

Crediting Summary Charts for the Preschool Meal Patterns of the School Nutrition Programs

School Year 2024-25 (July 1, 2024, through June 30, 2025)

This guidance applies to the U.S. Department of Agriculture’s (USDA) preschool meal patterns (ages 1-5) for the National School Lunch Program (NSLP), School Breakfast Program (SBP), Seamless Summer Option (SSO) of the NSLP, and Afterschool Snack Program (ASP) of the NSLP. The SSO follows the NSLP and SBP preschool meal patterns. The requirements for the preschool meal patterns are the same as the Child and Adult Care Food Program (CACFP) meal patterns for children. For information on the preschool meal patterns, visit the Connecticut State Department of Education’s (CSDE) [Meal Patterns for Preschoolers in School Nutrition Programs](#) webpage.

Crediting Summary Charts for the Preschool Meal Patterns of the School Nutrition Programs

Meeting the Meal Component Requirements

School food authorities (SFAs) must be able to document the preschool meal pattern contribution of foods and beverages served in the U.S. Department of Agriculture's (USDA) [National School Lunch Program \(NSLP\)](#), [School Breakfast Program \(SBP\)](#), and [Seamless Summer Option \(SSO\)](#) of the NSLP. The SSO follows the NSLP and SBP meal patterns.

This document summarizes the crediting requirements and methods for the five meal components of the NSLP and SBP preschool meal patterns, including the updates required by the USDA final rule, [Child Nutrition Programs: Meal Patterns Consistent with the 2020-2025 Dietary Guidelines for Americans](#) (89 FR 31962).

Effective with school year 2024-25 (beginning July 1, 2024), July 1, 2024, the USDA final rule, [Child Nutrition Programs: Meal Patterns Consistent with the 2020-2025 Dietary Guidelines for Americans](#), changes the previous terminology for "food component" to "meal component." A meal component is one of the food groups that comprise reimbursable meals and snacks in the USDA Child Nutrition Programs.

Chart 1 provides an overview of the crediting requirements for the five meal components (milk, meats/meat alternates, vegetables, fruits, and grains). Charts 2 through 6 summarize the specific crediting considerations for each meal component.

For detailed guidance on the preschool meal patterns and the crediting requirements for the meal components, refer to the CSDE's [Menu Planning Guide for the Preschool Meal Patterns of the School Nutrition Programs](#)

and visit the "[Crediting Foods in Preschool Menus](#)" section of the CSDE's [Meal Patterns for Preschoolers in School Nutrition Programs](#) webpage.

Required Crediting Documentation

SFAs must use appropriate crediting methods and maintain the applicable documentation for commercial products and foods made from scratch. Menu planners should follow the guidance below to ensure that school menus comply with the crediting requirements of the [preschool meal patterns](#).

- **Use the Food Buying Guide for Child Nutrition Programs (FBG):** The USDA's [FBG](#) determines food yields and crediting information, and indicates the specific contribution of foods toward the meal pattern requirements. The FBG indicates how many servings a specific quantity of food will provide, what quantity of raw product will provide the amount of ready-to-cook food in a recipe, and how much food to buy to provide a specific meal pattern contribution.
- **Obtain a Child Nutrition (CN) label or product formulation statement (PFS) for all commercial processed products:** SFAs must have a CN label or PFS to document the meal pattern contribution of all commercial processed foods with added ingredients, such as combination foods (e.g., pizza and chicken nuggets), deli meats, hot dogs, and breaded vegetables. Commercial processed foods without this documentation do not credit. For more information, refer to the Connecticut State Department of Education's (CSDE) resources, [Using Child Nutrition \(CN\) Labels in the School Nutrition Programs](#), [Using Product Formulation Statements in the School Nutrition Programs](#), and [Accepting Processed Product Documentation in the School Nutrition Programs](#), and the USDA's [Tips for Evaluating a](#)

Crediting Summary Charts for the Preschool Meal Patterns of the School Nutrition Programs

Manufacturer's Product Formulation Statement. Additional resources are available in the “[Crediting Commercial Processed Products](#)” section of the CSDE’s [Meal Patterns for Preschoolers in School Nutrition Programs Programs](#) webpage.

Training on the requirements for CN labels and PFS forms is available in Module 6: Meal Pattern Documentation of the CSDE’s training program, *What’s in a Meal: National School Lunch Program and School Breakfast Program Meal Patterns for Grades K-12.*

- **Maintain standardized recipes for foods made from scratch:** SFAs must have standardized recipes that document the crediting information for all foods made from scratch. Determine the recipe’s meal pattern contribution per serving by: 1) using the FBG to determine the weight or volume of each creditable ingredient in the recipe; and 2) dividing the weight or volume of each creditable ingredient by the number of servings. The FBG’s [Recipe Analysis Workbook](#) (RAW) allows menu planners to search for creditable ingredients and calculate the recipe’s meal pattern contribution. For more information, visit the “[Crediting Foods Made from Scratch](#)” section of the CSDE’s [Meal Patterns for Preschoolers in School Nutrition Programs Programs](#) webpage.

Remember to round down all crediting amounts for commercial products and standardized recipes to the nearest minimum creditable amount (refer to [chart 1](#)).

Training on the preschool meal patterns and crediting requirements is available in the CSDE’s [Preschool Meal Pattern Training for the School Nutrition Programs](#).

Meal Pattern Changes for School Year 2025-26

Effective July 1, 2025, the USDA final rule, *Child Nutrition Programs: Meal Patterns Consistent with the 2020-2025 Dietary Guidelines for Americans*, changes the preschool meal pattern’s product-based limits for yogurt and breakfast cereals from total sugars to added sugars.

- Yogurt cannot exceed 12 grams of added sugars per 6 ounces (2 grams of added sugars per ounce).
- Breakfast cereals cannot exceed 6 grams of added sugars per dry ounce.

For more information on the final rule, visit the “[Upcoming Meal Pattern Changes](#)” section of the CSDE’s [Meal Patterns for Grades K-12 in School Nutrition Programs](#) webpage.

Crediting Summary Charts for the Preschool Meal Patterns of the School Nutrition Programs

Chart 1 – Overview of Crediting Requirements for the Meal Components

Criteria	Milk	Meats/Meat Alternates (MMA)	Vegetables	Fruits	Grains
Meal pattern measure	Volume: cups	Ounce equivalents (oz eq): Weight (ounces [oz]) for most foods; volume (cups) for some foods (e.g., beans, peas, and lentils and peanut butter); and either weight or volume for some foods (e.g., yogurt and tofu)	Volume: cups	Volume: cups	Oz eq: <ul style="list-style-type: none"> weight (groups A-E) volume (groups H-I)
Minimum creditable amount	Full serving: 1 cup	¼ oz eq	⅛ cup	⅛ cup	¼ oz eq
Crediting methods: Round down all crediting amounts for products and standardized recipes to the nearest minimum creditable amount	Credit based on allowable types of milk for each age group (refer to chart 2).	<p>MMA without added ingredients: Credit based on cooked weight, e.g., 1 ounce of cooked lean meat credits as 1 oz eq of MMA. Use the FBG to determine the cooked yields or edible portions.</p> <p>Processed MMA with added ingredients: Credit based on the CN label, PFS, or FBG.</p> <p>Note: The manufacturer’s serving weight is not the same as the MMA contribution because processed foods contain non-MMA ingredients in addition to their MMA component.</p>	<p>Credit based on volume (cups) using the yields in the FBG.</p> <p>Credit raw leafy greens as half the volume served.</p>	<p>Credit based on volume (cups) using the yields in the FBG.</p> <p>Credit dried fruit credits as twice the volume served.</p>	<p>Method 1: Use the weight (groups A-G) or volume (groups H-I) in the USDA’s Exhibit A chart (refer to Grain Ounce Equivalents for the Preschool Meal Patterns of the School Nutrition Programs).</p> <p>Method 2: Determine the weight (grams) of the creditable grains per serving (refer to Calculation Methods for Grain Ounce Equivalents for the Preschool Meal Patterns of the School Nutrition Programs): 1 oz eq = 16 grams of creditable grains (groups A-G) or 28 grams of creditable grains (group H).</p>
Documentation for unprocessed commercial products	Not applicable	Use the FBG to determine and document food yields and crediting information (or USDA Foods in Schools Product Information Sheets for USDA Foods).	Same	Same	Same
Documentation for processed commercial products	Not applicable, except for milk in smoothies.	Must have CN label or PFS (or USDA Foods in Schools Product Information Sheets for USDA Foods). CSDE webpage: Crediting Commercial Processed Products in Preschool Menus	Same	Same	Same
Documentation for foods made from scratch	Not applicable, except for milk in smoothies.	Must have standardized recipe. CSDE webpage: Crediting Foods Made from Scratch in Preschool Menus	Same	Same	Same

Crediting Summary Charts for the Preschool Meal Patterns of the School Nutrition Programs

Milk Component

The milk component includes only fluid milk. Milk must be pasteurized, meet all state and local requirements, and contain vitamins A and D at levels specified by the Food and Drug Administration (FDA). For information on the meal pattern requirements for the milk component, refer to the CSDE's chart, [Comparison of the Milk Component Requirements in the Meal Patterns for School Nutrition Programs](#), and to section 3 of the CSDE's [Menu Planning Guide for the Preschool Meal Patterns of the School Nutrition Programs](#). For more resources, visit the "Milk Component" section of the CSDE's Meal Patterns for Preschoolers in School Nutrition Programs webpage.

Noncreditable foods: Examples of foods that do not credit as the milk component include flavored milk; reduced fat (2%) milk and whole milk for ages 2-5; low-fat (1%) milk, fat-free, and reduced fat milk for age 1; nondairy milk substitutes that do not meet the USDA's nutrition standards for fluid milk substitutes, such as rice milk, almond milk, and cashew milk; milk that is cooked or baked in prepared foods, e.g., cereals, puddings, and cream sauces; nutrition supplement beverages, e.g., Abbott's Pediasure; powdered milk beverages, e.g., Nestle's NIDO; and for public schools only, milk and nondairy milk substitutes that do not meet the state beverage requirements of Connecticut General Statute Section 10-221q. For additional guidance, refer to the CSDE's [Noncreditable Foods in the Preschool Meal Patterns for the School Nutrition Programs](#).

Change for school year 2024-25: Effective July 1, 2024, the USDA final rule, [Child Nutrition Programs: Meal Patterns Consistent with the 2020-2025 Dietary Guidelines for Americans](#), updates the units for vitamin A and vitamin D requirements for fluid milk substitutes to align with the Food and Drug Administration (FDA) labeling requirements. For vitamin A, instead of 500 IUs, the unit requirement is now 150 mcg retinol activity equivalents (RAE) per 8 fluid ounces. For vitamin D, instead of 100 IUs, the unit requirement is now 2.5 mcg per 8 fluid ounces. The amount of vitamin A and vitamin D required in fluid milk substitutes does not change; only the unit of measurement has changed to conform to FDA labeling requirements.

Crediting Summary Charts for the Preschool Meal Patterns of the School Nutrition Programs

Chart 2 – Crediting Foods in the Milk Component

Milk component food item	Crediting requirements	Crediting resources
Fluid milk	<ul style="list-style-type: none"> • The preschool meal patterns require fluid milk as a beverage. Milk does not credit when cooked or baked in foods, such as cereals, puddings, cream sauces, and other foods. • Milk must be pasteurized, meet all state and local requirements, and contain vitamins A and D at levels specified by the Food and Drug Administration (FDA). • Allowable types of milk: <ul style="list-style-type: none"> ○ Age 1: Whole milk, unflavored ○ Ages 2-5: Low-fat (1%) or fat-free milk, unflavored • Allowable types of milk include any of the following that meet the fat content restrictions: lactose-reduced milk, lactose-free milk, acidified milk, cultured milk, cultured buttermilk, and Ultra High Temperature (UHT) milk. • Public schools only: Milk must also meet the state beverage requirements of Section 10-221q of the Connecticut General Statutes (C.G.S). The state beverage statute requires that milk cannot contain artificial sweeteners and cannot exceed 4 grams of sugars per fluid ounce. • Preschool menus must document the type of milk served to each age group. 	<ul style="list-style-type: none"> • USDA webpage: Serving Milk in the CACFP • CSDE handout (applies only to public schools): Allowable Beverages for Connecticut Public Schools

Milk component food item	Crediting requirements	Crediting resources
<p>Milk substitutes for children without a disability</p>	<ul style="list-style-type: none"> • The USDA allows two types of milk substitutions: 1) nondairy milk substitutes that meet the USDA’s nutrition standards for fluid milk substitutes; and 2) lactose-free or lactose-reduced milk that meets the required fat content and flavor restrictions, i.e., low-fat (1%) milk and fat-free milk, either unflavored or flavored (refer to “Fluid milk” in this section). • Change for school year 2024-25: Effective July 1, 2024, the USDA final rule, Child Nutrition Programs: Meal Patterns Consistent with the 2020-2025 Dietary Guidelines for Americans, updates the units for vitamin A and vitamin D requirements for fluid milk substitutes to align with the Food and Drug Administration (FDA) labeling requirements. For vitamin A, instead of 500 IUs, the unit requirement is now 150 mcg retinol activity equivalents (RAE) per 8 fluid ounces. For vitamin D, instead of 100 IUs, the unit requirement is now 2.5 mcg per 8 fluid ounces. The amount of vitamin A and vitamin D required in fluid milk substitutes does not change; only the unit of measurement has changed to conform to FDA labeling requirements. • Public schools only: Nondairy milk substitutes must also meet the state beverage requirements of C.G.S. Section 10-221q. The state beverage statute requires that nondairy milk substitutes cannot contain artificial sweeteners and cannot exceed 4 grams of sugars per fluid ounce, 35 percent of calories from fat, and 10 percent of calories from saturated fat. • Juice, water, and other beverages cannot substitute for milk in meals for children without a disability. 	<ul style="list-style-type: none"> • CSDE handout: Milk Substitutes for Children with Disabilities in School Nutrition Programs • CSDE handout: Determining if Nondairy Beverages Meet the USDA’s Nutrition Standards for Fluid Milk Substitutes in School Nutrition Programs • CSDE handout (applies only to public schools): Allowable Beverages for Connecticut Public Schools

Crediting Summary Charts for the Preschool Meal Patterns of the School Nutrition Programs

Meats/Meat Alternates (MMA) Component

The MMA component includes fresh and frozen meats (e.g., lean beef, pork, poultry, fish, and shellfish), processed meats (e.g., chicken nuggets, deli meats, and fish sticks), canned meats (e.g., chicken, tuna, and salmon), and meat alternates such as eggs, cheese, yogurt, nuts and seeds and their butters, beans, peas, and lentils, tofu, and tempeh. The USDA's [CACFP best practices](#) recommend limiting processed meats to no more than one serving per week; and serving only lean meats, nuts, and beans, peas, and lentils. For information on the meal pattern requirements for the MMA component, refer to section 3 of the CSDE's [Menu Planning Guide for the Preschool Meal Patterns of the School Nutrition Programs](#) and visit the "[Meats/Meat Alternates \(MMA\) Component](#)" section of the CSDE's Meal Patterns for Preschoolers in School Nutrition Programs webpage.

The manufacturer's serving weight is not the same as the MMA contribution, i.e., 1 ounce does not equal 1 ounce equivalent (oz eq) of MMA, because processed foods (such as combination foods, deli meats, hot dogs, and sausages) contain non-MMA ingredients in addition to their MMA component. SFAs must obtain a CN label or PFS for all commercial processed products (refer to "[Crediting Documentation](#)" in this document).

Noncreditable foods: Examples of foods that do not credit as the MMA component include bacon, commercial canned soups (e.g., beef barley, beef noodle, turkey or chicken noodle, and turkey or chicken rice), cream cheese, drinkable yogurt, egg whites, frozen yogurt, imitation cheese, products made with tofu that are not easily recognized as meat substitutes

or that contain less than 5 grams of protein in 2.2 ounces, and sour cream. For additional guidance, refer to the CSDE's [Noncreditable Foods in the Preschool Meal Patterns for the School Nutrition Programs](#).

Changes for school year 2024-25: Effective July 1, 2024, the USDA final rule, [Child Nutrition Programs: Meal Patterns Consistent with the 2020-2025 Dietary Guidelines for Americans](#), implements the changes below to the NSLP and SBP preschool meal patterns.

- Updates the quantities for MMA in the preschool meal patterns from ounces to oz eq.
- Allows nuts and seeds to credit for the full MMA component in all meals, removing the previous 50 percent crediting limit for nuts and seeds at lunch and supper.
- Changes the name of the previous "legumes (beans and peas)" vegetable subgroup to the "beans, peas, and lentils" vegetable subgroup.

Change for school year 2025-26: Effective July 1, 2025, the USDA final rule, [Child Nutrition Programs: Meal Patterns Consistent with the 2020-2025 Dietary Guidelines for Americans](#), changes the product-based limit for yogurt from total sugars to added sugars. Yogurt cannot exceed 12 grams of added sugars per 6 ounces (2 grams of added sugars per ounce).

Eggs	<ul style="list-style-type: none"> • ½ large 	<ul style="list-style-type: none"> • Only whole eggs credit. Liquid egg substitutes are not whole eggs and do not credit. Egg whites served alone do not credit. • Foods that contain eggs (such as quiche or frittata) require a CN label or PFS for commercial products and a standardized recipe for foods made from scratch (refer to “Crediting Documentation” on page 1).
Foods made from scratch , e.g., pizza and macaroni and cheese	<ul style="list-style-type: none"> • Varies by food: Must have a standardized recipe to document the amount of MMA per serving. 	<ul style="list-style-type: none"> • CSDE webpage: Crediting Foods Made from Scratch in Preschool Menus
Hummus or bean dip made with beans, peas, and lentils) and tahini (or other nut/seed butters)	<ul style="list-style-type: none"> • Varies by commercial product and standardized recipe. The serving must contain at least ¼ oz eq of MMA combined from the beans, peas, and lentils and tahini (sesame paste) or other nut/seed butters. • Commercial products require a CN label or PFS to document the amount of meat alternate per serving (refer to “Crediting Documentation” on page 1 and “Commercial meat, poultry, or fish products with added ingredients” in this section). • Hummus and bean dips made from scratch must have a standardized recipe to document the amount of meat alternate per serving (refer to “Crediting Documentation” on page 1). 	<ul style="list-style-type: none"> • Bean dip is a spread made from ground pulses (beans, peas, and/or lentils) with one or more of the following optional ingredients: ground nut/seed butter (such as tahini [ground sesame] or peanut butter; vegetable oil (such as olive oil, canola oil, soybean oil); seasoning (such as salt, citric acid); vegetables and juice for flavor (such as olives, roasted peppers, garlic, lemon juice); and for manufactured bean dip, ingredients necessary as preservatives and/or to maintain freshness. • A ¼-cup serving of beans, peas, and lentils credits as 1 oz eq of the MMA component. The minimum creditable amount is 1 tablespoon (¼ oz eq). • Two tablespoons of tahini or other nut/seed butters credit as 1 oz eq of the MMA component. The minimum creditable amount is ½ tablespoon (¼ ounce). • The beans/peas/lentils in hummus or bean dips may credit as either the MMA component or vegetables component but one serving cannot credit as both components in the same meal. Refer to chart 4 for information on crediting hummus as the vegetables component. • CSDE handout: Crediting Beans, Peas, and Lentils in the School Nutrition Programs

Crediting Summary Charts for the Preschool Meal Patterns of the School Nutrition Programs

MMA component food item	1 oz eq of MMA =	Additional crediting requirements and resources
<p>Nut/seed butters, e.g., peanut butter, almond butter, sunflower seed butter, and soy nut butter</p>	<ul style="list-style-type: none"> ● 2 tablespoons 	<ul style="list-style-type: none"> ● The CACFP meal patterns require volume (tablespoons) not weight (ounces). Measuring 1 ounce by weight does not provide 1 oz eq of MMA. The FBG indicates that 1.1 ounces of nut/seed butter is required to credit as 1 oz eq of MMA. ● Consider the appropriateness of the serving size for each age group. It may be unreasonable to provide the full serving of a nut or seed butter in one menu item. For example, a peanut butter sandwich must contain 3 tablespoons of peanut butter to credit as 1½ oz eq of MMA for ages 3-5 at lunch. ● CSDE handout: Crediting Nuts and Seeds in the School Nutrition Programs
<p>Nuts/seeds, e.g., almonds, Brazil nuts, cashews, filberts, macadamia nuts, peanuts, pecans, walnuts, pine nuts, pistachios, pumpkin seeds, soy nuts, and sunflower seeds</p>	<ul style="list-style-type: none"> ● 1 ounce 	<ul style="list-style-type: none"> ● Effective July 1, 2024, the USDA final rule, <i>Child Nutrition Programs: Meal Patterns Consistent with the 2020-2025 Dietary Guidelines for Americans</i>, removes the previous 50 percent crediting limit for nuts and seeds at lunch. Nuts and seeds may credit for the full MMA component at any meal or snack. ● CSDE handout: Crediting Nuts and Seeds in the School Nutrition Programs
<p>Pasta products made of 100 percent bean, pea, and lentil flour, e.g., chickpea flour pasta and lentil flour pasta</p>	<ul style="list-style-type: none"> ● ¼ cup of cooked 100 percent bean, pea, and lentil flour pasta 	<ul style="list-style-type: none"> ● School menus must offer an additional MMA (such as tofu, cheese, or meat) with bean, pea, and lentil flour pasta. ● Pasta made of 100 percent beans, peas, or lentils may credit as either the MMA component or vegetables component but one serving cannot credit as both components in the same meal. Refer to chart 4 for information on crediting beans, peas, and lentils as vegetables.

<p>Yogurt and soy yogurt, plain or flavored; sweetened or unsweetened; and with or without added fruit, either blended or on the bottom or top</p>	<ul style="list-style-type: none"> ● ½ cup or 4 ounces weight 	<ul style="list-style-type: none"> ● Yogurt cannot exceed 23 grams of total sugars per 6 ounces (no more than 3.83 grams per ounce). ● Change for school year 2025-26: Effective July 1, 2025, the USDA final rule, Child Nutrition Programs: Meal Patterns Consistent with the 2020-2025 Dietary Guidelines for Americans, changes the product-based limit for yogurt from total sugars to added sugars. Yogurt cannot exceed 12 grams of added sugars per 6 ounces (2 grams of added sugars per ounce). ● Yogurt mixed in smoothies credits as the MMA component. Crediting requires a standardized recipe for foods made from scratch, and a PFS or CN label for commercial products. Refer to Crediting Smoothies in the Preschool Meal Patterns for the School Nutrition Programs. ● Fruits in commercially prepared yogurt (either blended or on the bottom or top) do not credit toward the fruits component. Menu planners may credit fruits offered as a separate component, such as yogurt topped with fresh blueberries or sliced strawberries in a yogurt-fruit parfait (refer to chart 5). ● Homemade yogurt does not credit. ● Commercial yogurt products do not credit. Examples include drinkable or squeezable yogurt, frozen yogurt, yogurt bars, yogurt-covered fruits and nuts, and yogurt-flavored products. ● CSDE handout: Crediting Yogurt in the Preschool Meal Patterns for the School Nutrition Programs ● USDA Memo SP 02-2024, CACFP 02-2024, and SFSP 02-2024: Revised: Crediting Tofu and Soy Yogurt Products in the School Meal Programs, CACFP, and SFSP

Crediting Summary Charts for the Preschool Meal Patterns of the School Nutrition Programs

Vegetables Component

The vegetables component includes fresh, frozen, and canned vegetables; rehydrated dried vegetables; and pasteurized 100 percent full-strength vegetable juices. The USDA's [CACFP best practices](#) recommend providing at least one serving per week of dark green vegetables, red and orange vegetables, beans, peas, and lentils, starchy vegetables, and other vegetables (refer to the CSDE's resource, [Vegetable Subgroups in the Child and Adult Care Food Program](#)).

For information on the meal pattern requirements for the vegetables component, refer to section 3 of the CSDE's [Menu Planning Guide for the Preschool Meal Patterns of the School Nutrition Programs](#) and visit the "Vegetables Component" section of the CSDE's Meal Patterns for Preschoolers in School Nutrition Programs webpage.

Juice limit: Pasteurized full-strength juice credits as either the vegetables component or fruits component at only one preschool meal or snack per day.

Noncreditable foods: Examples of foods that do not credit as the vegetables component include chili sauce; dehydrated vegetables used for seasoning; cream vegetable soups, e.g., cream of broccoli and cream of mushroom; home-canned products (for food safety reasons); ketchup; pickle relish; and snack-type foods made from vegetables, such as potato chips. For additional guidance, refer to the CSDE's resource, [Noncreditable Foods in the Preschool Meal Patterns for the School Nutrition Programs](#).

Change for school year 2024-25: Effective July 1, 2024, the USDA final rule, [Child Nutrition Programs: Meal Patterns Consistent with the 2020-2025 Dietary Guidelines for Americans](#), changes the name of the previous "legumes (beans and peas)" vegetable subgroup to the "beans, peas, and lentils" vegetable subgroup.

Vegetables component food item	Credit based on	Additional crediting requirements and resources
<p>Pureed vegetables, e.g., sweet potatoes, tomato sauce, and butternut squash</p>	<ul style="list-style-type: none"> ● Served volume. 	<ul style="list-style-type: none"> ● Must be recognizable (visible), e.g., tomato sauce, split pea soup, mashed potatoes, mashed sweet potatoes, and pureed butternut squash. ● Pureed vegetables do not credit as the vegetables component when they are not recognizable unless the food also provides at least 1/8 cup of a visible creditable vegetable. For example, a serving of macaroni and cheese that contains 1/8 cup of diced butternut squash (visible) and 1/8 cup of pureed carrots (not visible) credits as 1/4 cup of the red/orange vegetables subgroup. ● Pureed vegetables in smoothies credit only as juice (refer to “Vegetable juice, pasteurized full-strength” in this section). ● CSDE handout: Crediting Smoothies in the Preschool Meal Patterns for the School Nutrition Programs
<p>Vegetable juice, pasteurized full-strength, e.g., tomato juice and mixed vegetable juice</p>	<ul style="list-style-type: none"> ● Served volume. 	<ul style="list-style-type: none"> ● Juice limit: Juice credits as either the vegetables component or fruits component at only one preschool meal or snack per day. The juice limit includes all sources of juice, e.g., 100 percent juice, frozen pops made from 100 percent juice, pureed fruits and vegetables in smoothies, and juice from canned fruit in 100 percent juice. ● Juice blends: Fruit and vegetable juice blends credit based on the first ingredient. If the first ingredient is a fruit juice or fruit puree, it credits as the fruits component. If the first ingredient is a vegetable juice or vegetable puree, it credits as the vegetables component. ● CSDE handout: Crediting Juice in the Preschool Meal Patterns for the School Nutrition Programs

Fruits Component

The fruits component includes fresh fruit; frozen fruit; dried fruit; canned fruit in juice, water, or light syrup; and pasteurized 100 percent full-strength fruit juice. The USDA's [CACFP best practices](#) recommend serving whole fruits (fresh, canned, dried, and frozen) more often than juice; and making at least one of the two required snack components a vegetable or fruit. For information on the meal pattern requirements for the fruits component, refer to section 3 of the CSDE's [Menu Planning Guide for the Preschool Meal Patterns of the School Nutrition Programs](#) and visit the "Fruits Component" section of the CSDE's Meal Patterns for Preschoolers in School Nutrition Programs webpage.

Juice limit: Pasteurized full-strength juice credits as either the vegetables component or fruits component at only one preschool meal or snack per day.

Noncreditable foods: Examples of foods that do not credit as the fruits component include banana chips; dried coconut; fruit snacks (e.g., fruit roll-ups, fruit leathers, fruit wrinkles, fruit twists, yogurt-covered fruit snacks); home-canned products (for food safety reasons); jams, jellies, and preserves; and juice drinks that are not 100 percent juice such as grape juice drink, orange juice drink, pineapple-grapefruit drink, cranberry juice cocktail, and lemonade. For additional guidance, refer to the CSDE's resource, [Noncreditable Foods in the Preschool Meal Patterns for the School Nutrition Programs](#).

Crediting Summary Charts for the Preschool Meal Patterns of the School Nutrition Programs

Grains Component

The grains component includes breads and bread products (e.g., biscuits, bagels, rolls, tortillas, and muffins), snack products (e.g., crackers, animal crackers, graham crackers, hard pretzels, tortilla chips, and popcorn); cereal grains (e.g., buckwheat, brown rice, bulgur, and quinoa); ready-to-eat (RTE) breakfast cereals; cooked breakfast cereals (e.g., oatmeal); bread products used as an ingredient in another menu item such as combination foods (e.g., breading on fish or poultry and pizza crust in pizza); and pasta. Grain-based desserts (such as cookies, brownies, cakes, and granola bars) do not credit in the preschool meal patterns. For information on the meal pattern requirements for the grains component, refer to section 3 of the CSDE's [Menu Planning Guide for the Preschool Meal Patterns of the School Nutrition Programs](#) and visit the “[Grains Component](#)” section of the CSDE's Meal Patterns for Preschoolers in School Nutrition Programs webpage.

Commercial grain products and standardized recipes must meet the crediting, whole grain-rich (WGR), and oz eq requirements indicated below.

- **Crediting requirements:** Grain products and recipes must be made with creditable grains. Creditable grains include whole grains, enriched grains, bran (such as oat bran, wheat bran, corn bran, rice bran, and rye bran), and germ (such as wheat germ). Bran and germ credit the same as enriched grains. For guidance on creditable grains, refer to the CSDE's resources, [Crediting Whole Grains in the School Nutrition Programs](#), [Crediting Enriched Grains in the School Nutrition Programs](#), [Crediting Breakfast Cereals for Grades K-12 in the National School Lunch Program and School Breakfast Program](#), and [How to Identify Creditable Grains for the Preschool Meal Patterns of the School Nutrition Programs](#).

- **Daily whole WGR requirement:** At least one serving per day must be WGR. The USDA's [CACFP best practices](#) recommend at least two WGR serving per day. Grains that are not WGR must be enriched. For guidance on the preschool WGR criteria and how to identify WGR foods, refer to the CSDE's [Guide to Meeting the Whole Grain-rich Requirement for the Child and Adult Care Food Program](#). **Note:** Foods that meet the WGR criteria for the NSLP and SBP meal patterns for grades K-12 will also meet the preschool WGR criteria.
- **Oz eq:** The oz eq contribution of creditable commercial grain products and standardized recipes must be determined using one of the two allowable methods: 1) the required weight (groups A-E) or volume (groups H-I) in the USDA's [Exhibit A: Grain Requirements for Child Nutrition Programs](#) (refer to the CSDE's resources, [Grain Ounce Equivalents for the Preschool Meal Patterns of the School Nutrition Programs](#) and [How to Use the Ounce Equivalents Chart for the National School Lunch Program and School Breakfast Program](#)); or 2) the creditable grains per serving (refer to the CSDE's resources, [Calculation Methods for Grain Ounce Equivalents for the Preschool Meal Patterns of the School Nutrition Programs](#) and [When Commercial Grain Products Require a Product Formulation Statement to Credit in the School Nutrition Programs](#)). **Note:** The CSDE's [Grain Ounce Equivalents for the Preschool Meal Patterns of the School Nutrition Programs](#) does not include groups F and G (grain-based desserts) of the USDA's Exhibit A chart because these foods do not credit in the preschool meal patterns.

Crediting Summary Charts for the Preschool Meal Patterns of the School Nutrition Programs

Noncreditable foods: Examples of foods that do not credit as the grains component include commercial products that do not contain a creditable grain as the first ingredient; standardized recipes that are not made with creditable grains; breakfast cereals that contain more than 6 grams of sugars per ounce; and grain-based desserts. For additional guidance, refer to the CSDE's resource, [Noncreditable Foods in the Preschool Meal Patterns for the School Nutrition Programs](#).

Change for school year 2024-25: Effective July 1, 2024, the USDA final rule, [Child Nutrition Programs: Meal Patterns Consistent with the 2020-2025 Dietary Guidelines for Americans](#), adds the following definition for “whole grain-rich” in NSLP, SBP, and CACFP regulations: Whole grain-rich is the term designated by FNS to indicate that the grain content of a product is between 50 and 100 percent whole grain with any remaining grains being enriched. This definition does not change the meaning of whole grain-rich, and program operators can continue to identify whole grain-rich products as described in current guidance.

Change for school year 2025-26: Effective July 1, 2025, the USDA final rule, [Child Nutrition Programs: Meal Patterns Consistent with the 2020-2025 Dietary Guidelines for Americans](#), changes the product-based limit for breakfast cereals from total sugars to added sugars. Breakfast cereals cannot exceed 6 grams of added sugars per dry ounce.

For more information, refer to the CSDE's [Menu Planning Guide for the Preschool Meal Patterns of the School Nutrition Programs](#) and visit the "Crediting Foods in Preschool Menus" section of the CSDE's [Meal Patterns for Preschoolers in School Nutrition Programs](#) webpage or contact the [school nutrition programs staff](#) at the Connecticut State Department of Education, Bureau of Child Nutrition Programs, 450 Columbus Boulevard, Suite 504, Hartford, CT 06103-1841. This document is available at https://portal.ct.gov/-/media/sde/nutrition/nslp/crediting/crediting_summary_charts_snp_preschool.pdf.

In accordance with federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, this institution is prohibited from discriminating on the basis of race, color, national origin, sex (including gender identity and sexual orientation), disability, age, or reprisal or retaliation for prior civil rights activity.

Program information may be made available in languages other than English. Persons with disabilities who require alternative means of communication to obtain program information (e.g., Braille, large print, audiotape, American Sign Language), should contact the responsible state or local agency that administers the program or USDA's TARGET Center at (202) 720-2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877-8339.

To file a program discrimination complaint, a Complainant should complete a Form AD-3027, USDA Program Discrimination Complaint Form which can be obtained online at: <https://www.usda.gov/sites/default/files/documents/ad-3027.pdf>, from any USDA office, by calling (866) 632-9992, or by writing a letter addressed to USDA. The letter must contain the complainant's name, address, telephone number, and a written description of the alleged discriminatory action in sufficient detail to inform the Assistant Secretary for Civil Rights (ASCR) about the nature and date of an alleged civil rights violation. The completed AD-3027 form or letter must be submitted to USDA by:

1. mail: U.S. Department of Agriculture
Office of the Assistant Secretary for Civil Rights
1400 Independence Avenue, SW
Washington, D.C. 20250-9410; or
2. fax: (833) 256-1665 or (202) 690-7442; or
3. email: program.intake@usda.gov

This institution is an equal opportunity provider.

The Connecticut State Department of Education is committed to a policy of equal opportunity/affirmative action for all qualified persons. The Connecticut Department of Education does not discriminate in any employment practice, education program, or educational activity on the basis of race; color; religious creed; age; sex; pregnancy; sexual orientation; workplace hazards to reproductive systems, gender identity or expression; marital status; national origin; ancestry; retaliation for previously opposed discrimination or coercion, intellectual disability; genetic information; learning disability; physical disability (including, but not limited to, blindness); mental disability (past/present history thereof); military or veteran status; status as a victim of domestic violence; or criminal record in state employment, unless there is a bona fide occupational qualification excluding persons in any of the aforementioned protected classes. Inquiries regarding the Connecticut State Department of Education's nondiscrimination policies should be directed to: Attorney Louis Todisco, Connecticut State Department of Education, by mail 450 Columbus Boulevard, Hartford, CT 06103-1841; or by telephone 860-713-6594; or by email louis.todisco@ct.gov.
