The table below provides an example of how to increase percent proficiency and SPI for a school with 100 students.

| Desired Outcome | Necessary Achievement Results | Sample Aligned SLO |
| :--- | :--- | :--- |
| Increase percent Proficiency <br> by 9\% | 9 students move from Basic or <br> Below Basic to Proficient. | Increase reading proficiency <br> in English Language <br> Learners subgroup* by a <br> minimum of 9\% annually as <br> measured by CMT. |
| Increase SPI by 3 points | 9 students move from a lower <br> performance level to a higher <br> performance level. | Increase mathematics <br> proficiency for every student <br> in the Economically <br> Disadvantaged students <br> subgroup* by one or more <br> proficiency levels as <br> measured by CMT. |

*This sample assumes the cohorts contain no fewer than 9 students.
