This guidance applies to meals and snacks served in the U.S. Department of Agriculture’s (USDA) Summer Food Service Program (SFSP). For information on the SFSP meal patterns and the MMA component, refer to the Connecticut State Department of Education’s (CSDE) resource, [Requirements for the Meat/Meat Alternates Component of the Summer Food Service Program Meal Patterns](#), and visit the “Meal Patterns for the SFSP” and “Meat/Meat Alternates Component for the SFSP” sections of the CSDE’s SFSP webpage.

# Crediting Tofu and Tofu Products in the SFSP

## Tofu Definition

Tofu does not have a Food and Drug Administration (FDA) [standard of identity](#). Tofu must be commercially prepared and meet the following definition in [7 CFR 210.2](#) and [7 CFR 226.2](#): “a soybean-derived food, made by a process in which soybeans are soaked, ground, mixed with water, heated, filtered, coagulated, and formed into cakes. Basic ingredients are whole soybeans, one or more food-grade coagulants (typically a salt or an acid), and water.”

## USDA Crediting Requirements for Tofu

Tofu and tofu products must meet two criteria to credit as meat alternates toward the meat/meat alternates (MMA) component of the SFSP patterns. They must be easily recognizable as a meat substitute and must contain at least 5 grams of protein in a 2.2-ounce serving by weight (¼ cup volume equivalent).

### Criterion 1: Easily recognizable

The tofu or tofu product must be easily recognizable as a meat substitute to credit as the MMA component. The USDA’s intent for this requirement is to ensure that children can easily recognize that foods in school meals are part as part of the food groups that contribute to healthy meals. Tofu is widely recognized as a meat substitute and comes in a variety of textures such as silken, soft, firm, and extra firm. Some examples of recognizable tofu and tofu products include firm or extra firm tofu in stir-fries, omelets, miso soup, and minced in lasagna as a substitute for ricotta cheese; and commercial meat substitute products like tofu burgers and tofu sausage.

Tofu products that are not easily recognizable as meat substitutes cannot credit as the MMA component. Some examples include tofu blended into other foods (like smoothies, soup, and sauces), tofu baked in desserts, and tofu that does not represent a meat substitute, such as tofu noodles. These foods do not meet the customary and usual function of the MMA component.

### Criterion 2: Meets protein requirement

The tofu ingredient must contain at least 5 grams of protein in a 2.2-ounce serving by weight (¼ cup volume equivalent) to credit as 1 ounce of the MMA component. Menu planners must use the Nutrition Facts panel or product formulation statement (PFS) to determine if commercial tofu meets the USDA’s protein requirement.

## Tofu Crediting Example

Table 1 shows the steps for determining tofu’s compliance with the USDA’s protein requirement, using the sample Nutrition Facts panel for tofu on the right. This tofu contains 9 grams of protein in a 3-ounce serving, which equals 6.6 grams of protein in 2.2 ounces. This meets the USDA’s minimum protein requirement of 5 grams. A 2.2-ounce serving of this tofu provides 1 ounce of the MMA component if it is easily recognizable as a meat substitute (refer to criterion 1). SFSP sponsors must maintain all product documentation on file for the Administrative Review of the SFSP.

**Note:** This method cannot be used for commercial products that contain tofu as an ingredient (like tofu burgers or tofu sausages). The Nutrition Facts panel shows the amount of protein in the food, not the amount of protein in the tofu ingredient. Commercially prepared tofu products require a Child Nutrition (CN) label or PFS to determine crediting information (refer to “[Required Crediting Documentation](#)” in this document).

## MMA Contribution of Tofu Servings

Table 2 shows the MMA contribution for different serving sizes of tofu and the minimum grams of protein required to credit in the SFSP. Menu planners must review the Nutrition Facts label or PFS to determine if the tofu serving meets this requirement (refer to “[Tofu Crediting Example](#)” in this document).

<b>Serving size</b>	<b>MMA contribution</b>	<b>Minimum protein (grams) per serving</b>
0.55 ounce (1 tablespoon)	¼ ounce (minimum creditable amount)	1.25 grams
1.1 ounces (⅛ cup)	½ ounce	2.5 grams
<b>2.2 ounces (¼ cup)</b>	<b>1 ounce</b>	<b>5 grams</b>
3.3 ounces (⅜ cup)	1½ ounces	7.5 grams
4.4 ounces (½ cup)	2 ounces	10 grams

## Required Crediting Documentation

Commercially prepared tofu products that contain tofu as an ingredient (like tofu burgers and tofu sausages) require a CN label or manufacturer’s PFS that indicates the amount of protein per serving. For information on CN labels and PFS forms, refer to the CSDE’s resources, [Using Child Nutrition \(CN\) Labels in the Summer Food Service Program](#), [Using Product Formulation Statements in the Summer Food Service Program](#), and [Accepting Processed Product Documentation in the Summer Food Service Program](#). For guidance on how to review a PFS, refer to the USDA’s [Tips for Evaluating a Manufacturer’s Product Formulation Statement](#) and [Reviewer’s Checklist for Evaluating Manufacturer Product Formulation Statements for Meat/Meat Alternates](#).

For additional guidance on documentation for commercial products, visit the “[Crediting Commercial Processed Products](#)” section of the CSDE’s [Crediting Foods in School Nutrition Programs](#) webpage. Training on the PFS requirements and how to review a PFS is available in “Module 6: Meal Pattern Documentation” of the CSDE’s training program, [What’s in a Meal: National School Lunch Program and School Breakfast Program Meal Patterns for Grades K-12](#).
