

## Pricing Worksheet for A La Carte Sales in the School Nutrition Programs

A la carte pricing applies to all foods and beverages sold separately from reimbursable meals in the U.S. Department of Agriculture's (USDA) [National School Lunch Program \(NSLP\)](#), [School Breakfast Program \(SBP\)](#) and separately from reimbursable afterschool snacks in the [Afterschool Snack Program \(ASP\)](#) of the NSLP. A la carte prices must cover the cost of producing the item such as food cost, labor, and indirect costs. A la carte pricing should not create an incentive for students to choose a la carte items because the price is less than a reimbursable meal.

School food authorities (SFAs) should use this form to determine the correct pricing of a la carte items to meet their desired food cost percentage. The food cost percentage is determined by the school. The price for an a la carte item should be at least the suggested cost percentage but could be higher depending upon the perceived value of the item.
