

## 2024-25 TCS Improvements/Updates

The following updates are currently live in the TCS application, this list will be updated as additional improvements are deployed.

- **Co-Teachers are no longer required:** You do not have to report Teacher Type 103. If your district chooses to continue to report co-teachers be sure the credit value for the course associated with the co-teacher is 0.
- **Missing SASIDs Report:** You can now sort by SASID on the Records Reported/Edit screen.
- **Duplicate SASID Report:** Improvements have been made to the report logic which will contribute to the accuracy of your data.
- **Collection Edit/View Student Course Information Screen:** This screen has been updated to be a better tool to review records by student by adding the Outcome/Grade Status, Credit Earned and Course Start/End dates. There is also now a Download option.
- **Pre-Certification – Due July 9:** There is now a pre-certification button on the Certify page. The purpose of pre-certification is to indicate that your district has input and corrected all records available to date. This indicates the schools within your district have been reported; outplaced and APSEP data may still be outstanding. This action **does not** need to be completed by an Administrator.
