Fresh Vegetables Portioning Guide for Schools

This reference assists schools with proper portioning of fresh vegetables in the U.S. Department of Agriculture's (USDA) school nutrition programs. All quantities are based in the USDA's Food Buying Guide for Child Nutrition Programs (FBG), available at <https://www.fns.usda.gov/tn/fbg>.

How to Use

1. Locate the appropriate type of vegetable in the chart below.
2. Establish a visual reference for the correct portion size: Measure ten ½-cup portions by weight, placing each portion into its own serving container.
3. Use the visual reference to portion the remaining vegetable servings for the meal service.

Example for red bell pepper strips: The FBG indicates that 1.75 ounces of red bell pepper strips equal ½ cup of the vegetables component (red/orange subgroup). After preparing the peppers (coring, cleaning, and cutting into strips), weigh out ten 1.75 oz. portions. Use these initial servings as a visual reference to portion the remaining servings.
