons. The Connecticut Department of Education does not discriminate in any employment practice, education program, or educational activity on the basis of race; color; religious creed; age; sex; pregnancy; sexual orientation; workplace hazards to reproductive systems, gender identity or expression; marital status; national origin; ancestry; retaliation for previously opposed discrimination or coercion, intellectual disability; genetic information; learning disability; physical disability (including, but not limited to, blindness); mental disability (past/present history thereof); military or veteran status; status as a victim of domestic violence; or criminal record in state employment, unless there is a bona fide occupational qualification excluding persons in any of the aforementioned protected classes. Inquiries regarding the Connecticut State Department of Education's nondiscrimination policies should be directed to: Attorney Louis Todisco, Connecticut State Department of Education, by mail 450 Columbus Boulevard, Hartford, CT 06103-1841; or by telephone 860-713-6594; or by email louis.todisco@ct.gov.
